Nutanix is Named a Leader in 2024 Gartner® Magic Quadrant™ for Distributed Hybrid Infrastructure

October 11, 2024

Company recognized for its ability to execute and completeness of vision

SAN JOSE, Calif., Oct. 11, 2024 (GLOBE NEWSWIRE) -- Nutanix (NASDAQ: NTNX), a leader in hybrid multicloud computing, today announced it has been named as a Leader in the Gartner Magic Quadrant for Distributed Hybrid Infrastructure, 2024, which Gartner describes as “offerings that deliver cloud-native attributes, which can be deployed and operated where the customer prefers. Distributed hybrid infrastructure provides the foundation for the deployment of applications in a distributed manner that retains a cloud or cloud-inspired approach. In doing so, it improves agility and flexibility for the workloads outside of public cloud infrastructure.”

Nutanix believes this recognition is due to the company’s vision and investments in the integration of edge, private and public clouds, as well as having a platform that supports both cloud native and traditional applications. All this while providing unified management to help customers simplify their operations and use a hybrid multicloud platform to run applications anywhere and realize business outcomes faster.

“We are pleased to see this outcome and view it as validation of our hybrid multicloud vision and execution,” said Lee Caswell, SVP, Product and Solutions Marketing at Nutanix. “We are committed to the innovation, execution and support that free customers to build, manage and run secure applications and manage their associated data, including cloud native Gen AI apps, anywhere.”

Nutanix provides a secure, resilient and self-healing platform for running applications and managing data at scale across edge, public and private cloud environments. The single solution simplifies management of distributed hybrid infrastructure with consistent data services across a choice of Kubernetes® environments for applications of all kinds, including new Generative AI models.

Nutanix also continues focusing on innovation to support customers now and in the future. Recent announcements include: joint solutions with Dell Technologies to give customer choice for traditional and modern workloads; the GPT-in-a-Box 2.0 AI solution, including integrations with NVIDIA and Hugging Face, to accelerate enterprise AI adoption; Nutanix Kubernetes Platform solution to simplify management and operations of Kubernetes clusters; and new functionality in the Nutanix AHV hypervisor to drive enterprise modernization, and more.

Nutanix customers shared:

"We selected Nutanix to help us modernize our IT infrastructure from our VMware legacy environment which no longer supported our growing needs.”

- Paul Straton, Infrastructure and Security Manager, Day Lewis

“We explored other solutions following the acquisition of VMware and after evaluating key criteria, decided Nutanix was the best option.”

- Asad Rehman, IT Director, Regent’s University London

“Transitioning to Nutanix from VMware simplifies our operations with a unified hybrid multicloud platform.”

- Jeff Mack, Manager, Network/Server Administration, Titan America

"The migration to Nutanix was one of the fastest and smoothest transitions we’ve ever experienced.”

- Andrew Phan, CIO, Treasure Island Hotel and Casino
