Approximate date of commencement of proposed sale to the public: As soon as practicable after this Registration Statement becomes effective.

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act, check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

CALCULATION OF REGISTRATION FEE

Title of Each Class of Securities to be Registered	Amount to be Registered(1)	Proposed Maximum Aggregate Offering Price Per Share(2)	Proposed Maximum Aggregate Offering Price(1)(2)	Amount of Registration Fee(3)
Class A Common Stock, \$0.000025 par value per share	16,100,000	\$15.00	\$241,500,000	\$21,077

(1) Includes an additional 2,100,000 shares of Class A common stock that the underwriters have the option to purchase.

(2) Estimated pursuant to Rule 457(a) under the Securities Act of 1933, as amended, solely for the purpose of calculating the registration fee.

(3) Previously paid. Pursuant to Rule 457(a), no additional fee is payable as a result of the increase in the proposed maximum aggregate offering price per share reflected herein.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the Registration Statement shall become effective on such date as the Commission, acting pursuant to said Section 8(a), may determine.

The information in this preliminary prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This preliminary prospectus is not an offer to sell these securities and we are not soliciting offers to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to Completion. Dated September 28, 2016.

14,000,000 Shares

Class A Common Stock

This is the initial public offering of shares of Class A common stock of Nutanix, Inc.

Nutanix is offering all of the shares to be sold in the offering.

We have two classes of authorized common stock, Class A common stock and Class B common stock. The rights of the holders of Class A common stock and Class B common stock are identical, except with respect to voting and conversion. Each share of Class A common stock is entitled to one vote per share. Each share of Class B common stock is entitled to 10 votes per share and is convertible at any time into one share of Class A common stock. Following this offering, outstanding shares of Class B common stock will represent approximately 98.9% of the voting power of our outstanding capital stock.

Prior to this offering, there has been no public market for our Class A common stock. It is currently anticipated that the initial public offering price will be between \$13.00 and \$15.00 per share. We have been approved to list our Class A common stock on The NASDAQ Global Select Market under the symbol "NTNX."

We are an "emerging growth company" as defined under the federal securities laws and, as such, may elect to comply with certain reduced public company reporting requirements for future filings.

See "[Risk Factors](#)" beginning on page 17 to read about factors you should consider before buying shares of our Class A common stock.

Neither the Securities and Exchange Commission nor any other regulatory body has approved or disapproved of these securities or passed upon the accuracy or adequacy of this prospectus. Any representation to the contrary is a criminal offense.

	Per Share	Total
Initial public offering price	\$	\$
Underwriting discounts and commissions(1)	\$	\$
Proceeds, before expenses, to Nutanix	\$	\$

(1) See the section titled "Underwriting" for a description of the compensation payable to the underwriters.

To the extent that the underwriters sell more than 14,000,000 shares of our Class A common stock, the underwriters have an option to purchase up to an additional 2,100,000 shares from Nutanix at the initial public offering price, less the underwriting discounts and commissions.

The underwriters expect to deliver the shares of Class A common stock against payment in New York, New York on _____, 2016.

Through and including _____, 2016 (the 25th day after the date of this prospectus), all dealers effecting transactions in these securities, whether or not participating in this offering, may be required to deliver a prospectus. This is in addition to a dealer's obligation to deliver a prospectus when acting as an underwriter and with respect to an unsold allotment or subscription.

Neither we nor the underwriters have authorized anyone to provide any information or to make any representations other than those contained in this prospectus or in any free writing prospectuses prepared by or on behalf of us or to which we have referred you. We take no responsibility for, and can provide no assurance as to the reliability of, any other information that others may give you. This prospectus is an offer to sell only the shares offered hereby, but only under circumstances and in jurisdictions where it is lawful to do so. The information contained in this prospectus is current only as of its date, regardless of the time of delivery of this prospectus or of any sale of the Class A common stock.

For investors outside of the United States: Neither we nor the underwriters have done anything that would permit this offering or possession or distribution of this prospectus in any jurisdiction where action for that purpose is required, other than in the United States. You are required to inform yourself about, and to observe any restrictions relating to, this offering and the distribution of this prospectus outside of the United States.

PROSPECTUS SUMMARY

This summary highlights information contained elsewhere in this prospectus. You should read the following summary together with the more detailed information appearing in this prospectus, including "Risk Factors," "Management's Discussion and Analysis of Financial Condition and Results of Operations," "Business," and our consolidated financial statements and related notes before deciding whether to purchase shares of our Class A common stock. Our fiscal year end is July 31, and our fiscal quarters end on October 31, January 31, April 30 and July 31. Our fiscal years ended July 31, 2012, 2013, 2014, 2015 and 2016 are referred to herein as fiscal 2012, fiscal 2013, fiscal 2014, fiscal 2015 and fiscal 2016, respectively.

NUTANIX, INC.

Our Mission

Our mission is to deliver invisible infrastructure and elevate IT to focus on the applications and services that power their business.

Overview

We provide a leading next-generation enterprise cloud platform that converges traditional silos of server, virtualization and storage into one integrated solution and can also connect to public cloud services. Our software delivers the agility, scalability and pay-as-you-grow economics of the public cloud, while addressing enterprise requirements of application mobility, security, data integrity and control. We provide our customers with the flexibility to selectively utilize the public cloud for suitable workloads and specific use cases by enabling increasing levels of application mobility across private and public clouds. This capability will enable hybrid cloud deployments and addresses a critical requirement for any next-generation enterprise cloud platform. We have combined advanced web-scale technologies with elegant consumer-grade design to deliver a powerful enterprise cloud platform that elevates IT organizations to focus on the applications and services that power their businesses. We refer to our platform as "invisible infrastructure" because it provides constant availability and low-touch management, enables application mobility across computing environments and reduces inefficiencies in IT planning.

Leading Internet companies and public cloud providers have embraced convergence and distributed systems and implemented web-scale technologies in their proprietary operating environments. They took these steps because traditional siloed IT infrastructure architectures failed to deliver the levels of scalability and operational efficiency that their dynamic businesses required. Today, organizations across all industries are seeking to leverage IT capabilities as a competitive advantage while also facing the limitations of traditional siloed IT infrastructure. To address these challenges, we have pioneered a converged web-scale architecture that can be easily deployed by organizations of any size to address the limitations of traditional IT infrastructure.

Our solution is comprised of two comprehensive software product families, Acropolis and Prism, and is delivered on commodity x86 servers. Acropolis delivers high performance distributed storage, application mobility capabilities, which we are continuing to expand, and a built-in hypervisor, software that allows multiple operating systems to share a single hardware host. Prism delivers integrated virtualization and infrastructure management, robust operational analytics and one-click administration capabilities. Our solutions address a broad range of workloads, including enterprise applications,

databases, virtual desktop infrastructure, or VDI, unified communications and big data analytics and we have recently announced the capability to support both virtualized and non-virtualized applications. We have end-customers across a broad range of industries, including automotive, consumer goods, education, energy, financial services, healthcare, manufacturing, media, public sector, retail, technology and telecommunications. We also sell to service providers who utilize our platform to provide a variety of cloud-based services to their customers. We had a broad and diverse base of 3,768 end-customers as of July 31, 2016, including approximately 310 Global 2000 enterprises. Representative end-customers include Activision Blizzard, Inc., Best Buy Co., Inc., Covance Inc., Jabil Circuit, Inc., Kellogg Co., Nasdaq, Inc., Nintendo Co., Ltd., Nordstrom, Inc., NTT SmartConnect Corporation, Total S.A., Toyota Motor of North America, U.S. Department of Defense Office of the Secretary of Defense and Yahoo! JAPAN Corporation.

Since our founding, we have experienced significant growth in our business, including:

- Average billings growth of 20% on a quarterly basis for the last eight fiscal quarters, which grew from \$60.8 million in the three months ended October 31, 2014 to \$206.6 million in the three months ended July 31, 2016.
- Average revenue growth of 17% on a quarterly basis for the last eight fiscal quarters, which grew from \$46.1 million in the three months ended October 31, 2014 to \$139.8 million in the three months ended July 31, 2016.
- An increase in deferred revenue of 713% over the last eight fiscal quarters, which grew from \$36.5 million as of July 31, 2014 to \$296.5 million as of July 31, 2016.
- Average total end-customer growth of approximately 22% on a quarterly basis over the last eight fiscal quarters, which grew from 782 end-customers as of July 31, 2014 to 3,768 end-customers as of July 31, 2016. There were 657 new end-customers acquired during the three months ended July 31, 2016.

We have continued to make significant investments as we scale our business, including in developing and improving our platform, expanding our sales and marketing capabilities and global coverage, and in expanding our general and administrative resources to support our growth. In the recent quarters, we have begun to realize some of the benefits of the scale of our business, including:

- An improvement in adjusted gross margin percentage from 57% in the three months ended October 31, 2014 to 61% in the three months ended July 31, 2016.
- An improvement in our cash flow from operating activities from a use of cash of \$6.9 million in the three months ended October 31, 2014 to a generation of \$2.4 million of cash in the three months ended July 31, 2016. Over the same periods, our free cash flows have improved from a use of cash of \$11.4 million to a use of cash of \$6.5 million.

See “Selected Consolidated Financial and Other Data—Non-GAAP Financial Measures and Key Performance Measures” for information on the uses and limitations of billings, adjusted gross margin percentage, and free cash flow as financial measures and a reconciliation of these non-GAAP financial measures and key performance measures to the most directly comparable financial measures calculated and presented in accordance with GAAP.

On an annual basis, our total revenue was \$127.1 million, \$241.4 million and \$444.9 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively, representing year-over-year growth of 90% and 84%, respectively. Our net losses were \$84.0 million, \$126.1 million and \$168.5 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively. Net cash used in operating activities was \$45.7 million and

\$25.7 million for fiscal 2014 and fiscal 2015, respectively, and net cash generated from operations was \$3.6 million for fiscal 2016. As of July 31, 2016, we had an accumulated deficit of \$441.9 million.

Industry Background

Traditional IT infrastructure presents significant architectural challenges, particularly as it relates to storage and virtualization, including:

- **Lack of agility:** With traditional enterprise infrastructure, different silos of servers, virtualization, storage and networks are typically managed by specialist IT teams as each silo has its own proprietary operating system, hardware platform and management interface. Every time infrastructure is provisioned to support new application requirements, these different teams must coordinate and align their workflows. As a result, traditional infrastructure often requires days or weeks for simple application and infrastructure provisioning or deployment tasks, greatly reducing agility.
- **Diminishing performance as infrastructure scales:** Traditional infrastructure places data storage in dedicated, performance-bound appliances that are connected to servers over storage networks. In these environments, scaling capacity by adding more hard drives or flash devices does not proportionately improve performance because the storage controllers that read and write data are often fixed at the time of initial deployment. Expanding the storage controllers typically requires an expensive and time-consuming “forklift upgrade” (i.e., requiring an entire new system purchase and migration of data from the prior system).
- **Costly overprovisioning and manual operations:** Due to their lack of scalability and complexity of deployment, servers and storage arrays are typically overprovisioned for longer-term peak capacity and remain underutilized for extensive periods. Furthermore, existing virtualization products are often sold under restrictive enterprise license agreements, which may lead to significant underutilization of software licenses and higher costs. Both of these factors can significantly impact infrastructure IT budgets. These traditional products also require extensive manual administration for routine tasks such as upgrades and maintenance.
- **Closed architectures that prevent mobility of applications and adoption of new technologies:** Traditional infrastructure suppliers have created vendor lock-in by providing closed architecture technologies that often do not interoperate well with other enterprise computing environments. For example, virtualization was not designed with the ability to migrate applications across different hypervisors or emerging computing environments such as public clouds and containers, a method of virtualizing the operating system so that multiple applications and their dependent libraries can share the same Linux operating system instance. This is creating cost and complexity challenges as more enterprises seek to operate multi-vendor hypervisor environments. Lack of application mobility across multi-hypervisor, hybrid cloud and container environments has resulted in silos of computing that limit agility, drive up costs and limit the adoption of new technologies.

While public cloud providers offer an alternative to on-premise infrastructure deployments, full-scale adoption of the public cloud has been challenging for many organizations due primarily to the lack of control over infrastructure service levels and data. Public cloud providers typically offer homogenous infrastructure services and do not provide adequate control or granularity to customize specific services to deliver tiered levels of application performance and availability for traditional enterprise workloads with varying requirements. Customers are largely dependent on public cloud providers to ensure data security and compliance with regulatory requirements. Extensive usage of public clouds can also result in higher lifetime costs, particularly for applications with predictable and consistent infrastructure requirements. We believe the majority of existing enterprise applications

exhibit predictable infrastructure consumption patterns and can be delivered with lower cost using an enterprise cloud platform like ours. Further, most public cloud providers do not easily allow portability of applications and data to alternative providers or to enterprise cloud platforms as requirements, costs and services levels change, resulting in vendor lock-in.

Our Solution

Our enterprise cloud platform is based on powerful distributed systems architecture and converges server, virtualization and storage resources into one integrated solution on commodity x86 servers. Our solution is comprised of two comprehensive software product families, Acropolis and Prism. Acropolis includes our Distributed Storage Fabric that replaces traditional storage arrays and delivers efficient and high performance enterprise-grade data management across a range of storage protocols to support a wide variety of enterprise applications, and we have recently introduced the capability to operate both virtualized and non-virtualized applications. Acropolis also includes our innovative Application Mobility Fabric that will enable increasing levels of application placement, conversion and migration across different hypervisors and public clouds. Additionally, the built-in Acropolis Hypervisor can replace expensive third-party hypervisors and eliminate an additional infrastructure silo. Built with consumer-grade design, Prism delivers integrated virtualization and infrastructure management, robust operational analytics, a search-first interface, self-service capabilities and one-click administration. Prism allows routine IT operations that are typically manual and cumbersome to be fully automated or completed with just one click, including capacity planning, provisioning of new applications and resources, troubleshooting and software upgrades.

Key benefits of our solution include:

- **Agility:** Our platform converges several disparate silos of server, virtualization and storage infrastructure into a unified solution that can be deployed and managed as a single system to simplify operations. According to an IDC study commissioned by us, customers can deploy our technology in up to 85% less time than traditional infrastructure. We have also developed extensive automation capabilities to eliminate time-consuming and error-prone tasks, while implementing consumer-grade design into our intuitive Prism user interface to simplify and streamline common IT administrator workflows. With our solution, infrastructure can be provisioned in minutes with one click by a single IT administrator, compared to traditional infrastructure that can take several days and dozens of discrete tasks executed by separate IT teams. According to the same commissioned IDC study, our technology can reduce the time required for infrastructure management by up to 71%.
- **Scalability:** Our platform is designed to be a web-scale distributed system and deployments can start with only a few nodes and scale to thousands without degradation in performance per node. Our customers can grow their clusters in flexible increments by adding any number of nodes at a time depending on their capacity and performance requirements.

- **Lower total cost of ownership:** We estimate, based on a model validated by IDC in August 2015, that our solution can reduce total cost of ownership by up to 60% compared to traditional infrastructure for a broad set of workloads and up to 30% compared to public cloud offerings for predictable workloads.¹ With Acropolis, our end-customers can benefit from application mobility, simplicity of use and up to an 80% reduction in virtualization costs.²
- **Improved resiliency:** Our platform includes extensive self-healing capabilities to ensure higher levels of infrastructure resiliency to mitigate application downtime which can harm business operations and damage customer reputations. Designed not to have a single point of failure, our advanced web-scale software is able to automatically detect failed hardware or software components and then adapt by redirecting requests to other available resources in a cluster. According to the same IDC study referenced above, our solutions can reduce unplanned downtime by up to 98%.
- **Flexible application mobility:** We design our software to provide a high degree of flexibility and choice of where applications run, preventing vendor lock-in. We intend to enable customers to make application placement decisions based entirely on performance, scalability and economic considerations, thereby accelerating speed of implementation and reducing cost. With application mobility, our customers will be able to selectively adopt the public cloud for specific workloads and certain scenarios, while preserving the flexibility to bring those workloads back to an on-premises enterprise cloud or move them to different public cloud providers should requirements or costs change.
- **Secure platform:** We embed security features into our hardened software solution and we strengthen our platform by employing two-factor authentication and encryption as configurable system options. We regularly apply threat modeling and analysis to reduce the attack surface, and recently added automated detection and self-healing capability.

Competitive Strengths

We believe the following strengths will allow us to extend our market leadership and broaden adoption of our solution:

- **Purpose built enterprise cloud platform based on web-scale engineering:** Our enterprise cloud platform leverages sophisticated web-scale technologies, enhanced by our proprietary innovations, to build highly reliable distributed systems that are fast, efficient and scalable.
- **Commitment and passion for elegant design:** Our passion and appreciation for elegant design inspires us to deliver uncompromisingly simple user experiences. This passion is reflected throughout our platform and customer lifecycle.
- **Breadth of engineering expertise:** We have assembled a strong engineering group with experience spanning many technology domains, including distributed systems, virtualization, storage, networking, enterprise applications and security. We believe our engineering expertise should enable us to continue innovating rapidly, developing elegant solutions to difficult technical challenges and addressing emerging market opportunities.

¹ Percentages are based on an internal model prepared by us using available industry data and our estimates on IT spending, which data and calculations were validated by IDC and reflects a three-to-five year cost of ownership for traditional infrastructure and four year cost of ownership for public cloud offerings. See "Risk Factors—Our estimates of end-customer cost savings may not be indicative of the actual benefits that end-customers experience in the future" and "Business—Overview" for more information.

² Percentages are based on an internal model prepared by us using available industry data and our estimates on virtualization costs. See "Risk Factors—Our estimates of end-customer cost savings may not be indicative of the actual benefits that end-customers experience in the future" and "Business—Our Solution" for more information.

- **Focus on customer delight:** Our award-winning support organization focuses on delighting our customers, which has led to high customer loyalty, strong customer references and accelerated repeat purchases. During calendar year 2015, we achieved a Net Promoter Score of 92, which we believe is among the industry best for IT infrastructure companies based on comparisons against Net Promoter Scores that have been publicly announced by our competitors and peers.³ Additionally, as of July 31, 2016, approximately 75% of our end-customers who have been with us for 18 months or more have made a repeat purchase, and repurchase orders are often a multiple of the original order value.
- **Diverse and global business:** Our platform addresses a common set of critical IT issues which are pervasive across a diverse array of workloads, range of industries and customer segments. Since selling our first product in fiscal 2012, we have taken advantage of this large opportunity, and now have customers spanning more than 90 countries, with international revenue comprising 37% of total revenue for fiscal 2016.
- **Unique culture:** Our culture is based on building a deep understanding of our customers, partners and employees that we believe makes us an attractive company to work with and for. We also foster extensive collaboration and open communication, crowdsourcing of ideas and frequent collection of input that we believe leads to rapid and improved decision-making. We embrace constant experimentation and continually challenge ourselves to extend our competitive edge.

Our Market Opportunity

Our market opportunity is to replace traditional IT products, including x86 servers, storage systems, virtualization software, cloud management software and systems management software. We capture spend from the following markets which have a combined spend of over \$100 billion:

- The x86 server market, which according to Gartner, is expected to be \$51.8 billion in 2016⁴
- The storage systems markets, which according to IDC, is expected to be \$43.7 billion in 2016
- The virtualization infrastructure software market, which according to Gartner, is expected to be \$5.4 billion in 2016⁵
- The cloud management software market, which according to IDC, is expected to be \$3.7 billion in 2016
- The systems management software market, which according to IDC, is expected to be \$21.0 billion in 2016

Beyond these five markets, we also have an opportunity to capture a portion of the hundreds of billions of dollars of IT budget that are spent on personnel, consulting and services costs required to deploy, manage and maintain traditional IT infrastructure, as well as public cloud services.

³ A Net Promoter Score is a measure of customer loyalty ranging from negative 100 to 100 based on the standard question: "On a scale of 0 to 10, with 10 being extremely likely, how likely are you to recommend Nutanix to a friend or colleague?" Our Net Promoter Score is based on end-customers who respond to the survey question, which is automatically generated, when we close a product support ticket, and is automatically calculated and tracked by our support analytics system. Our Net Promoter Score is calculated by using the standard methodology of subtracting the percentage of end-customers who respond that they are not likely to recommend Nutanix from the percentage of end-customers that respond that they are extremely likely to recommend Nutanix.

⁴ See Gartner note (3) in the section titled "Market and Industry Data."

⁵ See Gartner note (2) in the section titled "Market and Industry Data."

Growth Strategy

Key elements of our growth strategy include:

- **Continually innovate and maintain technology leadership:** Since inception, we have rapidly innovated from supporting limited applications and a single hypervisor to a full platform that is designed to support a wide variety of enterprise applications, including virtualized applications across multiple hypervisors and recently non-virtualized workloads. We intend to continue to invest in technologies such as virtualization, containers, cloud management and orchestration, infrastructure analytics and networking to expand our market opportunity.
- **Invest to acquire new end-customers:** We intend to grow our base of 3,768 end-customers, which we believe represents a small portion of our potential end-customer base, by increasing our investment in sales and marketing, leveraging our network of channel partners and furthering our international expansion. One area of specific focus will be on expanding our position within the Global 2000, where we currently have approximately 310 end-customers.
- **Continue to drive follow-on sales to existing end-customers:** Our end-customers typically deploy our technology initially for a specific workload. Our sales teams and channel partners then seek to systematically target follow-on sales opportunities to drive purchases of additional appliances and higher tier software editions, which in the aggregate are often multiples of the initial order.
- **Deepen engagement with current channel and OEM partners and establish additional routes to market to enhance sales leverage:** We have driven strong engagement and initial commercial success with several major resellers and distributors. We have established original equipment manufacturer, or OEM, partnerships with Dell Inc. and Lenovo PC HK Ltd., and believe that OEMs can augment our routes to market to accelerate our growth. We believe there is a significant opportunity to grow our sales with our partners. As a result, we are investing aggressively in sales enablement and co-marketing with our partners, and attracting and engaging new channel and OEM partners around the globe while also selling our standalone software on qualified x86 servers to maximize the availability of our solution for our customers.

Risks Affecting Us

Our business is subject to numerous risks and uncertainties, including those highlighted in the section titled "Risk Factors" immediately following this prospectus summary. These risks include, but are not limited to, the following:

- we have a history of losses and we may not be able to achieve or maintain profitability in the future;
- the markets in which we compete are rapidly evolving, which make it difficult to forecast end-user adoption rates and demand for our solutions;
- if end-customers do not adopt our solution, our ability to grow our business and operating results may be adversely affected;
- our revenue growth in recent periods may not be indicative of our future performance;
- we have experienced rapid growth in recent periods and we may not be able to sustain or manage any future growth effectively;

- we compete with traditional storage vendors, IT systems vendors and infrastructure software providers and expect competition to continue to intensify in the future from both established competitors and new market entrants;
- our relatively limited operating history makes it difficult to evaluate our current business and prospects, and may increase the risk of your investment;
- developments or improvements in enterprise IT infrastructure technologies may materially and adversely affect the demand for our solutions;
- if other vendors do not cooperate with us to ensure that our solutions interoperate with their products, including by providing us with early access to their new products or information about their new products, our product development efforts may be delayed or impaired which could adversely affect our business, operating results and prospects;
- if we fail to develop or introduce new or enhanced solutions on a timely basis, our ability to attract and retain end-customers could be impaired and our competitive position could be harmed; and
- our directors, executive officers and pre-offering investors, who, due to our dual class structure, will beneficially own, in the aggregate, approximately 98.9% of the voting power of our outstanding capital stock after this offering collectively, based on the beneficial ownership of our outstanding capital stock as of July 31, 2016, will continue to have substantial control over us after this offering and will be able to influence corporate matters.

Corporate Information

We were incorporated in the State of Delaware in September 2009. Our principal executive offices are located at 1740 Technology Drive, Suite 150, San Jose, California, 95110, and our telephone number is (408) 216-8360. Our website address is www.nutanix.com. Information on or that can be accessed through our website is not part of this prospectus and should not be relied upon in determining whether to make an investment decision.

Unless the context otherwise requires, the terms “Nutanix,” “the Company,” “we,” “us” and “our” in this prospectus refers to Nutanix, Inc. and its subsidiaries. The Nutanix design logo, the “X” design logo and the marks “Nutanix,” “Acropolis,” “Prism,” “Acropolis Hypervisor,” “Distributed Storage Fabric,” “Application Mobility Fabric,” “Xpress” and our other registered or common law trade names, trademarks or service marks appearing in this prospectus are our property. This prospectus contains additional trade names, trademarks and service marks of other companies that are the property of their respective owners. Cisco® and OCP trademarks are the registered trademarks of Cisco Technology, Inc. and Open Compute Project, respectively. We do not intend our use or display of other companies’ trade names, trademarks or service marks to imply a relationship with, or endorsement or sponsorship of us by, these other companies.

Implications of Being an Emerging Growth Company

We are an “emerging growth company” as defined in the Jumpstart Our Business Startups Act of 2012, or the JOBS Act. An emerging growth company may take advantage of specified reduced reporting requirements that are otherwise applicable generally to public companies. These reduced reporting requirements include:

- an exemption from compliance with the auditor attestation requirement on the effectiveness of our internal controls over financial reporting;

- an exemption from compliance with any requirement that the Public Company Accounting Oversight Board may adopt regarding mandatory audit firm rotation or a supplement to the auditor's report providing additional information about the audit and the financial statements;
- reduced disclosure about our executive compensation arrangements; and
- an exemption from the requirements to obtain a non-binding advisory vote on executive compensation or stockholder approval of any golden parachute arrangements.

We will remain an emerging growth company until the earliest to occur of: (i) the first fiscal year following the fifth anniversary of this offering; (ii) the first fiscal year after our annual gross revenue is \$1.0 billion or more; (iii) the date on which we have, during the previous three-year period, issued more than \$1.0 billion in non-convertible debt securities; or (iv) as of the end of any fiscal year in which the market value of our common stock held by non-affiliates exceeded \$700.0 million as of the end of the second quarter of that fiscal year.

We may choose to take advantage of some, but not all, of the available benefits under the JOBS Act. We are choosing to irrevocably "opt out" of the extended transition periods available under the JOBS Act for complying with new or revised accounting standards, but we intend to take advantage of the other exemptions discussed above. Accordingly, the information contained herein may be different than the information you receive from other public companies in which you hold stock.

THE OFFERING

Class A common stock offered by us	14,000,000 shares
Underwriters' option to purchase additional shares from us	2,100,000 shares
Class A common stock to be outstanding after this offering	14,000,000 shares (16,100,000 shares, if the underwriters exercise their option to purchase additional shares in full)
Class B common stock to be outstanding after this offering	122,403,162 shares
Total Class A and Class B common stock to be outstanding after this offering	136,403,162 shares (138,503,162 shares, if the underwriters exercise their option to purchase additional shares in full)
Use of proceeds	<p>We estimate that the net proceeds from the sale of shares of our Class A common stock that we are selling in this offering will be approximately \$176.4 million, or approximately \$203.7 million if the underwriters exercise their option to purchase additional shares in full, at an assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.</p> <p>We currently intend to use the net proceeds we receive from this offering for capital expenditures and for general corporate purposes, including working capital, sales and marketing activities, research and development, and general and administrative matters, although we do not currently have any specific or preliminary plans with respect to the use of proceeds for such purposes. See "Use of Proceeds."</p>
Voting rights	<p>Shares of our Class A common stock are entitled to one vote per share.</p> <p>Shares of our Class B common stock are entitled to 10 votes per share.</p> <p>Holders of our Class A common stock and Class B common stock will generally vote together as a single class, unless otherwise required by law or our amended and restated certificate of incorporation. The holders of our outstanding Class B common stock will hold approximately 98.9% of the voting power of our outstanding capital stock following this offering and will have the ability to control the outcome of matters submitted to our stockholders for</p>

Directed share program

approval, including the election of our directors and the approval of any change in control transaction. See the sections entitled “Principal Stockholders” and “Description of Capital Stock” for additional information.

At our request, the underwriters have reserved up to 5% of the Class A common stock being offered by this prospectus for sale at the initial public offering price to certain customers and partners. None of our directors, executive officers or employees will participate in the directed share program. The sales will be made by J.P. Morgan Securities LLC, an underwriter in this offering, through a directed share program. We do not know if these parties will choose to purchase all or any portion of these reserved shares, but any purchases they do make will reduce the number of shares available to the general public. Any reserved shares that are not so purchased will be offered by the underwriters to the general public on the same terms as the other shares of Class A common stock. Shares sold through the directed share program will not be subject to lock-up or market stand-off restrictions. See “Underwriting” for additional information.

NASDAQ Global Select Market symbol

“NTNX”

Prior to the completion of this offering, we had one class of common stock. Upon completion of this offering, we will have authorized a new class of Class A common stock and a new class of Class B common stock. All currently outstanding shares of common stock, convertible preferred stock, and warrants exercisable for convertible preferred stock will be reclassified into shares of or exercisable for or convertible into our new Class B common stock. In addition, all currently outstanding stock options and restricted stock units, or RSUs, will become eligible to be exercisable for or settled in, as applicable, shares of our new Class B common stock.

The number of shares of our Class A and Class B common stock to be outstanding after this offering is based on no shares of Class A common stock outstanding and 122,403,162 shares of our Class B common stock outstanding as of July 31, 2016 and excludes:

- 26,166,968 shares of Class B common stock issuable upon the exercise of stock options outstanding under our 2010 Stock Plan, or 2010 Plan, and our 2011 Stock Plan, or 2011 Plan, as of July 31, 2016, with a weighted-average exercise price of \$4.39 per share;
- 12,265,369 shares of Class B common stock issuable upon the vesting of RSUs outstanding under our 2010 Plan as of July 31, 2016;
- 824,094 shares of Class B common stock issuable upon the exercise of warrants outstanding as of July 31, 2016, with a weighted-average exercise price of \$0.70 per share;
- 3,340,762 shares of Class B common stock issuable upon the vesting of RSUs granted under our 2010 Plan after July 31, 2016, including 911,489 RSUs issued as part of a stock option exchange program;

- 1,039,950 shares of Class B common stock issuable upon the exercise of stock options granted under our 2010 Plan after July 31, 2016, with a weighted-average exercise price of \$12.01 per share;
- a reduction of an aggregate of 449,828 shares of Class B common stock as a result of the exchange of stock options for RSUs as part of a stock option exchange program;
- 528,517 shares of Class B common stock issued upon completion of our acquisition of Calm.io Pte. Ltd., or Calm, after July 31, 2016;
- 1,711,019 shares of Class B common stock issued upon completion of our acquisition of PernixData, Inc., or PernixData, after July 31, 2016; and
- 26,200,000 shares of Class A common stock reserved for future issuance under our equity compensation plans as of July 31, 2016, consisting of (i) 22,400,000 shares of our Class A common stock initially reserved for future issuance under our 2016 Equity Incentive Plan, or 2016 Plan, which will become effective on the date immediately prior to the date of this prospectus, and (ii) 3,800,000 shares of our Class A common stock initially reserved for issuance under our 2016 Employee Stock Purchase Plan, or ESPP, which will become effective on the date adopted by our board of directors. In addition, the shares to be reserved for issuance under our 2016 Plan shall be increased by that number of shares of Class A Common Stock equal to the number of shares of our Class B Common Stock returned to our 2010 Plan and our 2011 Plan as the result of expiration or termination of awards after the effective date of this prospectus. Our 2016 Plan and ESPP also provide for automatic annual increases in the number of shares reserved under such plans each year, as more fully described in “Executive Compensation—Employee Benefit and Stock Plans.”

Except as otherwise indicated, all information in this prospectus assumes:

- the effectiveness of our amended and restated certificate of incorporation and amended and restated bylaws, the authorization of a new class of Class A common stock and a new class of Class B common stock and the reclassification of all currently outstanding shares of common stock into shares of Class B common stock, each of which will occur immediately prior to the completion of this offering;
- the automatic conversion of all outstanding shares of our convertible preferred stock outstanding as of July 31, 2016 into an aggregate of 76,319,511 shares of Class B common stock effective immediately prior to the completion of this offering;
- the conversion of all outstanding warrants to purchase convertible preferred stock into warrants to purchase shares of Class B common stock;
- no exercise of outstanding stock options or warrants, or settlement of outstanding RSUs after July 31, 2016; and
- no exercise of the underwriters' option to purchase up to an additional 2,100,000 shares of Class A common stock.

SUMMARY CONSOLIDATED FINANCIAL AND OTHER DATA

The following table summarizes our consolidated financial data. The summary consolidated statements of operations data presented below for fiscal 2014, 2015 and 2016 are derived from our audited consolidated financial statements that are included elsewhere in this prospectus. The following summary consolidated financial data should be read together with our audited consolidated financial statements and the related notes, as well as the section entitled "Management's Discussion and Analysis of Financial Condition and Results of Operations" included elsewhere in this prospectus. Our historical results are not necessarily indicative of our results in any future period.

	Fiscal Year Ended July 31		
	2014	2015	2016
(In thousands, except share and per share data)			
Consolidated Statements of Operations Data:			
Revenue:			
Product	\$ 113,562	\$ 200,833	\$ 350,798
Support and other services	13,565	40,599	94,130
Total revenue	<u>127,127</u>	<u>241,432</u>	<u>444,928</u>
Cost of revenue:			
Product(1)	52,417	80,900	133,541
Support and other services(1)	8,495	20,059	37,246
Total cost of revenue	<u>60,912</u>	<u>100,959</u>	<u>170,787</u>
Gross profit	<u>66,215</u>	<u>140,473</u>	<u>274,141</u>
Operating expenses:			
Sales and marketing(1)	93,001	161,829	288,493
Research and development(1)	38,037	73,510	116,400
General and administrative(1)	13,496	23,899	34,265
Total operating expenses	<u>144,534</u>	<u>259,238</u>	<u>439,158</u>
Loss from operations	(78,319)	(118,765)	(165,017)
Other expense—net	(5,076)	(5,818)	(1,290)
Loss before provision for income taxes	(83,395)	(124,583)	(166,307)
Provision for income taxes	608	1,544	2,192
Net loss	<u>\$ (84,003)</u>	<u>\$ (126,127)</u>	<u>\$ (168,499)</u>
Net loss per share attributable to common stockholders—basic and diluted(2) (3)	<u>\$ (2.30)</u>	<u>\$ (3.11)</u>	<u>\$ (3.83)</u>
Weighted-average shares used in computing net loss per share attributable to common stockholders—basic and diluted(2)(3)	<u>36,520,107</u>	<u>40,509,481</u>	<u>43,970,381</u>
Pro forma net loss per share attributable to common stockholders—basic and diluted(2)(3)			<u>\$ (1.42)</u>
Weighted-average shares used in computing pro forma net loss per share attributable to common stockholders—basic and diluted(2)(3)			<u>120,289,892</u>

- (1) Includes stock-based compensation expense as follows:

	Fiscal Year Ended July 31		
	2014	2015	2016
	(In thousands)		
Cost of revenue:			
Product	\$ 124	\$ 363	\$ 391
Support and other services	194	718	968
Total cost of revenue	318	1,081	1,359
Sales and marketing	2,150	6,474	8,006
Research and development	2,243	5,411	6,259
General and administrative	1,149	4,174	4,432
Total stock-based compensation expense	<u>\$5,860</u>	<u>\$17,140</u>	<u>\$20,056</u>

- (2) For an explanation of the calculations of our net loss per share attributable to common stockholders—basic and diluted, and our pro forma net loss per share attributable to common stockholders—basic and diluted, see note 11 of the notes to consolidated financial statements included elsewhere in this prospectus.
- (3) Stock-based compensation expense related to our performance stock awards, which vesting is subject to continuous service with us and satisfaction of certain liquidity events, is excluded from net loss per share attributable to common stockholders, and pro forma net loss per share attributable to common stockholders. Had an initial public offering, or IPO, been deemed probable on July 31, 2016, we would have recorded approximately \$59 million of stock-based compensation expense, net of estimated forfeitures related to our performance stock awards during fiscal 2016. If the IPO is deemed probable as of October 31, 2016, we estimate that we would record approximately \$77 million of estimated compensation expense related to the performance stock awards granted to date, net of estimated forfeitures, during the three months ending October 31, 2016.

	As of July 31, 2016		
	Actual	Pro Forma(1)	Pro Forma as Adjusted(2)(3)
	(In thousands)		
Consolidated Balance Sheet Data:			
Cash, cash equivalents and short-term investments(4)	\$ 185,200	\$ 185,200	\$ 283,234
Total assets(4)	399,086	399,086	497,120
Deferred revenue	296,465	296,465	296,465
Senior notes(4)	73,260	73,260	—
Preferred stock warrant liability	9,679	—	—
Convertible preferred stock	310,379	—	—
Total stockholders' (deficit) equity(4)	(376,315)	(56,257)	115,100

- (1) The pro forma column reflects (i) the reclassification of our outstanding common stock into Class B common stock, (ii) the automatic conversion of all outstanding shares of our convertible preferred stock as of July 31, 2016 into 76,319,511 shares of our Class B common stock, (iii) the related reclassification of the preferred stock warrant liability to additional paid-in capital and (iv) the effectiveness of our amended and restated certificate of incorporation as of immediately prior to the completion of this offering.
- (2) The pro forma as adjusted column reflects (i) all adjustments included in the pro forma column, (ii) the early extinguishment of our senior notes prior to the effectiveness of this offering (see footnote 4 below) and (iii) the sale by us of 14,000,000 shares of our Class A common stock in this offering at an assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.
- (3) The pro forma as adjusted information discussed above is illustrative only and will be adjusted based on the actual public offering price and other terms of this offering determined at pricing. Each \$1.00 increase (decrease) in the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, would increase (decrease) our pro forma as adjusted cash, cash equivalents and short-term investments, total assets and total stockholders' (deficit) equity by approximately \$13.0 million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us. Similarly, each 1.0 million increase (decrease) in the number of shares offered by us would increase (decrease) our pro forma as adjusted cash, cash equivalents and short-term investments, total assets and total stockholders' (deficit) equity by approximately \$13.0 million, assuming that the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us.

- (4) We intend to repay the entire outstanding principal amount of our senior notes prior to the effectiveness of this offering. If our senior notes were extinguished as of July 31, 2016, our cash, cash equivalents and short-term investments and total assets would have decreased by approximately \$78.4 million, which consists of payment of the principal amount of our senior notes and payment of the guaranteed minimum return, and our stockholders' equity would have decreased by \$5.0 million primarily due to the estimated loss on debt extinguishment.

Key Financial and Operational Metrics

We monitor the following key financial and operational metrics:

	As of or for the Fiscal Year Ended July 31		
	2014	2015	2016
	(Dollars in thousands)		
Total revenue	\$127,127	\$241,432	\$444,928
Year-over-year percentage increase	316%	90%	84%
Billings(1)	\$151,074	\$308,553	\$637,795
Adjusted gross margin percentage(1)	52%	59%	62%
Total deferred revenue(2)	\$ 36,477	\$103,598	\$296,465
Net cash (used in) provided by operating activities	\$ (45,707)	\$ (25,694)	\$ 3,636
Free cash flow(1)	\$ (64,739)	\$ (49,002)	\$ (38,658)
Total end-customers	782	1,799	3,768

	As of or for the Three Months Ended							
	October 31, 2014	January 31, 2015	April 30, 2015	July 31, 2015	October 31, 2015	January 31, 2016	April 30, 2016	July 31, 2016
	(Dollars in thousands)							
Total revenue	\$ 46,053	\$ 56,798	\$ 64,496	\$ 74,085	\$ 87,756	\$ 102,697	\$114,690	\$139,785
Quarter-over-quarter percentage increase	18%	23%	14%	15%	18%	17%	12%	22%
Billings(1)	\$ 60,830	\$ 70,978	\$ 82,075	\$ 94,670	\$ 128,289	\$ 143,373	\$159,505	\$206,628
Adjusted gross margin percentage(1)	57%	59%	59%	60%	60%	63%	62%	61%
Total deferred revenue(2)	\$ 51,254	\$ 65,434	\$ 83,013	\$103,598	\$ 144,131	\$ 184,807	\$229,622	\$296,465
Net cash (used in) provided by operating activities	\$ (6,921)	\$ (7,691)	\$ (5,715)	\$ (5,367)	\$ (5,616)	\$ 4,473	\$ 2,413	\$ 2,366
Free cash flow(1)	\$ (11,405)	\$ (14,084)	\$ (10,951)	\$ (12,562)	\$ (15,258)	\$ (5,906)	\$ (10,985)	\$ (6,509)
Total end-customers	923	1,168	1,412	1,799	2,144	2,638	3,111	3,768

(1) See "—Non-GAAP Financial Measures and Key Performance Measures" below.

(2) The majority of our deferred revenue consists of the unrecognized portion of revenue from sales of our software and support and maintenance agreements.

Non-GAAP Financial Measures and Key Performance Measures

Please see the section titled "Selected Consolidated Financial and Other Data" for more information on the uses and limitations of our non-GAAP financial measures and key performance measures and a reconciliation of our non-GAAP financial measures and key performance measures to the most directly comparable financial measure calculated and presented in accordance with accounting principles generally accepted in the United States, or GAAP.

Billings

We calculate billings by adding the change in deferred revenue between the start and end of the period to total revenue recognized in the same period.

Adjusted Gross Margin Percentage

We calculate adjusted gross margin percentage as adjusted gross profit divided by total revenue. We define adjusted gross profit as our gross profit adjusted to exclude stock-based compensation. Our presentation of adjusted gross margin percentage should not be construed as implying that our future results will not be affected by any recurring expenses or any unusual or non-recurring items that we exclude from our calculation of this non-GAAP financial measure.

Free Cash Flow

We calculate free cash flow as net cash used in operating activities plus purchases of property and equipment, which measures our ability to generate cash from our business operations after our capital expenditures.

RISK FACTORS

Investing in our Class A common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described below, together with all of the other information in this prospectus, including our consolidated financial statements and related notes, before investing in our Class A common stock. The risks and uncertainties described below are not the only ones we face. Additional risks and uncertainties that we are unaware of, or that we currently believe are not material, may also become important factors that affect our business. If any of the following risks occur, our business, financial condition, operating results and prospects could be materially harmed. In that event, the price of our Class A common stock could decline, and you could lose part or all of your investment.

Risks Related to Our Business and Industry

We have a history of losses and we may not be able to achieve or maintain profitability in the future.

We have incurred net losses in all periods since our inception, and we expect that we will continue to incur net losses for the foreseeable future. We experienced net losses of \$84.0 million, \$126.1 million and \$168.5 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively. As of July 31, 2016, we had an accumulated deficit of \$441.9 million. In addition to the investments we expect to continue to make to grow our business, we also expect to incur significant additional legal, accounting and other expenses as a newly public company, that we did not incur as a private company. If we fail to increase our revenue and manage our expenses, we may not achieve or sustain profitability in the future.

The markets in which we compete are rapidly evolving, which make it difficult to forecast end-customer adoption rates and demand for our solutions.

The markets in which we compete are rapidly evolving. Accordingly, our future financial performance will depend in large part on the allocation of spending in traditional IT markets and on our ability to adapt to new market demands. Currently, sales of our solutions are dependent in large part upon replacement of spending in traditional markets, including x86 servers, storage systems and virtualization software. If these markets experience a shift in customer demand, our solutions may not compete as effectively, if at all. It is also difficult to predict end-customer demand or adoption rates for our solutions or the future growth of our market.

If end-customers do not adopt our solutions, our ability to grow our business and operating results may be adversely affected.

We believe that our solutions represent a major shift to web-scale architecture, and traditional IT infrastructure architecture is entrenched in the datacenters of many of our end-customers because of their historical financial investment in existing IT infrastructure architecture and the existing knowledge base and skillsets of IT administrators. As a result, our sales efforts often involve extensive efforts to educate our end-customers as to the benefits and capabilities of our solutions, particularly as we continue to pursue large organizations as end-customers. If we fail to achieve market acceptance of our solutions, our ability to grow our business and our operating results will be adversely affected.

Our revenue growth in recent periods may not be indicative of our future performance.

We have experienced significant growth in recent periods with total revenue of \$127.1 million, \$241.4 million and \$444.9 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively. You should not consider our revenue growth in recent periods as indicative of our future performance. While we have recently experienced significant revenue growth, we may not achieve similar revenue growth in future periods. Accordingly, you should not rely on our revenue growth for any prior quarterly or annual periods as an indication of our future revenue or revenue growth.

We have experienced rapid growth in recent periods and we may not be able to sustain or manage any future growth effectively.

We have expanded our overall business and operations significantly in recent periods. Our employee headcount increased from 247 as of July 31, 2013 to 1,980 as of July 31, 2016, and we expect to have significant headcount increases in the future. We anticipate that our operating expenses will increase in the foreseeable future as we scale our business, including in developing and improving our solutions, expanding our sales and marketing capabilities and global coverage, and in providing general and administrative resources to support our growth. As we continue to grow our business, we must effectively integrate, develop and motivate a large number of new employees while maintaining the effectiveness of our business execution. We must also continue to improve and expand our information technology, or IT, and financial infrastructure, management systems and product management and sales processes. We expect that our future growth will continue to place a significant strain on our management, operational and financial resources. We may incur costs associated with future growth prior to realizing the anticipated benefits, and the return on these investments may be lower, or may develop more slowly than we expect. If we are unable to manage our growth effectively, we may not be able to take advantage of market opportunities. We also may fail to satisfy end-customers' requirements, maintain product quality, execute on our business plan or respond to competitive pressures, any of which could adversely affect our business, operating results, financial condition and prospects.

We compete with traditional storage vendors, IT systems vendors and infrastructure software providers and expect competition to continue to intensify in the future from both established competitors and new market entrants.

We operate in the intensely competitive enterprise infrastructure market and compete primarily with companies that sell software to build and operate enterprise clouds, integrated systems, and standalone storage and servers. These markets are characterized by constant change and rapid innovation. Our main competitors fall into the following categories:

- software providers such as VMware, Inc. and Red Hat, Inc., that offer a broad range of virtualization, infrastructure and management products to build and operate enterprise clouds;
- traditional IT systems vendors such as Hewlett Packard Enterprise Company, or HPE, Cisco Systems, Inc., Lenovo Group Ltd., Dell Technologies Inc., or Dell Technologies, Hitachi Data Systems and IBM Corporation that offer integrated systems that include bundles of servers, storage and networking solutions, as well as a broad range of standalone server and storage products; and
- traditional storage array vendors such as Dell Technologies, NetApp, Inc. and Hitachi Data Systems, which typically sell centralized storage products.

In addition, we compete against vendors of hyperconverged infrastructure and software-defined storage products such as VMware, Inc., Cisco Systems, Inc., HPE, Dell Technologies and many smaller emerging companies. As our market grows, we expect it will continue to attract new companies as well as existing larger vendors. Some of our competitors may expand their product offerings, acquire competing businesses, sell at lower prices, bundle with other products, provide closed technology platforms or otherwise attempt to gain a competitive advantage. Furthermore, as we expand our product offerings, we may expand into new markets and we may encounter additional competitors in such markets.

EMC announced in October 2015 that it had signed a definitive agreement to be acquired by Dell. As part of the announcement, EMC and Dell emphasized the companies' complementary product portfolios, that Dell would give EMC a leading server platform and that the transaction would give Dell an opportunity to combine the storage businesses of the two companies. Dell is not just a competitor

but also is an OEM partner of ours and has accounted for a meaningful portion of our total billings over the past few fiscal quarters. The acquisition was completed on September 7, 2016. The combined company, Dell Technologies, may be more likely to promote and sell its own solutions over our products or cease selling or promoting our products entirely. EMC also held the majority of the outstanding voting power in VMware, Inc. Dell now controls VMware, and could combine the Dell, EMC and VMware product portfolios into unified offerings optimized for their platforms. If Dell Technologies decides to sell its own solutions over our products, that could adversely impact our OEM sales and harm our business, operating results and prospects, and our stock price could decline.

Many of our existing competitors have, and some of our potential competitors may have, competitive advantages over us, such as longer operating histories, significantly greater financial, technical, marketing or other resources, stronger brand awareness and name recognition, larger intellectual property portfolios and broader global presence and distribution networks. Furthermore, some of our competitors supply a wide variety of products to, and have well-established relationships with, our current and prospective end-customers. Some of these competitors have in the past and may in the future take advantage of their existing relationships with end-customers, distributors or resellers to provide incentives to such current or prospective end-customers that make their products more economically attractive or to interfere with our ability to offer our solutions to our end-customers. Our competitors may also be able to offer products or functionality similar to ours at a more attractive price, such as by integrating or bundling their solutions with their other product offerings or those of technology partners or establishing cooperative relationships with other competitors, technology partners or other third parties. Potential end-customers may prefer to purchase from their existing suppliers rather than a new supplier, especially given the significant investments that they have historically made in their legacy infrastructures. Some of our competitors may also have stronger or broader relationships with technology partners than we do, which could make their products more attractive than ours. As a result, we cannot assure you that our solutions will compete favorably, and any failure to do so could adversely affect our business, operating results and prospects.

Our relatively limited operating history makes it difficult to evaluate our current business and prospects, and may increase the risk of your investment.

We began selling our products in October 2011. We have a relatively limited historical financial data, and we operate in a rapidly evolving market. Our relatively limited operating history makes it difficult to evaluate our current business and our future prospects, including our ability to plan for and model future growth. In addition, the rapidly evolving nature of the enterprise IT infrastructure market, as well as other factors beyond our control, reduce our ability to accurately forecast quarterly or annual performance. Our solutions may never reach widespread adoption, and changes or advances in technologies could adversely affect the demand for our solutions. A reduction in demand for web-scale architectures caused by lack of customer acceptance, technological challenges, competing technologies and solutions or otherwise would result in lower revenue growth rates or decreased revenue, either of which could negatively impact our business, operating results and prospects. Any predictions about future revenue and expenses may not be as accurate as they would be if we had a longer operating history. We have encountered and will continue to encounter risks and difficulties associated with rapid growth and expansion and a relatively limited operating history. If we do not address these risks successfully, our business and operating results would be adversely affected, and our stock price could decline.

Developments or improvements in enterprise IT infrastructure technologies may materially and adversely affect the demand for our solutions.

Significant developments in enterprise IT infrastructure technologies, such as advances in storage, virtualization, containers and management software, may materially and adversely affect our business, operating results and prospects in ways we do not currently anticipate. For example,

improvements in existing data storage technologies, such as a significant increase in the speed of traditional interfaces for transferring data between a server and a storage system or the speed of traditional embedded controllers within the storage system, could emerge as a preferred alternative to our solutions, especially if they are sold at lower prices. Any failure by us to develop new or enhanced technologies or processes, to react to changes or advances in existing technologies or to correctly anticipate these changes or advances as we create and invest in our product roadmap could materially delay our development and introduction of new solutions, which could result in the loss of competitiveness of our solutions, decreased revenue and a loss of market share to competitors. In addition, the servers, network, software and other components and systems of a datacenter must comply with established industry standards in order to interoperate and function efficiently together. If larger companies who are more influential in driving industry standards do not support the same standards we use, market acceptance of our solutions could be adversely affected, or we may be required to spend significant time and resources duplicating efforts to adapt to different standards.

Public cloud infrastructure offers alternatives to the on-premise infrastructure deployments that our platform supports. Various factors could cause the rate of adoption of public cloud infrastructure to increase, including continued or accelerated decreases in the price of public cloud offerings and improvements in the ability of public cloud providers to deliver reliable performance, enhanced security, better application compatibility and more precise infrastructure control. Any of these factors could make our platform less competitive as compared to the public cloud, and could materially and adversely affect the demand for our solutions.

If other vendors do not cooperate with us to ensure that our solutions interoperate with their products, including by providing us with early access to their new products or information about their new products, our product development efforts may be delayed or impaired, which could adversely affect our business, operating results and prospects.

Our solutions provide a platform on which software applications and hypervisors from different software providers run. As a result, our solutions must interoperate with our end-customers' existing hardware and software infrastructure, specifically their networks, servers, software and operating systems, as well as the applications that they run on this infrastructure, which may be manufactured and provided by a wide variety of vendors and OEMs. In addition to ensuring that our solutions interoperate with these hardware and software products initially, we must occasionally update our software to ensure that our solutions continue to interoperate with new or updated versions of these hardware and software products. Current or future providers of software applications, hypervisors or data management tools could make changes that would diminish the ability of our solutions to interoperate with them, and significant additional time and effort may be necessary to ensure the continued compatibility of our solutions, which might not be possible at all. Even if our solutions are compatible with those of other providers, if they do not certify or support our solutions for their systems or cooperate with us to coordinate troubleshooting and hand off of support cases, end-customers may be reluctant to buy our solutions, which could decrease demand for our solutions and harm our ability to achieve a return on the investments and resources that we have dedicated to ensuring compatibility. Developing solutions that interoperate properly requires substantial partnering, capital investment and employee resources, as well as the cooperation of the vendors or developers of the software applications and hypervisors both with respect to product development and product support. Vendors may not provide us with early or any access to their technology and products, assist us in these development efforts, certify our solutions, share with or sell to us any APIs, formats, or protocols we may need, or cooperate with us to support end-customers. If they do not provide us with the necessary access, assistance or proprietary technology on a timely basis or at all, we may experience product development delays or be unable to ensure the compatibility of our solutions with such new technology or products. To the extent that vendors develop products that compete with ours, they have in the past, and may again in the future, withhold their cooperation, decline to share access, certify our solutions or sell or make available to us their proprietary APIs, protocols or formats or engage in practices to

actively limit the functionality, or compatibility, and certification of our products. If any of the foregoing occurs, our product development efforts may be delayed or impaired, our solutions could become less attractive to end-customers resulting in a decline in sales, and our business, operating results and prospects may be adversely affected.

If we fail to develop or introduce new or enhanced solutions on a timely basis, our ability to attract and retain end-customers could be impaired and our competitive position could be harmed.

We operate in a dynamic environment characterized by rapidly changing technologies and industry standards and technological obsolescence. We will need to continue to create valuable software and hardware solutions to be integrated with our enterprise cloud platform. To compete successfully, we must design, develop, market and sell new or enhanced solutions that provide increasingly higher levels of performance, capacity, scalability, security and reliability and meet the cost expectations of our end-customers. The introduction of new products by our competitors, the market acceptance of products based on new or alternative technologies, or the emergence of new industry standards could render our existing or future solutions obsolete or less attractive to end-customers. Any failure to anticipate or develop new or enhanced solutions or technologies in a timely manner in response to technological shifts could result in decreased revenue and harm to our business and prospects. Any new feature or application that we develop or acquire may not be introduced in a timely or cost-effective manner and may not achieve broad market acceptance and investments in research and development or efforts to optimize our engineering cost structure may not be successful. If we fail to introduce new or enhanced solutions that meet the needs of our end-customers or penetrate new markets in a timely fashion, we will lose market share and our business, operating results and prospects will be adversely affected.

If we are not successful in executing our strategy to increase sales of our solutions to new and existing organizations and service provider end-customers, our operating results may suffer.

Our growth strategy is dependent in large part upon increasing sales of our solutions to new and existing enterprises, service providers and government entities. Sales to these end-customers involve risks that may not be present (or that are present to a lesser extent) with sales to smaller end-customers. These risks include:

- competition from companies that traditionally target larger enterprises, service providers and government entities and that may have pre-existing relationships or purchase commitments from such end-customers;
- increased purchasing power and leverage held by large end-customers in negotiating contractual arrangements with us;
- more stringent requirements in our support service contracts, including demand for quicker support response times and penalties for any failure to meet support requirements; and
- longer sales cycles and the associated risk that substantial time and resources may be spent on a potential end-customer that elects not to purchase our solutions.

Large organizations often undertake a significant evaluation process that results in a lengthy sales cycle. Although we have a channel sales model, our sales representatives typically engage in direct interaction with our prospective end-customers as well as our distributors and resellers. We typically provide evaluation products to these end-customers and may spend substantial time, effort and money in our sales efforts to these prospective end-customers. In addition, product purchases by large organizations are frequently subject to budget constraints, multiple approvals and unanticipated administrative, processing and other delays. Finally, large organizations typically have longer implementation cycles, require greater product functionality and scalability, require a broader range of services, demand that vendors take on a larger share of risks, require acceptance provisions that can lead to a delay in revenue recognition and expect greater payment flexibility. If we fail to realize an

expected sale from a large end-customer in a particular quarter or at all, our business and operating results could be adversely affected. All of these factors can add further risk to business conducted with these end-customers.

Our growth depends on our existing end-customers purchasing additional appliances and software upgrades and renewing and upgrading their support and software maintenance agreements, and the failure of our end-customers to do so could harm our business and operating results.

Our future success depends in part on purchases by our existing end-customers of additional appliances and software as well as renewals and upgrades to their support and software maintenance agreements. If our end-customers do not purchase additional appliances, or renew or upgrade their support and software maintenance agreements, our revenue may decline and our operating results may be harmed. In order for us to maintain or improve our operating results, we depend on our existing end-customers renewing support and software maintenance agreements or purchasing additional appliances. End-customers may choose not to renew their support and software maintenance agreements or purchase additional appliances because of several factors, including dissatisfaction with our prices or features relative to competitive offerings, reductions in our end-customers' spending levels or other causes outside of our control. If our existing end-customers do not purchase new solutions, or renew or upgrade their support and software maintenance agreements, our revenue may grow more slowly than expected or may decline, and our business and operating results may be adversely affected.

If we do not effectively expand and train our sales force, we may be unable to add new end-customers or increase sales to our existing end-customers and our business will be adversely affected.

Although we have a channel sales model, our sales representatives typically engage in direct interaction with our prospective end-customers. Therefore, we continue to be substantially dependent on our sales force to obtain new end-customers and sell additional solutions to our existing end-customers. There is significant competition for sales personnel with the skills and technical knowledge that we require. Our ability to achieve significant revenue growth will depend, in large part, on our success in recruiting, training and retaining sufficient numbers of sales personnel to support our growth. New hires require significant training and may take significant time before they achieve full productivity; we estimate based on past experience that sales team members typically do not fully ramp and are not fully productive until around the time of the start of their fourth quarter of employment with us. Our recent hires and planned hires may not become productive as quickly as we expect, and we may be unable to hire or retain sufficient numbers of qualified individuals in the markets where we do business or plan to do business. Furthermore, hiring sales personnel in new countries requires additional set up and upfront costs that we may not recover if the sales personnel fail to achieve full productivity. In addition, as a result of our rapid growth, a large percentage of our sales force is new to our company and our solutions and therefore less effective than our more seasoned employees. If these new employees do not become fully productive on the timelines that we have projected, our revenue will not increase at anticipated levels and our ability to achieve long term projections may be negatively impacted. If we are unable to hire and train sufficient numbers of effective sales personnel, or the sales personnel are not successful in obtaining new end-customers or increasing sales to our existing customer base, our business, operating results and prospects will be adversely affected.

We rely primarily on indirect sales channels for the distribution of our solutions, and disruption within these channels could adversely affect our business, operating results and cash flows.

We primarily sell our solutions through indirect sales channels, including channel partners such as distributors, our hardware OEM partners, value added resellers and system integrators. Our OEM partners in turn distribute our solutions through their own networks of channel partners with whom we have no direct relationships.

We rely, to a significant degree, on our channel partners to select, screen and maintain relationships with their distribution networks and to distribute our solutions in a manner that is consistent with applicable law, regulatory requirements and our quality standards. If our channel partners or a partner in their distribution network violates applicable law or regulatory requirements or misrepresents the functionality of our solutions, our reputation could be damaged and we could be subject to potential liability. Additionally, if we are unable to establish relationships with strong channel partners in key growth regions, our ability to sell our solutions in these regions may be adversely affected. Our agreements with our channel partners are non-exclusive, meaning our channel partners may offer end-customers the products of several different companies, including products that compete with ours. If our channel partners do not effectively market and sell our solutions, choose to use greater efforts to market and sell their own products or those of our competitors, or fail to meet the needs of our end-customers, our business, operating results and prospects may be adversely affected. Our channel partners may cease marketing our solutions with limited or no notice and with little or no penalty. The loss of a substantial number of our channel partners, together with our inability to replace them, or the failure to recruit additional channel partners or establish an alternative distribution network could materially and adversely affect our business and operating results. For example, sales through Carahsoft Technology Corp. and Promark Technology Inc. to our end-customers represented 23% and 15%, respectively, of our total revenue for fiscal 2015 and represented 15% and 20%, respectively, of our total revenue for fiscal 2016. In addition, if a channel partner offers its own products or services that are competitive to our solutions, is acquired by a competitor or reorganizes or divests its reseller business units, our revenue derived from that partner may be adversely impacted or eliminated altogether.

Recruiting and retaining qualified channel partners and training them in the use of our technologies require significant time and resources. If we fail to devote sufficient resources to support and expand our network of channel partners, our business may be adversely affected. Maintaining strong indirect sales channels for our products and effectively leveraging our channel partners and OEMs is important to our growth strategy, and the failure to effectively manage these relationships may lead to higher costs and reduced revenue. Also, in certain international markets we are in the process of transitioning our distribution model from contracting directly with hundreds of individual resellers to contracting with a smaller number of larger global distributors. Although we believe that this transition will make our sales channels more efficient and broader reaching in the long term in these markets, there is no guarantee that this new distribution model will increase our sales in the short term or allow us to sustain our gross margins. Any potential delays or confusion during the transition process to our new partners may negatively affect our relationship with our existing end-customers and channel partners and may cause us to lose prospective end-customers or additional business from existing end-customers. Upon completion of the transition to the new sales model, we will be more reliant on fewer channel partners, which may reduce our contact with our end-customers making it more difficult for us to establish brand awareness, ensure proper delivery and installation of our software, support ongoing end-customer requirements, estimate end-customer demand, respond to evolving end-customer needs and obtain subscription renewals from end-customers.

All of our sales to government entities have been made indirectly through our channel partners. Government entities may have statutory, contractual or other legal rights to terminate contracts with our channel partners for convenience or due to a default, and, in the future, if the portion of government contracts that are subject to renegotiation or termination at the election of the government are material, any such termination or renegotiation may adversely impact our future operating results. In the event of such termination, it may be difficult for us to arrange for another channel partner to sell our solutions to these government entities in a timely manner, and we could lose sales opportunities during the transition. Governments routinely investigate and audit government contractors' administrative processes, and any unfavorable audit could result in the government refusing to continue buying our solutions, a reduction of revenue or fines or civil or criminal liability if the audit uncovers improper or illegal activities.

If our indirect distribution channel is disrupted, particularly if we are reliant on a fewer number of channel partners, we may be required to devote more resources to distribute our solutions directly and support our end-customers, which may not be as effective and could lead to higher costs, reduced revenue and growth that is slower than expected.

Our operating results may fluctuate significantly, which could make our future results difficult to predict and could cause our operating results to fall below expectations.

Our operating results may fluctuate due to a variety of factors, many of which are outside of our control. As a result, comparing our operating results on a period-to-period basis may not be meaningful. If our revenue or operating results in any particular period fall below investor expectations, the price of our Class A common stock would likely decline. Factors that are difficult to predict and that could cause our operating results to fluctuate include:

- the timing and magnitude of orders, shipments and acceptance of our solutions in any quarter;
- our ability to attract new and retain existing end-customers;
- disruptions in our sales channels or termination of our relationship with important channel partners and OEMs;
- the timing of revenue recognition for our sales;
- reductions in end-customers' budgets for information technology purchases;
- delays in end-customers' purchasing cycles or deferments of end-customers' purchases in anticipation of new products or updates from us or our competitors;
- fluctuations in demand and competitive pricing pressures for our solutions;
- the mix of solutions sold and the mix of revenue between products and support and other services;
- our ability to develop, introduce and ship in a timely manner new solutions and platform enhancements that meet customer requirements;
- the timing of product releases or upgrades or announcements by us or our competitors;
- any change in the competitive dynamics of our markets, including consolidation among our competitors or resellers, new entrants or discounting of prices;
- the amount and timing of expenses to grow our business and the extent to which we are able to take advantage of economies of scale or to leverage our relationships with OEM or channel partners;
- the costs associated with acquiring new businesses and technologies and the follow-on costs of integrating and consolidating the results of acquired businesses;
- the amount and timing of stock-based compensation expenses;
- our ability to control the costs of our solutions and their key components;
- general economic, industry and market conditions; and
- future accounting pronouncements and changes in accounting policies.

The occurrence of any one of these risks could negatively affect our operating results in any particular quarter, which could cause the price of our Class A common stock to decline.

Our gross margins are impacted by a variety of factors and may be subject to variation from period to period.

Our gross margins may be affected by a variety of factors, including shifts in the mix of whether our solutions are sold as an appliance or as software-only, fluctuations in the pricing of our products, including as a result of competitive pricing pressures and the degree to which we are successful in selling the value of incremental feature improvements and upgrades, changes in the cost of components of our hardware appliances, changes in the mix between direct versus indirect sales and the timing and amount of recognized and deferred revenue. If we are unable to manage these factors effectively, our gross margins may decline, and fluctuations in gross margin may make it difficult to manage our business and to achieve or maintain profitability, which could adversely affect our business and operating results.

Our sales cycles can be long and unpredictable and our sales efforts require considerable time and expense. As a result, it can be difficult for us to predict when, if ever, a particular customer will choose to purchase our solutions, which may cause our operating results to fluctuate significantly.

Our sales efforts involve educating our end-customers about the uses and benefits of our solutions, including their technical capabilities and cost saving potential. End-customers often undertake an evaluation and testing process that can result in a lengthy sales cycle. Increasing competition and the emergence of new hyperconverged infrastructure product offerings often result in customers evaluating multiple vendors at the same time, which can further lengthen the sales cycle. We spend substantial time and resources on our sales efforts without any assurance that our efforts will produce any sales. Platform purchases are frequently subject to budget constraints, multiple approvals and unanticipated administrative, processing and other delays. The broad nature of the technology shift that our solutions represent and the legacy relationships our end-customers have with existing IT vendors sometimes lead to unpredictable sales cycles, which make it difficult for us to predict when end-customers may purchase solutions from us. Our business and operating results will be significantly affected by the degree to which and speed with which organizations adopt our solutions.

Because we depend on contract manufacturers to assemble and test our hardware appliances, we are susceptible to delays and pricing fluctuations that could prevent us from shipping orders on time, if at all, or on a cost-effective basis, which would cause our business to be adversely affected.

We rely substantially on Super Micro Computer, Inc., or Super Micro, and, to a lesser extent, Avnet, Inc., or Avnet, to assemble and test our appliances. Our reliance on these contract manufacturers reduces our control over the manufacturing process and exposes us to risks, including reduced control over quality assurance, product costs and product supply and timing. Furthermore, our orders represent a relatively small percentage of the overall orders received by our third-party manufacturers from their customers. Therefore, fulfilling our orders may not be a priority in guiding their business decisions and operational commitments. If we fail to manage our relationships with these contract manufacturers effectively, inaccurately forecast our component requirements, or if either of them experience delays or increased manufacturing lead-times, disruptions, capacity constraints or quality control problems in their operations or are unable to meet our requirements for timely delivery, or we are unable to shift operations from one contract manufacturer to the other, our ability to ship high-quality solutions to our end-customers could be severely impaired, we could incur substantial costs, such as costs relating to the procurement of non-standard components and inventory costs, and our business and operating results, competitive position and reputation could be harmed.

Our agreements with Super Micro and Avnet expire in May 2017 and May 2019, respectively, with the option to terminate upon each annual renewal thereafter, and do not contain any minimum long-term commitment to manufacture our solutions. Further, any orders are fulfilled only after a

purchase order has been delivered and accepted. If we are required to change contract manufacturers, we may lose revenue, incur increased costs and damage our channel partner and end-customer relationships. Switching to a new contract manufacturer and commencing production is expensive and time-consuming. Our agreements with Super Micro and Avnet do not contain any price assurances, and any increases in component costs, without a corresponding increase in the price of our solutions, could harm our gross margins. Furthermore, we may need to increase our component purchases, manufacturing capacity and internal test and quality functions if we experience increased demand. The inability of Super Micro or other contract manufacturers to provide us with adequate supplies of high-quality products could cause a delay in our order fulfillment, and our business, operating results and prospects would be adversely affected.

We rely on a limited number of suppliers, and in some cases single-source suppliers, for several key components of our hardware appliances, and any disruption in the availability or quality of these components could delay shipments of our appliances and damage our channel partner or end-customer relationships.

We rely on a limited number of suppliers, and in some cases single-source suppliers, for several key hardware components of our appliances. These components are generally purchased on a purchase order basis through Super Micro and we do not have long-term supply contracts with our suppliers. Our reliance on key suppliers exposes us to risks, including reduced control over product quality, production costs, timely delivery and capacity. It also exposes us to the potential inability to obtain an adequate supply of required components because we do not have long-term supply commitments, and replacing some of these components would require a product qualification process that could take months to complete. Furthermore, we extensively test and qualify the components that are used in our appliances to ensure that they meet certain quality and performance specifications. If our supply of certain components is disrupted or delayed, or if we need to replace our existing suppliers, there can be no assurance that additional supplies or components can serve as adequate replacements for the existing components, will be available when required or that supplies will be available on terms that are favorable to us, and we may be required to modify our solutions to interoperate with the replacement components. Any of these developments could extend our lead times, increase the costs of our components or costs of product development and adversely affect our business, operating results and financial condition.

We generally maintain minimal inventory for repairs and a limited number of evaluation and demonstration units, and acquire components only as needed. We do not enter into long-term supply contracts for these components. As a result, our ability to respond to channel partner or end-customer orders efficiently may be constrained by the then-current availability, terms and pricing of these components. The technology industry has experienced component shortages and delivery delays in the past, and we may experience shortages or delays of critical components in the future as a result of strong demand in the industry or other factors. If we or our suppliers inaccurately forecast demand for our solutions or we ineffectively manage our enterprise resource planning processes, our suppliers may have inadequate inventory, which could increase the prices we must pay for substitute components or result in our inability to meet demand for our solutions, as well as damage our channel partner or end-customer relationships.

If the suppliers of the components of our hardware appliances increase prices of components, experience delays, disruptions, capacity constraints, quality control problems in their manufacturing operations or adverse changes to their financial condition, our ability to ship appliances to our channel partners or end-customers in a timely manner and at competitive prices could be impaired and our competitive position and reputation could be adversely affected. Qualifying a new component is expensive and time-consuming. If we are required to change key suppliers or assume internal manufacturing operations, we may lose revenue and damage our channel partner or end-customer relationships which could adversely impact our revenue and operating results.

We rely upon third parties for the warehousing and delivery of our appliances and replacement parts for support, and we therefore have less control over these functions than we otherwise would.

We outsource the warehousing and delivery of all of our appliances to a third-party logistics provider for worldwide fulfillment. In addition, some of our support offerings commit us to replace defective parts in our appliances as quickly as four hours after the initial customer support call is received, which we satisfy by storing replacement parts inventory in various third-party supply depots in strategic locations. As a result of relying on third parties, we have reduced control over shipping and logistics, quality control, security and the supply of replacement parts for support. Consequently, we may be subject to shipping disruptions as well as failures to provide adequate support for reasons that are outside of our direct control. If we are unable to have our appliances or replacement products shipped in a timely manner, end-customers may cancel their contracts with us, we may suffer reputational harm and our business, operating results and prospects may be adversely affected.

We rely on our key technical, sales and management personnel to grow our business, and the loss of one or more key employees or the inability to attract and retain qualified personnel could harm our business.

Our success and future growth depends to a significant degree on the skills and continued services of our key technical, sales and management personnel. In particular, we are highly dependent on the services of Dheeraj Pandey, our Chief Executive Officer and Chairman, who is critical to the development of our technology, future vision and strategic direction. We rely on our leadership team in the areas of operations, security, marketing, sales, support and general and administrative functions, and on individual contributors on our research and development team. All of our employees work for us on an at-will basis, and we could experience difficulty in retaining members of our senior management team or other key personnel. We do not have “key person” life insurance policies that cover any of our officers or other key employees. The loss of the services of any of our key employees could disrupt our operations, delay the development and introduction of our solutions, and negatively impact our business, operating results and prospects.

Our future success also depends on our ability to continue to attract, integrate and retain highly skilled personnel, especially skilled sales and engineering employees. Competition for highly skilled personnel is frequently intense, especially in the San Francisco Bay Area where we are headquartered.

Volatility or lack of performance in our stock price may also affect our ability to attract and retain our key employees. Also, many of our employees have become, or will soon become, vested in a substantial amount of equity awards which gives them a substantial amount of personal wealth. This may make it more difficult for us to retain and motivate these employees, and this wealth could affect their decision about whether or not they continue to work for us.

Any failure to successfully attract, integrate or retain qualified personnel to fulfill our current or future needs may negatively impact our growth. We cannot assure you that we will be able to successfully attract or retain qualified personnel. Our inability to attract and retain the necessary personnel could adversely affect our business, operating results and financial condition.

Our ability to sell our solutions is dependent in part on ease of use and the quality of our technical support, and any failure to offer high-quality technical support would harm our business, operating results and financial condition.

Once our solutions are deployed, our end-customers depend on our support organization to resolve any technical issues relating to our solutions. Furthermore, because of the emerging nature of our solutions, our support organization often provides support for and troubleshoots issues for products of other vendors running on our solutions, even if the issue is unrelated to our solutions. There is no assurance that we can solve issues unrelated to our solutions, or that vendors whose products run on our

solutions will not challenge our provision of technical assistance to their products. Our ability to provide effective support is largely dependent on our ability to attract, train and retain personnel who are not only qualified to support our solutions, but also well versed in some of the primary applications and hypervisors that our end-customers run on our solutions. Furthermore, as we expand our operations internationally, our support organization will face additional challenges, including those associated with delivering support, training and documentation in languages other than English. Any failure to maintain high-quality installation and technical support, or a market perception that we do not maintain high-quality support, could harm our reputation, adversely affect our ability to sell our solutions to existing and prospective end-customers, and could harm our business, operating results and financial condition.

Our solutions are highly technical and may contain undetected defects, which could cause data unavailability, loss or corruption that might, in turn, result in liability to our end-customers and harm to our reputation and business.

Our solutions are highly technical and complex and are often used to store information critical to our end-customers' business operations. Our solutions may contain undetected errors, defects or security vulnerabilities that could result in data unavailability, unauthorized access to, loss, corruption or other harm to our end-customers' data. Some errors or defects in our solutions may only be discovered after they have been installed and used by end-customers. We previously conducted an in-field replacement of equipment manufactured by our previous outsourced manufacturer, and may be required to do so again in the future. If any hardware or software errors, defects or security vulnerabilities are discovered in our solutions after commercial release, a number of negative effects in our business could result, including:

- lost revenue or lost end-customers;
- increased costs, including warranty expense and costs associated with end-customer support as well as development costs to remedy the errors or defects;
- delays, cancellations, reductions or rescheduling of orders or shipments;
- platform returns or discounts; and
- damage to our reputation and brand.

In addition, we could face legal claims for breach of contract, product liability, tort or breach of warranty. While many of our contracts with end-customers contain provisions relating to warranty disclaimers and liability limitations, these provisions might not be upheld or might not provide adequate protection if we face such legal claims. Defending a lawsuit, regardless of its merit, could be costly and may divert management's attention and adversely affect the market's perception of us and our solutions. In addition, our business liability insurance coverage could prove inadequate with respect to a claim and future coverage may be unavailable on acceptable terms or at all. These product-related issues could result in claims against us and our business could be adversely impacted.

Our business depends, in part, on sales to government organizations, and significant changes in the contracting or fiscal policies of such government organizations could have an adverse effect on our business and operating results.

We derive a portion of our revenue from contracts with federal, state, local and foreign governments, and we believe that the success and growth of our business will continue to depend on our successful procurement of government contracts. However, demand is often unpredictable from government organizations, and there can be no assurance that we will be able to maintain or grow our revenue from the public sector. Government agencies are subject to budgetary processes and expenditure constraints that could lead to delays or decreased capital expenditures in IT spending, particularly in light of continued uncertainties about government spending levels. The budget and approval process for government agencies also experiences a longer sales cycle relative to our other end-customers. If government organizations reduce or shift their capital spending patterns, our

business, operating results and prospects may be harmed. Factors that could impede our ability to maintain or increase the amount of revenue derived from government contracts, include:

- public sector budgetary cycles and funding authorizations;
- changes in fiscal or contracting policies;
- decreases in available government funding;
- changes in government programs or applicable requirements;
- the adoption of new laws or regulations or changes to existing laws or regulations;
- potential delays or changes in the government appropriations or other funding authorization processes; and
- higher expenses associated with diligence and qualifying or maintaining qualification as a government vendor.

The occurrence of any of the foregoing could cause governments and governmental agencies to delay or refrain from purchasing our solutions in the future or otherwise have an adverse effect on our business, operating results and prospects.

Third-party claims that we are infringing intellectual property, whether successful or not, could subject us to costly and time-consuming litigation or expensive licenses, and our business could be harmed.

A number of companies, both within and outside of the enterprise computing infrastructure industry, hold a large number of patents covering aspects of storage, servers and virtualization products. In addition to these patents, participants in this industry typically also protect their technology through copyrights and trade secrets. As a result, there is frequent litigation based on allegations of infringement, misappropriation or other violations of intellectual property rights. We have received, and in the future may receive, inquiries from other intellectual property holders and may become subject to claims that we infringe their intellectual property rights, particularly as we expand our presence in the market and face increasing competition. In this regard, we have had correspondence with International Business Machines Corporation, or IBM, regarding their allegations that we infringe at least five U.S. patents held by IBM. Based upon our review of these claims, we believe we have meritorious defenses to the allegations, although there can be no assurance that we will be successful in defending against these allegations or reaching a business resolution that is satisfactory to us. In addition, parties may claim that the names and branding of our solution infringe their trademark rights in certain countries or territories. If such a claim were to prevail we may have to change the names and branding of our solution in the affected territories and we could incur other costs.

We currently have a number of agreements in effect pursuant to which we have agreed to defend, indemnify and hold harmless our end-customers, suppliers and channel and other partners from damages and costs which may arise from the infringement by our solutions of third-party patents or other intellectual property rights. The scope of these indemnity obligations varies, but may, in some instances, include indemnification for damages and expenses, including attorneys' fees. Our insurance may not cover all intellectual property infringement claims. A claim that our solutions infringe a third party's intellectual property rights, even if untrue, could harm our relationships with our end-customers, may deter future end-customers from purchasing our solutions and could expose us to costly litigation and settlement expenses. Even if we are not a party to any litigation between a customer and a third party relating to infringement by our solutions, an adverse outcome in any such litigation could make it more difficult for us to defend our solutions against intellectual property infringement claims in any subsequent litigation in which we are a named party. Any of these results could harm our brand and operating results.

Our defense of intellectual property rights claims brought against us or our end-customers, suppliers and channel partners, with or without merit, could be time-consuming, expensive to litigate or settle, divert management resources and attention and force us to acquire intellectual property rights and licenses, which may involve substantial royalty or other payments. Further, a party making such a claim, if successful, could secure a judgment that requires us to pay substantial damages. An adverse determination also could invalidate our intellectual property rights and prevent us from offering our solutions to our end-customers and may require that we procure or develop substitute solutions that do not infringe, which could require significant effort and expense. We may have to seek a license for the technology, which may not be available on acceptable terms or at all, and as a result may significantly increase our operating expenses or require us to restrict our business activities in one or more respects. Any of these events could adversely affect our business, operating results, financial condition and prospects.

The success of our business depends in part on our ability to protect and enforce our intellectual property rights.

We rely on a combination of patent, copyright, service mark, trademark and trade secret laws, as well as confidentiality procedures and contractual restrictions, to establish and protect our proprietary rights, all of which provide only limited protection. We cannot assure you that any patents will be issued with respect to our currently pending patent applications in a manner that gives us adequate defensive protection or competitive advantages, if at all, or that any patents issued to us will not be challenged, invalidated or circumvented. We have filed for patents in the United States and in certain international jurisdictions, but such protections may not be available in all countries in which we operate or in which we seek to enforce our intellectual property rights, or may be difficult to enforce in practice. Our currently issued patents and any patents that may be issued in the future with respect to pending or future patent applications may not provide sufficiently broad protection or they may not prove to be enforceable in actions against alleged infringers. We cannot be certain that the steps we have taken will prevent unauthorized use of our technology or the reverse engineering of our technology. Moreover, others may independently develop technologies that are competitive to ours or infringe our intellectual property.

Protecting against the unauthorized use of our intellectual property, solutions and other proprietary rights is expensive and difficult, particularly internationally. Litigation may be necessary in the future to enforce or defend our intellectual property rights or to determine the validity and scope of the proprietary rights of others. Any such litigation could result in substantial costs and diversion of management resources, either of which could harm our business, operating results and financial condition. Further, many of our current and potential competitors have the ability to dedicate substantially greater resources to defending intellectual property infringement claims and to enforcing their intellectual property rights than we have. Attempts to enforce our rights against third parties could also provoke these third parties to assert their own intellectual property or other rights against us, or result in a holding that invalidates or narrows the scope of our rights, in whole or in part. Effective patent, trademark, service mark, copyright and trade secret protection may not be available in every country in which our solutions are available. An inability to adequately protect and enforce our intellectual property and other proprietary rights could seriously harm our business, operating results, financial condition and prospects.

We may become subject to claims that our employees have wrongfully disclosed or we have wrongfully used proprietary information of our employees' former employers. These claims may be costly to defend and if we do not successfully do so, our business could be harmed.

Many of our employees were previously employed at current or potential competitors. Although we have processes to ensure that our employees do not use the proprietary information or know-how of others in their work for us and we are not currently subject to any claims that they have done so, we

may in the future become subject to claims that these employees have divulged, or we have used, proprietary information of these employees' former employers. Litigation may be necessary to defend against these claims. If we fail in defending such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights or personnel. A loss of key research personnel or their work product could hamper our ability to develop new solutions and features for existing solutions, which could severely harm our business. Even if we are successful in defending against these claims, litigation efforts are costly, time-consuming and a significant distraction to management.

Failure to comply with laws and regulations applicable to our business could subject us to fines and penalties and could also cause us to lose end-customers in the public sector or negatively impact our ability to contract with the public sector.

Our business is subject to regulation by various federal, state, local and foreign governmental agencies, including agencies responsible for monitoring and enforcing employment and labor laws, workplace safety, product safety, environmental laws, consumer protection laws, anti-bribery laws, import/export controls, federal securities laws and tax laws and regulations. In certain jurisdictions, these regulatory requirements may be more stringent than in the United States. Noncompliance with applicable regulations or requirements could subject us to investigations, sanctions, mandatory product recalls, enforcement actions, disgorgement of profits, fines, damages and civil and criminal penalties or injunctions. If any governmental sanctions are imposed, or if we do not prevail in any possible civil or criminal litigation, our business, operating results and financial condition could be adversely affected. In addition, responding to any action will likely result in a significant diversion of management's attention and resources and an increase in professional fees. Enforcement actions and sanctions could harm our business, operating results and financial condition.

In addition, we must comply with laws and regulations relating to the formation, administration and performance of contracts with the public sector, including U.S. federal, state and local governmental organizations, which affect how we and our channel partners do business with governmental agencies. Selling our solutions to the U.S. government, whether directly or through channel partners, also subjects us to certain regulatory and contractual requirements. Failure to comply with these requirements by either us or our channel partners could subject us to investigations, fines and other penalties, which could have an adverse effect on our business, operating results, financial condition and prospects. As an example, the U.S. Department of Justice, or DOJ, and the General Services Administration, or GSA, have in the past pursued claims against and financial settlements with IT vendors under the False Claims Act and other statutes related to pricing and discount practices and compliance with certain provisions of GSA contracts for sales to the federal government. The DOJ and GSA continue to actively pursue such claims. Violations of certain regulatory and contractual requirements could also result in us being suspended or debarred from future government contracting. Any of these outcomes could have an adverse effect on our revenue, operating results, financial condition and prospects.

These laws and regulations impose added costs on our business, and failure to comply with these or other applicable regulations and requirements, including non-compliance in the past, could lead to claims for damages from our channel partners, penalties, termination of contracts, loss of exclusive rights in our intellectual property, and temporary suspension or permanent debarment from government contracting. Any such damages, penalties, disruptions or limitations in our ability to do business with the public sector could have an adverse effect on our business and operating results.

Failure to comply with anticorruption and anti-money laundering laws, including the U.S. Foreign Corrupt Practices Act of 1977, as amended, or the FCPA, and similar laws associated with our activities outside of the United States could subject us to penalties and other adverse consequences.

We are subject to the FCPA, the U.S. domestic bribery statute contained in 18 U.S.C. § 201, the U.S. Travel Act, the USA PATRIOT Act, the United Kingdom Bribery Act of 2010, or the U.K. Bribery Act, and possibly other anti-bribery and anti-money laundering laws in countries in which we conduct activities. We face significant risks if we fail to comply with the FCPA and other anticorruption laws that prohibit companies and their employees and third-party intermediaries from authorizing, offering or providing, directly or indirectly, improper payments or benefits to foreign government officials, political parties and private-sector recipients for the purpose of obtaining or retaining business, directing business to any person or securing any advantage. In many foreign countries, particularly in countries with developing economies, it may be a local custom that businesses engage in practices that are prohibited by the FCPA or other applicable laws and regulations. In addition, we use various third parties to sell our solutions and conduct our business abroad. We or our third-party intermediaries may have direct or indirect interactions with officials and employees of government agencies or state-owned or affiliated entities and we can be held liable for the corrupt or other illegal activities of these third-party intermediaries, our employees, representatives, contractors, partners, and agents, even if we do not explicitly authorize such activities. We continue to implement our FCPA/anti-corruption compliance program and cannot assure you that all of our employees and agents, as well as those companies to which we outsource certain of our business operations, will not take actions in violation of our policies and applicable law, for which we may be ultimately held responsible.

In this regard, in June 2015, we learned of an instance in 2013 in which an individual who was then participating in our consulting partner referral program in Europe engaged in conduct that an end-customer, which was a consortium of Dutch municipalities and for which such individual also had a consulting relationship, contended was improper. That consortium has not indicated that it believes that we engaged in improper conduct and has subsequently purchased additional products from us. We have reviewed the matter and believe that this instance was isolated and does not reflect any systemic problem. We have implemented and continue to implement several remedial actions to reduce the likelihood of instances such as this, including among other things, terminating the referral program and providing training programs for all of our employees.

Any violation of the FCPA, other applicable anticorruption laws, and anti-money laundering laws could result in whistleblower complaints, adverse media coverage, investigations, loss of export privileges, severe criminal or civil sanctions and, in the case of the FCPA, suspension or debarment from U.S. government contracts, which could have a material and adverse effect on our reputation, business, operating results and prospects. In addition, responding to any enforcement action may result in a materially significant diversion of management's attention and resources and significant defense costs and other professional fees.

We are subject to governmental export and import controls that could impair our ability to compete in international markets or subject us to liability if we violate the controls.

Our solutions are subject to United States export controls, including the Export Administration Regulations and economic sanctions administered by the Office of Foreign Assets Control, and we incorporate encryption technology into certain of our solutions. These encryption products and the underlying technology may be exported outside of the United States only with the required export authorizations, including by license, a license exception or other appropriate government authorizations, including the filing of an encryption registration.

Furthermore, our activities are subject to the U.S. economic sanctions laws and regulations that prohibit the shipment of certain products and services without the required export authorizations,

including to countries, governments and persons targeted by U.S. embargoes or sanctions. Obtaining the necessary export license or other authorization for a particular sale may be time-consuming and may result in the delay or loss of sales opportunities even if the export license ultimately may be granted. While we take precautions to prevent our solutions from being exported in violation of these laws, including obtaining authorizations for our encryption products, implementing IP address blocking and screenings against U.S. government and international lists of restricted and prohibited persons, we cannot guarantee that the precautions we take will prevent violations of export control and sanctions laws. Violations of U.S. sanctions or export control laws can result in significant fines or penalties and possible incarceration for responsible employees and managers could be imposed for criminal violations of these laws.

We also note that if our channel partners fail to obtain appropriate import, export or re-export licenses or permits, we may also be adversely affected, through reputational harm as well as other negative consequences including government investigations and penalties. We presently incorporate export control compliance requirements to our channel partner agreements; however, no assurance can be given that our channel partners will be able to comply with such requirements.

Also, various countries, in addition to the United States, regulate the import and export of certain encryption and other technology, including import and export licensing requirements, and have enacted laws that could limit our ability to distribute our solutions or could limit our end-customers' ability to implement our solutions in those countries. Changes in our solutions or future changes in export and import regulations may create delays in the introduction of our solutions in international markets, prevent our end-customers with international operations from deploying our solutions globally or, in some cases, prevent the export or import of our solutions to certain countries, governments, or persons altogether. From time to time, various governmental agencies have proposed additional regulation of encryption technology, including the escrow and government recovery of private encryption keys. Any change in export or import regulations, economic sanctions or related legislation, or change in the countries, governments, persons or technologies targeted by such regulations, could result in decreased use of our solutions by, or in our decreased ability to export or sell our solutions to, existing or potential end-customers with international operations. Any decreased use of our solutions or limitation on our ability to export or sell our solutions would adversely affect our business, operating results and prospects.

Our international operations expose us to additional risks, and failure to manage those risks could adversely affect our business, operating results and cash flows.

Increasingly, we derive a significant portion of our revenue from end-customers and channel partners outside the United States. We derived 37%, 33% and 39% of our total revenue from our international customers based on bill-to-location for fiscal 2016, fiscal 2015 and fiscal 2014, respectively. We are continuing to adapt to and develop strategies to address international markets but there is no guarantee that such efforts will have the desired effect. As of July 31, 2016, approximately 42% of our full-time employees were located outside of the United States. We expect that our international activities will continue to grow over the foreseeable future as we continue to pursue opportunities in international markets, which will require significant management attention and financial resources. We are subject to risks associated with having significant worldwide operations, including:

- business practices may differ from those in the United States and may require us in the future to include terms other than our standard terms in customer, channel partner, employee, consultant and other contracts;
- political, economic and social instability around the world;

- greater difficulty in enforcing contracts, judgments and arbitration awards in international courts, and in collecting accounts receivable and longer payment and collection periods;
- greater risk of unexpected changes in regulatory practices, tariffs, and tax laws and treaties;
- risks associated with trade restrictions and foreign legal requirements, including the importation, certification and localization of our solutions required in foreign countries;
- greater risk of a failure of foreign employees, partners, distributors and resellers to comply with both U.S. and foreign laws, including antitrust regulations, the FCPA, the U.K. Bribery Act, U.S. or foreign sanctions regimes and export or import control laws, and any trade regulations ensuring fair trade practices;
- heightened risk of unfair or corrupt business practices in certain geographies and of improper or fraudulent sales arrangements that may impact financial results and result in restatements of, or irregularities in, financial statements;
- requirements to comply with foreign privacy, data protection and information security laws and regulations and the risks and costs of non-compliance;
- reduced or uncertain protection for intellectual property rights in some countries;
- impediments to the flow of foreign exchange capital payments and receipts due to exchange controls instituted by certain foreign governments;
- increased expenses incurred in establishing and maintaining office space and equipment for our international operations;
- difficulties in managing and staffing international offices and increased travel, infrastructure and legal compliance costs associated with multiple international locations;
- greater difficulty in identifying, attracting and retaining local experienced personnel, and the costs and expenses associated with such activities;
- the challenge of managing a development team in geographically disparate locations;
- management communication and integration problems resulting from cultural and geographic dispersion;
- differing employment practices and labor relations issues;
- fluctuations in exchange rates between the U.S. dollar and foreign currencies in markets where we do business; and
- treatment of revenue from international sources for tax purposes and changes in tax laws, regulations or official interpretations, including being subject to foreign tax laws and being liable for paying withholding, income or other taxes in foreign jurisdictions.

As we expand our business globally, our success will depend, in large part, on our ability to anticipate and effectively manage these risks. These factors and other factors could harm our ability to gain future international revenue and, consequently, materially impact our business, operating results and financial condition. The expansion of our existing international operations and entry into additional international markets will require significant management attention and financial resources. Our failure to successfully manage our international operations and the associated risks effectively could limit the future growth of our business. Additionally, failure to effectively manage this growth may result in reduced international revenue relative to U.S. revenue, and as a result, a higher effective tax rate due to the overall percentage of total revenue from U.S. customers relative to international customers.

A number of our solutions incorporate software provided under open source licenses which may restrict or impose certain obligations on how we use or distribute our solutions or subject us to various risks and challenges, which could result in increased development expenses, delays or disruptions to the release or distribution of those solutions, inability to protect our intellectual property rights and increased competition.

Certain significant components of our solutions incorporate or are based upon open source software, and we may incorporate open source software into other solutions in the future. Such open source software is generally licensed under open source licenses, including, for example, the GNU General Public License, the GNU Lesser General Public License, "Apache-style" licenses, "BSD-style" licenses and other open source licenses. The use of open source software subjects us to a number of risks and challenges, including:

- If open source software programmers, most of whom we do not employ, do not continue to develop and enhance open source technologies, our development expenses could be increased and our product release and upgrade schedules could be delayed.
- Open source software is open to further development or modification by anyone. As a result, others may develop such software to be competitive with our platform, and may make such competitive software available as open source. It is also possible for competitors to develop their own solutions using open source software, potentially reducing the demand for, and putting price pressure on, our solutions.
- The licenses under which we license certain types of open source software may require that, if we modify the open source software we receive, we are required to make such modified software and other related proprietary software of ours publicly available without cost and on the same terms. Accordingly, we monitor our use of open source software in an effort to avoid subjecting our proprietary software to such conditions and others we do not intend. Although we believe that we have complied with our obligations under the various applicable licenses for open source software that we use, our processes used to monitor how open source software is used could be subject to error. In addition, there is little or no legal precedent governing the interpretation of terms in most of these licenses. Therefore, any improper usage of open source could result in unanticipated obligations regarding our solutions and technologies, which could have an adverse impact on our intellectual property rights and our ability to derive revenue from solutions incorporating the open source software.
- If an author or other third party that distributes such open source software were to allege that we had not complied with the conditions of one or more of these licenses, we could be required to incur legal expenses defending against such allegations, or engineering expenses in developing a substitute solution.

If we are unable to successfully address the challenges of integrating offerings based upon open source technology into our business, our business and operating results may be adversely affected and our development costs may increase.

Our failure to raise additional capital or generate the significant capital necessary to expand our operations and invest in new solutions could reduce our ability to compete and could harm our business.

We expect that our existing cash and cash equivalents, and short-term investments, together with the net proceeds that we receive in this offering, will be sufficient to meet our anticipated cash needs for working capital and capital expenditures for at least the next 12 months. We may, however, need to raise additional funds in the future, and we may not be able to obtain those funds on favorable terms, or at all. If we raise additional equity financing, our stockholders may experience significant dilution of their

ownership interests and the per share value of our Class A common stock could decline. Furthermore, if we engage in debt financing, the holders of debt would have priority over the holders of our common stock, and we may be required to accept terms that restrict our ability to incur additional indebtedness. We may also be required to take other actions, any of which could harm our business and operating results. If we are unable to obtain adequate financing or financing on terms satisfactory to us, when we require it, our ability to continue to support our business growth and to respond to business challenges could be significantly limited, and our business, operating results, financial condition and prospects could be adversely affected.

Adverse economic conditions or reduced datacenter spending may adversely impact our revenues and profitability.

Our operations and performance depend in part on worldwide economic conditions and the impact these conditions have on levels of spending on enterprise computing technology. Our business depends on the overall demand for enterprise computing infrastructure and on the economic health and general willingness of our current and prospective end-customers to purchase our solutions. Weak economic conditions, or a reduction in enterprise computing spending, would likely adversely affect our business, operating results and financial condition in a number of ways, including by reducing sales, lengthening sales cycles and lowering prices for our solutions.

If we fail to maintain an effective system of internal controls, our ability to produce timely and accurate financial statements or comply with applicable regulations could be impaired.

As a public company, we will be subject to the reporting requirements of the Securities Exchange Act of 1934, as amended, or Exchange Act, the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, and the rules and regulations of the NASDAQ Stock Market. We expect that the requirements of these rules and regulations will continue to increase our legal, accounting and financial compliance costs, make some activities more difficult, time-consuming and costly, and place significant strain on our personnel, systems and resources.

The Sarbanes-Oxley Act requires, among other things, that we maintain effective disclosure controls and procedures and internal control over financial reporting. We are continuing to develop and refine our disclosure controls, internal control over financial reporting and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we will file with the Securities and Exchange Commission, or SEC, is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms, and that information required to be disclosed in reports under the Exchange Act is accumulated and communicated to our principal executive and financial officers.

Our current controls and any new controls that we develop may become inadequate because of changes in conditions in our business. Further, weaknesses in our internal controls may be discovered in the future. Any failure to develop or maintain effective controls, or any difficulties encountered in their implementation or improvement, could harm our operating results or cause us to fail to meet our reporting obligations and may result in a restatement of our financial statements for prior periods. Any failure to implement and maintain effective internal controls also could adversely affect the results of periodic management evaluations and annual independent registered public accounting firm attestation reports regarding the effectiveness of our internal control over financial reporting that we are required to include in our periodic reports we will file with the SEC under Section 404 of the Sarbanes-Oxley Act. Ineffective disclosure controls and procedures and internal control over financial reporting could also cause investors to lose confidence in our reported financial and other information, which would likely have a negative effect on the market price of our Class A common stock.

In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, we have expended and anticipate that we will continue to expend

significant resources, including accounting-related costs, and provide significant management oversight. Any failure to maintain the adequacy of our internal controls, or consequent inability to produce accurate financial statements on a timely basis, could increase our operating costs and could materially impair our ability to operate our business. In the event that our internal controls are perceived as inadequate or that we are unable to produce timely or accurate financial statements, investors may lose confidence in our operating results and our stock price could decline. In addition, if we are unable to continue to meet these requirements, we may not be able to remain listed on The NASDAQ Global Select Market.

We are not currently required to comply with the SEC rules that implement Sections 302 and 404 of the Sarbanes-Oxley Act, and are therefore not required to make a formal assessment of the effectiveness of our internal controls over financial reporting for that purpose. Upon becoming a public company, we will be required to comply with certain of these rules, which will require management to certify financial and other information in our quarterly and annual reports and provide an annual management report on the effectiveness of our internal control over financial reporting commencing with our second annual report on Form 10-K. To comply with the requirements of being a public company, we will need to undertake various actions, such as implementing new internal controls and procedures and hiring accounting or internal audit staff.

Our independent registered public accounting firm is not required to formally attest to the effectiveness of our internal control over financial reporting until after we are no longer an emerging growth company. At such time, our independent registered public accounting firm may issue a report that is adverse in the event it is not satisfied with the level at which our controls are documented, designed or operating. Any failure to maintain effective disclosure controls and internal control over financial reporting could have a material and adverse effect on our business and operating results and could cause a decline in the price of our Class A common stock.

We are exposed to fluctuations in currency exchange rates, which could negatively affect our operating results.

Our sales contracts are denominated in U.S. dollars, and therefore, substantially all of our revenue is not subject to foreign currency risk. However, a strengthening of the U.S. dollar could increase the real cost of our solutions to our end-customers outside of the United States, which could adversely affect our financial condition and operating results. In addition, an increasing portion of our operating expenses is incurred outside the United States, is denominated in foreign currencies such as the Euro, the Pound Sterling, the Indian Rupee, the Canadian Dollar and the Australian Dollar, and is subject to fluctuations due to changes in foreign currency exchange rates. If we become more exposed to currency fluctuations and are not able to successfully hedge against the risks associated with currency fluctuations, our operating results could be adversely affected.

Taxing authorities may successfully assert that we should have collected or in the future should collect sales and use, value added or similar taxes, and we could be subject to liability with respect to past or future sales, which could adversely affect our operating results.

We do not collect sales and use, value added or similar taxes in all jurisdictions in which we have sales, and we have been advised that such taxes are not applicable to our products and services in certain jurisdictions. Sales and use, value added and similar tax laws and rates vary greatly by jurisdiction. Certain jurisdictions in which we do not collect such taxes may assert that such taxes are applicable, which could result in tax assessments, penalties and interest, to us or our end-customers for the past amounts, and we may be required to collect such taxes in the future. If we are unsuccessful in collecting such taxes from our end-customers, we could be held liable for such costs, which may adversely affect our operating results.

Our international operations may subject us to potential adverse tax consequences.

We are expanding our international operations and staff to better support our growth into the international markets. Our corporate structure and associated transfer pricing policies contemplate the business flows and future growth into the international markets, and consider the functions, risks and assets of the various entities involved in the intercompany transactions. The amount of taxes we pay in different jurisdictions may depend on the application of the tax laws of the various jurisdictions, including the United States, to our international business activities, changes in tax rates, new or revised tax laws or interpretations of existing tax laws and policies and our ability to operate our business in a manner consistent with our corporate structure and intercompany arrangements. The taxing authorities of the jurisdictions in which we operate may challenge our methodologies for pricing intercompany transactions pursuant to the intercompany arrangements or disagree with our determinations as to the income and expenses attributable to specific jurisdictions. If such a challenge or disagreement were to occur, and our position was not sustained, we could be required to pay additional taxes, interest and penalties, which could result in one-time tax charges, higher effective tax rates, reduced cash flows and lower overall profitability of our operations. Our financial statements could fail to reflect adequate reserves to cover such a contingency.

Our business is subject to the risks of earthquakes, fire, floods and other natural catastrophic events, and interruptions by man-made problems, such as network security breaches, computer viruses or terrorism.

A significant natural disaster, such as an earthquake, fire, flood or significant power outage could have an adverse impact on our business and operating results. Despite the implementation of network security measures, our networks also may be vulnerable to computer viruses, break-ins and similar disruptions from unauthorized tampering with our solutions. Both our corporate headquarters and our sole contract manufacturer are located in the San Francisco Bay Area, a region known for seismic activity. In addition, natural disasters, acts of terrorism or war could cause disruptions in our or our end-customers' or channel partners' businesses, our suppliers' and manufacturers' operations or the economy as a whole. We also rely on IT systems to communicate among our workforce and with third parties. Any disruption to our communications, whether caused by a natural disaster or by manmade problems, such as power disruptions, could adversely affect our business. We do not have a formal disaster recovery plan or policy in place and do not currently require that our manufacturing partners have such plans or policies in place. To the extent that any such disruptions result in delays or cancellations of orders or impede our suppliers' or our manufacturers' ability to timely deliver our solutions and product components, or the deployment of our solutions, our business, operating results and financial condition would be adversely affected. We do maintain what we believe are commercially reasonable levels of business interruption insurance. However, such insurance may not adequately cover our losses in the event of a significant disruption in our business.

If our networks, computer systems or software solutions are breached or unauthorized access to customer data otherwise occurs, our enterprise and our solutions may be perceived as insecure, we may lose existing end-customers or fail to attract new end-customers, our reputation may be damaged and we may incur significant liabilities.

We store, transmit and process our end-customers' data. If any unauthorized access to or security breach of our solutions occurs, or is believed to have occurred, such an event or perceived event could result in the loss of data, loss of intellectual property or trade secrets, loss of business, severe reputational or brand damage adversely affecting end-customer or investor confidence, regulatory investigations and orders, litigation, indemnity obligations, damages for contract breach, and penalties for violation of privacy, data protection and other applicable laws, regulations or contractual obligations. We may also be subject to significant costs for remediation that may include liability for stolen assets or

information and repair of system damage that may have been caused or incentives offered to end-customers or other business partners in an effort to maintain business relationships after a breach and other liabilities. Additionally, any such event or perceived event could impact our reputation, harm customer confidence, hurt our sales and expansion into new markets or cause us to lose existing end-customers. We could be required to expend significant capital and other resources to alleviate problems caused by such actual or perceived breaches and to remediate our systems, we could be exposed to a risk of loss, litigation or regulatory action and possible liability, and our ability to operate our business may be impaired. Additionally, actual, potential or anticipated attacks may cause us to incur increasing costs, including costs to deploy additional personnel and protection technologies, train employees and engage third-party experts and consultants.

Additionally, we depend upon our employees to appropriately handle confidential data and deploy our IT resources in a safe and secure fashion that does not expose our network systems, or those of our end-customers, to security breaches and the loss of data. Accordingly, if our cybersecurity systems and measures or those of our contractors, partners and vendors fail to protect against unauthorized access, sophisticated cyberattacks and the mishandling of data by our employees, contractors, partners or vendors, our business and prospects could be adversely affected. We could lose or suffer the exposure of sensitive data regarding our business, including intellectual property or other proprietary data, or personally identifiable information of our end-customers, employees and business partners; encounter disruptions in our communications systems that impair our ability to conduct our business operations; and experience degradation in our ability to process customer orders or deliver solutions, affecting our distribution channels and delaying our revenue recognition. Likewise, security vulnerabilities could be exploited or introduced into our solutions, thereby damaging the reputation and perceived reliability and security of our products and services and potentially making the data systems of our end-customers vulnerable to further data loss and cyber incidents.

In addition, if the security measures of our end-customers are compromised, even without any actual compromise of our own systems or of our solutions used by such end-customers, we may face negative publicity or reputational harm if our end-customers or anyone else incorrectly attributes the blame for such security breaches to us or our solutions. If end-customers believe that our solutions do not provide adequate security for the storage of personal or other sensitive or proprietary information or the transmission of such information over the internet, our business will be harmed. End-customers' concerns about security or privacy may deter them from using our solutions for activities that involve personal or other sensitive information, which may significantly affect our business and operating results.

Because the techniques used and vulnerabilities exploited to obtain unauthorized access or to sabotage systems change frequently and generally are not identified until they are launched against a target, we may be unable to anticipate these techniques or vulnerabilities or implement adequate preventative measures. We may also experience security breaches that may remain undetected for an extended period.

We are subject to governmental regulation and other legal obligations, particularly related to privacy, data protection and information security, and our actual or perceived failure to comply with such obligations could adversely affect our business and operating results. Compliance with such laws could also impair our efforts to maintain and expand our end-customer base, and thereby decrease our revenue.

Personal privacy, data protection and information security are significant issues in the United States and the other jurisdictions where we offer our solutions. The regulatory framework for privacy and security issues worldwide is rapidly evolving and is likely to remain uncertain for the foreseeable future. Our handling of data is subject to a variety of laws and regulations, including regulation by

various government agencies, including the U.S. Federal Trade Commission, or FTC, and various state, local and foreign bodies and agencies.

The U.S. federal and various state and foreign governments have adopted or proposed limitations on the collection, distribution, use and storage of personal information of individuals, including end-customers and employees. In the United States, the FTC and many state attorneys general are applying federal and state consumer protection laws to the online collection, use and dissemination of data. Additionally, many foreign countries and governmental bodies, including in Australia, the European Union, India, Japan and numerous other jurisdictions in which we operate or conduct our business, have laws and regulations concerning the collection and use of personally identifiable information obtained from their residents or by businesses operating within their jurisdiction. These laws and regulations often are more restrictive than those in the United States. Such laws and regulations may require companies to implement privacy and security policies, permit end-customers to access, correct and delete personal information stored or maintained by such companies, inform individuals of security breaches that affect their personal information, and, in some cases, obtain individuals' consent to use personally identifiable information for certain purposes. In addition, a foreign government could require that any personally identifiable information collected in a country not be disseminated outside of that country, and we are not currently equipped to comply with such a requirement. We also may find it necessary or desirable to join industry or other self-regulatory bodies or other information security- or data protection-related organizations that require compliance with their rules pertaining to information security and data protection. We also may be bound by additional, more stringent contractual obligations relating to our collection, use and disclosure of personal, financial and other data.

We also expect that there will continue to be new proposed laws, regulations and industry standards concerning privacy, data protection and information security in the United States, the European Union and other jurisdictions, and we cannot yet determine the impact such future laws, regulations and standards may have on our business. Additionally, we expect that existing laws, regulations and standards may be interpreted in new manners in the future. For example, the European Court of Justice in October 2015 issued a ruling invalidating the U.S.-EU Safe Harbor Framework, which facilitated personal data transfers to the United States in compliance with applicable EU data protection laws. Subsequently, EU and United States political authorities adopted the EU-U.S. Privacy Shield on July 12, 2016, which may provide a new mechanism for companies to transfer EU personal data to the United States. We do not rely upon the U.S.-EU Framework for our transfer of EU personal data to the United States, and it is not clear at this time whether we may rely upon the EU-U.S. Privacy Shield in the future. There remains significant regulatory uncertainty surrounding the future of data transfers from the European Union to the United States. Additionally, the European Commission recently adopted a general data protection regulation, effective in May 2018, that will supersede current EU data protection legislation, impose more stringent EU data protection requirements, and provide for greater penalties for noncompliance. Future laws, regulations, standards and other obligations, and changes in the interpretation of existing laws, regulations, standards and other obligations could impair our or our end-customers' ability to collect, use or disclose information relating to individuals, which could decrease demand for our solutions, require us to restrict our business operations, increase our costs and impair our ability to maintain and grow our end-customer base and increase our revenue.

Although we are working to comply with those federal, state and foreign laws and regulations, industry standards, contractual obligations and other legal obligations that apply to us, those laws, regulations, standards and obligations are evolving and may be modified, interpreted and applied in an inconsistent manner from one jurisdiction to another, and may conflict with one another, other requirements or legal obligations, our practices or the features of our solutions. As such, we cannot assure ongoing compliance with all such laws or regulations, industry standards, contractual

obligations and other legal obligations. Any failure or perceived failure by us to comply with federal, state or foreign laws or regulations, industry standards, contractual obligations or other legal obligations, or any actual or suspected security incident, whether or not resulting in unauthorized access to, or acquisition, release or transfer of personally identifiable information or other data, may result in governmental enforcement actions and prosecutions, private litigation, fines and penalties or adverse publicity and could cause our end-customers to lose trust in us, which could have an adverse effect on our reputation and business. Any inability to adequately address privacy and security concerns, even if unfounded, or comply with applicable laws, regulations, policies, industry standards, contractual obligations or other legal obligations could result in additional cost and liability to us, damage our reputation, inhibit sales, and adversely affect our business and operating results.

We are dependent on the continued availability of the Internet and third-party computer and communications systems.

Our ability to provide services and solutions to our end-customers depends on our ability to communicate with our end-customers through the public Internet and electronic networks that are owned and operated by third parties. In addition, in order to provide customer service and sales on-demand and promptly, our computer equipment and network servers must be functional 24 hours per day, which requires access to telecommunications facilities managed by third parties and the availability of electricity, which we do not control. A severe disruption of one or more of these networks, including as a result of utility or third-party system interruptions, could impair our ability to process information, which could impede our ability to provide services to our end-customers, harm our reputation, result in a loss of end-customers and adversely affect our business and operating results.

The forecasts of market growth included in this prospectus may prove to be inaccurate, and even if the markets in which we compete achieve the forecasted growth, we cannot assure you our business will grow at similar rates, if at all.

Growth forecasts are subject to significant uncertainty and are based on assumptions and estimates that may not prove to be accurate. The forecasts in this prospectus relating to the expected growth in the market for virtual computing platform products may prove to be inaccurate. Even if these markets experience the forecasted growth described in this prospectus, we may not grow our business at similar rates, or at all. Our growth is subject to many factors, including our success in implementing our business strategy, which is subject to many risks and uncertainties. Accordingly, the forecasts of market growth included in this prospectus should not be taken as indicative of our future growth.

Our estimates of end-customer cost savings may not be indicative of the actual benefits that end-customers experience in the future.

We have based our estimates of the cost savings that end-customers may experience on our internal models, which depend on a variety of assumptions, including publicly-available industry data, our estimates of spending on IT and our industry experience. These assumptions may turn out to be incorrect, may not reflect the specific circumstances faced by an end-customer or could change over time due to a variety of factors, including our assumptions regarding the costs of third-party equipment, software licenses, services, support offerings and IT administration may change over time, may not accurately reflect current market trends or may not accurately reflect the actual costs faced by our end-customers; the prices of our solutions may change; technological changes could render the need for some equipment obsolete; and competitors may offer more favorable pricing or bundle some components together with other products, reducing the cost of the infrastructures or solutions against which we have made our comparisons. As a result, end-customers may not experience these estimated cost savings, and the failure of many of them to do so could harm our brand or our future sales, which could harm our business.

We have expanded and may further expand through acquisitions of, or investments in, other companies, each of which may divert our management's attention, resulting in additional dilution to our stockholders and consumption of resources that are necessary to sustain and grow our business.

Our business strategy may, from time to time, include acquiring other complementary products, technologies or businesses. For example, in August 2016, we acquired Calm.io Pte. Ltd., or Calm, and in September 2016, we acquired PernixData, Inc., or PernixData. We also may enter into relationships with other businesses in order to expand our solutions, which could involve preferred or exclusive licenses, additional channels of distribution or discount pricing or investments in other companies. Negotiating these transactions can be time-consuming, difficult and expensive, and our ability to close these transactions may be subject to third-party approvals, such as government regulatory approvals, which are beyond our control. Consequently, we can make no assurance that these transactions once undertaken and announced, will close.

These kinds of acquisitions or investments may result in unforeseen operating difficulties and expenditures. In particular, we may encounter difficulties assimilating or integrating the businesses, technologies, products, personnel or operations of PernixData, Calm, or other companies that we may acquire in the future, particularly if the key personnel of the acquired business choose not to work for us. We may have difficulty retaining the customers of any acquired business or the acquired technologies or research and development expectations may prove unsuccessful. Acquisitions may also disrupt our ongoing business, divert our resources and require significant management attention that would otherwise be available for development of our business. We may not successfully evaluate or utilize the acquired technology or personnel, or accurately forecast the financial impact of an acquisition transaction, including accounting charges. Any acquisition or investment could expose us to unknown liabilities. Moreover, we cannot assure you that the anticipated benefits of any acquisition or investment would be realized or that we would not be exposed to unknown liabilities. In connection with these types of transactions, we may issue additional equity securities that would dilute our stockholders, use cash that we may need in the future to operate our business, incur debt on terms unfavorable to us or that we are unable to repay, incur large charges or substantial liabilities, encounter difficulties integrating diverse business cultures, and become subject to adverse tax consequences, substantial depreciation or deferred compensation charges. These challenges related to acquisitions or investments could adversely affect our business, operating results, financial condition and prospects.

Regulations related to conflict minerals may cause us to incur additional expenses and could limit the supply and increase the costs of certain metals used in the manufacturing of our platforms.

As a public company, we will be subject to the requirements under the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, or the Dodd-Frank Act, that will require us to diligence, disclose and report whether our solutions contain conflict minerals. The implementation of these requirements could adversely affect the sourcing, availability and pricing of the materials used in the manufacture of components used in our appliances. In addition, we will incur additional costs to comply with the disclosure requirements, including costs related to conducting diligence procedures to determine the sources of conflict minerals that may be used in or necessary to the production of our appliances and, if applicable, potential changes to appliances, processes or sources of supply as a consequence of such verification activities. It is also possible that we may face reputational harm if we determine that certain of our appliances contain minerals not determined to be conflict-free or if we are unable to alter our appliances, processes or sources of supply to avoid use of such materials.

Risks Related to this Offering and Ownership of Our Class A Common Stock

The market price of our Class A common stock may be volatile, and you could lose all or part of your investment.

There has been no public market for our Class A common stock prior to this offering. The initial public offering price for our Class A common stock will be determined through negotiations between us and the underwriters. The market price of our Class A common stock following this offering may fluctuate substantially and may be lower than the initial public offering price. The market price of our Class A common stock following this offering will depend on a number of factors, including those described in this “Risk Factors” section, many of which are beyond our control and may not be related to our operating performance. These fluctuations could cause you to lose all or part of your investment in our Class A common stock, since you might not be able to sell your shares at or above the price you paid in this offering. Factors that could cause fluctuations in the market price of our Class A common stock include the following:

- price and volume fluctuations in the overall stock market from time to time;
- volatility in the market prices and trading volumes of high technology stocks;
- changes in operating performance and stock market valuations of other technology companies generally, or those in our industry in particular;
- the expiration of market stand-off or contractual lock-up agreements and sales of shares of our Class A common stock by us or our stockholders;
- failure of financial analysts to maintain coverage of us, changes in financial estimates by any analysts who follow our company, or our failure to meet these estimates or the expectations of investors;
- the financial projections we may provide to the public, any changes in these projections or our failure to meet these projections;
- announcements by us or our competitors of new products or new or terminated significant contracts, commercial relationships or capital commitments;
- public analyst or investor reaction to our press releases, other public announcements and filings with the SEC;
- rumors and market speculation involving us or other companies in our industry;
- actual or anticipated changes or fluctuations in our operating results;
- actual or anticipated developments in our business or our competitors’ businesses or the competitive landscape generally;
- litigation involving us, our industry or both, or investigations by regulators into our operations or those of our competitors;
- developments or disputes concerning our intellectual property or our solutions, or third-party proprietary rights;
- announced or completed acquisitions of businesses or technologies by us or our competitors;
- new laws or regulations or new interpretations of existing laws or regulations applicable to our business;
- changes in accounting standards, policies, guidelines, interpretations or principles;
- any major changes in our management or our board of directors;
- general economic conditions and slow or negative growth of our markets; and
- other events or factors, including those resulting from war, incidents of terrorism or responses to these events.

In addition, the stock market in general, and the market for technology companies in particular, have experienced extreme price and volume fluctuations that have often been unrelated or disproportionate to the operating performance of those companies. Broad market and industry factors may seriously affect the market price of our Class A common stock, regardless of our actual operating performance. In addition, in the past, following periods of volatility in the overall market and the market prices of a particular company's securities, securities class action litigation has often been instituted against that company. Securities litigation, if instituted against us, could result in substantial costs and divert our management's attention and resources from our business. This could have an adverse effect on our business, operating results and financial condition.

Sales of substantial amounts of our Class A common stock in the public markets, or the perception that they might occur, could reduce the price that our Class A common stock might otherwise attain and may dilute your voting power and your ownership interest in us.

Sales of a substantial number of shares of our Class A common stock in the public market after this offering, particularly sales by our directors, executive officers and significant stockholders, or the perception that these sales could occur, could adversely affect the market price of our Class A common stock and may make it more difficult for you to sell your Class A common stock at a time and price that you deem appropriate. Based on the total number of outstanding shares of our common stock as of July 31, 2016, upon completion of this offering, we will have 14,000,000 shares of Class A common stock and 122,403,162 shares of Class B common stock outstanding, assuming no exercise of our outstanding stock options or warrants or settlement of RSUs after July 31, 2016 and assuming the underwriters do not exercise their option to purchase additional shares.

All of the shares of Class A common stock sold in this offering will be freely tradable without restrictions or further registration under the Securities Act of 1933, as amended, or the Securities Act, except for any shares held by our affiliates as defined in Rule 144 under the Securities Act.

Subject to certain exceptions described in the section titled "Underwriting," we, all of our directors and executive officers and holders of substantially all of our common stock, or securities exercisable for or convertible into our common stock outstanding immediately prior to this offering, are subject to market stand-off agreements or have agreed not to offer, sell or agree to sell, directly or indirectly, any shares of common stock without the permission of each of Goldman, Sachs & Co. and Morgan Stanley & Co. LLC on behalf of the underwriters, for a period of 180 days from the date of this prospectus. When the lock-up period expires, we and our securityholders subject to a lock-up agreement or market stand-off agreement will be able to sell our shares in the public market. In addition, the underwriters may, in their sole discretion, release all or some portion of the shares subject to lock-up agreements prior to the expiration of the lock-up period. See "Shares Eligible for Future Sale" for more information. Sales of a substantial number of such shares upon expiration of the lock-up and market stand-off agreements, or the perception that such sales may occur, or early release of these agreements, could cause our market price to fall or make it more difficult for you to sell your Class A common stock at a time and price that you deem appropriate.

In addition, following this offering, holders of up to 74,906,047 shares of our Class B common stock, based on shares outstanding as of July 31, 2016, will be entitled to rights with respect to registration of these shares under the Securities Act pursuant to our Amended and Restated Investors' Rights Agreement, or the Investors' Rights Agreement. If these holders of our Class B common stock, by exercising their registration rights, sell a large number of shares, they could adversely affect the market price for our Class A common stock. We also intend to register the offer and sale of all shares of Class A and Class B common stock that we may issue under our equity compensation plans.

We may also issue our shares of Class A common stock or securities convertible into shares of our Class A common stock from time to time in connection with a financing, acquisition, investments or

otherwise. Any such issuance could result in substantial dilution to our existing stockholders and cause the market price of our Class A common stock to decline.

The dual class structure of our common stock as contained in our charter documents has the effect of concentrating voting control with a limited number of stockholders that held our stock prior to this offering, including our directors, executive officers, and employees and their affiliates, and significant stockholders, which will limit your ability to influence corporate matters.

Our Class B common stock has 10 votes per share, and our Class A common stock, which is the stock we are offering in this offering, has one vote per share. Upon the consummation of this offering, stockholders who hold shares of Class B common stock, including our pre-offering investors and our directors, executive officers, and employees, and their affiliates, will together hold approximately 98.9% of the voting power of our outstanding capital stock. As a result, for the foreseeable future, our pre-offering stockholders will have significant influence over the management and affairs of our company and over the outcome of all matters submitted to our stockholders for approval, including the election of directors and significant corporate transactions, such as a merger, consolidation or sale of substantially all of our assets.

In addition, the holders of Class B common stock collectively will continue to control all matters submitted to our stockholders for approval even if their stock holdings represent less than 50% of the outstanding shares of our common stock. Because of the ten-to-one voting ratio between our Class B and Class A common stock, the holders of our Class B common stock collectively will continue to control a majority of the combined voting power of our common stock so long as the shares of Class B common stock represent at least 9.1% of all outstanding shares of our Class A and Class B common stock. This concentrated control will limit your ability to influence corporate matters for the foreseeable future, and, as a result, the market price of our Class A common stock could be adversely affected. These holders of our Class B common stock may also have interests that differ from yours and may vote in a way with which you disagree and which may be adverse to your interests, and, unless earlier converted at the election of the holders of 67% of our outstanding Class B common stock, our amended and restated certificate of incorporation provides for a dual class stock structure for 17 years following the completion of this offering.

Future transfers, whether or not for value, by holders of Class B common stock will generally result in those shares converting to Class A common stock, subject to limited exceptions, such as certain transfers affected for estate planning purposes. The conversion of shares of our Class B common stock into shares of our Class A common stock will have the effect, over time, of increasing the relative voting power of those holders of Class B common stock who retain their shares in the long term. For a description of the dual class structure, see “Description of Capital Stock—Anti-Takeover Effects of Delaware Law and our Certificate of Incorporation and Bylaws.”

An active public trading market may not develop or be sustained following this offering.

Prior to this offering, there has been no public market or active private market for our common stock. We have been approved to list our Class A common stock on The NASDAQ Global Select Market, however, an active trading market may not develop following the completion of this offering or, if developed, may not be sustained. The lack of an active market may impair your ability to sell your shares at the time you wish to sell them or at a price that you consider reasonable. The lack of an active market may also reduce the market price of your shares of Class A common stock. An inactive market may also impair our ability to raise capital by selling shares and may impair our ability to acquire other companies or technologies by using our shares as consideration. We cannot predict the prices at which our Class A common stock will trade. The initial public offering price of our Class A

common stock will be determined by negotiations between us and the underwriters and may not bear any relationship to the market price at which our Class A common stock will trade after this offering or to any other established criteria of the value of our business and prospects.

We have broad discretion to determine how to use the funds raised in this offering, and may use them in ways that may not enhance our operating results or the price of our Class A common stock.

The principal purposes of this offering are to raise additional capital, to create a public market for our Class A common stock and to facilitate our future access to the public equity markets. We currently intend to use a significant portion of the net proceeds from this offering for general corporate purposes, including for any of the purposes described in "Use of Proceeds." However, we do not currently have any specific or preliminary plans for the net proceeds from this offering and will have broad discretion in how we use the net proceeds of this offering. We could spend the proceeds from this offering in ways that our stockholders may not agree with or that do not yield a favorable return. You will not have the opportunity as part of your investment decision to assess whether the net proceeds are being used appropriately. Investors in this offering will need to rely upon the judgment of our management with respect to the use of proceeds. If we do not use the net proceeds that we receive in this offering effectively, our business, financial condition, results of operations and prospects could be harmed, and the market price of our Class A common stock could decline.

We are an "emerging growth company" and we cannot be certain if the reduced disclosure requirements applicable to emerging growth companies will make our Class A common stock less attractive to investors.

For so long as we remain an "emerging growth company" as defined in the in the JOBS Act, we may take advantage of certain exemptions from various requirements that are applicable to public companies that are not "emerging growth companies," including, but not limited to, not being required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act, reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements and exemptions from the requirements of holding a nonbinding advisory vote on executive compensation and stockholder approval of any golden parachute payments not previously approved. We may take advantage of these exemptions until we are no longer an emerging growth company. We would cease to be an emerging growth company upon the earliest to occur of: (i) the first fiscal year following the fifth anniversary of our initial public offering; (ii) the first fiscal year after our annual gross revenue is \$1 billion or more; (iii) the date on which we have, during the previous three-year period, issued more than \$1 billion in non-convertible debt securities; or (iv) as of the end of any fiscal year in which the market value of our common stock held by non-affiliates exceeded \$700 million as of the end of the second quarter of that fiscal year. We cannot predict if investors will find our Class A common stock less attractive because we may rely on these exemptions. If some investors find our Class A common stock less attractive as a result, there may be a less active trading market for our Class A common stock and our stock price may be more volatile.

The requirements of being a public company may strain our resources, divert management's attention and affect our ability to attract and retain qualified board members.

As a public company, we will be subject to the reporting and corporate governance requirements of the Exchange Act, the listing requirements of the NASDAQ Stock Market and other applicable securities rules and regulations, including the Sarbanes-Oxley Act and the Dodd-Frank Act. Compliance with these rules and regulations will increase our legal and financial compliance costs, make some activities more difficult, time-consuming or costly and increase demand on our systems and resources, particularly after we are no longer an "emerging growth company" as defined in the

JOBS Act. Among other things, the Exchange Act requires that we file annual, quarterly and current reports with respect to our business and results of operations and maintain effective disclosure controls and procedures and internal control over financial reporting. In order to improve our disclosure controls and procedures and internal control over financial reporting to meet this standard, significant resources and management oversight may be required. As a result, management's attention may be diverted from other business concerns, which could harm our business, financial condition, results of operations and prospects. Although we have already hired additional employees to help comply with these requirements, we may need to further expand our legal and finance departments in the future, which will increase our costs and expenses.

In addition, changing laws, regulations and standards relating to corporate governance and public disclosure are creating uncertainty for public companies, increasing legal and financial compliance costs and making some activities more time-consuming. These laws, regulations and standards are subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. We intend to invest resources to comply with evolving laws, regulations and standards, and this investment may result in increased general and administrative expense and a diversion of management's time and attention from revenue-generating activities to compliance activities. If our efforts to comply with new laws, regulations and standards differ from the activities intended by regulatory or governing bodies, regulatory authorities may initiate legal proceedings against us and our business and prospects may be harmed. As a result of disclosure of information in the filings required of a public company and in this prospectus, our business and financial condition will become more visible, which may result in threatened or actual litigation, including by competitors and other third parties. If such claims are successful, our business, financial condition, results of operations and prospects could be harmed, and even if the claims do not result in litigation or are resolved in our favor, these claims, and the time and resources necessary to resolve them, could divert the resources of our management and harm our business, financial condition, results of operations and prospects.

We also expect that being a public company and these new rules and regulations will make it more expensive for us to obtain director and officer liability insurance, and we may be required to accept reduced coverage or incur substantially higher costs to obtain coverage. These factors could also make it more difficult for us to attract and retain qualified executive officers and members of our board of directors, particularly to serve on our audit committee and compensation committee.

In addition, as a result of our disclosure obligations as a public company, we will have reduced strategic flexibility and will be under pressure to focus on short-term results, which may adversely affect our ability to achieve long-term profitability.

If financial or industry analysts do not publish research or reports about our business, or if they issue inaccurate or unfavorable research regarding our Class A common stock, our stock price and trading volume could decline.

The trading market for our Class A common stock will be influenced by the research and reports that industry or financial analysts publish about us or our business. We do not control these analysts or the content and opinions included in their reports. As a new public company, we may be slow to attract research coverage and the analysts who publish information about our Class A common stock will have had relatively little experience with our company, which could affect their ability to accurately forecast our results and make it more likely that we fail to meet their estimates. In the event we obtain industry or financial analyst coverage, if any of the analysts who cover us issue an inaccurate or unfavorable opinion regarding our stock price, our stock price would likely decline. In addition, the

stock prices of many companies in the high technology industry have declined significantly after those companies have failed to meet, or often times significantly exceeded, the financial guidance publicly announced by the companies or the expectations of analysts. If our financial results fail to meet (or significantly exceed) our announced guidance or the expectations of analysts or public investors, analysts could downgrade our Class A common stock or publish unfavorable research about us. If one or more of these analysts cease coverage of our company or fail to publish reports on us regularly, we could lose visibility in the financial markets, which in turn could cause our stock price or trading volume to decline.

Because the initial public offering price of our Class A common stock will be substantially higher than the pro forma net tangible book value per share of our outstanding common stock following this offering, new investors will experience immediate and substantial dilution.

The initial public offering price of our Class A common stock will be substantially higher than the pro forma net tangible book value per share of our common stock immediately following this offering, based on the total value of our tangible assets less our total liabilities. Therefore, if you purchase shares of our Class A common stock in this offering, you will experience immediate dilution of \$13.16 per share, the difference between the price per share you pay for our Class A common stock and its pro forma net tangible book value per share as of July 31, 2016, after giving effect to the issuance of shares of our Class A common stock in this offering and assuming an initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus. Furthermore, if the underwriters exercise their option to purchase additional shares, if outstanding options and warrants are exercised, if we issue awards to our employees under our equity incentive plans, or if we otherwise issue additional shares of our Class A common stock, you could experience further dilution. See “Dilution” for more information.

Certain provisions in our charter documents and under Delaware law could make an acquisition of our company more difficult, limit attempts by our stockholders to replace or remove members of our board of directors or current management and may adversely affect the market price of our Class A common stock.

Our amended and restated certificate of incorporation and amended and restated bylaws that will be in effect upon completion of this offering contain provisions that could delay or prevent a change in control of our company. These provisions could also make it difficult for stockholders to elect directors that are not nominated by the current members of our board of directors or take other corporate actions, including effecting changes in our management. These provisions include:

- our amended and restated certificate of incorporation provides for a dual class common stock structure for 17 years following the completion of this offering;
- a classified board of directors with three-year staggered terms, which could delay the ability of stockholders to change the membership of a majority of our board of directors;
- the ability of our board of directors to issue shares of preferred stock and to determine the price and other terms of those shares, including preferences and voting rights, without stockholder approval, which could be used to significantly dilute the ownership of a hostile acquirer;
- upon the conversion of our Class A common stock and Class B common stock into a single class of common stock, the exclusive right of our board of directors to elect a director to fill a vacancy created by the expansion of our board of directors or the resignation, death or removal of a director, which prevents stockholders from being able to fill vacancies on our board of directors;
- upon the conversion of our Class A common stock and Class B common stock into a single class of common stock, a prohibition on stockholder action by written consent, which forces stockholder action to be taken at an annual or special meeting of our stockholders;

- the requirement that a special meeting of stockholders may be called only by the chairman of our board of directors, our lead independent director, our president, our secretary or a majority vote of our board of directors, which could delay the ability of our stockholders to force consideration of a proposal or to take action, including the removal of directors;
- the requirement for the affirmative vote of holders of at least 66 2/3% of the voting power of all of the then outstanding shares of the voting stock, voting together as a single class, to amend the provisions of our amended and restated certificate of incorporation relating to the issuance of preferred stock and management of our business or our amended and restated bylaws, which may inhibit the ability of an acquirer to effect such amendments to facilitate an unsolicited takeover attempt;
- the ability of our board of directors, by majority vote, to amend our amended and restated bylaws, which may allow our board of directors to take additional actions to prevent an unsolicited takeover and inhibit the ability of an acquirer to amend our amended and restated bylaws to facilitate an unsolicited takeover attempt; and
- advance notice procedures with which stockholders must comply to nominate candidates to our board of directors or to propose matters to be acted upon at a stockholders' meeting, which may discourage or deter a potential acquirer from conducting a solicitation of proxies to elect the acquirer's own slate of directors or otherwise attempting to obtain control of us.

In addition, as a Delaware corporation, we are subject to Section 203 of the Delaware General Corporation Law. These provisions may prohibit large stockholders, in particular those owning 15% or more of our outstanding voting stock, from merging or combining with us for a certain period of time. See "Description of Capital Stock—Anti-Takeover Effects of Delaware Law and Our Certificate of Incorporation and Bylaws."

We believe our long-term value as a company will be greater if we focus on growth, which may negatively impact our profitability in the near term.

Part of our business strategy is to primarily focus on our long-term growth. As a result, our profitability may be lower in the near term than it would be if our strategy was to maximize short-term profitability. Expenditures on expanding our research and development efforts, sales and market efforts, infrastructure and other such investments may not ultimately grow our business or cause long-term profitability. If we are ultimately unable to achieve profitability at the level anticipated by analysts and our stockholders, our stock price may decline.

We do not intend to pay dividends in the foreseeable future. As a result, your ability to achieve a return on your investment will depend on appreciation in the price of our Class A common stock.

We have never declared or paid any cash dividends on our Class A common stock. We currently intend to retain all available funds and any future earnings for use in the operation of our business and do not anticipate paying any dividends on our Class A common stock in the foreseeable future. Any determination to pay dividends in the future will be at the discretion of our board of directors. Accordingly, investors must rely on sales of their Class A common stock after price appreciation, which may never occur, as the only way to realize any future gains on their investments.

In making your investment decision, you should not rely on information about Nutanix and statements made by our Chief Executive Officer and Chairman as reported in a September 27, 2016 online industry publication, and you should instead only rely on statements made in this prospectus in determining whether to purchase shares of our Class A common stock.

Information about Nutanix, and statements made by our Chief Executive Officer and Chairman during an interview were published in a September 27, 2016 online industry publication by Network World and its affiliated entity CIO.com. The full text of the industry publication has been included in a free writing prospectus that we filed on September 28, 2016. The industry publication presented certain statements about Nutanix, our business strategy, our industry and our competitors in isolation and did not disclose many of the related clarifications, risks and uncertainties described in this prospectus. You should only rely on statements made in this prospectus in making any investment decision in our Class A common stock. Additionally, you should review and rely on the information regarding our market opportunity, industry and our competitors in “Business” and elsewhere in this prospectus, and not the statements made in the industry publication. You should carefully evaluate all the information in this prospectus, including the risks described in this section and throughout the prospectus.

If our involvement in the industry publication were held by a court to be in violation of the Securities Act, we could be required to repurchase the shares sold to purchasers in this offering at the original purchase price, plus statutory interest from the date of purchase, for claims brought during a period of one year following the date of the violation. We would contest vigorously any claim that a violation of the Securities Act occurred. We could also incur considerable expense in contesting any such claim.

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

This prospectus, including the sections entitled “Prospectus Summary,” “Risk Factors,” “Use of Proceeds,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” and “Business,” contains forward-looking statements. The words “believe,” “may,” “will,” “potentially,” “estimate,” “continue,” “anticipate,” “intend,” “could,” “would,” “project,” “plan,” “expect” and similar expressions that convey uncertainty of future events or outcomes are intended to identify forward-looking statements.

Forward-looking statements contained in this prospectus include, but are not limited to, statements about:

- our future financial performance, including our expectations regarding our total revenue, cost of revenue, gross profit or gross margin, operating expenses including changes in research and development, sales and marketing and general and administrative expenses and our ability to achieve, and maintain, future profitability;
- our business plan and our ability to effectively manage our growth;
- anticipated trends, growth rates and challenges in our business and in the markets in which we operate;
- market acceptance of new technology and recently introduced solutions;
- beliefs and objectives for future operations;
- our ability to increase sales of our solutions;
- our ability to attract and retain end-customers;
- our ability to further penetrate our existing end-customer base;
- maintaining and expanding our end-customer base and our relationships with our channel partners;
- our ability to timely and effectively scale and adapt our existing solutions;
- our ability to develop new solutions and bring them to market in a timely manner and make enhancements to our existing solutions;
- the effects of seasonal trends on our results of operations;
- our expectations concerning relationships with third parties;
- our ability to maintain, protect and enhance our intellectual property;
- our ability to continue to expand internationally;
- the effects of increased competition in our markets and our ability to compete effectively;
- anticipated capital expenditures;
- sufficiency of cash to meet cash needs for at least the next 12 months;
- future acquisitions or investments in complementary companies, products, services or technologies and the ability to successfully integrate acquisitions such as Calm and PernixData;
- our ability to stay in compliance with laws and regulations that currently apply or become applicable to our business both in the United States and internationally;
- economic and industry trends, projected growth or trend analysis;
- the attraction and retention of qualified employees and key personnel;

[Table of Contents](#)

[Index to Financial Statements](#)

- the estimates and estimate methodologies used in preparing our consolidated financial statements and determining option exercise prices; and
- the future market prices of our Class A common stock.

These forward-looking statements are subject to a number of risks, uncertainties and assumptions, including those described in "Risk Factors" and elsewhere in this prospectus. Moreover, we operate in a very competitive and rapidly changing environment, and new risks emerge from time to time. It is not possible for our management to predict all risks, nor can we assess the impact of all factors on our business or the extent to which any factor, or combination of factors, may cause actual results to differ materially from those contained in any forward-looking statements we may make. In light of these risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this prospectus may not occur and actual results could differ materially and adversely from those anticipated or implied in the forward-looking statements.

You should not rely upon forward-looking statements as predictions of future events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that the future results, levels of activity, performance or events and circumstances reflected in the forward-looking statements will be achieved or occur. We undertake no obligation to update publicly any forward-looking statements for any reason after the date of this prospectus to conform these statements to actual results or to changes in our expectations, except as required by law.

You should read this prospectus and the documents that we reference in this prospectus and have filed with the SEC as exhibits to the registration statement of which this prospectus is a part with the understanding that our actual future results, levels of activity, performance, and events and circumstances may be materially different from what we expect.

MARKET AND INDUSTRY DATA

Unless otherwise indicated, information contained in this prospectus concerning our industry and the markets in which we operate, including our general expectations and market position, market opportunity and market size, is based on information from various sources, including Gartner, Inc., or Gartner, and International Data Corporation, or IDC, on assumptions that we have made that are based on those data and other similar sources and on our knowledge of the markets for our solutions. This information involves a number of assumptions and limitations, and you are cautioned not to give undue weight to such estimates. Estimates of third parties, particularly as they relate to projections, involve numerous assumptions and estimates of our future performance and the future performance of the industry in which we operate are necessarily subject to a high degree of uncertainty and risk due to a variety of factors, including those described in the section titled "Risk Factors" and elsewhere in this prospectus. These and other factors could cause results to differ materially from those expressed in the estimates made by the independent parties and by us.

USE OF PROCEEDS

We estimate that the net proceeds to us from our sale of 14,000,000 shares of Class A common stock in this offering will be approximately \$176.4 million, or \$203.7 million if the underwriters exercise their option to purchase additional shares in full, based on an assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

A \$1.00 increase (decrease) in the assumed initial public offering price would increase (decrease) the net proceeds to us from this offering by approximately \$13.0 million, assuming the number of shares offered by us, as reflected on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us. Similarly, each 1.0 million increase (decrease) in the number of shares offered by us would increase (decrease) the net proceeds to us from this offering by approximately \$13.0 million, assuming that the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us.

The principal purposes of this offering are to increase our capitalization and financial flexibility, to create a public market for our stock and thereby enable access to the public equity markets for our employees and stockholders, to obtain additional capital and to increase our visibility in the marketplace. We currently intend to use the net proceeds we receive from this offering primarily for capital expenditures, and for general corporate purposes, including working capital, sales and marketing activities, research and development and general and administrative matters, although we do not currently have any specific or preliminary plans with respect to the use of proceeds for such purposes. In addition, we may also use a portion of the net proceeds for the acquisition of, or investment in, technologies, solutions, products or businesses that complement our business, although we have no present commitments or agreements to enter into any material acquisitions or investments. We will have broad discretion over the uses of the net proceeds of this offering. Pending these uses, we intend to invest the net proceeds in short-term, investment-grade interest-bearing securities such as money market accounts, certificates of deposit, commercial paper and guaranteed obligations of the U.S. government.

DIVIDEND POLICY

We have never declared or paid cash dividends on our capital stock. We currently intend to retain all available funds and any future earnings for use in the operation of our business and do not anticipate paying any dividends on our capital stock in the foreseeable future. Any future determination to declare dividends will be made at the discretion of our board of directors and will depend on our financial condition, operating results, capital requirements, general business conditions and other factors that our board of directors may deem relevant.

CAPITALIZATION

The following table sets forth our cash, cash equivalents and short-term investments, senior notes and capitalization as of July 31, 2016, on:

- an actual basis;
- a pro forma basis, giving effect to: (i) the reclassification of our outstanding common stock into Class B common stock, (ii) the automatic conversion of all outstanding shares of our convertible preferred stock as of July 31, 2016 into 76,319,511 shares of our Class B common stock, (iii) the related reclassification of the preferred stock warrant liability to additional paid-in capital, (iv) the effectiveness of our amended and restated certificate of incorporation as of immediately prior to the completion of this offering, and (v) the early extinguishment of our senior notes, which we intend to repay in full prior to the effectiveness of this offering; and
- a pro forma as adjusted basis, giving effect to the pro forma adjustments noted above and the sale of shares of our Class A common stock by us in this offering, based on an assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

You should read this table together with “Selected Consolidated Financial and Other Data,” “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and related notes included elsewhere in this prospectus.

	As of July 31, 2016		
	Actual	Pro Forma(2)	Pro Forma as Adjusted(1)
	(In thousands, except share and per share data)		
Cash, cash equivalents and short-term investments(2)	\$ 185,200	\$ 106,854	\$ 283,234
Senior notes(2)	\$ 73,260	\$ —	\$ —

Convertible preferred stock, \$0.000025 par value per share: 78,263,309 shares authorized, 76,319,511 shares issued and outstanding, actual; no shares authorized, issued or outstanding, pro forma and pro forma as adjusted	310,379	—	—
Stockholders’ (deficit) equity:			
Preferred stock, \$0.000025 par value per share: no shares authorized, issued and outstanding, actual; 200,000,000 shares authorized, no shares issued or outstanding, pro forma and pro forma as adjusted	—	—	—
Common stock, \$0.000025 par value per share: 165,000,000 shares authorized, 46,083,651 shares issued and outstanding, actual; no shares authorized, issued and outstanding, pro forma and pro forma as adjusted	1	—	—
Class A common stock, \$0.000025 par value per share: no shares authorized, issued and outstanding, actual; 1,000,000,000 shares authorized, no shares issued and outstanding, pro forma; 1,000,000,000 shares authorized, 14,000,000 shares issued and outstanding, pro forma as adjusted	—	—	—
Class B common stock, \$0.000025 par value per share: no shares authorized, issued and outstanding, actual; 200,000,000 shares authorized, 122,403,162 shares issued and outstanding, pro forma and pro forma as adjusted	—	3	3
Additional paid-in capital	65,629	385,685	562,065
Accumulated other comprehensive loss	(12)	(12)	(12)
Accumulated deficit(2)	(441,933)	(446,956)	(446,956)
Total stockholders’ (deficit) equity(2)	(376,315)	(61,280)	115,100
Total capitalization(2)	\$ (56,257)	\$ (61,280)	\$ 115,100

[Table of Contents](#)

[Index to Financial Statements](#)

- (1) The pro forma as adjusted information is illustrative only and will be adjusted based on the actual public offering price and other terms of this offering determined at pricing. Each \$1.00 increase (decrease) in the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, would increase (decrease) our pro forma as adjusted cash, cash equivalents and short-term investments, additional paid-in capital, total stockholders' (deficit) equity and total capitalization by approximately \$13.0 million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us. Similarly, each 1.0 million increase (decrease) in the number of shares offered by us would increase (decrease) our pro forma as adjusted cash, cash equivalents and short-term investments, total assets, total stockholders' (deficit) equity and total capitalization by approximately \$13.0 million, assuming that the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us.
- (2) The pro forma information includes the early extinguishment of our senior notes as of July 31, 2016, which (i) would have decreased our cash, cash equivalents and short-term investments by approximately \$78.4 million and (ii) would have decreased our total capitalization and increased our accumulated deficit and total stockholders' deficit by approximately \$5.0 million, primarily due to the estimated loss on debt extinguishment.

The number of shares of our Class A and Class B common stock to be outstanding after this offering is based on no shares of Class A common stock outstanding and 122,403,162 shares of our Class B common stock outstanding as of July 31, 2016 and excludes:

- 26,166,968 shares of Class B common stock issuable upon the exercise of stock options outstanding under our 2010 Plan and 2011 Plan as of July 31, 2016, with a weighted-average exercise price of \$4.39 per share;
- 12,265,369 shares of Class B common stock issuable upon the vesting of RSUs outstanding under our 2010 Plan as of July 31, 2016;
- 824,094 shares of Class B common stock issuable upon the exercise of warrants outstanding as of July 31, 2016, with a weighted-average exercise price of \$0.70 per share;
- 3,340,762 shares of Class B common stock issuable upon the vesting of RSUs granted under our 2010 Plan after July 31, 2016, including 911,489 RSUs issued as part of a stock option exchange program;
- 1,039,950 shares of Class B common stock issuable upon the exercise of stock options granted under our 2010 Plan after July 31, 2016, with a weighted-average exercise price of \$12.01 per share;
- a reduction of an aggregate of 449,828 shares of Class B common stock as a result of the exchange of stock options for RSUs as part of a stock option exchange program;
- 528,517 shares of Class B common stock issued upon completion of our acquisition of Calm.io Pte. Ltd. after July 31, 2016;
- 1,711,019 shares of Class B common stock issued upon completion of our acquisition of PernixData, Inc. after July 31, 2016; and
- 26,200,000 shares of Class A common stock reserved for future issuance under our equity compensation plans as of July 31, 2016, consisting of (i) 22,400,000 shares of our Class A common stock initially reserved for future issuance under our 2016 Plan, which will become effective on the date immediately prior to the date of this prospectus, and (ii) 3,800,000 shares of our Class A common stock initially reserved for issuance under our ESPP, which will become effective on the date adopted by our board of directors. In addition, the shares to be reserved for issuance under our 2016 Plan shall be increased by that number of shares of Class A Common Stock equal to the number of shares of our Class B Common Stock returned to our 2010 Plan and our 2011 Plan as the result of expiration or termination of awards after the effective date of this prospectus. Our 2016 Plan and ESPP also provide for automatic annual increases in the number of shares reserved under such plans each year, as more fully described in "Executive Compensation—Employee Benefit and Stock Plans."

DILUTION

If you invest in our Class A common stock, your interest will be diluted to the extent of the difference between the amount per share paid by purchasers of shares of Class A common stock in this initial public offering and the pro forma as adjusted net tangible book value per share of Class A common stock immediately after this offering.

As of July 31, 2016, our pro forma net tangible book value was a deficit of \$61.3 million, or a deficit of \$0.50 per share of common stock. Our pro forma net tangible book value per share represents the amount of our total tangible assets reduced by the amount of our total liabilities and divided by the total number of shares of our common stock outstanding as of July 31, 2016, after giving effect to the automatic conversion of all outstanding shares of our convertible preferred stock into 76,319,511 shares of our Class B common stock, the related reclassification of the preferred stock warrant liability to additional paid-in capital and the estimated loss on debt extinguishment of our senior notes.

After giving effect to our sale in this offering of 14,000,000 shares of our Class A common stock, at an assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, after deducting estimated underwriting discounts and commissions and estimated offering expenses payable by us, our pro forma net tangible book value as of July 31, 2016, as adjusted to give effect to this offering, would have been approximately \$115.1 million, or \$0.84 per share of our common stock. This represents an immediate increase in pro forma net tangible book value of \$1.34 per share to our existing stockholders and an immediate dilution of \$13.16 per share to investors purchasing shares in this offering.

The following table illustrates this dilution:

Assumed initial public offering price per share		\$14.00
Pro forma net tangible book value per share as of July 31, 2016	\$(0.50)	
Increase in pro forma net tangible book value per share attributable to new investors in this offering	<u>1.34</u>	
Pro forma net tangible book value, as adjusted to give effect to this offering		<u>0.84</u>
Dilution in pro forma as adjusted net tangible book value per share to new investors in this offering		<u>\$13.16</u>

The dilution information discussed above is illustrative only and will change based on the actual initial public offering price and other terms of this offering determined at pricing. Each \$1.00 increase (decrease) in the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, would increase (decrease) our pro forma net tangible book value by \$0.10 per share, and the dilution in pro forma as adjusted net tangible book value per share to new investors in this offering by \$0.90 per share, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us. Similarly, each 1.0 million increase (decrease) in the number of shares offered by us as set forth on the cover page of this prospectus, would increase (decrease) our pro forma net tangible book value, as adjusted to give effect to this offering, by \$0.09 per share, and the dilution in pro forma as adjusted net tangible book value per share to new investors in this offering by \$0.09 per share, assuming that the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions payable by us.

[Table of Contents](#)[Index to Financial Statements](#)

If the underwriters exercise their option to purchase additional shares in full, the pro forma net tangible book value per share of our common stock as adjusted to give effect to this offering would be \$1.03 per share, and the dilution in pro forma net tangible book value per share to new investors in this offering would be \$12.97 per share.

The following table summarizes, on a pro forma as adjusted basis as of July 31, 2016 after giving effect to the sale of shares of Class A common stock by us in this offering, the difference between existing stockholders and new investors with respect to the number of shares of common stock purchased from us, the total consideration paid to us and the average price per share paid or to be paid to us at an assumed offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, before deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us:

	Shares Purchased		Total Consideration		Average Price Per Share
	Number	Percent	Amount	Percent	
	(Dollars in thousands)				
Existing stockholders	122,403,162	89.7%	\$340,543	63.5%	\$ 2.78
New public investors	14,000,000	10.3	196,000	36.5%	14.00
Total	<u>136,403,162</u>	<u>100.0%</u>	<u>\$536,543</u>	<u>100.0%</u>	

The information discussed above is illustrative only and will change based on the actual initial public offering price and other terms of this offering determined at pricing. Each \$1.00 increase (decrease) in the assumed initial public offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, would increase (decrease) total consideration paid by new investors and total consideration paid by all stockholders by approximately \$13.0 million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

To the extent that any outstanding options or warrants are exercised or RSUs settle, investors will experience further dilution.

Except as otherwise indicated, the above discussion and tables assume no exercise of the underwriters' option to purchase additional shares. After giving effect to the sale of shares in the offering by us, if the underwriters exercise their option to purchase additional shares in full, our existing stockholders would own 88.4% and our new investors would own 11.6% of the total number of shares of our Class A and Class B common stock outstanding upon the completion of this offering.

The number of shares of our Class A and Class B common stock to be outstanding after this offering is based on no shares of Class A common stock outstanding and 122,403,162 shares of our Class B common stock outstanding as of July 31, 2016 and excludes:

- 26,166,968 shares of Class B common stock issuable upon the exercise of stock options outstanding under our 2010 Plan and 2011 Plan as of July 31, 2016, with a weighted-average exercise price of \$4.39 per share;
- 12,265,369 shares of Class B common stock issuable upon the vesting of RSUs outstanding under our 2010 Plan as of July 31, 2016;
- 824,094 shares of Class B common stock issuable upon the exercise of warrants outstanding as of July 31, 2016, with a weighted-average exercise price of \$0.70 per share;

[Table of Contents](#)

[Index to Financial Statements](#)

- 3,340,762 shares of Class B common stock issuable upon the vesting of RSUs granted under our 2010 Plan after July 31, 2016, including 911,489 RSUs issued as part of a stock option exchange program;
- 1,039,950 shares of Class B common stock issuable upon the exercise of stock options granted under our 2010 Plan after July 31, 2016, with a weighted-average exercise price of \$12.01 per share;
- a reduction of an aggregate of 449,828 shares of Class B common stock as a result of the exchange of stock options for RSUs as part of a stock option exchange program;
- 528,517 shares of Class B common stock issued upon completion of our acquisition of Calm.io Pte. Ltd., or Calm, after July 31, 2016;
- 1,711,019 shares of Class B common stock issued upon completion of our acquisition of PernixData, Inc., or PernixData, after July 31, 2016; and
- 26,200,000 shares of Class A common stock reserved for future issuance under our equity compensation plans as of July 31, 2016, consisting of (i) 22,400,000 shares of our Class A common stock initially reserved for future issuance under our 2016 Plan, which will become effective on the date immediately prior to the date of this prospectus, and (ii) 3,800,000 shares of our Class A common stock initially reserved for issuance under our ESPP, which will become effective on the date adopted by our board of directors. In addition, the shares to be reserved for issuance under our 2016 Plan shall be increased by that number of shares of Class A Common Stock equal to the number of shares of our Class B Common Stock returned to our 2010 Plan and our 2011 Plan as the result of expiration or termination of awards after the effective date of this prospectus. Our 2016 Plan and ESPP also provide for automatic annual increases in the number of shares reserved under such plans each year, as more fully described in “Executive Compensation—Employee Benefit and Stock Plans.”

SELECTED CONSOLIDATED FINANCIAL AND OTHER DATA

The following selected consolidated financial data should be read together with our consolidated financial statements and related notes and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” which are included elsewhere in this prospectus. We derived the selected consolidated statements of operations data for fiscal 2012 and the selected consolidated balance sheet data as of July 31, 2012 from our unaudited consolidated financial statements that are not included in this prospectus. We derived the selected consolidated statements of operations data for fiscal 2013 and the selected consolidated balance sheet data as of July 31, 2013 and 2014 from our audited consolidated financial statements that are not included in this prospectus. We derived the selected consolidated statements of operations data for fiscal 2014, 2015 and 2016 and the selected consolidated balance sheet data as of July 31, 2015 and 2016 from our audited consolidated financial statements included elsewhere in this prospectus. The unaudited consolidated financial statements were prepared on the same basis as the audited consolidated financial statements contained in this prospectus and include, in the opinion of management, all adjustments necessary for a fair presentation of the financial information set forth in those statements. Our historical results presented below are not necessarily indicative of financial results to be achieved in future periods.

Table of Contents

Index to Financial Statements

(1) Includes stock-based compensation expense as follows:

	Fiscal Year Ended July 31				
	2012	2013	2014	2015	2016
	(In thousands)				
Cost of revenue:					
Product	\$ 23	\$ 61	\$ 124	\$ 363	\$ 391
Support and other services	11	40	194	718	968
Total cost of revenue	34	101	318	1,081	1,359
Sales and marketing	94	611	2,150	6,474	8,006
Research and development	573	3,835	2,243	5,411	6,259
General and administrative	141	443	1,149	4,174	4,432
Total stock-based compensation expense	<u>\$842</u>	<u>\$4,990</u>	<u>\$5,860</u>	<u>\$17,140</u>	<u>\$20,056</u>

- (2) For an explanation of the calculations of our basic and diluted net loss per share attributable to common stockholders, basic and diluted, and our pro forma net loss per share attributable to common stockholders, basic and diluted, see note 11 of the notes to consolidated financial statements included elsewhere in this prospectus.
- (3) Stock-based compensation expense related to our performance stock awards, which vesting is subject to continuous service with us and satisfaction of certain liquidity events, is excluded from net loss per share attributable to common stockholders, and pro forma net loss per share attributable to common stockholders. Had the IPO been deemed probable on July 31, 2016, we would have recorded approximately \$59 million of stock-based compensation expense, net of estimated forfeitures related to our performance stock awards during fiscal 2016. If the IPO is deemed probable as of October 31, 2016, we estimate that we would record approximately \$77 million of estimated compensation expense related to the performance stock awards granted to date, net of estimated forfeitures, during the three months ending October 31, 2016.

Free cash flow(1)	\$ (11,405)	\$ (14,084)	\$ (10,951)	\$ (12,562)	\$ (15,258)	\$ (5,906)	\$ (10,985)	\$ (6,509)
Total end-customers	923	1,168	1,412	1,799	2,144	2,638	3,111	3,768

- (1) See “—Non-GAAP Financial Measures and Key Performance Measures” below for more information on the uses and limitations of our non-GAAP financial measures and key performance measures and a reconciliation of billings, adjusted gross margin percentage and free cash flow to the most directly comparable financial measures calculated and presented in accordance with GAAP.
- (2) The majority of our deferred revenue consists of the unrecognized portion of revenue from sales of our software and support and maintenance agreements.

Non-GAAP Financial Measures and Key Performance Measures

We regularly monitor billings, adjusted gross margin percentage and free cash flow, which are non-GAAP financial measures and key performance measures, to help us evaluate our growth and operational efficiencies, measure our performance and identify trends in our sales activity, and establish our budgets. We evaluate these measures because they:

- are used by our management and board of directors to understand and evaluate our performance and trends as well as provide a useful measure for period-to-period comparisons of our core business;
- are widely used by investors and other parties in understanding and evaluating companies in our industry as a measure of financial performance; and
- are used by management to prepare and approve our annual budget and to develop short-term and long-term operational and compensation plans, as well as to assess the extent of achievement of goals.

Billings, adjusted gross margin percentage and free cash flow have limitations as analytical tools, and you should not consider them in isolation or as substitutes for analysis of our results as reported under GAAP. Billings, adjusted gross margin percentage and free cash flow are not substitutes for total revenue, gross profit or cash used in operating activities, respectively. In addition, other companies, including companies in our industry, may calculate non-GAAP financial measures and key performance measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of our non-GAAP financial measures and key performance measures as tools for comparison. We urge you to review the reconciliation of our non-GAAP financial measures and key performance measures to the most directly comparable GAAP financial measures included below, and not to rely on any single financial measure to evaluate our business.

Billings

We calculate billings by adding the change in deferred revenue between the start and end of the period to total revenue recognized in the same period.

Adjusted Gross Margin Percentage

We calculate adjusted gross margin percentage as adjusted gross profit divided by total revenue. We define adjusted gross profit as our gross profit adjusted to exclude stock-based compensation. Our presentation of adjusted gross margin percentage should not be construed as implying that our future results will not be affected by any recurring expenses or any unusual or non-recurring items that we exclude from our calculation of this non-GAAP financial measure.

Free Cash Flow

We calculate free cash flow as net cash used in operating activities plus purchases of property and equipment, which measures our ability to generate cash from our business operations after our capital expenditures.

Reconciliation of Non-GAAP Financial Measures and Key Performance Measures

The following table presents a reconciliation of billings, adjusted gross margin percentage and free cash flow to the most directly comparable GAAP financial measures, for each of the periods indicated:

	Fiscal Year Ended July 31				
	2012	2013	2014	2015	2016
	(Dollars in thousands)				
Total revenue	\$ 6,586	\$ 30,533	\$ 127,127	\$ 241,432	\$ 444,928

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations together with the consolidated financial statements and related notes that are included elsewhere in this prospectus. The last day of our fiscal year is July 31. Our fiscal quarters end on October 31, January 31, April 30 and July 31. This discussion contains forward-looking statements based upon current expectations that involve risks and uncertainties. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of various factors, including those set forth under "Risk Factors" or in other parts of this prospectus.

Overview

We provide a leading next-generation enterprise cloud platform that converges traditional silos of server, virtualization and storage into one integrated solution and can also connect to public cloud services. Our software delivers the agility, scalability and pay-as-you-grow economics of the public cloud, while addressing enterprise requirements of application mobility, security, data integrity and control. We provide our customers with the flexibility to selectively utilize the public cloud for suitable workloads and specific use cases by enabling increasing levels of application mobility across private and public clouds. We have combined advanced web-scale technologies with elegant consumer-grade design to deliver a powerful enterprise cloud platform that elevates IT organizations to focus on the applications and services that power their businesses. Our invisible infrastructure provides constant availability and low-touch management, enables application mobility across computing environments and reduces inefficiencies in IT planning.

We were founded in September 2009 and in October 2011 began selling the initial version of the Nutanix Operating System, which pioneered hyperconverged infrastructure by providing block storage for virtualized environments on VMware. In 2012, we released a new version of our software which included support for file storage, high availability and enhanced security. In 2013, we released several versions of our software, which added our intuitive Prism interface, built-in disaster recovery, deduplication, compression, and additional hypervisor support for Hyper-V and KVM. In 2014, we added enhanced resiliency, One-click Upgrade, Cloud Connect backup to Amazon Web Services, or AWS, and Cluster Health Analytics. In 2015, we rebranded the Nutanix Operating System as Acropolis and introduced the Acropolis Distributed Storage Fabric, Acropolis Mobility Fabric and Acropolis Hypervisor. We also recently announced our Xpress product line, a new solution designed to leverage the Nutanix enterprise cloud platform to address the needs of small and medium-sized businesses, or SMBs.

Our solution can be delivered either as an appliance that is configured to order or as software only. When end-customers purchase our platform, they typically also purchase one or more years of support and maintenance in order to receive software upgrades, bug fixes and parts replacement. Product revenue is generated primarily from the sales of our solution, and is generally recognized upon shipment. Support and other services revenue is derived from the related support and maintenance contracts, and is recognized over the term of the support contracts.

We had a broad and diverse base of 3,768 end-customers as of July 31, 2016, including approximately 310 Global 2000 enterprises. Since shipping our first product in fiscal 2012, our end-customer base has grown rapidly. The number of end-customers has grown from 211 as of July 31, 2013 to 782 as of July 31, 2014, 1,799 as of July 31, 2015 and 3,768 as of July 31, 2016. Our platform is primarily sold through channel partners, including distributors and resellers, and delivered directly to our end-customers. A major part of our sales and marketing investment is to educate our end-customers about the benefits of our solution, particularly as we continue to pursue large enterprises and mission critical workloads. Our solutions serve a broad range of workloads, including enterprise

applications, databases, virtual desktop infrastructure, or VDI, unified communications and big data analytics and we have recently announced the capability to support both virtualized and non-virtualized applications. We have end-customers across a broad range of industries, such as automotive, consumer goods, education, energy, financial services, healthcare, manufacturing, media, public sector, retail, technology and telecommunications. We also sell to service providers, who utilize our platform to provide a variety of cloud-based services to their customers.

We have invested heavily in the growth of our business, including the development of our solutions and build-out of our global sales force. The number of our full-time employees increased from 247 as of July 31, 2013 to 617 as of July 31, 2014, to 1,180 as of July 31, 2015 and to 1,980 as of July 31, 2016. We have recruited an engineering team focused on distributed systems and IT infrastructure technologies at our San Jose, California headquarters and at our research and development centers in Bangalore, India, Durham, North Carolina and Seattle, Washington. We have also expanded our international sales and marketing presence by continuing to build out our global teams. We intend to continue to invest in our global engineering team to enhance the functionality of our platform, introduce new products and features and build upon our technology leadership. We also intend to continue to expand our global sales and marketing teams. While we believe that these investments will contribute to our long-term growth, they may adversely affect our profitability in the near term. See also the section titled “—Factors Affecting Our Performance” below.

Since our founding, we have experienced significant growth in our business, including:

- Average billings growth of 20% on a quarterly basis for the last eight fiscal quarters, which grew from \$60.8 million in the three months ended October 31, 2014 to \$206.6 million in the three months ended July 31, 2016.
- Average revenue growth of 17% on a quarterly basis for the last eight fiscal quarters, which grew from \$46.1 million in the three months ended October 31, 2014 to \$139.8 million in the three months ended July 31, 2016.
- An increase in deferred revenue of 713% over the last eight fiscal quarters, which grew from \$36.5 million as of July 31, 2014 to \$296.5 million as of July 31, 2016.
- Average total end-customer growth of approximately 22% on a quarterly basis over the last eight fiscal quarters, which grew from 782 end-customers as of July 31, 2014 to 3,768 end-customers as of July 31, 2016. There were 657 new end-customers acquired during the three months ended July 31, 2016.

We have continued to make significant investments as we scale our business, including in developing and improving our platform, expanding our sales and marketing capabilities and global coverage, and in expanding our general and administrative resources to support our growth. In the recent quarters, we have begun to realize some of the benefits of the scale of our business, including:

- An improvement in adjusted gross margin percentage from 57% in the three months ended October 31, 2014 to 61% in the three months ended July 31, 2016.
- An improvement in our cash flow from operating activities from a use of cash of \$6.9 million in the three months ended October 31, 2014 to a generation of \$2.4 million of cash in the three months ended July 31, 2016. Over the same periods, our free cash flows have improved from a use of cash of \$11.4 million to a use of cash of \$6.5 million.

See “Selected Consolidated Financial and Other Data—Non-GAAP Financial Measures and Key Performance Measures” for information on the uses and limitations of billings, adjusted gross margin percentage, and free cash flow as financial measures and a reconciliation of these non-GAAP financial measures and key performance measures to the most directly comparable financial measures calculated and presented in accordance with GAAP.

On an annual basis, our total revenue was \$127.1 million, \$241.4 million and \$444.9 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively, representing year-over-year growth of 90% and 84%, respectively. Our net losses were \$84.0 million, \$126.1 million and \$168.5 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively. Net cash used in operating activities was \$45.7 million and \$25.7 million for fiscal 2014 and fiscal 2015, respectively, and net cash generated from operations was \$3.6 million for fiscal 2016. As of July 31, 2016, we had an accumulated deficit of \$441.9 million.

Recent Developments

On September 6, 2016, we completed the acquisition of PernixData Inc., a company based in the United States which specializes in scale-out data acceleration and analytics, referred to as the PernixData acquisition. The consideration for the acquisition consisted of 1.7 million shares of our Class B common stock and contingent consideration, of up to \$7.5 million, which may be payable over the next three years upon the achievement of certain operating milestones. Immediately after the completion of the acquisition, we repaid \$7.0 million of debt assumed in the acquisition. The PernixData acquisition is not included in our consolidated financial statements as of and for the year ended July 31, 2016.

On August 22, 2016, we completed the acquisition of all outstanding shares of Calm.io Pte. Ltd., a company based in Singapore which specializes in container and DevOps automation, referred to as the Calm acquisition. The consideration for the acquisition consisted of 0.5 million shares of our Class B common stock and \$1.2 million of cash. The Calm acquisition is not included in our consolidated financial statements as of and for the year ended July 31, 2016.

In July 2016, we approved a tender offer stock option exchange program under which outstanding employee stock options with exercise prices of \$8.41 or greater per share could be exchanged for a specified number of performance RSUs based on a predetermined exchange ratio granted with a new vesting period, referred to as the tender offer. As a result of the tender offer, on August 16, 2016, stock options to purchase approximately 1.4 million shares of Class B common stock were cancelled and, in exchange, we granted approximately 0.9 million RSUs that will vest upon satisfaction of both service and performance conditions, referred to as the performance RSUs, to eligible employees. The tender offer resulted in a total incremental stock-based compensation expense of approximately \$3.4 million which we will begin to recognize when it is probable that the performance condition will be met.

In April 2016, we issued an aggregate principal amount of \$75.0 million of senior notes due April 15, 2019, or the senior notes, to Goldman Sachs Specialty Lending Group, L.P. The senior notes bear interest at a rate based on adjusted LIBOR plus an applicable margin of 9% per annum or, at our option, the base rate, which is defined as the greatest of (a) the prime rate, (b) the Federal funds effective rate plus 0.5%, and (c) 4% per annum, plus an applicable margin of 8% per annum. Interest is payable monthly in arrears. The senior notes contain a guaranteed minimum return to the holder of the senior notes of \$6.5 million, which is reduced by the \$1.6 million of debt issuance costs paid following the issuance of the senior notes and all interest payments to date at the time of repayment of all principal of the senior notes. If, on the date of the repayment of all principal of the senior notes, the total of \$1.6 million of debt issuance costs plus interest paid to date is less than the guaranteed minimum return, the Company is required to make an additional payment equal to the difference between the guaranteed minimum return and the total of \$1.6 million of debt issuance costs plus interest paid to date. See the section titled "Debt Obligations."

Factors Affecting Our Performance

We believe that our future success will depend on many factors, including those described below. While these areas present significant opportunity, they also present risks that we must manage to achieve successful results. See the section titled "Risk Factors." If we are unable to address these challenges, our business and operating results could be adversely affected.

Investment in Growth

We plan to continue to invest in sales and marketing so that we can capitalize on our market opportunity. We have significantly increased our sales and marketing personnel, which grew by 70% from July 31, 2015 to July 31, 2016. We estimate, based on past experience, that sales team members typically become fully productive around the time of the start of their fourth quarter of employment with us, and as our newer employees ramp up we expect their increased productivity to contribute to our revenue growth. As of July 31, 2016, we considered 54% of our global sales team members to be fully productive, while the remaining 46% of our global sales team members are in the process of ramping up. We intend to continue to grow our global sales and marketing team to acquire new end-customers and to increase sales to existing end-customers.

We also intend to continue to grow our research and development and global engineering team to enhance our solutions, improve integration with new and existing ecosystem partners, and broaden the range of IT infrastructure technologies that we converge into our platform. We believe that these investments will contribute to our long-term growth, although they may adversely affect our profitability in the near term.

Market Adoption of Our Products

The public cloud has changed IT buyer expectations about the simplicity, agility, scalability and pay-as-you-grow economics of IT resources, which represent a major architectural shift and business model evolution. A key focus of our sales and marketing efforts is creating market awareness about the benefits of our platform both as compared to traditional datacenter architectures as well as the public cloud, particularly as we continue to pursue large enterprises and mission critical workloads. The broad nature of the technology shift that our platform represents and the relationships our end-customers have with existing IT vendors sometimes lead to unpredictable sales cycles, which we hope to compress and stabilize as market adoption increases, as we gain leverage with our channel partners and as our sales and marketing efforts expand. Our business and operating results will be significantly affected by the degree to and speed with which organizations adopt our platform.

Leveraging Channel Partners

We plan to continue to strengthen and expand our network of channel and OEM partners to increase sales to both new and existing end-customers. We believe that increasing channel leverage by investing aggressively in sales enablement and co-marketing with our partners will extend and improve our engagement with a broad set of end-customers. Our business and results of operations will be significantly affected by our success in leveraging and expanding our network of our channel and OEM partners.

Continued Purchases and Upgrades within Existing Customer Base

Our end-customers typically deploy our technology for a specific workload initially. After the initial order, which includes the product and associated maintenance, support and professional services, by a new end-customer, we focus on expanding our footprint by serving more workloads. We also generate

recurring revenue from our support and maintenance renewals. We view continued orders as a critical driver of our success, as the sales cycles are typically shorter compared to new end-customer deployments and selling expenses are typically lower. As of July 31, 2016, approximately 75% of our end-customers who have been with us for 18 months or more have made a repeat purchase, which is defined as any purchase activity, including support and maintenance renewals, subsequent to the initial purchase during the course of their customer lifetime. Additionally, end-customers who have been with us for 18 months or more have total lifetime orders (which includes the initial order) to date in an amount that is more than 3.6x greater, on average, than their initial order. This number increases to approximately 7.2x, on average, for our approximately 310 Global 2000 end-customers and to more than 14.1x, on average, for our top 25 end-customers. The multiples exclude the effect of one end-customer who had a very large and irregular purchase pattern that we believe is not representative of the purchase patterns of all our other end-customers. Our business and operating results will depend on our ability to sell additional products to our current existing and future base of end-customers.

Changes in Product Mix and Associated Accounting Impact

Shifts in the mix of whether our solutions are sold as an appliance or as software-only could result in fluctuations in our revenue and gross margins. Software-only sales reflect higher gross margins and lower revenue in a given period, since the sale does not include the revenue or cost of the hardware components in an appliance. When we sell our solution as an appliance, the revenue for the appliance and the basic version of our software included in the appliance is generally recognized upon delivery, whereas revenue from software-only transactions is only recognized upon delivery to the extent we have established vendor specific objective evidence, or VSOE, of the fair value of the related maintenance and support contracts, otherwise revenue for the entire arrangement is deferred and recognized over the term of our maintenance and support contracts. Historically, most of our solutions have been delivered on an appliance, and, as a result, most of our historical product revenue has been recognized upon delivery. However, we anticipate that to the extent that broad market adoption of our solutions continues to increase, there may be an increase in the delivery of our software licenses on separately procured hardware. For additional information on our revenue recognition and VSOE, please see the section titled “Critical Accounting Estimates—Revenue Recognition.”

Components of Our Results of Operations

Revenue

Product revenue. We generate our product revenue from the sales of our solution, both delivered on a hardware appliance as well as software-only. Our revenue from software-only sales, which currently constitute a small portion of our product revenue, is subject to industry-specific software revenue recognition guidance and has typically been deferred and recognized over the contractual support period associated with the delivered software licenses. However, revenue associated with certain software licenses can be recognized upon delivery to our end-customers to the extent we have established VSOE for related support and other services. For additional information, please see the section titled “Critical Accounting Estimates—Revenue Recognition.”

Support and other services revenue. We generate our support and other services revenue primarily from support and maintenance contracts, and, to a lesser extent, from professional services. The majority of our product sales are sold in conjunction with support and maintenance contracts with terms ranging from one to five years. We recognize revenue from support and maintenance contracts over the contractual service period. We recognize revenue related to professional services as they are performed.

Cost of Revenue

Cost of product revenue. Cost of product revenue consists of costs paid to third-party contract manufacturers, which includes hardware costs, as well as personnel costs associated with our operations function and allocated costs. Personnel costs consist of salaries, benefits, bonuses and stock-based compensation. In addition, we may also begin to incur costs associated with the amortization of intangible assets related to our PernixData and Calm acquisitions which closed subsequent to fiscal 2016. We expect our cost of product revenue to increase in absolute dollars as our product revenue increases.

Cost of support and other services revenue. Cost of support and other services revenue includes personnel and operating costs associated with our global customer support organization as well as allocated costs. We expect our cost of support and other services revenue to increase in absolute dollars as our support and other services revenue increases.

Operating Expenses

Sales and marketing. Sales and marketing expense consists primarily of personnel costs. Sales and marketing expense also includes sales commissions, costs for promotional activities and other marketing costs, travel costs and costs associated with demonstration units, including depreciation and allocated costs. Commissions are deferred and recognized as we recognize the associated revenue. We expect sales and marketing expense to continue to increase in absolute dollars as we increase the size of our global sales and marketing organizations. In addition, we may also begin to incur costs associated with the amortization of intangible assets related to our PernixData and Calm acquisitions which occurred subsequent to fiscal 2016. Our sales and marketing expense may fluctuate as a percentage of total revenue.

Research and development. Research and development expense primarily consists of personnel costs, as well as other direct and allocated costs. We have devoted our product development efforts primarily to enhancing the functionality and expanding the capabilities of our solutions. Research and development costs are expensed as incurred. We expect research and development expense to increase in absolute dollars as we continue to invest in our future products and services, although our research and development expense may fluctuate as a percentage of total revenue.

General and administrative. General and administrative expense consists primarily of personnel costs, which include our executive, finance, human resources and legal organizations. General and administrative expense also includes outside professional services, which consists primarily of legal, accounting and other consulting costs and allocated costs. We expect general and administrative expense to increase in absolute dollars particularly due to additional legal, accounting, insurance and other costs associated with being a public company, although our general and administrative expense may fluctuate as a percentage of total revenue.

Other Income (Expense)—net

Other income (expense)—net consists primarily of the change in fair value of our convertible preferred stock warrant liability, and, to a lesser extent, interest expense, foreign exchange gains or losses and gains or losses on investments. Convertible preferred stock warrants are classified as a liability on our consolidated balance sheet and re-measured to fair value at each balance sheet date with the corresponding changes in fair value recorded as other expense. Upon completion of this offering, the convertible preferred stock warrants will convert into warrants to purchase Class B common stock. As a result, the convertible preferred stock liability will be re-measured to its then fair value, which is based on the offering price per share of our Class A common stock, and reclassified to

additional paid-in capital. Based on an assumed offering price of \$14.00 per share, the midpoint of the range on the cover of this prospectus, we would record a re-measurement adjustment of \$1.3 million in the quarter in which this offering is completed. Subsequent to the conversion of convertible preferred stock warrants in connection with this offering, we will no longer re-measure them at fair value or incur any charges related to changes in fair value.

Provision for Income Taxes

Provision for income taxes consists primarily of income taxes in certain foreign jurisdictions in which we conduct business. As of July 31, 2016, we had federal and state net operating loss, or NOL, carryforwards of \$267.1 million and \$160.7 million, respectively, which will begin to expire in fiscal 2030. Utilization of the NOLs may be subject to an annual limitation due to ownership change limitations set forth under Section 382 of the Internal Revenue Code of 1986, as amended, or the Code. Our NOLs may also be impaired under similar provisions of state law. We have recorded a full valuation allowance related to our federal and state NOLs and other net deferred tax assets due to the uncertainty of the ultimate realization of the future benefits of those assets.

Results of Operations

The following tables set forth our consolidated results of operations in dollars and as a percentage of total revenue for the periods presented:

	Fiscal Year Ended July 31		
	2014	2015	2016
	(In thousands)		
Consolidated Statements of Operations Data:			
Revenue:			
Product	\$113,562	\$ 200,833	\$ 350,798
Support and other services	13,565	40,599	94,130
Total revenue	<u>127,127</u>	<u>241,432</u>	<u>444,928</u>
Cost of revenue:			
Product(1)	52,417	80,900	133,541
Support and other services(1)	8,495	20,059	37,246

Comparison of the Years Ended July 31, 2015 and 2016

Revenue

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
	(In thousands, except percentages)			
Product	\$200,833	\$350,798	\$149,965	75%
Support and other services	40,599	94,130	53,531	132%
Total revenue	\$241,432	\$444,928	\$203,496	84%

Total revenue by bill-to-location was as follows:

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
	(In thousands, except percentages)			
U.S.	\$161,439	\$280,800	\$119,361	74%
Europe, the Middle East and Africa	43,526	81,320	37,794	87%
Asia-Pacific	28,386	63,610	35,224	124%
Other Americas	8,081	19,198	11,117	138%
Total revenue	\$241,432	\$444,928	\$203,496	84%

The increase in product revenue reflects increased domestic and international demand for our solution as we continue our penetration and expansion in global markets through increased sales and marketing activities. Our total end-customer count increased from 1,799 as of July 31, 2015 to 3,768 as of July 31, 2016.

Support and other services revenue increased in conjunction with the growth of our end-customer base and the related support and software maintenance contracts.

Cost of Revenue and Gross Margin

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
	(In thousands, except percentages)			
Cost of product revenue	\$80,900	\$133,541	\$52,641	65%
Product gross margin	60%	62%		
Cost of support and other revenue	\$20,059	\$37,246	\$17,187	86%
Support and other services gross margin	51%	60%		
Total gross margin percentage	58%	62%		

Cost of product revenue

The increase in cost of product revenue was primarily due to the corresponding increase in product sales. Product gross margin increased primarily due to cost savings achieved from our procurement process, and changes in product mix.

Cost of support and other services revenue

The increase in cost of support and other services revenue was primarily due to higher personnel costs of our global customer support organization, as our customer support and services headcount

increased by 113%, in order to support our growing end-customer base. Support and other services gross margin improved as we continued to gain leverage from our support organization.

Operating Expenses

Sales and marketing

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
	(In thousands, except percentages)			
Sales and marketing	\$161,829	\$288,493	\$126,664	78%
Percent of total revenue	67%	65%		

The increase in sales and marketing expense was primarily due to higher personnel costs and sales commissions, as our sales and marketing headcount increased by 70%. As part of our efforts to penetrate and expand in global markets, we increased our marketing activities related to brand awareness, promotions, trade shows and partner programs.

Research and development

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
	(In thousands, except percentages)			
Research and development	\$73,510	\$116,400	\$42,890	58%
Percent of total revenue	30%	26%		

The increase in research and development expense was primarily due to higher personnel costs, as our research and development headcount increased by 59% as part of the continued expansion of our product development activities primarily related to the addition of features and functionality to our platform.

General and administrative

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
	(In thousands, except percentages)			
General and administrative	\$23,899	\$34,265	\$10,366	43%
Percent of total revenue	10%	8%		

The increase in general and administrative expense was primarily due to higher personnel costs, as our general and administrative headcount increased by 51% to support our growing operations and international footprint, and to a lesser extent, costs related to our preparation for becoming a public company.

Other expense—net

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
	(In thousands, except percentages)			
Other expense—net	\$(5,818)	\$(1,290)	\$ 4,528	(78)%

The decrease in other expense—net was primarily due to \$8.2 million of higher charges related to the change in fair value of our convertible preferred stock warrant liability during the year ended July 31, 2015, partially offset by \$1.5 million of foreign currency losses and \$2.3 million of interest expense from the issuance of the senior notes during the year ended July 31, 2016.

Provision for income taxes

	Fiscal Year Ended July 31		\$ Change	% Change
	2015	2016		
Provision for income taxes	\$1,544	\$2,192	\$ 648	42%

(In thousands, except percentages)

The increase in the provision for income taxes was primarily due to higher foreign taxes as we continue to expand globally.

Comparison of the Years Ended July 31, 2014 and 2015

Revenue

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
Product	\$113,562	\$200,833	\$ 87,271	77%
Support and other services	13,565	40,599	27,034	199%
Total revenue	<u>\$127,127</u>	<u>\$241,432</u>	<u>\$114,305</u>	90%

(In thousands, except percentages)

Total revenue by bill-to-location was as follows:

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
U.S.	\$ 77,531	\$161,439	\$ 83,908	108%
Europe, the Middle East and Africa	25,789	43,526	17,737	69%
Asia-Pacific	15,949	28,386	12,437	78%
Other Americas	7,858	8,081	223	3%
Total revenue	<u>\$127,127</u>	<u>\$241,432</u>	<u>\$114,305</u>	90%

(In thousands, except percentages)

The increase in product revenue reflects increased domestic and international demand for our solution as we continue our penetration and expansion in global markets through increased sales and marketing activities. Our total end-customer count increased from 782 as of July 31, 2014 to 1,799 as of July 31, 2015.

Support and other services revenue increased in conjunction with the growth of our end-customer base and the related support and software maintenance contracts.

Cost of Revenue and Gross Margin

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
	(In thousands, except percentages)			
Cost of product revenue	\$52,417	\$80,900	\$28,483	54%
Product gross margin	54%	60%		
Cost of support and other revenue	\$ 8,495	\$20,059	\$11,564	136%
Support and other services gross margin	37%	51%		
Total gross margin percentage	52%	58%		

Cost of product revenue

The increase in cost of product revenue was primarily due to the corresponding increase in product sales. Product gross margin increased primarily due to cost savings achieved from our procurement process, and changes in product mix.

Cost of support and other services revenue

The increase in cost of support and other services revenue was primarily due to higher personnel costs of our global customer support organization, as our customer support and services headcount increased by 126%, in order to support our growing end-customer base. Support and other services gross margin improved as we continued to gain leverage from our support organization.

Operating Expenses**Sales and marketing**

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
	(In thousands, except percentages)			
Sales and marketing	\$93,001	\$161,829	\$68,828	74%
Percent of total revenue	73%	67%		

The increase in sales and marketing expense was primarily due to higher personnel costs and sales commissions, as our sales and marketing headcount increased by 105%. As part of our efforts to penetrate and expand in global markets, we increased our marketing activities related to brand awareness, promotions, trade shows and partner programs.

Research and development

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
	(In thousands, except percentages)			
Research and development	\$38,037	\$73,510	\$35,473	93%
Percent of total revenue	30%	30%		

The increase in research and development expense was primarily due to higher personnel costs, as our research and development headcount increased by 74% as part of the continued expansion of our product development activities primarily related to the addition of features and functionality to our platform.

General and administrative

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
			(In thousands, except percentages)	
General and administrative	\$13,496	\$23,899	\$10,403	77%
Percent of total revenue	11%	10%		

The increase in general and administrative expense was primarily due to higher personnel costs, as our general and administrative headcount increased by 73% to support our growing operations and international footprint, and to a lesser extent, costs related to our preparation for becoming a public company.

Other expense—net

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
			(In thousands, except percentages)	
Other expense—net	\$(5,076)	\$(5,818)	\$ (742)	15%

The increase in other expense—net was primarily due to higher charges resulting from changes in the fair value of our convertible preferred stock warrant liability.

Provision for income taxes

	Fiscal Year Ended July 31		\$ Change	% Change
	2014	2015		
			(In thousands, except percentages)	
Provision for income taxes	\$608	\$1,544	\$ 936	154%

The increase in the provision for income taxes was primarily due to higher foreign taxes as a result of our global expansion during fiscal 2015.

Quarterly Results of Operations

The following table sets forth our unaudited consolidated statement of operations data for each of the eight quarters in the period ended July 31, 2016. The unaudited consolidated statement of operations data set forth below have been prepared on the same basis as our audited consolidated financial statements and, in the opinion of management, reflect all adjustments, consisting only of normal recurring adjustments, that are necessary for the fair presentation of such data. Our historical results are not necessarily indicative of the results that may be expected in the future and the results for any quarter are not necessarily indicative of results to be expected for a full year or any other period. The following quarterly financial data should be read in conjunction with our consolidated financial statements and the related notes included elsewhere in this prospectus.

[Table of Contents](#)[Index to Financial Statements](#)

The following table presents our unaudited quarterly results of operations as a percentage of total revenue for each of the eight quarters in the period ended July 31, 2016:

	Three Months Ended							
	October 31 2014	January 31 2015	April 30 2015	July 31 2015	October 31 2015	January 31 2016	April 30 2016	July 31 2016
(As a percentage of total revenue)								
Consolidated Statement of Operations Data:								
Revenue:								
Product	85%	85%	83%	81%	80%	79%	78%	78%
Support and other services	15	15	17	19	20	21	22	22
Total revenue	100	100	100	100	100	100	100	100
Cost of revenue:								
Product	34	34	34	33	32	29	29	30
Support and other services	9	8	8	8	8	8	9	9
Total cost of revenue	43	42	42	41	40	37	38	39
Gross profit	57	58	58	59	60	63	62	61
Operating expenses:								
Sales and marketing	72	65	66	66	67	64	66	63
Research and development	31	30	31	31	27	25	27	25
General and administrative	12	9	10	9	8	8	8	7
Total operating expenses	115	104	107	106	102	97	101	95
Loss from operations	(58)	(46)	(49)	(47)	(42)	(34)	(39)	(34)
Other income (expense)—net	(3)	(2)	(1)	(3)	(1)	3	(2)	(1)
Loss before provision for income taxes	(61)	(48)	(50)	(50)	(43)	(31)	(41)	(35)
Provision for income taxes	1	1	1	0	1	1	0	1
Net loss	(62)%	(49)%	(51)%	(50)%	(44)%	(32)%	(41)%	(36)%

Quarterly Revenue Trends

Our quarterly revenue increased for all quarterly periods presented due primarily to increases in the number of new end-customers as well as the related support contracts. Our revenue is subject to seasonal trends depending on spending patterns of our existing and potential end-customers. For instance, we have generally experienced an increase in sales activity as we approach our fiscal year-end in July and our second quarter in January, as a portion of our sales professionals' compensation is based on results through the end of each of these six-month periods. Additionally, we have experienced an increase in sales activity in our second fiscal quarter, which aligns with the tail end of the IT spend budget cycles for many of our end-customers. While we believe that these seasonal trends have affected and will continue to affect our quarterly results, we believe our rapid growth has largely masked seasonal trends to date, and these trends could have more of an impact on our quarterly results in future periods.

Additionally, revenue from support and maintenance contracts has increased as we have generated more product revenue through the sale of our solutions. The revenue from support and maintenance contracts is initially deferred and recognized ratably over the contractual term, which generally ranges from one to five years. As a consequence, support and other services revenue has increased as a greater percentage than product revenue due to the amortization of deferred revenue from sales in prior periods.

Quarterly Gross Margin Trends

Overall, our total gross margin has increased for most of the quarterly periods presented due to changes in product mix, operational efficiencies from our support organization, and increasing cost savings, including lower procurement costs. We intend to reinvest these gross margin improvements to continue to pursue growth opportunities and market penetration, which is expected to result in a decrease in our total gross margin percentage over time from the 63% we achieved in the three months ended January 31, 2016 to a level more consistent with recent historical results. In addition, our gross margin may fluctuate depending on a variety of factors such as mix of our product sales, our discounting practices and procurement costs.

Quarterly Expenses Trends

Sales and marketing, research and development and general and administrative expenses generally grew significantly over the quarterly periods, which have been primarily due to increases in headcount in connection with the expansion of our business.

Other income (expense) fluctuates primarily due to the change in fair value of our convertible preferred stock warrant liability and includes interest expense on our senior notes and foreign currency gains or losses.

Provision for income taxes consists primarily of income taxes in certain foreign jurisdictions in which we conduct business. During the three months ended April 30, 2016, our tax provision included a benefit related to the resolution of an uncertain tax position.

Liquidity and Capital Resources

To date, we have satisfied our liquidity needs principally through the sale of convertible preferred stock, borrowings from our credit facilities and proceeds from the exercise of stock options. In April 2016, we issued an aggregate principal amount of \$75.0 million of senior notes due April 15, 2019 to Goldman Sachs Specialty Lending Group, L.P. The senior notes bear interest at a rate based on adjusted LIBOR plus an applicable margin of 9% per annum or, at our option, the base rate, which is defined as the greatest of (a) the Prime Rate, (b) the Federal Funds Effective Rate plus 0.5%, and (c) 4% per annum, plus an applicable margin of 8% per annum. Interest is payable monthly in arrears. We intend to repay the entire outstanding principal amount of the senior notes prior to the effectiveness of this offering. For more information on our senior notes, please see below under "Debt Obligations."

As of July 31, 2016, we had cash and cash equivalents of \$99.2 million and \$86.0 million of short-term investments. In the next 12 months, we anticipate our capital expenditures to be approximately \$55.0 million to \$65.0 million. We believe that our cash and cash equivalents and short-term investments will be sufficient to meet our anticipated cash needs for working capital and capital expenditures for at least the next 12 months. In August and September 2016, respectively, we used a total of \$1.2 million in cash to complete the Calm and PernixData acquisitions, not including up to \$7.5 million of contingent consideration. In addition, immediately after the completion of the PernixData acquisition, we used \$7.0 million of cash to repay debt assumed in the acquisition. Strategically, we continue to look at attractive opportunities to grow our business through acquisitions beside our organic growth.

Cash Flows

The following table summarizes our cash flows for the periods presented:

	Fiscal Year Ended July 31		
	2014	2015	2016
	(In thousands)		
Net cash (used in) provided by operating activities	\$ (45,707)	\$ (25,694)	\$ 3,636
Net cash used in investing activities	(19,032)	(106,667)	(46,504)
Net cash provided by financing activities	104,177	142,755	74,198
Net increase in cash and cash equivalents	<u>\$ 39,438</u>	<u>\$ 10,394</u>	<u>\$ 31,330</u>

Cash Flows from Operating Activities

Net cash used in operating activities for fiscal 2015 was \$25.7 million compared to \$3.6 million of net cash provided by operating activities for fiscal 2016. The generation in cash was primarily due to higher billings and collections, partially offset by higher operating expenses as we continued to invest in the longer term growth of our business.

Net cash used in operating activities was \$45.7 million and \$25.7 million for fiscal 2014 and fiscal 2015, respectively. The decrease was primarily due to higher billings and improved collections, partially offset by higher operating expenses.

Cash Flows from Investing Activities

Net cash used in investing activities of \$46.5 million for fiscal 2016 was due to \$106.3 million of purchases of investments and \$42.3 million of purchases of property and equipment as we continue to invest in the longer term growth of our business, partially offset by \$102.1 million of maturities of investments.

Net cash used in investing activities of \$106.7 million for fiscal 2015 was due to \$116.1 million of purchases of investments and \$23.3 million of purchases of property and equipment, partially offset by \$32.8 million of maturities of investments.

Net cash used in investing activities of \$19.0 million for fiscal 2014 consisted of purchases of property and equipment.

Cash Flows from Financing Activities

Net cash provided by financing activities of \$74.2 million for fiscal 2016 primarily consisted of \$73.3 million of net proceeds from the senior notes and \$3.5 million of proceeds from exercises of stock options, partially offset by \$3.2 million in payments of IPO costs.

Net cash provided by financing activities of \$142.8 million for fiscal 2015 primarily consisted of \$138.3 million of net proceeds from the sale of our Series E convertible preferred stock and \$4.9 million of proceeds from exercises of stock options.

Net cash provided by financing activities of \$104.2 million for fiscal 2014 primarily consisted of \$100.7 million of net proceeds from the sale of Series D convertible preferred stock and \$3.7 million of proceeds from exercises of stock options.

Debt Obligations

In April 2016, we issued an aggregate principal amount of \$75.0 million of senior notes due on April 15, 2019 to Goldman Sachs Specialty Lending Group, L.P. Interest is payable monthly in arrears. The senior notes are secured by substantially all of our assets. The senior notes bear interest at a rate based on adjusted LIBOR plus an applicable margin of 9% per annum or, at our option, the base rate (defined as the greatest of (a) the Prime Rate, (b) the Federal Funds Effective Rate plus 0.5%, and (c) 4% per annum) plus an applicable margin of 8% per annum. Under the terms of the senior notes, we are required to early repay the senior notes in full upon receipt of any cash proceeds from a qualified offering (or IPO). The senior notes contain a guaranteed minimum return to the holder of the senior notes of \$6.5 million, which is reduced by \$1.6 million of debt issuance costs paid following the issuance of the senior notes and all interest payments to date, at the time of repayment of all principal of the senior notes. If on date of the repayment of all principal of the senior notes the total of \$1.6 million of debt issuance costs plus interest paid to date is less than the guaranteed minimum return, we are required to make an additional payment equal to the difference between the guaranteed minimum return and the total of \$1.6 million of debt issuance costs plus interest paid to date. The senior notes also contain two financial covenants, (i) a minimum consolidated cash billings of \$300.0 million at any fiscal quarter, beginning with the fiscal quarter ended April 30, 2016, for the four fiscal quarter period and (ii) a minimum consolidated liquidity of \$50.0 million at any time during this agreement. As of July 31, 2016, we were in compliance with all financial covenants. We intend to repay the entire outstanding principal amount of the senior notes prior to the effectiveness of this offering. As a result, we may incur a loss on debt extinguishment.

We had a revolving credit line with Comerica Bank which provided a total of \$15.0 million available for us to borrow. This credit facility was secured by substantially all of our assets other than our intellectual property and contained certain financial and non-financial restrictive covenants, including a minimum liquidity ratio of 1.25 to 1.00, which we had to comply with monthly. This credit facility expired unutilized in November 2015. For further information on our debt obligations, see note 5 of the notes to consolidated financial statements included elsewhere in this prospectus.

Contractual Obligations

The following table summarizes our contractual obligations as of July 31, 2016:

	Payments Due by Period			
	Total	Less than 1 Year	1 Year to 3 Years	3 to 5 Years
	(In thousands)			
Contractual Obligations:				
Senior notes(1)	\$ 75,000	\$ —	\$ 75,000	\$ —
Interest expense(2)	20,583	7,604	12,979	—
Operating lease obligations	41,707	9,698	17,456	14,553
Other purchase commitments(3)	18,911	18,911	—	—
Purchase commitments with contract manufacturers(4)	19,820	19,820	—	—
Total	\$176,021	\$56,033	\$105,435	\$ 14,553

(1) Required to be fully repaid upon receipt of any cash proceeds from a qualified offering (or IPO), and as such, the senior notes may be repaid within one year.

(2) Reflects contractual obligations to pay interest on the senior notes until the maturity of the senior notes.

(3) Purchase obligations pertaining to our normal operations.

(4) Commitments with our contract manufacturers, which consist of obligations for on-hand inventories and non-cancelable purchase orders for non-standard components.

As of July 31, 2016, payments related to our above outstanding non-cancellable lease obligations will be made through fiscal 2021.

From time to time, we make commitments with our contract manufacturer, which consist of obligations for on-hand inventories and non-cancelable purchase orders for non-standard components. We record a charge to cost of product sales for firm, non-cancelable and unconditional purchase commitments with the contract manufacturers for non-standard components when and if quantities exceed our future demand forecasts. Our historical charges have not been material.

As of July 31, 2016, we had accrued liabilities related to uncertain tax positions, which are reflected on our consolidated balance sheet. These accrued liabilities are not reflected in the table above since it is unclear when these liabilities will be paid.

Off-Balance Sheet Arrangements

As of July 31, 2016, we did not have any relationships with unconsolidated organizations or financial partnerships, such as structured finance or special purpose entities that would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

Segment Information

We have one primary business activity and operate in one reportable segment.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to market risk in the ordinary course of our business. Market risk represents the risk of loss that may impact our financial position due to adverse changes in financial market prices and rates. Our market risk exposure is primarily a result of fluctuations in foreign currency exchange rates and interest rates.

Foreign Currency Risk

Our consolidated results of operations and cash flows are subject to fluctuations due to changes in foreign currency exchange rates. Historically, our revenue contracts have been denominated in U.S. dollars. Our expenses are generally denominated in the currencies in which our operations are located. To date, we have not entered into any hedging arrangements with respect to foreign currency risk or other derivative instruments. In the event our foreign sales and expenses increase, our operating results may be more greatly affected by foreign currency exchange rate fluctuations, which can affect our operating income or loss. The effect of a hypothetical 10% change in foreign currency exchanges rates applicable to our business would not have had a material impact on our historical consolidated financial statements.

Interest Rate Risk

Our investment objective is to conserve capital and maintain liquidity to support our operations; therefore, we generally invest in highly liquid securities, consisting primarily of bank deposits, money market funds, commercial paper, certificates of deposit and corporate bonds. Such fixed and floating interest-earning instruments carry a degree of interest rate risk. Fixed income securities may have their fair market value adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than predicted if interest rates fall. Due to the short-term nature of our investment portfolio, we do not believe an immediate 10% increase or decrease in interest rates would have a

material effect on the fair market value of our portfolio. Therefore, we do not expect our operating results or cash flows to be materially affected by a sudden change in interest rates.

In April 2016, we issued \$75.0 million principal amount of senior notes. An immediate increase or decrease in current interest rates could have a material impact on our senior notes, which bear interest at variable rates. The effect of a hypothetical 100 basis point change in interest rates applicable to our borrowings under the senior notes could increase or decrease our annual interest expense by approximately \$0.8 million. As of July 31, 2016, we had not employed any interest rate derivative products against our debt obligation. However, we may enter into interest rate hedging agreements in the future to mitigate our exposure to interest rate risk.

We do not enter into investments for trading or speculative purposes and have not used any derivative financial instruments to manage our interest rate risk exposure.

Critical Accounting Estimates

Our consolidated financial statements are prepared in accordance with GAAP. The preparation of these consolidated financial statements requires our management to make estimates, assumptions and judgments that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the applicable periods. We base our estimates, assumptions and judgments on historical experience and on various other factors that we believe to be reasonable under the circumstances. Different assumptions and judgments would change the estimates used in the preparation of our consolidated financial statements, which, in turn, could change the results from those reported. We evaluate our estimates, assumptions and judgments on an ongoing basis.

The critical accounting estimates, assumptions and judgments that we believe have the most significant impact on our consolidated financial statements are described below.

Revenue Recognition

We derive revenue from two sources: (i) product revenue, which consists of hardware combined with software and software-only revenue, and (ii) support and service revenue which includes post-contract customer support, or PCS, and professional services. Revenue is recognized when all of the following criteria are met:

Persuasive evidence of an arrangement exists. We rely on sales agreements and purchase orders to determine the existence of an arrangement.

Delivery has occurred. We typically recognize product revenue upon shipment, when title and risk of loss are transferred to our partners at that time. Service revenue is recognized as services are performed.

The fee is fixed or determinable. We assess whether the fee is fixed or determinable based on the payment terms associated with the transaction. Payment from partners is not contingent upon the partners receiving payments from end-customers.

Collectability is reasonably assured. We assess collectability based on a credit analysis and payment history.

Most of our arrangements are multiple-element arrangements with a combination of hardware, software, support and maintenance and other professional services. Products and services generally qualify as separate units of accounting. Hardware deliverables include proprietary software, which

together deliver the essential functionality of the products. For multiple-element arrangements, we allocate revenue to each unit of accounting based on an estimated selling price at the arrangement inception. The estimated selling price for each element is based upon the following hierarchy: VSOE of selling price, if available, third-party evidence, or TPE, of selling price, if VSOE of selling price is not available, or best estimate of selling price, or BESP, if neither VSOE of selling price nor TPE of selling price are available. Other than certain PCS related deliverables, we have not established VSOE of fair value and TPE typically cannot be obtained, therefore we typically allocate consideration to deliverables based on BESP. Our process to determine VSOE is based upon the evaluation of normal pricing and discount practices on deliverables when they are sold separately. Our process to determine BESP for our products and services is based on qualitative and quantitative considerations of multiple factors, which primarily include historical sales, margin objectives and discount behavior. Additional considerations are given to other factors such as customer demographics, costs to manufacture products or provide services, pricing practices and market conditions.

Commissions

Commissions consist of direct incremental costs paid to our sales force related to customer orders. Commissions are expensed over the same period that revenue is recognized from the related customer order. Deferred commissions are recoverable through the revenue streams that will be recognized under the related orders. Amortization of deferred commissions is included in sales and marketing expense in the consolidated statements of operations.

Convertible Preferred Stock Warrant Liability

We account for freestanding warrants to purchase shares of our convertible preferred stock as liabilities in the consolidated balance sheets at their estimated fair value. The fair value of the warrants is estimated using the Black-Scholes-Merton, or Black-Scholes, option-pricing model and is subject to re-measurement at fair value at each reporting date. Changes in the estimated fair value of the warrants are recorded in the consolidated statements of operations within other expense—net. We will continue to adjust the convertible preferred stock warrant liability for changes in fair value until the earlier of conversions, exercise or expiration of the warrants. Upon the conversion of the underlying preferred stock to Class B common stock in connection with an initial public offering, or IPO, the convertible preferred stock warrants will become warrants to purchase Class B common stock, the related convertible preferred stock warrant liability will be re-measured to its then fair value and will be reclassified to additional paid-in capital, and subsequently we will cease to record any related fair value adjustments.

Income Taxes

We account for income taxes using the asset and liability method. Deferred income taxes are recognized by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The measurement of deferred tax assets is reduced, if necessary, by a valuation allowance to amounts that are more likely than not to be realized.

We recognize uncertain tax positions only if it is more likely than not to be sustained based solely on its technical merits as of the reporting date. We consider many factors when evaluating and estimating our tax positions and tax benefits, which may require periodic adjustments and which may not accurately anticipate actual outcomes.

Stock-Based Compensation

Stock-based compensation expense is measured and recognized in the financial statements based on the fair value of the awards granted. The fair value of a stock option is estimated on the grant date using the Black-Scholes option-pricing model. The fair value of an RSU is measured using the fair value of our common stock on the date of the grant. Stock-based compensation expense is recognized, net of forfeitures, over the requisite service periods of the awards, which is generally four years.

Our use of the Black-Scholes option-pricing model requires the input of highly subjective assumptions, including the fair value of the underlying common stock, expected term of the option, expected volatility of the price of our common stock, risk-free interest rates, and the expected dividend yield of our common stock. The assumptions used in our option-pricing model represent management's best estimates. These estimates involve inherent uncertainties and the application of management's judgment. If factors change and different assumptions are used, our stock-based compensation expense could be materially different in the future.

These assumptions and estimates are as follows:

Fair Value of Common Stock. As our stock is not publicly traded, we estimate the fair value of common stock as discussed in "—Common Stock Valuations" below.

Expected Term. The expected term of employee stock options represents the weighted-average period that the stock options are expected to remain outstanding. To determine the expected term, we generally apply the simplified approach in which the expected term of an award is presumed to be the mid-point between the vesting date and the expiration date of the award as we do not have sufficient historical exercise data to provide a reasonable basis for an estimate of expected term.

Risk-Free Interest Rate. We base the risk-free interest rate on the yields of U.S. Treasury securities with maturities approximately equal to the term of employee stock option awards.

Expected Volatility. As we do not have a trading history for our common stock, the expected volatility for our common stock was estimated by taking the average historic price volatility for industry peers based on daily price observations over a period equivalent to the expected term of the stock option awards. Industry peers consist of several public companies in our industry which are either similar in size, stage of life cycle or financial leverage and were the same as the comparable companies used in the common stock valuation analyses.

Dividend Rate. We have never declared or paid any cash dividends and do not presently plan to pay cash dividends in the foreseeable future. Consequently, we use a dividend rate of zero.

We must also estimate a forfeiture rate to calculate the stock-based compensation expense for our awards. Our forfeiture rate is based on an analysis of our actual forfeitures. We will continue to evaluate the appropriateness of the forfeiture rate based on actual forfeiture experience, analysis of employee turnover and other factors. Quarterly changes in the estimated forfeiture rate can have a significant impact on our stock-based compensation expense as the cumulative effect of adjusting the rate is recognized in the period the forfeiture estimate is changed. Higher revised forfeiture rate than previously estimated will result in an adjustment that will decrease the stock-based compensation expense recognized in the consolidated statement of operations. Lower revised forfeiture rate than previously estimated will result in an adjustment that will increase the stock-based compensation expense recognized in the consolidated statement of operations.

We will continue to use judgment in evaluating the assumptions related to our stock-based compensation on a prospective basis. As we continue to accumulate additional data related to our common stock, we may have refinements to our estimates, which could materially impact our future stock-based compensation expense.

We have granted stock awards with a service condition only, which stock-based compensation expense is recognized using straight-line method over the requisite service period of the awards. As of July 31, 2016, we had a total of approximately \$35.5 million of unrecognized stock-based compensation expense, net of estimated forfeitures, related to stock awards with a service condition only, which is expected to be recognized over a weighted-average period of 2.2 years. Additionally, we have granted stock options and RSUs that will vest upon satisfaction of both service and performance conditions, together referred to as the performance stock awards, for which stock-based compensation expense is recognized using the accelerated attribution method. The service condition of the performance stock awards is satisfied over the vesting term but the performance condition will only be satisfied upon certain events, including a change of control or the expiration of a lock-up period established in connection with the IPO, or both certain events and the achievement of specified performance targets. Stock-based compensation expense related to the performance stock awards is excluded from net loss per share attributable to common stockholders in the periods when the satisfaction of the performance condition associated with the performance stock awards is not deemed probable. As of July 31, 2016, we had a total of approximately \$151.1 million of unrecognized stock-based compensation expense, net of estimated forfeitures, related to the performance stock awards, of which none had been recognized as satisfaction of the performance condition is not deemed probable. In the quarter in which this offering occurs we expect to recognize stock-based compensation expense related to the performance stock awards as the satisfaction of the performance condition will be deemed probable. Had the IPO been deemed probable as of July 31, 2016, we would have recorded approximately \$59 million of compensation expense, net of estimated forfeitures related to the performance stock awards during fiscal 2016. If the IPO is deemed probable as of October 31, 2016, our estimated compensation expense related to the performance stock awards granted to date would be approximately \$77 million, net of estimated forfeitures, during the three months ending October 31, 2016. Additionally, we will begin to record stock-based compensation expense related to the performance stock awards for the portion of the awards for which the service condition has not been satisfied over the remaining vesting term of the awards.

In July 2016, we approved a tender offer stock option exchange program under which outstanding employee stock options with exercise prices of \$8.41 or greater per share could be exchanged for a specified number of performance RSUs based on a predetermined exchange ratio granted with a new vesting period. As a result of the tender offer, on August 16, 2016, stock options to purchase approximately 1.4 million shares of Class B common stock were cancelled and, in exchange, we granted approximately 0.9 million performance RSUs to eligible employees. The tender offer resulted in a total incremental stock-based compensation expense of approximately \$3.4 million which we will begin to recognize when it is probable that the performance condition associated with the performance RSUs will be met.

Upon the settlement of RSUs with both service and performance conditions, or the performance RSUs, granted to our executive officers, we plan to undertake a net settlement of the performance RSUs and remit income taxes on behalf of the holders of the performance RSUs at the applicable minimum statutory rates. Based on the performance RSUs outstanding as of July 31, 2016 for which the service condition had been satisfied, assuming that the performance condition had been satisfied on the date of the settlement and the price of our Class A common stock at the time of settlement was equal to the assumed initial public offering price per share of \$14.00, which is the midpoint of the range on the cover of this prospectus, we estimate that our tax obligation on the initial settlement date would be approximately \$5 million in the aggregate. However, depending on our closing stock price on the vesting date, which is also the settlement date, the amounts of actual tax obligation on the settlement date could materially differ from the tax obligation as previously estimated. Following the initial settlement date, the performance RSUs will begin to vest in accordance with the service condition, and the tax obligations due on each such settlement date will depend on the price of our common stock on each such settlement date.

Common Stock Valuations

The fair value of the common stock underlying our stock options was determined by our board of directors. The valuations of our common stock were determined in accordance with the guidelines outlined in the American Institute of Certified Public Accountants Practice Aid, *Valuation of Privately-Held-Company Equity Securities Issued as Compensation*. In the absence of a public trading market, our board of directors, with input from management, exercised significant judgment and considered numerous objective and subjective factors to determine the fair value of our common stock as of the date of each option grant, including the following factors:

- contemporaneous valuations performed by independent third-party valuation firms;
- the prices, rights, preferences and privileges of our convertible preferred stock relative to those of our common stock;
- the lack of marketability of our common stock;
- our actual operating and financial performance;
- current business conditions and projections;
- our history and the timing of the introduction of new products and services;
- our stage of development;
- the likelihood of achieving a liquidity event, such as an initial public offering or a merger or acquisition of our business given prevailing market conditions;
- the illiquidity of stock-based awards involving securities in a private company;
- the market performance of comparable publicly-traded companies;
- recent private stock sales transactions; and
- U.S. and global capital market conditions.

In valuing our common stock, the fair value of our business, or Enterprise Value, was determined using an income approach and a market approach, which are both considered highly complex and subjective valuation methodologies. The income approach estimates the fair value of a company based on the present value of the company's future estimated cash flows and the residual value of the company beyond the forecast period. These future cash flows, including the cash flows beyond the forecast period for the residual value, are discounted to their present values using an appropriate discount rate, to reflect the risks inherent in the company achieving these estimated cash flows. We used the guideline public company method in applying the market approach. The guideline public company method is based upon the premise that indications of value for a given entity can be estimated based upon the observed valuation multiples of comparable public companies, the equity of which is freely traded by investors in the public securities markets. The Enterprise Value determined was then adjusted to: (1) add back cash on hand and tax benefits from NOLs and (2) remove certain long-term liabilities in order to determine an equity value, or Equity Value.

The resulting Equity Value was then allocated to the common stock using a combination of the option pricing method, or OPM, and a Probability Weighted Expected Return Method, or PWERM. The PWERM approach involves the estimation of multiple future potential outcomes for us, and estimates of the probability of each respective potential outcome. The common stock per share value determined using this approach is ultimately based upon probability-weighted per share values resulting from the various future scenarios, which include an initial public offering, merger or sale, or continued operation as a private company. Additionally, the OPM uses the preferred stockholders' liquidation preferences, participation rights, dividend rights, and conversion rights to determine the value of each share class in specific potential future outcomes considered in the PWERM approach.

After the Equity Value is determined and allocated to the various classes of shares, a discount for lack of marketability, or DLOM is applied to arrive at the fair value of the common stock. A DLOM is applied based on the theory that as a private company, an owner of the stock has limited opportunities to sell this stock and any such sale would involve significant transaction costs, thereby reducing overall fair market value. Our assessments of the fair value of the common stock for grant dates between the dates of the valuations were based in part on the current available financial and operational information and the common stock value provided in the most recent valuation as compared to the timing of each grant. For financial reporting purposes, we considered the amount of time between the valuation date and the grant date to determine whether to use the latest common stock valuation or a straight-line calculation between the two valuation dates. This determination included an evaluation of whether the subsequent valuation indicated that any significant change in valuation had occurred between the previous valuation and the grant date.

Once we are operating as a public company, we will rely on the closing price of our Class A common stock as reported on the date of grant to determine the fair value of our common stock.

Based on the assumed initial public offering price per share of \$14.00, which is the midpoint of the range set forth on the cover of this prospectus, the aggregate intrinsic value of our outstanding stock awards as of July 31, 2016 was approximately \$423.4 million, of which approximately \$161.3 million related to vested awards and \$262.1 million related to unvested awards.

Recent Accounting Pronouncements

In August 2016, the Financial Accounting Standards Board, or FASB, issued Accounting Standards Update, or ASU, 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This new standard will make eight targeted changes to how cash receipts and cash payments are presented and classified in the statement of cash flows. The new standard is effective for fiscal years beginning after December 15, 2018, which means that it will be effective for us in our fiscal year beginning August 1, 2019. The new standard will require adoption on a retrospective basis unless it is impracticable to apply, in which case we would be required to apply the amendments prospectively as of the earliest date practicable. We are currently evaluating the effect the adoption of this guidance will have on our consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, Stock Compensation, which is intended to simplify several aspects of the accounting for share-based payment award transactions. ASU 2016-09 is effective for the fiscal years beginning after December 15, 2017, and interim periods within fiscal years beginning after December 15, 2018 for us, with early adoption permitted. We are currently evaluating the effect the adoption of this guidance will have on our consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases, which requires recognition of right-to-use lease assets and lease liabilities for all leases (with the exception of short-term leases) on the balance sheet of lessees. ASU 2016-02 is effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020 for us, with early adoption permitted. ASU 2016-02 requires a modified retrospective transition approach and provides certain optional transition relief. We are currently evaluating the effect the adoption of this guidance will have on our consolidated financial statements.

In November 2015, the FASB issued ASU 2015-17, Balance Sheet Classification of Deferred Taxes. The standard requires deferred tax liabilities and assets to be classified as non-current in a classified statement of financial position. We early adopted ASU 2015-17 on a prospective basis effective January 31, 2016, which resulted in a reclassification of our net current deferred tax asset to the net non-current deferred tax asset in our consolidated balance sheet as of January 31, 2016 (see

[Table of Contents](#)

[Index to Financial Statements](#)

note 12 of the notes to consolidated financial statements included elsewhere in this prospectus). We did not retrospectively adjust prior periods. We believe that this change in accounting principle provides more useful information by simplifying the presentation of deferred tax assets and liabilities.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). The standard is a comprehensive new revenue recognition model that requires revenue to be recognized in a manner to depict the transfer of goods or services to a customer at an amount that reflects the consideration expected to be received in exchange for those goods or services. In August 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers, to defer the effective date of ASU 2014-09 by one year, but permits entities to adopt the original effective date if they choose. In 2016, the FASB issued ASU 2016-08, ASU 2016-10 and ASU 2016-12 that provide interpretive clarifications on the new guidance in Topic 606. We expect to adopt these updates in Topic 606 by August 1, 2018 with early adoption allowed, beginning August 1, 2017. We are currently evaluating the impact that the adoption of these updates will have on our consolidated financial statements.

BUSINESS

Our Mission

Our mission is to deliver invisible infrastructure and elevate IT to focus on the applications and services that power their business.

Overview

We provide a leading next-generation enterprise cloud platform that converges traditional silos of server, virtualization and storage into one integrated solution and can also connect to public cloud services. Our software delivers the agility, scalability and pay-as-you-grow economics of the public cloud, while addressing enterprise requirements of application mobility, security, data integrity and control. We provide our customers with the flexibility to selectively utilize the public cloud for suitable workloads and specific use cases by enabling increasing levels of application mobility across private and public clouds. This capability will enable hybrid cloud deployments and addresses a critical requirement for any next-generation enterprise cloud platform. We have combined advanced web-scale technologies with elegant consumer-grade design to deliver a powerful enterprise cloud platform that elevates IT organizations to focus on the applications and services that power their businesses. We refer to our platform as “invisible infrastructure” because it provides constant availability and low-touch management, enables application mobility across computing environments and reduces inefficiencies in IT planning.

Leading Internet companies and public cloud providers such as Google Inc., Facebook, Inc. and Amazon.com, Inc. have embraced convergence and distributed systems and implemented web-scale technologies in their proprietary operating environments. They took these steps because traditional siloed IT infrastructure architectures failed to deliver the levels of scalability and operational efficiency that their dynamic businesses required. To address these challenges, we have pioneered a converged web-scale architecture that can be easily deployed by organizations of any size to address the limitations of traditional IT infrastructure. Our enterprise cloud platform also addresses the limitations of existing virtualization products, which often require days or weeks for simple provisioning or deployment tasks and limit the ability to migrate applications across computing environments such as different hypervisors, or software that allows multiple operating systems to share a single hardware host, containers, which are a method of virtualizing the operating system so that multiple applications and their dependent libraries can share the same Linux operating system instance, and public clouds.

Our solution is comprised of two comprehensive software product families, Acropolis and Prism, and is delivered on commodity x86 servers, also referred to as nodes. These nodes can be joined to form clusters, permitting the pooling of resources across servers to increase overall system performance, capacity and resiliency. Acropolis includes our Distributed Storage Fabric that delivers efficient and high performance enterprise-grade data management features. Acropolis also includes a built-in hypervisor, named AHV, and our innovative Application Mobility Fabric that will enable application placement, conversion and migration across different hypervisors, and between public and private clouds. Prism delivers integrated virtualization and infrastructure management, robust operational analytics and a suite of one-click administration capabilities.

Our platform is simple, scalable and cost-effective, and also facilitates application mobility across computing environments. We deliver extensive automation and converge disparate silos into a single system to significantly enhance IT agility and scalability, enabling organizations to scale infrastructure incrementally from a few to thousands of nodes. We estimate, based on a model validated by IDC in August 2015, that our solution can reduce total cost of ownership by up to 60% compared to traditional infrastructure for a broad set of workloads and up to approximately 30% compared to public cloud

offerings for predictable workloads.¹ Our software also provides customers with flexibility and choice of where applications run, reducing their dependence on a specific vendor, which is commonly known as vendor lock-in.

Our solution addresses a broad range of workloads, including enterprise applications, databases, virtual desktop infrastructure, or VDI, unified communications and big data analytics and we have recently announced the capability to support both virtualized and non-virtualized applications. We have end-customers across a broad range of industries, including automotive, consumer goods, education, energy, financial services, healthcare, manufacturing, media, public sector, retail, technology and telecommunications. We also sell to service providers who utilize our platform to provide a variety of cloud-based services to their customers. We had a broad and diverse base of 3,768 end-customers as of July 31, 2016, including approximately 310 Global 2000 enterprises. Representative end-customers include Activision Blizzard, Inc., Best Buy Co., Inc., Covance Inc., Jabil Circuit, Inc., Kellogg Co., Nasdaq, Inc., Nintendo Co., Ltd., Nordstrom, Inc., NTT SmartConnect Corporation, Total S.A., Toyota Motor of North America, U.S. Department of Defense Office of the Secretary of Defense and Yahoo! JAPAN Corporation.

Since our founding, we have experienced significant growth in our business, including:

- Average billings growth of 20% on a quarterly basis for the last eight fiscal quarters, which grew from \$60.8 million in the three months ended October 31, 2014 to \$206.6 million in the three months ended July 31, 2016.
- Average revenue growth of 17% on a quarterly basis for the last eight fiscal quarters, which grew from \$46.1 million in the three months ended October 31, 2014 to \$139.8 million in the three months ended July 31, 2016.
- An increase in deferred revenue of 713% over the last eight fiscal quarters, which grew from \$36.5 million as of July 31, 2014 to \$296.5 million as of July 31, 2016.
- Average total end-customer growth of approximately 22% on a quarterly basis over the last seven fiscal quarters, which grew from 782 end-customers as of July 31, 2014 to 3,768 end-customers as of July 31, 2016. There were 657 new end-customers acquired during the three months ended July 31, 2016.

We have continued to make significant investments as we scale our business, including in developing and improving our platform, expanding our sales and marketing capabilities and global coverage, and in expanding our general and administrative resources to support our growth. In the recent quarters, we have begun to realize some of the benefits of the scale of our business, including:

- An improvement in adjusted gross margin percentage from 57% in the three months ended October 31, 2014 to 61% in the three months ended July 31, 2016.

¹ Percentages are based on an internal model prepared by us using available industry data and our estimates on IT spending, which data and calculations were validated by IDC, and reflect a three-to-five year cost of ownership for traditional infrastructure and four year cost of ownership for public cloud offerings. The cost of ownership model for traditional infrastructure estimates typical capital expenditures (storage, compute, networking and software costs) and operating expenses (support, facilities and management costs) for a mid-size server virtual machine required for mid-to-large sized enterprises using these solutions and compares them to the same costs for a comparable Nutanix solution. The cost of ownership model for the public cloud estimates assumes a predictable server workload over four years, typical compute, storage, cloud monitoring charges and basic level support costs, and compares those costs to the capital expenditures and operating expenses for a comparable Nutanix solution. Calculations for both models are based on U.S.-based list pricing with assumptions related to typical discount rates in the industry, derived from either published price lists or vendor quotes. IDC's validation of the cost of ownership models, which was commissioned by us, included a review and validation of the cost of ownership calculation methodology as well as validating the cost assumptions underlying the calculations. See "Risk Factors—Our estimates of end-customer cost savings may not be indicative of the actual benefits that end-customers experience in the future."

- An improvement in our cash flow from operating activities from a use of cash of \$6.9 million in the three months ended October 31, 2014 to a generation of \$2.4 million of cash in the three months ended July 31, 2016. Over the same periods, our free cash flows have improved from a use of cash of \$11.4 million to a use of cash of \$6.5 million.

See “Selected Consolidated Financial and Other Data—Non-GAAP Financial Measures and Key Performance Measures” for information on the uses and limitations of billings, adjusted gross margin percentage, and free cash flow as financial measures and a reconciliation of these non-GAAP financial measures and key performance measures to the most directly comparable financial measures calculated and presented in accordance with GAAP.

On an annual basis, our total revenue was \$127.1 million, \$241.4 million and \$444.9 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively, representing year-over-year growth of 90% and 84%, respectively. Our net losses were \$84.0 million, \$126.1 million and \$168.5 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively. Net cash used in operating activities was \$45.7 million and \$25.7 million for fiscal 2014 and fiscal 2015, respectively, and net cash generated from operations was \$3.6 million for fiscal 2016. As of July 31, 2016, we had an accumulated deficit of \$441.9 million.

Industry Background

Emergence and adoption of web-scale IT

The resiliency, agility, flexibility and scalability of IT capabilities have become significant competitive differentiators and play an important role in driving business success. Internet companies in particular faced extreme dependency on IT as they aggressively competed for first-mover advantage in markets that often presented minimal barriers to entry for new competitors. These companies required IT infrastructure that would enable rapid development and deployment of new applications and services, effectively handle unpredictable and large-scale usage demands and minimize capital and operating expenditures. Traditional IT infrastructure solutions failed to meet these requirements, and as a result, these companies developed their own infrastructure stacks built with web-scale architectures, which are based on advanced distributed systems technology. These infrastructure stacks, driven by powerful proprietary software, provided greater agility, highly automated operations, predictable and linear scalability and lower total cost of ownership.

Today, organizations of all sizes across all industries are seeking to leverage IT capabilities as a competitive advantage and are also experiencing the challenges associated with traditional IT solutions. As a result, the benefits of web-scale architectures introduced by leading Internet companies and public cloud providers are now desired by many IT organizations. According to Gartner, by 2020, 40% of global enterprise Chief Information Officers, or CIOs, will have initiated a corporate web-scale IT initiative, which is a significant increase from today’s fewer than 5%.²

Limitations of existing enterprise IT infrastructure

Traditional IT infrastructure presents significant architectural challenges related to existing storage and virtualization technologies, limiting the IT organization’s ability to deliver applications and services fast and efficiently.

Limitations of storage

Traditional centralized storage requires complex and expensive storage networks that connect storage to servers where applications run. This separation of data storage from the applications has slowed performance, increased costs, added administrative overhead and limited scalability. The adoption of flash has magnified the architectural limitations of centralized storage because placing

² See Gartner note (1) in the section titled “Market and Industry Data.”

flash devices outside the server diminishes the expected performance gains. Early efforts to alleviate the challenges of centralized storage involved placing hard drives or flash devices in servers, but these offerings failed to gain widespread adoption due to the lack of a scale-out data fabric that can (i) pool resources across many servers in a cluster, (ii) deliver high levels of resiliency and (iii) address critical data management requirements.

Also, managing storage policies, such as compression, deduplication and replication, has been complicated due to the wide adoption of virtualization. Virtualization enables deployment of multiple applications on a single server, but paradoxically depends on centralized storage arrays that are designed to operate with a single application on each server. This incongruity results in storage policies that are not mapped directly to virtualized applications, causing inefficient storage management and wasteful overprovisioning.

Limitations of virtualization

Today's virtualization products, comprised primarily of hypervisors and associated management, were generally designed to operate with disparate silos of infrastructure. As a result, these products often require days or weeks for simple application and infrastructure provisioning or deployment tasks. Additionally, virtualization was not designed with the ability to migrate applications across different hypervisors or emerging computing environments such as containers and public clouds. This is creating cost and complexity challenges as more enterprises seek to operate multi-vendor hypervisor environments and adopt containers and hybrid cloud computing. Lack of application mobility across these environments has resulted in silos of computing that limit agility, drive up costs and result in vendor lock-in.

Challenges resulting from limitations of existing enterprise infrastructure options

Limitations of traditional storage and virtualization products are creating a number of challenges for IT organizations, including:

- **Lack of agility:** With traditional enterprise infrastructure, different silos of servers, virtualization, storage and networks are typically managed by specialist IT teams as each silo has its own proprietary operating system, hardware platform and management interface. These products require extensive training, experience and certifications to effectively operate them, restricting IT professionals from working across silos. Every time infrastructure is provisioned to support new application requirements, these different teams must coordinate and align their workflows, significantly reducing the agility of the IT function.
- **Diminishing performance as infrastructure scales:** Traditional infrastructure places data storage in dedicated, performance-bound appliances that are connected to servers over storage networks. In these environments, scaling capacity by adding more hard drives or flash devices does not proportionately improve performance because the storage controllers that read and write data are often fixed at the time of initial deployment. Managing an ever-growing volume of data with the same capacity storage controllers reduces response times and negatively impacts application performance. Expanding the storage controllers typically requires an expensive and time-consuming "forklift upgrade" (i.e., requiring an entire new system purchase and migration of data from the prior system).
- **Costly overprovisioning and manual operations:** Due to their lack of scalability and complexity of deployment, servers and storage arrays are typically overprovisioned for longer-term peak capacity and remain underutilized for extensive periods. Furthermore, existing virtualization products are often sold under restrictive enterprise license agreements, which may lead to significant underutilization of software licenses and higher costs. Both of these factors can significantly impact infrastructure IT budgets. These traditional products also require extensive manual administration for routine tasks such as upgrades and maintenance, driving up recurring operating expenses. According to IDC, IT administrators spend

approximately 80% of their time just on maintaining the existing infrastructure. This keeps IT organizations from focusing on the applications and services that drive their business.

- **Closed architectures that prevent mobility of applications and adoption of new technologies:** Traditional infrastructure suppliers have created vendor lock-in by providing closed architecture technologies that often do not interoperate well with other enterprise computing environments. This makes application portability difficult while also limiting adoption of new technologies. With the pace of innovation in datacenter technologies, these closed architectures can significantly harm customers and reduce their competitiveness.

Limitations of full-scale public cloud adoption

While the public cloud offers significant agility, scalability and economic benefits over traditional infrastructure, full-scale adoption has been challenging for many organizations due primarily to the lack of control over infrastructure service levels, data integrity and compliance, as well as potentially higher total lifetime costs. Public cloud providers typically offer homogenous infrastructure services and do not provide adequate control or granularity to customize specific services to deliver tiered levels of application performance and availability for traditional enterprise workloads with varying requirements. Also, customers are largely dependent on public cloud providers to ensure data security and compliance with regulatory requirements, which are further complicated by providers operating across many jurisdictions and being subjected to local laws, increasing the potential for compliance risk.

Extensive usage of public clouds can also result in higher lifetime costs, particularly for applications with predictable and consistent infrastructure requirements. We believe the majority of existing enterprise applications exhibit predictable infrastructure utilization patterns and can be delivered with lower cost using an enterprise cloud platform like ours. Further, most public cloud providers do not easily allow portability of applications and data to alternative providers or to on-premises enterprise cloud environments as requirements, costs and services levels change. Removing an application from the public cloud is expensive, time-consuming and creates a high risk of downtime.

We believe the most successful enterprise cloud providers in the future will offer flexible software platforms that seamlessly integrate different consumption models and enable the movement of applications between on-premises environments and the public cloud.

Our Solution

Our enterprise cloud platform is based on powerful distributed systems architecture and converges server, virtualization and storage resources into one integrated solution delivered on commodity x86 servers. Generalist IT professionals are able to manage one datacenter operating system and management interface, which reduces administrative time and costs. We combine the benefits of the public cloud such as agility, scalability and pay-as-you-grow economics with the enterprise requirements of application mobility, security, data integrity and control. Our solution is comprised of two comprehensive software product families, Acropolis and Prism. The diagram below represents our platform's capabilities and the different computing environments it is intended to support.

Acropolis includes our Distributed Storage Fabric that replaces traditional storage arrays and delivers efficient and high performance enterprise-grade data management across a range of storage protocols to support a wide variety of enterprise applications, and we have recently introduced the capability to operate both virtualized and non-virtualized applications. Acropolis also includes our innovative Application Mobility Fabric that will enable increasing levels of application placement, conversion and migration across different hypervisors and public clouds. Additionally, the built-in Acropolis Hypervisor can replace expensive third-party hypervisors and eliminate an additional infrastructure silo. With Acropolis, our end-customers can benefit from faster time to market, application mobility, up to a 60% reduction of total cost of ownership compared to traditional infrastructure,³ and up to an 80% reduction in virtualization costs⁴. In the last year, we have made a number of product improvements which we believe further increases these advantages.

³ See footnote 1 on page 92.

⁴ Percentages are based on an internal model prepared by us using available industry data and our estimates on virtualization costs. Our internal model compares the software license and support costs of a virtualization solution offered by VMware vSphere with the built-in virtualization solution in the Acropolis Hypervisor for two typical customer scenarios: mid-size enterprise customers requiring core virtualization functionality to implement server consolidation and large enterprise customers that need a virtualization solution to run enterprise applications in production environments. Calculations are based on U.S.-based list pricing, with no assumptions made on discounting in order to make an equivalent price comparison. See "Risk Factors—Our estimates of end-customer cost savings may not be indicative of the actual benefits that end-customers experience in the future."

Built with consumer-grade design, Prism delivers integrated virtualization and infrastructure management, robust operational analytics, a search-first interface, self-service capabilities and one-click administration. Prism allows routine IT operations that are typically manual and cumbersome to be fully automated or completed with just one click, including capacity planning, provisioning of new applications and resources, troubleshooting and software upgrades. Prism also offers a self-service portal that enables developers and line-of-business owners to provision services as well as a broad set of APIs for integration with third-party cloud management and orchestration software.

Key benefits of our solution include:

- **Agility:** Our platform converges several disparate silos of server, virtualization and storage infrastructure into a unified solution that can be deployed and managed as a single system to simplify operations. According to an IDC study commissioned by us, customers can deploy our technology in up to 85% less time than traditional infrastructure. We have also developed extensive automation capabilities to eliminate time-consuming and error-prone tasks, while implementing consumer-grade design into our intuitive Prism user interface to simplify and streamline common IT administrator workflows. With our solution, infrastructure can be provisioned in minutes with one click by a single IT administrator, compared to traditional infrastructure that can take several days and dozens of discrete tasks executed by separate IT administrators, compared to traditional infrastructure that can take several days and dozens of discrete tasks executed by separate IT teams. According to the same commissioned IDC study, our technology can reduce the time required for infrastructure management by up to 71%.
- **Scalability:** Our platform is designed to be a web-scale distributed system and deployments can start with only a few nodes and scale to thousands of nodes without degradation in performance per node. Our Acropolis Distributed Storage Fabric places software-based storage controllers in every node within a cluster to keep data close to the application and deliver predictable and linear scalability. Our customers can grow their clusters in flexible increments by adding any number of nodes at a time depending on their capacity and performance requirements.
- **Lower total cost of ownership:** We estimate, based on a model validated by IDC in August 2015, that our solution can reduce total cost of ownership by up to 60% compared to traditional infrastructure for a broad set of workloads and up to 30% compared to public cloud offerings for predictable workloads.⁵ According to an IDC study commissioned by us, the cost reduction realized from our solution can enable end-customers to achieve an average 5-year return on investment of up to 510%. We can deliver a significant reduction in operating expenses resulting from personnel, power, cooling and rack space savings. Our solutions also reduce capital expenditure as a result of more precise infrastructure provisioning, reduction in excessive spend on virtualization software and elimination of the storage area network. In the last year, we have made a number of product improvements which we believe further increases these advantages.

⁵ Percentages are based on an internal model prepared by us using available industry data and our estimates on IT spending, which data and calculations were validated by IDC, and reflect a three-to-five year cost of ownership for traditional infrastructure and four year cost of ownership for public cloud offerings. The cost of ownership model for traditional infrastructure estimates typical capital expenditures (storage, compute, networking and software costs) and operating expenses (support, facilities and management costs) for a mid-size server virtual machine required for mid-to-large sized enterprises using these solutions and compares them to the same costs for a comparable Nutanix solution. The cost of ownership model for the public cloud estimates assumes a predictable server workload over four years, typical compute, storage, cloud monitoring charges and basic level support costs, and compares those costs to the capital expenditures and operating expenses for a comparable Nutanix solution. Calculations for both models are based on U.S.-based list pricing with assumptions related to typical discount rates in the industry, derived from either published price lists or vendor quotes. IDC's validation of the cost of ownership models, which was commissioned by us, included a review and validation of the cost of ownership calculation methodology as well as validating the cost assumptions underlying the calculations. See "Risk Factors—Our estimates of end-customer cost savings may not be indicative of the actual benefits that end-customers experience in the future."

- **Improved resiliency:** Our platform includes extensive self-healing capabilities to ensure higher levels of infrastructure resiliency to mitigate application downtime which can harm business operations and damage customer reputations. Designed not to have a single point of failure, our advanced web-scale software is able to automatically detect failed hardware or software components and then adapt by redirecting requests to other available resources in a cluster. According to the same commissioned IDC study referenced above, our solutions can reduce unplanned downtime by up to 98%.
- **Flexible application mobility:** We design our software to provide a high degree of flexibility and choice of where applications run, preventing vendor lock-in to any specific compute, storage or network hardware, hypervisor or public cloud. We intend to enable customers to make application placement decisions based entirely on performance, scalability and economic considerations, thereby accelerating speed of implementation and reducing cost. With application mobility, our customers will be able to selectively adopt the public cloud for specific workloads and certain scenarios, while preserving the flexibility to bring those workloads back to an on-premises enterprise cloud or move them to different public cloud providers should requirements or costs change.
- **Secure platform:** We embed security features into our hardened software solution and we strengthen our platform by employing two-factor authentication and encryption as customer configurable system options. We continually enhance the security of our platform with fully-automated testing and threat modeling that regularly assesses our systems for attack vectors to significantly decrease the threat posture. Additionally, our platform's self-healing capabilities isolate security baseline misconfigurations and allow for automated remediation of the system.

As a result of these benefits, our customers are able to elevate their IT innovation by freeing up valuable resources and budgets that may otherwise be spent on maintaining IT infrastructure and reallocating those resources toward developing new applications and services that power their businesses.

Competitive Strengths

We believe the following strengths will allow us to extend our market leadership and broaden adoption of our solutions:

- **Purpose built enterprise cloud platform based on web-scale engineering:** Our enterprise cloud platform leverages sophisticated web-scale technologies, enhanced by our proprietary innovations, to build highly reliable distributed systems that are fast, efficient and scalable. Our extensible platform can be used to converge additional infrastructure services, as demonstrated by the features in Acropolis File Services and Acropolis Block Services, thereby delivering the benefits of highly efficient and reliable distributed systems to increase the value of our platform to our customers.
- **Commitment and passion for elegant design:** Our passion and appreciation for elegant design inspires us to deliver uncompromisingly simple user experiences. This passion is reflected throughout our platform and customer lifecycle, from planning and sizing, to procurement and deployment, and through scaling and maintenance.
- **Breadth of engineering expertise:** We have assembled a strong engineering group with experience spanning many technology domains, including distributed systems, virtualization, storage, networking, enterprise applications and security. Some of our employees are widely recognized in the industry for their expertise and contributions to advancing research and development in their fields. We believe our engineering prowess will enable us to continue innovating rapidly, developing elegant solutions to difficult technical challenges and addressing emerging market opportunities.

- **Focus on customer delight:** Our objective is to exceed our customers' expectations throughout the procurement and support lifecycle. Our award-winning support organization is comprised of highly trained and certified engineers who are able to quickly diagnose and resolve customer support issues, including those caused by independent third-party software or hardware that is deployed in conjunction with our platform. This focus on delighting our customers has led to high customer loyalty, strong customer references and accelerated repeat purchases. During calendar year 2015, we achieved a Net Promoter Score of 92, which we believe is among the industry best for IT infrastructure companies based on comparisons against Net Promoter Scores that have been publicly announced by our competitors and peers.⁶ Additionally, as of July 31, 2016, approximately 75% of our end-customers who have been with us for 18 months or more have made a repeat purchase, and repurchase orders are often a multiple of the original order value.
- **Diverse and global business:** Our platform addresses a common set of critical IT issues which are pervasive across a broad set of workloads. Additionally, our solution can be deployed in both core enterprise datacenters and in sprawling remote office and branch office environments. This allows us to sell across a broad range of industries, customer segments and geographies. We have taken advantage of this large opportunity by rapidly expanding our footprint, and we have acquired a diverse customer base across more than 90 countries, with international revenue comprising 33% and 37% of total revenue for fiscal 2015 and fiscal 2016, respectively.
- **Unique culture:** Our culture is based on building a deep understanding of our customers, partners and employees that we believe makes us an attractive company to work with and for. We also foster extensive collaboration and open communication, crowdsourcing of ideas and frequent collection of input that we believe leads to rapid and improved decision-making. We embrace constant experimentation and continually challenge ourselves to extend our competitive edge. The combination of our culture and talented employees has enabled us to solve very difficult technical and business challenges.

⁶ A Net Promoter Score is a measure of customer loyalty ranging from negative 100 to 100 based on the standard question: "On a scale of 0 to 10, with 10 being extremely likely, how likely are you to recommend Nutanix to a friend or colleague?" Our Net Promoter Score is based on end-customers who respond to the survey question, which is automatically generated, when we close a product support ticket, and is automatically calculated and tracked by our support analytics system. Our Net Promoter Score is calculated by using the standard methodology of subtracting the percentage of end-customers who respond that they are not likely to recommend Nutanix from the percentage of end-customers that respond that they are extremely likely to recommend Nutanix.

Our Market Opportunity

Our market opportunity is to replace traditional IT products, including x86 servers, storage systems, virtualization software, cloud management software and systems management software. We believe these categories of traditional IT spending are undergoing significant disruption and budgets are being reallocated to address new technical and business requirements. We capture spend from the following markets which have a combined spend of over \$100 billion:

- The x86 server market, which according to Gartner, is expected to be \$51.8 billion in 2016⁷
- The storage systems markets, which according to IDC, is expected to be \$43.7 billion in 2016
- The virtualization infrastructure software market, which according to Gartner, is expected to be \$5.4 billion in 2016⁸
- The cloud management software market, which according to IDC, is expected to be \$3.7 billion in 2016
- The systems management software market, which according to IDC, is expected to be \$21.0 billion in 2016

Beyond these five markets, IT budgets are also being directed to public cloud services. Compute and storage, along with associated virtualization and management services, delivered through the public cloud is often described as Infrastructure as a Service, or IaaS. Gartner estimates this market to be \$24.9 billion in 2016.⁹ We believe our enterprise cloud platform provides a compelling alternative to IaaS, while also providing in the future a seamless path to adopt IaaS for specific workloads, which could influence public cloud adoption patterns and enable us to participate in this growing opportunity. In addition, we also have an opportunity to capture a portion of the hundreds of billions of dollars of IT budget that are spent on personnel, consulting and services costs required to deploy, manage and

⁷ See Gartner note (3) in the section titled "Market and Industry Data."

⁸ See Gartner note (2) in the section titled "Market and Industry Data."

⁹ See Gartner note (4) in the section titled "Market and Industry Data."

maintain traditional IT infrastructure, as our platform replaces manual operations with software automation and machine learning.

Our solutions have been recognized as a leading platform by industry analysts, and Gartner has recognized us as a leader in the “2015 Magic Quadrant for Integrated Systems.” We believe our technology leadership in this large, broader market for Integrated Systems is a key driver of our rapid revenue growth as we continue to replace traditional infrastructure and participate in the re-allocation of IT budgets towards our technology. According to Gartner, the Integrated Systems market is expected to grow from \$14.6 billion in 2016 to \$20.5 billion in 2019, representing a 12% CAGR.¹⁰ Because of the numerous benefits of our solutions, we believe they could replace traditional infrastructure offerings at a faster rate than Gartner predicts and result in evolving market definitions.

Growth Strategy

Key elements of our growth strategy include:

- **Continually innovate and maintain technology leadership:** Since inception, we have rapidly innovated from supporting limited applications and a single hypervisor to a full platform that is designed to support a wide variety of enterprise applications, including virtualized applications across multiple hypervisors and recently non-virtualized workloads. In June 2015, we announced Acropolis, which extended our storage fabric, and added new capabilities, including built-in virtualization and application mobility. We also announced the latest version of Prism, which delivers advanced infrastructure analytics and management. In March 2016, we announced Acropolis File Services to eliminate the need for standalone filers that add cost and complexity to enterprise datacenters. In June 2016, we announced Acropolis Block Services, which enables applications not running on Nutanix to use our storage fabric for back-end block storage while benefiting from the simplicity and scalability of our platform. At the same time, we announced Acropolis Container Services to provide persistent storage for containers. We intend to continue to invest in technologies such as virtualization, containers, cloud management and orchestration, infrastructure analytics and networking to expand our market opportunity.
- **Invest to acquire new end-customers:** We completed our first end-customer sale in October 2011, and have since grown to 3,768 end-customers. We believe this represents a small portion of our potential end-customer base given the breadth of our solutions. We intend to grow our base of end-customers by increasing our investment in sales and marketing, leveraging our network of channel partners, furthering our international expansion and extending our enterprise cloud platform to address new customer segments. One area of specific focus will be on expanding our position within the Global 2000, where we currently have approximately 310 end-customers.
- **Continue to drive follow-on sales to existing end-customers:** Our end-customers typically deploy our technology initially for a specific workload. Our sales teams and channel partners then seek to systematically target follow-on sales opportunities to drive purchases of additional appliances and higher tier software editions. This allows us to quickly expand our footprint within our existing end-customer base from follow-on orders that in the aggregate are often multiples of the initial order. We intend to continue to pursue follow-on opportunities within our large and growing end-customer base.
- **Deepen engagement with current channel and OEM partners and establish additional routes to market to enhance sales leverage:** We have established meaningful channel partnerships globally and have driven strong engagement and initial commercial success with

¹⁰ See Gartner note (5) in the section titled “Market and Industry Data.”

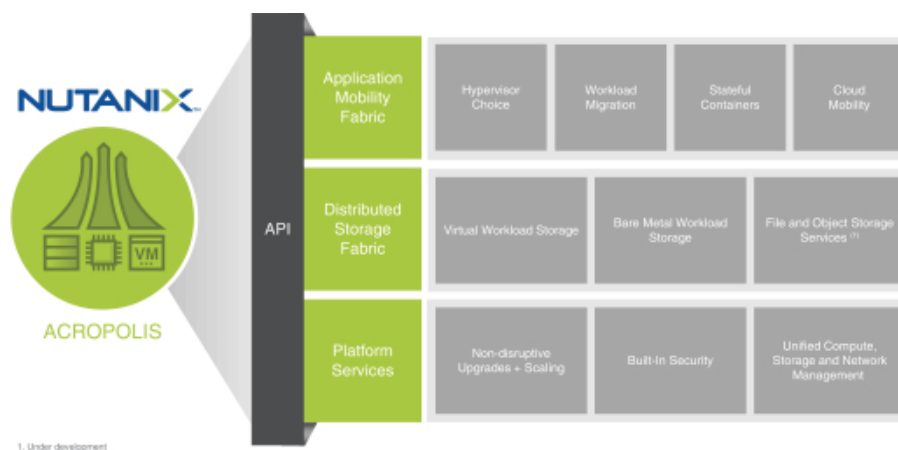

several major resellers and distributors. We have established OEM partnerships with Dell Technologies and Lenovo and believe that OEMs can augment our routes to market to accelerate our growth. We believe there is a significant opportunity to grow our sales with our partners. We are investing aggressively in sales enablement and co-marketing with our partners, which we believe will provide meaningful leverage to our sales organization. We intend to attract and engage new channel and OEM partners around the globe while also selling our standalone software on qualified x86 servers to maximize the availability of our solution for our customers.

Our Technology

Our enterprise cloud platform converges server, virtualization and storage into one software-driven integrated platform. Our platform is designed to run on commodity x86 servers with off-the-shelf central processing units, or CPUs, memory and storage media. Our solutions are easy-to-deploy and can be expanded one node at a time, reducing costs associated with overprovisioning. The product is a scalable distributed system and can be formed into very large clusters without any single point of failure or degradation of performance. Our solution is comprised of two comprehensive software product families, Acropolis and Prism.

Acropolis: Acropolis provides an open platform designed to address storage, application mobility and virtualization needs for a wide range of workloads that can be run at any scale. This platform offers IT professionals feature-rich turnkey infrastructure with increased flexibility of where to run their applications. Acropolis is comprised of three foundational components that can replace mid-range to high-end storage arrays and standalone virtualization products:

- **Acropolis Distributed Storage Fabric:** Building on our Nutanix Distributed File System, the Acropolis Distributed Storage Fabric, or DSF, enables robust enterprise storage services across multiple storage protocols and hypervisors. Acropolis DSF provides file and block based storage for both virtualized and non-virtualized environments.
- **Acropolis Application Mobility Fabric:** The Acropolis Application Mobility Fabric, or AMF, provides an open environment capable of delivering intelligent application placement and migration, as well as cross-hypervisor high availability and integrated disaster recovery. Acropolis supports all virtualized applications, and is intended to provide a seamless path to containers and hybrid cloud computing in the future.
- **Acropolis Hypervisor:** Our built-in Acropolis Hypervisor is based on widely-used open source hypervisor technology known as Linux KVM, and is enhanced with security, self-healing capabilities and robust virtual machine, or VM, management.

Acropolis delivers enterprise-grade data management services, applied to individual virtual machines or applications to provide our customers with the granular infrastructure control they desire. Acropolis also provides scalable, efficient and secure platform services with built-in virtualization. The rich set of capabilities delivered by Acropolis include:

- **Data protection:** Acropolis DSF creates application-centric clones (full copies of the data within a VM) and snapshots (capturing subsequent changes from an initial clone copy) for fine-grained data protection without sacrificing performance or space efficiency. Our innovative Shadow Clones feature provides data consistency across multiple virtual machines without sacrificing performance in multi-reader scenarios due to an innovative distributed caching mechanism. Our disaster recovery, backup and Metro Availability (also known as stretch clustering) features are simple to configure and implement with only a few clicks in our Prism management interface. These features utilize compression techniques and only send fine-grained changes in order to minimize data transfer over low bandwidth wide area links.
- **Intelligent data tiering:** Flash devices are used both as a cache and as a persistent data tier in our system. Utilizing our MapReduce massively parallel framework, data is intelligently placed in the optimal storage tier (memory, flash devices and hard drives) to yield maximum performance. This enables us to abstract the underlying storage media and apply different storage technologies in the system without complex administration.
- **Inline and post-process deduplication:** Acropolis DSF enables deduplication across the entire system to reduce the storage footprint required and improve performance. Inline deduplication in the content cache, performed before any data is written to disk, can yield significant capacity savings while accelerating performance for configured storage. Post-process deduplication, done after data is written to a disk, is performed and distributed across all nodes in the cluster using MapReduce to minimize system overhead on any individual node.
- **Inline and post-process compression:** Acropolis DSF uses an optimized algorithm to increase the effective storage capacity of the system by performing fine-grained compression for increased efficiency and greater capacity savings.
- **Native file services:** We recently extended our storage capabilities to include native file services. Acropolis File Services, which is part of Acropolis DSF, can replace traditional standalone file servers that are expensive and difficult to manage and scale. Our built-in capability provides an on-demand solution that is capable of serving billions of files and can run on the same platform as the applications, eliminating yet another datacenter silo and improving infrastructure utilization efficiency.
- **Storage for non-virtualized applications:** We recently extended our storage fabric to include iSCSI block storage. Applications not running on the Nutanix platform (for example, large databases or farms of containers running on bare metal blade servers) can now leverage the Nutanix DSF to provide rich storage management features and simplified operations.
- **Erasure coding:** Our proprietary EC-X erasure coding technology can increase effective storage capacity by up to 70%, compared to the prior release of our software.
- **Thin provisioning:** Acropolis DSF only allocates physical storage when required by a workload instead of allocating large blocks of physical storage to each workload before storage is actually needed.
- **Encryption:** We leverage our distributed systems architecture to provide highly scalable encryption performance in our platform by invoking key management across all available nodes in the system. We utilize commodity hardware such as self-encrypting hard drives to implement transparent encryption of all data-at-rest within our system. Management of encryption keys is performed by third-party software and our technology invokes in a highly scalable parallel manner from the available nodes in the system to provide high performance.

- **Multi-protocol support:** We implement standard storage protocols such as NFS, iSCSI and SMB to deliver broad coverage of enterprise applications and enable our customers to utilize one infrastructure platform for all of their workloads.
- **Scalable NoSQL metadata:** We leverage a distributed database system called Cassandra, which we have extensively customized to deliver strict consistency of updates, higher reliability over noisy networks and dramatically improved CPU consumption in low-compute cluster environments such as branch office closets and factory floors. We use lockless techniques to update multiple copies of metadata to dramatically improve scalability of our clusters. This approach also helps us grow and shrink clusters without causing global redistribution of keys – metadata perturbations that can become one of the biggest challenges in large cluster environments.
- **Rolling upgrades:** Our data, metadata, and inter-service communication use a web-scale self-describing format called “protobufs” to support backward compatibility and inherent versioning of on-disk data and over-the-network protocols. Acropolis software upgrades can, therefore, be done in a piecemeal rolling fashion without requiring the cluster to be taken offline. Similarly, petabytes of data and terabytes of metadata can be upgraded incrementally over time without disruption to operations.
- **Auto-pathing:** Because the Acropolis DSF and AMF run outside of the hypervisor kernel, local applications can survive planned or unplanned downtime of the software-based storage controller. We use ZooKeeper, a web-scale cluster manager service, to detect downtimes, and in the event of storage controller unavailability, we re-route storage traffic to other controllers in the cluster using a software-based patent-pending technique named auto-pathing. This capability also enables rolling (non-disruptive) upgrades in the system.
- **Data locality and intelligent application placement:** Because applications and our storage controller run on the same instance of the hypervisor, we deliberately decouple virtualization tasks from the storage fabric so that there is no change to the existing compute-side workflows. With Acropolis DSF and AMF, the onus of detecting application migration and high availability is left to unique auto-detection and leadership-election algorithms that we implement using ZooKeeper. This technique also helps us in moving hot data closer to the application or vice-versa. Data locality is at the heart of our platform, and helps us scale without generating “noisy neighbors” that often overwhelm the network.
- **Multi-hypervisor operations and application mobility:** Because our software runs outside the hypervisor kernel, we are able to support multiple hypervisors in both private cloud and public cloud environments. We provide support for heterogeneous computing environments within the same Acropolis DSF instance. Our software controllers can run on top of multiple hypervisors while being part of the same cluster, enabling us to develop a highly innovative and differentiated application mobility feature with Acropolis AMF. This feature supports high availability, disaster recovery, placement and intelligent resource scheduling across multiple hypervisors, including VMware ESXi and our own Acropolis Hypervisor. Acropolis AMF allows migration from one hypervisor such as VMware ESXi to another hypervisor such as Acropolis Hypervisor. The underlying Acropolis DSF will be used to abstract out the storage dependencies and Acropolis AMF automates the workflows of the discrete steps of file format conversion, driver injection and VM provisioning.
- **Container support:** Modern stateless micro-services that benefit from the flexibility and application portability that containers provide often make a difficult tradeoff to leave data behind. With Acropolis Container Services, our platform can provide persistent storage for containers and in a future release will allow for integrated management of containers within Prism.
- **Hybrid cloud:** We currently offer a feature named Cloud Connect that allows customers to back up application data to AWS. Cloud Connect is now part of Acropolis AMF, which will offer

extended hybrid cloud capabilities such as disaster recovery and full application bursting to AWS, Microsoft Azure and other cloud providers. Acropolis AMF will also support bi-directional application migration across customer datacenters and public clouds including the ability to move workloads back on-premises.

- **Built-in hypervisor with integrated management:** Acropolis Hypervisor is based on open-source KVM technology, has been enhanced to support native support for iSCSI and is hardened with enterprise-grade security and self-healing mechanisms. It is also integrated with Prism to deliver streamlined administrator workflows when provisioning, cloning and placing VMs.

Prism: Prism offers a single point of management for server, virtualization and storage resources and provides an end-to-end view of all common administrator workflows, system health, alerts and notifications through a simple, elegant and intuitive interface. Prism features innovative technology that streamlines time-consuming IT tasks, and includes one-click operation of software upgrades, detailed capacity analysis and troubleshooting.

The Prism homepage shows an overview of the cluster, system health and critical alerts:

Prism enables efficient management of enterprise-wide deployments by serving as a central administration point to manage multiple clusters within a datacenter or across multiple sites. Prism is built with HTML5 and can be accessed from any connected device that is HTML5-enabled, including smartphones and tablets. Users can precisely track infrastructure utilization across a distributed environment and add or remove nodes to any cluster in minutes. Software updates and patches can be executed non-disruptively on a rolling basis and do not require the cluster to be brought offline. Prism provides a suite of APIs for integration with third-party cloud management and orchestration systems.

¹¹ Under development

The innovative and powerful capabilities delivered by Prism include:

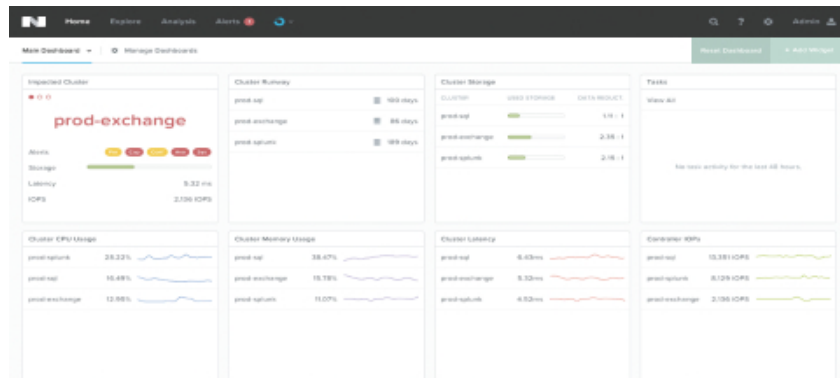

- **High performance management plane without a single point of failure:** Prism is built using a scale-out NoSQL database that provides multiple resiliency and scalability benefits. For example, during rolling upgrades, Prism continues to be available as it leverages the underlying distributed NoSQL framework and is not dependent on any particular node. Also, Prism becomes more powerful as clusters grow because the statistics and configuration data are stored and queried in a distributed fashion.
- **Real-time search and analytics:** Prism implements a scale-out analytics database that provides real-time monitoring and troubleshooting capabilities for the applications and hardware resources within our platform. It also provides advanced search capability by leveraging our proprietary machine learning technology with built-in heuristics and business intelligence to quickly analyze large volumes of historical and current system data to generate actionable insights for improving infrastructure performance.
- **Single pane of glass to manage heterogeneous computing environments:** Prism unifies management of diverse appliance models, multiple hypervisors and specific elements of public cloud infrastructure, while maintaining the same elegant administrator experience. We recently announced that Prism can now manage VMware ESXi environments and perform virtual machine management with the simplicity of one-click operations directly within Prism to eliminate the need for specialized and dedicated VMware vCenter administrators.
- **Self-service provisioning:** Prism allows developers and business users to provision infrastructure services without the need for intervention by IT. Often viewed as a key capability of any cloud platform, Nutanix Self Service improves IT agility by radically simplifying application delivery and development while also heightening infrastructure automation.

- **Just-in-time capacity provisioning:** With innovative built-in machine intelligence technology, Prism provides capacity runway projections and capacity optimization recommendations to ensure just the right amount of resources are provisioned to support the applications running on the platform. We recently introduced a new feature to perform scenario-based capacity modeling which predicts whether sufficient systems resources are available to support new applications or projects on the existing cluster. These capabilities eliminate wasteful overprovisioning and allow our customers to consume infrastructure in small increments to yield optimal business results with a given IT budget.
- **Secure platform:** Prism combines two-factor authentication, cluster lockdown and password policy compliance, with a security development lifecycle that is applied throughout product development to help customers meet their security requirements. Our platform complies with the strictest standards including FIPS 140-2 and Common Criteria.
- **Proactive infrastructure operations:** Prism includes a feature named Pulse that proactively monitors the system health of our appliances and will identify hot spots in CPU or storage capacity usage, latency anomalies and likely-to-fail hardware components. This capability enables our support organization to anticipate potential technical issues, thereby providing higher levels of service and faster troubleshooting, while delivering more accurate capacity forecasting.

The Prism planning tool shows how many days or weeks of capacity remain in the cluster given historical usage patterns:

Prism can be configured with personalized dashboards to provide summary views of cluster details appropriate for different administrators:

Our Solutions: Our software is combined with commodity x86 servers and sold as integrated appliances by us (via our reseller partners) or by one of our OEM partners. Additionally, end-customers can buy our stand-alone software and deploy the software on qualified x86 servers, which we believe expands our addressable market. We expect that in the future an increasing share of our revenue will come in the form of stand-alone software sales.

The appliances we sell are designed and optimized for various use cases and workloads, ranging from the NX-1000 series, which is intended for remote branch office environments, to our all-flash NX-9000 series, which is intended for high-end databases and enterprise applications requiring the highest performance. We also recently announced our Xpress product line, a new solution designed to leverage the Nutanix enterprise cloud software to address the needs of small and medium-sized businesses.

Across the breadth of models we offer, our appliances may include one, two or four nodes in a 2U (rack unit) footprint. Our appliances are configured to order, providing our customers with a range of available hardware combinations in terms of CPU, memory, flash devices, hard drives and networking interfaces to meet the specific requirements of customers' workloads. We recently announced that all Nutanix appliances can be configured with all-flash storage to meet higher-end application performance requirements. Our appliances can be mixed and matched with different models in a cluster to provide maximum flexibility and address the requirement to scale storage and compute resources independently.

	Xpress	NX-1000 Series	NX-3000 Series	NX-6000 Series	NX-7000 Series	NX-8000 Series	NX-9000 Series
	Per Node (4 per appliance)	Per Node (4 per appliance)	Per Node (1 or 4 per appliance)	Per Node (2 per appliance)	Per Node (1 per appliance)	Per Node (1 or 2 per appliance)	Per Node (4 per appliance)

We also have OEM partnerships with Dell Technologies and Lenovo, which purchase our software and package it with their hardware into the Dell XC Series and Lenovo Converged HX Series appliances, respectively. Dell Technologies and Lenovo offer the XC Series and HX Series in a range of configurations and also sell associated support offerings, which we jointly support.

Acropolis is available in different software editions so that our end-customers can easily select the capabilities to meet their infrastructure needs.

- **Starter:** The Acropolis Starter edition offers the core set of our software functionality. This edition is designed for smaller-scale deployments with a limited set of non-critical workloads. The Starter edition is included in the price of each appliance.
- **Pro:** The Acropolis Pro edition offers enhanced data services, along with higher level resilience and management features. This edition is designed for enterprises running multiple applications on a cluster or for large-scale single workload deployments.
- **Ultimate:** The Acropolis Ultimate edition offers the complete suite of our software capabilities, including application mobility and even more robust data protection, to meet the most demanding infrastructure requirements. This edition is designed for multi-site deployments and for meeting advanced security requirements.

Prism is also available in multiple software editions, helping our end-customers choose the advanced management and automation capabilities that best fit their operational needs.

- **Starter:** The Prism Starter edition is a complete system management platform and includes single and multi-site management of Nutanix clusters. Capabilities include streamlined administration of all compute, virtualization and storage services in the Nutanix platform.
- **Pro:** The Prism Pro edition includes an advanced machine intelligence platform, delivering robust operations and automation capabilities such as capacity planning, one-click capacity optimization, integrated consumer-grade search and customizable dashboards. This edition adds advanced IT operations management and eliminates the need for expensive third party cloud management and orchestration products.

Our Support Program

We offer technical support to our end-customers around the clock to meet their needs and four hour part replacement for end-customers who purchase our highest level of support. Our support centers are located around the world and are staffed by our employees. We offer technical support in the form of three different subscription and support programs, available in one, three or five-year packages:

- **Basic (Gold):** Our Gold Program is an economical choice for single-site or test and development environments that require support during business hours. End-customers receive telephone and web support, and next business day on-site part replacement.
- **Production (Platinum):** Our Platinum Program is designed for mid-size to large enterprises that operate business-critical operations. The Platinum Program entitles end-customers to 24 hour support, priority call and case handling and next business day on-site part replacement.
- **Mission Critical (Platinum Plus):** Our Platinum Plus Program is designed for large enterprises that operate our products in mission-critical environments. The Platinum Plus Program entitles end-customers to 24 hour support, priority call and case handling, direct access to senior level engineers and up to four hour on-site part replacement.

Our End-Customers

Our solution addresses a broad range of workloads, including enterprise applications, databases, VDI, unified communications and big data analytics. We have end-customers across a broad range of industries, including automotive, consumer goods, education, energy, financial services, healthcare, manufacturing, media, public sector, retail, technology and telecommunications. We also sell to service providers who utilize our platform to provide a variety of cloud-based services to their customers. We had a broad and diverse base of 3,768 end-customers as of July 31, 2016, including many Global 2000 enterprises. Representative end-customers include Activision Blizzard, Inc., Best Buy Co., Inc., Covance Inc., Jabil Circuit, Inc., Kellogg Co., Nasdaq, Inc., Nintendo Co., Ltd., Nordstrom, Inc., NTT SmartConnect Corporation, Total S.A., Toyota Motor of North America, U.S. Department of Defense Office of the Secretary of Defense and Yahoo! JAPAN Corporation. Carahsoft Technology Corp., a distributor to our end-customers, represented 23%, 23% and 15% of our total revenue for fiscal 2014, fiscal 2015 and fiscal 2016, respectively. For fiscal 2015 and fiscal 2016, Promark Technology Inc., another distributor to our end-customers, also represented 15% and 20%, respectively, of our total revenue.

We define the number of end-customers as the number of end-customers for which we have received an order by the last day of the period indicated. Our count of end-customers does not include partners to which we have sold product for their own demonstration purposes. A single organization or customer may represent multiple end-customers for separate divisions, segments or subsidiaries.

End-Customer Case Studies

The following case studies are examples of how certain of our end-customers have deployed and benefited from our platform.

Toyota Motor of North America

Situation: Toyota is the world's largest automaker. Toyota was looking to replace its siloed traditional infrastructure with an integrated solution that was easier to manage and scale across its 4 data centers, and locations across North America. Scalability and manageability issues were severely impacting the performance of critical VDI, enterprise application, database and Big Data analytics workloads.

Benefits of Nutanix Solution: After a proof of concept evaluation, Toyota Motor Sales began its migration from traditional infrastructure to Nutanix in 2013. The customer began with a deployment of 200 virtual desktops, which has now grown to 1,900. Recognizing the success of the Nutanix platform and significant scalability, performance and manageability benefits, Toyota began to refresh core virtualization servers with Nutanix in production and disaster recovery (DR) sites. Subsequently, the customer expanded to Microsoft SQL Server database workloads. Current initiatives also include Windows and Linux virtualization, Big Data analytics and additional database workloads.

Our solution has enabled Toyota to reduce deployment times from weeks to hours, enabling the customer's IT organization to meet the rapidly changing needs of Toyota's business units. By eliminating siloes, our solution has simplified the process of buying and deploying infrastructure. Toyota was able to decrease its datacenter footprint in the Wintel environment by 50% while simultaneously realizing a major increase in agility, performance, and availability.

As of July 31, 2016, the total subsequent purchases of Nutanix products and services by Toyota was approximately 23.5x the initial purchase in March 2013.

Large Global 2000 Retailer

Situation: A premier specialty retailer with more than 600 stores in the United States, Canada, Europe and Australia, an expansive direct-mail business, and a highly successful e-commerce site was looking to replace its traditional infrastructure with a cost-effective solution that was easier to manage and scale. The customer's traditional infrastructure environment made it challenging to scale compute and storage independently, thereby severely affecting the delivery of applications and services to its internal businesses.

Benefits of Nutanix Solution: After a successful proof-of-concept, the customer migrated 120 of its physical servers to Nutanix for its East Coast and West Coast data centers. Today, all the customer's preproduction, staging and production environments run on Nutanix, including its warehouse management solution, application servers and logistics system. Our solution enabled the customer to decrease its datacenter footprint by approximately 30% and deploy new applications and services to its business at a much faster rate. Additionally, Nutanix's Prism management interface provided comprehensive visibility into the health of the infrastructure, improving capacity planning and troubleshooting. In future periods, the customer plans to standardize all of its virtual workloads and remote office architecture on our solution.

As of July 31, 2016, the total subsequent purchases of Nutanix products and services by this customer from us was approximately 26.4x the initial purchase in January 2014.

Top 15 U.S. Metropolitan City

Situation: One of the top 15 metropolitan areas in the United States, with a population of over 650,000 and 10,000 public employees, was experiencing rapid growth in both population and range of online services. In response, the city launched an IT initiative to consolidate its disparate IT departments to create a scalable next-generation data center and deliver citywide cloud services. Primary IT objectives included consolidating existing IT resources, moving from physical to virtualized environments, and investigating more agile alternatives to traditional infrastructure.

Benefits of Nutanix Solution: During the evaluation process, the city assessed several infrastructure options and conducted a multi-year TCO assessment. Our solution's rapid pay-as-you-go scalability provided the city with the agility to cope with both long-term growth and short-term fluctuations in demand for IT resources. Additionally, lower operational costs, arising from the integrated management of all compute, storage, and virtualization resources across our platform was a primary benefit of moving to Nutanix.

The first phase of the next-generation data center supported over 1,000 virtual workloads, with the future objective of supporting 3,000 VMs with automated disaster recovery across two locations. Initial workloads supported by Nutanix include the city's ERP solution, Microsoft SQL Server databases, custom web applications, personnel productivity applications, and unified communications infrastructure. Owing to the agility, simplicity and flexibility of our solution, Nutanix is now one of the preferred suppliers for IT across the entire city's administration.

As of July, 2016, the total subsequent purchases of Nutanix products and services by this customer from us was approximately 31.7x the initial purchase in July 2014.

NetSuite

Situation: NetSuite is a leading provider of cloud-based business management software. The company's global corporate IT department manages over 4,500 employees across 25 locations. For its corporate information technology datacenter solution, NetSuite needed a solution with increased performance, efficiency, flexibility and choice to sustain its rapid growth.

Benefits of Nutanix Solution: NetSuite implemented our platform with the Acropolis Hypervisor in its corporate datacenter, supporting the company's intranet for developers, human resources, and several other business units. In addition, NetSuite also implemented Nutanix to run remote office and development workloads. Nutanix enabled NetSuite to dramatically improve system performance including application speed and webpage load times. In addition, NetSuite was able to reduce its internal corporate IT datacenter footprint by over 90%. Cost savings were achieved by scaling the Nutanix infrastructure, eliminating overprovisioning and reducing internal corporate IT time commitments significantly. Further, since installation in early 2015 through the date of this filing, NetSuite has maintained 100% uptime for the Nutanix infrastructure underlying these internal services.

Sales and Marketing

We primarily engage our end-customers through our global sales force who directly interact with key IT decision makers while also providing sales development, opportunity qualification and support to our channel partners. We have established relationships with many of the key resellers and distributors of datacenter infrastructure software and systems in each of the geographic regions where we operate.

We also engage our end-customers through our OEM partners Dell Technologies and Lenovo, which purchase our software and package it with their hardware into the Dell XC Series and Lenovo Converged HX Series appliances, respectively. Dell Technologies and Lenovo products incorporating our software are sold through their direct sales forces and channel partners.

Our agreements with Dell Technologies and Lenovo provide that these OEMs pay us royalties for the distribution of our software together with their hardware and the sale of support and maintenance contracts for the integrated products. We provide training to their support personnel, and we also coordinate with them to collectively resolve support issues for end-customers. We have also agreed with Dell Technologies and Lenovo to invest in sufficient sales and marketing resources to support the launch and promotion of the integrated products, which, in the case of Lenovo, includes the

commitment of dedicated sales personnel to support the sale of the integrated products. We work with each of Dell Technologies and Lenovo to ensure interoperability between our software and their hardware and to certify certain hardware configurations for use with our software. Our agreement with Lenovo expires in October 2018, and automatically renews for two successive one-year periods thereafter unless one party gives six months' prior notice to the other party of its intent not to renew. We recently extended our agreement with Dell Technologies, which now expires in June 2021, and automatically renews for successive one-year periods thereafter unless one party gives six months' prior notice to the other party of its intent not to renew.

Our channel partners, including our OEM partners, have joined our integrated partner program, the Nutanix Partner Network, which provides market development funds, preferred pricing through deal registration, sales enablement and product training, innovative marketing campaigns and dedicated account support. We also coordinate with Dell Technologies and Lenovo on joint marketing activities.

We supplement our sales efforts with our marketing program that includes print and online advertising, corporate and third-party events, demand generation activities, social media promotions, media and analyst relations and communities programs. For example, in June 2016 we hosted our second .NEXT Conference, where approximately 2,500 attendees came to learn about our current and future products and solutions. We also establish deep integration with our ecosystem of third-party technology partners and engage in joint marketing activities with them.

Research and Development

Our research and development efforts are focused primarily on improving current technology, developing new technologies in current and adjacent markets and supporting existing end-customer deployments. Our research and development teams primarily consist of distributed systems software and user interface engineers. Most of our research and development team is based in San Jose, California. We also maintain research and development centers in Bangalore, India, Durham, North Carolina and Seattle, Washington. We plan to dedicate significant resources to our continued research and development efforts.

Research and development expense was \$38.0 million, \$73.5 million and \$116.4 million for fiscal 2014, fiscal 2015 and fiscal 2016, respectively.

Manufacturing

We outsource the assembly of our hardware products to two contract manufacturers, Super Micro and Avnet. Super Micro and Avnet assemble and test our products and they generally procure the components used in our products directly from third-party suppliers. The initial term of our agreement with Super Micro expires in May 2017, with the option to terminate upon each annual renewal thereafter. The initial term of our agreement with Avnet expires in May 2019, with the option to terminate upon each annual renewal thereafter. Our third-party logistics partners handle shipment of our products. Distributors handle fulfillment and shipment for certain end-customers, but do not hold inventory.

Backlog

Products are shipped and billed shortly after receipt of an order, with the majority of our product revenue coming from orders that are received and shipped in the same quarter. Accordingly, we do not believe that our product backlog at any particular time is meaningful because it is not necessarily indicative of future revenue in any given period.

Competition

We operate in the intensely competitive enterprise infrastructure market and compete primarily with companies that sell software to build and operate enterprise clouds, integrated systems, and standalone storage and servers. These markets are characterized by constant change and rapid innovation. Our main competitors fall into the following categories:

- software providers, such as VMware, Inc. and Red Hat, Inc., that offer a broad range of virtualization, infrastructure and management products to build and operate enterprise clouds;
- traditional IT systems vendors such as HPE, Cisco Systems, Inc., Lenovo Group Ltd., Dell Technologies, Hitachi Data Systems and IBM Corporation that offer integrated systems that include bundles of servers, storage and networking solutions, as well as a broad range of standalone server and storage products; and
- traditional storage array vendors, such as Dell Technologies, NetApp, Inc. and Hitachi Data Systems, which typically sell centralized storage products.

In addition, we compete against vendors of hyperconverged infrastructure and software-defined storage products such as VMware, Inc., Cisco Systems, Inc., HPE, Dell Technologies and many smaller emerging companies. As our market grows, we expect it will continue to attract new companies as well as existing larger vendors. Some of our competitors may expand their product offerings, acquire competing businesses, sell at lower prices, bundle with other products, provide closed technology platforms, or otherwise attempt to gain a competitive advantage.

We believe the principal competitive factors in the infrastructure software and systems market include:

- product features and capabilities;
- system scalability, performance and resiliency;
- management and operations, including provisioning, analytics, automation and upgrades;
- total cost of ownership over the lifetime of the technology;
- product interoperability with third-party applications, infrastructure software, infrastructure systems and public clouds;
- application mobility across disparate silos of enterprise computing; and
- complete customer experience, including support and professional services.

We believe we are positioned favorably against our competitors based on these factors. However, many of our competitors have substantially greater financial, technical and other resources, greater brand recognition, larger sales forces and marketing budgets, broader distribution, and larger and more mature intellectual property portfolios.

Intellectual Property

Our success depends in part upon our ability to protect and use our core technology and intellectual property. We rely on patents, trademarks, copyrights and trade secret laws, confidentiality procedures, and employee disclosure and invention assignment agreements to protect our intellectual property rights. As of July 31, 2016, we had 22 United States patents that have been issued or allowed and 83 patent applications pending in the United States. Our issued patents expire between 2031 and 2034. We also integrate open source software into our products.

We control access to and use of our proprietary software and other confidential information through the use of internal and external controls, including contractual protections with employees, contractors, customers and partners, and our software is protected by U.S. and international copyright

laws. Despite our efforts to protect our trade secrets and proprietary rights through intellectual property rights, licenses and confidentiality agreements, unauthorized parties may still copy or otherwise obtain and use our software and technology. In addition, we sell extensively internationally, and effective patent, copyright, trademark and trade secret protection may not be available or may be limited in foreign countries.

Our industry is characterized by the existence of a large number of patents and frequent claims and related litigation regarding patent and other intellectual property rights. We believe that competitors will try to develop products and services that are similar to ours and that may infringe our intellectual property rights. Our competitors or other third-parties may also claim that our platform infringes their intellectual property rights. In particular, leading companies in our industry have extensive patent portfolios. From time to time, third-parties, including certain of these leading companies and non-practicing entities, may assert patent, copyright, trademark and other intellectual property rights against us, our channel partners, or our end-customers, which our standard license and other agreements obligate us to indemnify against such claims. Successful claims of infringement by a third-party could prevent us from distributing certain products or performing certain services, require us to expend time and money to develop non-infringing solutions, or force us to pay substantial damages (including damages if we are found to have willfully infringed patents or copyrights), royalties or other fees. In addition, to the extent that we gain greater visibility and market exposure as a public company, we face a higher risk of being the subject of intellectual property infringement claims from third parties. We cannot assure you that we do not currently infringe, or that we will not in the future infringe, upon any third-party patents or other proprietary rights. See “Risk Factors—Third-party claims that we are infringing intellectual property, whether successful or not, could subject us to costly and time-consuming litigation or expensive licenses, and our business could be harmed” for additional information.

Facilities

Our corporate headquarters are located in San Jose, California where, under two lease agreements that expire in March 2021, we currently lease approximately 165,000 square feet of space. We also maintain offices in Durham, North Carolina, Seattle, Washington and McLean, Virginia as well as multiple locations internationally, including in Australia, Belgium, China, Germany, India, Japan, South Korea, Malaysia, the Netherlands, Singapore, Thailand, Turkey, United Arab Emirates, and the United Kingdom. We lease all of our facilities and do not own any real property. We expect to add facilities as we grow our employee base and expand geographically. We believe that our facilities are adequate to meet our needs for the immediate future, and that, should it be needed, suitable additional space will be available to accommodate expansion of our operations.

Employees

We had 1,980 employees worldwide as of July 31, 2016. None of our employees in the United States is represented by a labor organization or is a party to any collective bargaining arrangement. In certain of the European countries in which we operate, we are subject to, and comply with, local labor law requirements in relation to the establishment of works councils. We are often required to consult and seek the consent or advice of these works councils. We have never had a work stoppage and we consider our relationship with our employees to be good.

Legal Proceedings

We are not currently a party to any material legal proceedings that we believe to be material to our business or financial condition. From time to time we may become party to various litigation matters and subject to claims that arise in the ordinary course of business.

MANAGEMENT

Executive Officers and Directors

The following table provides information regarding our executive officers and directors as of July 31, 2016:

<u>Name</u>	<u>Age</u>	<u>Position(s)</u>
Executive Officers:		
Dheeraj Pandey	40	Chief Executive Officer and Chairman
Duston M. Williams	58	Chief Financial Officer
Sudheesh Nair Vadakkedath	39	President
Rajiv Mirani	47	Senior Vice President, Engineering
Sunil Potti	45	Chief Product and Development Officer
David Sangster	51	Executive Vice President, Operations
Howard Ting	40	Chief Marketing Officer
Non-Employee Directors:		
Steven J. Gomo(1)(3)	64	Director
John McAdam(2)	65	Director
Ravi Mhatre*(2)(3)	49	Director
Jeffrey T. Parks(1)(2)	35	Director
Michael P. Scarpelli(1)	49	Director
Bipul Sinha	42	Director

* Lead independent director

(1) Member of our audit committee

(2) Member of our compensation committee

(3) Member of our nominating and corporate governance committee

Executive Officers

Dheeraj Pandey co-founded our company and has served as our Chief Executive Officer and as the Chairman of our board of directors since our inception in September 2009, as well as our President from September 2009 until February 2016. Prior to joining us, Mr. Pandey served as Vice President, Engineering at Aster Data Systems (now Teradata Corporation), a data management and analysis software company, from February 2009 to September 2009 and as its Director of Engineering from September 2007 to February 2009. Mr. Pandey holds a B. Tech. in Computer Science from the Indian Institute of Technology, Kanpur, an M.S. in Computer Science from the University of Texas at Austin and was a Graduate Fellow of Computer Science in the Ph.D. program at the University of Texas at Austin. We believe that the perspective and experience that Mr. Pandey brings as our Chief Executive Officer and Chairman uniquely qualify him to serve on our board of directors.

Duston M. Williams has served as our Chief Financial Officer since June 2014. Prior to joining us, Mr. Williams served as Chief Financial Officer for Gigamon Inc., a network security company, from March 2012 until June 2014. From March 2011 to January 2012, he served as Chief Financial Officer for SandForce, Inc., a data storage company acquired by LSI Corporation. From July 2010 to February 2011, Mr. Williams served as the Chief Financial Officer of Soraa, Inc., a solid state lighting company. From June 2006 to June 2010, Mr. Williams served as Vice President and Chief Financial Officer of Infinera Corporation, an optical networking systems provider. He currently serves on the board of directors of Applied Micro Circuits Corporation, a fabless semiconductor company. Mr. Williams holds a B.S. in Accounting from Bentley College and an M.B.A. from the University of Southern California.

Sudheesh Nair Vadakkedath has served as our President since February 2016 and was our Senior Vice President, Worldwide Sales and Business Development from April 2014 to February 2016, Vice President of Worldwide Sales from October 2013 to April 2014, and Director of Sales from February 2011 to October 2013. Prior to joining us, Mr. Vadakkedath served as a Consulting Storage Architect for International Business Machines Corporation from May 2009 to February 2011. Mr. Vadakkedath holds a diploma in Instrumentation and Control Engineering with Distinction from Government Polytechnic College, Palghat.

Rajiv Mirani has served as our Senior Vice President, Engineering since January 2015 and was our Vice President of Engineering from June 2013 to January 2015. Prior to joining us, Mr. Mirani was with Citrix Systems, Inc., a cloud and mobile computing technology company, from November 2005 to June 2013, where he held various senior executive roles, most recently as Vice President, Engineering. Mr. Mirani holds a Bachelor of Technology (B.Tech) in Computer Science and Engineering from the Indian Institute of Technology Delhi and an M.S., M.Phil. and Ph.D. in Computer Science from Yale University.

Sunil Potti has served as our Chief Product and Development Officer since February 2016 and was our Senior Vice President, Engineering and Product Management from January 2015 to February 2016. Prior to joining us, Mr. Potti was with Citrix Systems, Inc., a cloud and mobile computing technology company, from April 2009 to January 2015, where he most recently served as Vice President and General Manager and previously as Vice President, Product Management and Marketing. Mr. Potti holds a B.E. in Computer Science from Osmania University and an M.S. in Computer Science from Pennsylvania State University.

David Sangster has served as our Executive Vice President, Operations since February 2016 and was our Senior Vice President, Operations from April 2014 to February 2016 and Vice President, Operations from December 2011 to April 2014. Prior to joining us, Mr. Sangster served as Vice President, Manufacturing Technology at EMC Corporation, an IT storage hardware solutions company, from July 2009 to December 2011. Mr. Sangster holds a B.S. in Mechanical Engineering from Massachusetts Institute of Technology, an M.S. in Manufacturing Systems Engineering from Stanford University and an M.B.A. in Operations and Marketing from Santa Clara University.

Howard Ting has served as our Chief Marketing Officer since February 2016 and was our Senior Vice President, Marketing from April 2014 to February 2016 and Vice President, Marketing and Product Management from October 2012 to April 2014. Prior to joining us, Mr. Ting served as a Senior Director, Corporate Marketing at Palo Alto Networks, Inc., an enterprise security company, from April 2009 to October 2012. Mr. Ting holds a B.S. in Business Administration from the University of California, Berkeley.

Non-Employee Directors

Steven J. Gomo has served as a member of our board of directors since June 2015. Mr. Gomo served as Executive Vice President, Finance and Chief Financial Officer of NetApp, Inc., a storage and data management company from October 2004 until his retirement in December 2011, as well as Senior Vice President, Finance and Chief Financial Officer from August 2002 to September 2004. He currently serves on the board of directors and is chairman of the audit committees, of Enphase Energy, Inc., a solar energy management device maker, and NetSuite Inc., a business management software company. Mr. Gomo also served on the board of directors and audit committee of SanDisk Corporation, a flash memory storage solutions and software company, from December 2005 until the company was acquired by Western Digital Corporation in May 2016. Mr. Gomo holds a B.S. in Business Administration from Oregon State University and an M.B.A. from Santa Clara University. We believe Mr. Gomo is qualified to serve as a member of our board of directors because of his substantial

corporate governance, operational and financial expertise gained from holding various executive positions at publicly-traded technology companies and from serving on the board of directors of several public companies.

John McAdam has served as a member of our board of directors since August 2015. Mr. McAdam has served as the President and Chief Executive Officer of F5 Networks, Inc., a developer and provider of software-defined application services, from July 2000 to July 2015 and was re-appointed in December 2015. Mr. McAdam currently also serves as a director of F5 Networks, as well as Tableau Software Inc., a company that provides business intelligence software. Mr. McAdam holds a B.S. in Computer Science from the University of Glasgow, Scotland. We believe Mr. McAdam is qualified to serve on our board of directors because of his extensive executive management experience and substantial expertise in our industry.

Ravi Mhatre has served as our lead independent director since August 2015, and as a member of our board of directors since July 2010. Mr. Mhatre co-founded Lightspeed Venture Partners, a global technology venture capital firm, and has served as managing director of Lightspeed Venture Partners since August 1999. He currently serves on the board of directors of several private companies. Mr. Mhatre holds a B.S. in Electrical Engineering and a B.A. in Economics from Stanford University and an M.B.A. from Stanford University's Graduate School of Business. We believe Mr. Mhatre is qualified to serve as a member of our board of directors because of his significant corporate finance and business expertise gained from his experience in the venture capital and IT industries, including his time spent serving on the boards of directors of various private technology companies. We also value his perspective as a representative of one of our largest stockholders.

Jeffrey T. Parks has served as a member of our board of directors since December 2013. Mr. Parks founded and has been a general partner of Riverwood Capital, a private equity firm, since January 2008. Mr. Parks currently serves on the board of directors of several privately-held companies. Prior to co-founding Riverwood Capital, Mr. Parks served as an investment executive with KKR & Co. L.L.P., a private equity firm, as an investment professional in the Principal Opportunities Fund at Oaktree Capital Management, an asset management firm, and as an investment banker at UBS, a global financial services company. Mr. Parks holds a B.A. in Economics and Mathematics from Pomona College, where he currently serves on the Board of Trustees. We believe Mr. Parks is qualified to serve as a member of our board of directors because of his extensive corporate governance and management experience with technology companies, including as a director and venture capitalist.

Michael P. Scarpelli has served as a member of our board of directors since December 2013. Mr. Scarpelli has served as the Chief Financial Officer of ServiceNow, Inc., a company providing cloud-based solutions, since August 2011. From July 2009 to August 2011, Mr. Scarpelli served as Senior Vice President of Finance and Business Operations of the Backup Recovery Systems Division at EMC Corporation, a computer data storage company. Mr. Scarpelli served as Chief Financial Officer of Data Domain, Inc., an information technology company, from September 2006 to July 2009, when it was acquired by EMC. Mr. Scarpelli holds a B.A. in Economics from the University of Western Ontario. We believe Mr. Scarpelli is qualified to serve as a member of our board of directors because of his substantial corporate governance, operational and financial expertise gained as an executive at several companies in the technology industry.

Bipul Sinha has served as a member of our board of directors since December 2011, and previously served as one of our directors from December 2009 to September 2011. Mr. Sinha has served as a venture partner at Lightspeed Venture Partners since January 2014, and from July 2010 to January 2014, Mr. Sinha served as a principal/partner at Lightspeed Venture Partners. In December 2013, he co-founded Rubrik, Inc., a converged data management provider, and has served as Chief

Executive Officer and a director since December 2013. From October 2008 to June 2010, Mr. Sinha served as a principal at Blumberg Capital, a venture capital firm. Mr. Sinha holds a Bachelor of Technology (B.Tech) in Electrical Engineering from Indian Institute of Technology, Kharagpur and an M.B.A. from the Wharton School of the University of Pennsylvania. We believe Mr. Sinha is qualified to serve as a member of our board of directors based on his experience on the boards of directors of privately held technology companies, his corporate management experience with converged web-scale architecture and his experience in private equity and finance.

Selection of Officers

Our executive officers serve at the discretion of our board of directors. There are no familial relationships among our directors and executive officers.

Codes of Business Conduct and Ethics

We have adopted a code of business conduct and ethics that applies to all of our employees, officers and directors. Upon completion of this offering, the full text of our code of business conduct and ethics will be available on the investor relations section of our website. We intend to post any future amendment to our code of business conduct and ethics, and any waivers of such code for directors and executive officers, on the same website or in filings under the Exchange Act. Information on or that can be accessed through our website is not part of this prospectus.

Board Composition

Our board of directors currently consists of seven members. Following the completion of this offering, our amended and restated certificate of incorporation and amended and restated bylaws will provide for a classified board of directors, with each director serving a staggered, three-year term. As a result, only one class of directors will be elected at each annual meeting of our stockholders, with the other classes continuing for the remainder of their respective three-year terms. The terms of the directors will expire upon the election and qualification of successor directors at the annual meeting of stockholders to be held during 2018 for the Class I directors, 2019 for the Class II directors and 2020 for the Class III directors. Our directors will be divided among the three classes as follows:

- the Class I directors will be Jeffrey T. Parks and Steven J. Gomo and their terms will expire at the annual meeting of stockholders to be held in 2018;
- the Class II directors will be Bipul Sinha and Michael P. Scarpelli and their terms will expire at the annual meeting of stockholders to be held in 2019; and
- the Class III directors will be Dheeraj Pandey, Ravi Mhatre and John McAdam and their terms will expire at the annual meeting of stockholders to be held in 2020.

Upon expiration of the term of a class of directors, directors for that class will be elected for three-year terms at the annual meeting of stockholders in the year in which that term expires. Each director's term shall continue until the election and qualification of his successor, or his earlier death, resignation or removal. Any additional directorships resulting from an increase in the number of authorized directors will be distributed among the three classes so that, as nearly as possible, each class will consist of one-third of the directors.

The division of our board of directors into three classes with staggered three-year terms may delay or prevent a change of our management or a change of control. Under Delaware law and our amended and restated certificate of incorporation, our directors may be removed for cause by the affirmative vote of the holders of a majority of our voting stock.

Director Independence

Under the rules of the NASDAQ Stock Market, independent directors must comprise a majority of a listed company's board of directors within a specified period of the completion of an initial public offering. In addition, the rules of the NASDAQ Stock Market require that, subject to specified exceptions, each member of a listed company's audit, compensation and nominating and corporate governance committees be independent. Under the rules of the NASDAQ Stock Market, a director will only qualify as an "independent director" if, in the opinion of that company's board of directors, that person does not have a relationship that would interfere with the exercise of independent judgment in carrying out the responsibilities of a director. Compensation committee members must not have a relationship with us that is material to the director's ability to be independent from management in connection with the duties of a compensation committee member. Additionally, audit committee members must also satisfy the independence criteria set forth in Rule 10A-3 under the Exchange Act.

In order to be considered independent for purposes of Rule 10A-3, a member of an audit committee of a listed company may not, other than in his or her capacity as a member of the audit committee, the board of directors or any other board committee accept, directly or indirectly, any consulting, advisory or other compensatory fee from the listed company or any of its subsidiaries or be an affiliated person of the listed company or any of its subsidiaries.

Our board of directors has undertaken a review of the independence of each director and considered whether each director has a material relationship with us that could compromise his ability to exercise independent judgment in carrying out his responsibilities. As a result of this review, our board of directors determined that each of Messrs. Gomo, McAdam, Mhatre, Parks, Scarpelli and Sinha, representing six of our seven directors, do not have a relationship that would interfere with the exercise of independent judgment in carrying out the responsibilities of a director and were "independent directors" as defined under the applicable rules and regulations of the SEC and the listing requirements and rules of the NASDAQ Stock Market.

Lead Independent Director

Our board of directors has adopted corporate governance guidelines that provide that one of our independent directors should serve as our Lead Independent Director. Our board of directors has appointed Mr. Mhatre to serve as our Lead Independent Director. As Lead Independent Director, Mr. Mhatre will preside at all meetings of the board of directors at which the Chairman is not present, preside over executive sessions of our independent directors, serve as a liaison between our Chairman and our independent directors and perform such additional duties as our board of directors may otherwise determine and delegate.

Committees of the Board of Directors

Our board of directors has an audit committee, a compensation committee and a nominating and corporate governance committee, each of which will have the composition and responsibilities described below upon completion of this offering. Members serve on these committees until their resignation or until otherwise determined by our board of directors.

Audit Committee

Our audit committee is comprised of Messrs. Gomo, Parks and Scarpelli, each of whom is a non-employee member of our board of directors. Mr. Scarpelli is the chairman of our audit committee. Our board of directors has determined that each of the members of our audit committee satisfies the requirements for independence and financial literacy under the rules and regulations of the NASDAQ Stock Market and the SEC. Our board of directors has also determined that each of Messrs. Gomo and Scarpelli qualifies as an "audit committee financial expert" as defined in the SEC rules and

satisfies the financial sophistication requirements of the NASDAQ Stock Market. The audit committee is responsible for, among other things:

- selecting and hiring our registered public accounting firm;
- evaluating the performance and independence of our registered public accounting firm;
- approving the audit and pre-approving any non-audit services to be performed by our registered public accounting firm;
- reviewing our financial statements and related disclosures and reviewing our critical accounting policies and practices;
- reviewing the adequacy and effectiveness of our internal control policies and procedures and our disclosure controls and procedures;
- overseeing procedures for the treatment of complaints on accounting, internal accounting controls or audit matters;
- reviewing and discussing with management and the independent registered public accounting firm the results of our annual audit, our quarterly financial statements and our publicly filed reports;
- reviewing and approving in advance any proposed related-person transactions; and
- preparing the audit committee report that the SEC requires in our annual proxy statement.

Compensation Committee

Our compensation committee is comprised of Messrs. Mhatre, Parks and McAdam, each of whom is a non-employee member of our board of directors. Mr. Parks is the chairman of our compensation committee. Our board of directors has determined that each member of our compensation committee meets the requirements for independence under the rules of the NASDAQ Stock Market and the SEC, is a “non-employee director” within the meaning of Rule 16b-3 under the Exchange Act, and is an “outside director” within the meaning of Section 162(m) of the Code. The compensation committee is responsible for, among other things:

- reviewing and approving our Chief Executive Officer’s and other executive officers’ annual base salaries, incentive compensation plans, including the specific goals and amounts, equity compensation, employment agreements, severance arrangements and change in control agreements and any other benefits, compensation or arrangements;
- administering our equity compensation plans;
- overseeing our overall compensation philosophy, compensation plans and benefits programs; and
- preparing the compensation committee report that the SEC will require in our annual proxy statement.

Nominating and Corporate Governance Committee

Our nominating and corporate governance committee is comprised of Messrs. Mhatre and Gomo, each of whom is a non-employee member of our board of directors. Mr. Mhatre serves as the chairman of the committee. Our board of directors has determined that each member of our nominating and corporate governance committee meets the requirements for independence under the rules of the NASDAQ Stock Market. The nominating and corporate governance committee will be responsible for, among other things:

- evaluating and making recommendations regarding the composition, organization and governance of our board of directors and its committees;

- evaluating and making recommendations regarding the creation of additional committees or the change in mandate or dissolution of committees;
- developing and monitoring a set of corporate governance guidelines and compliance with laws and regulations; and
- reviewing and approving conflicts of interest of our directors and officers, other than related-person transactions reviewed by the audit committee.

We intend to post the charters of our audit, compensation and nominating and corporate governance committees, and any amendments thereto that may be adopted from time to time, on our website. Information on or that can be accessed through our website is not part of this prospectus. Our board of directors may from time to time establish other committees.

Compensation Committee Interlocks and Insider Participation

None of the members of our compensation committee is or has been an officer or employees of our company. None of our executive officers currently serves, or during fiscal 2016 has served, as a member of the compensation committee or director (or other board committee performing equivalent functions or, in the absence of any such committee, the entire board of directors) of any entity that has one or more executive officers serving on our compensation committee or our board of directors.

Mr. Mhatre, a member of our board of directors and our compensation committee, is affiliated with Lightspeed Venture Partners, which is a holder of more than 5% of our capital stock. Entities affiliated with Lightspeed Venture Partners purchased 686,011 shares of our Series D convertible preferred stock for a total purchase price of \$5.0 million in December 2013.

Mr. Parks, a member of our board of directors and our audit, compensation, and nominating and corporate governance committees, is affiliated with Riverwood Capital Partners, which is a holder of more than 5% of our capital stock. Entities affiliated with Riverwood Capital Partners purchased 6,174,108 shares of our Series D convertible preferred stock for a total purchase price of \$45.0 million in December 2013 and January 2014.

In connection with the purchases of our convertible preferred stock, we entered into an amended and restated investors' rights agreement with the holders of such stock, including entities affiliated with Lightspeed Venture Partners and Riverwood Capital Partners. This agreement provides, among other things, that the holders of our preferred stock have the right to request that we file a registration statement or request that their shares be covered by a registration statement that we are otherwise filing, subject to certain exceptions. For a description of these registration rights, see the section titled "Description of Capital Stock—Registration Rights."

Non-Employee Director Compensation

The table below shows the total compensation for each of our non-employee directors during fiscal 2016 for service on our board of directors. Directors who are employees do not receive any additional compensation for their service on our board of directors. We reimburse our non-employee directors for their reasonable out-of-pocket costs and travel expenses in connection with their attendance at board of directors and committee meetings. We did not pay or accrue any compensation for Messrs. Mhatre, Parks or Sinha during fiscal 2016.

<u>Name</u>	<u>Fees Earned or Paid in Cash (\$)</u>	<u>Stock Awards\$(1)</u>	<u>Total (\$)</u>
Steven J. Gomo	—	622,186	622,186
John McAdam	—	1,270,750	1,270,750
Michael P. Scarpelli	20,000	—	20,000

(1) The amounts in this column represent the aggregate grant-date fair value of the award as computed in accordance with Financial Accounting Standard Board Accounting Standards Codification Topic 718. The assumptions used in calculating the grant-date fair value of the awards reported in this column are set forth in the notes to our consolidated financial statements included elsewhere in this prospectus.

The following table lists outstanding equity awards held by our non-employee directors as of July 31, 2016.

<u>Name</u>	<u>Option Awards</u>	<u>Stock Awards</u>
Steven J. Gomo	—	85,000
John McAdam	—	85,000
Michael P. Scarpelli	275,000	—

EXECUTIVE COMPENSATION

Our named executive officers for fiscal 2016, which consist of our principal executive officer and the next two most highly-compensated executive officers, are:

- Dheeraj Pandey, Chief Executive Officer and Chairman;
- Sudheesh Nair Vadakkedath, President; and
- Sunil Potti, Chief Product and Development Officer.

2016 Summary Compensation Table

The following table provides information regarding the total compensation for services rendered in all capacities that was earned by our named executive officers in fiscal 2016 and fiscal 2015:

Name and Principal Position	Fiscal Year	Salary (\$)	Stock Awards (\$)(1)	Non-Equity Incentive Plan Compensation (\$)(2)	Total (\$)
Dheeraj Pandey(3) Chief Executive Officer and Chairman	2016	250,000	—	198,258(4)	448,258
	2015	232,500(5)	21,527,000(6)	194,700(7)	21,954,200
Sudheesh Nair Vadakkedath President	2016	325,000	4,179,000	261,130	4,765,130
Sunil Potti Chief Product and Development Officer	2016	250,000	3,482,500	198,258	3,930,758
	2015(8)	138,258	8,760,000	107,218	9,005,476

- (1) The amounts in this column represent the aggregate grant-date fair value of the award as computed in accordance with Financial Accounting Standard Board Accounting Standards Codification Topic 718. The assumptions used in calculating the grant-date fair value of the awards reported in this column are set forth in the notes to our consolidated financial statements included elsewhere in this prospectus.
- (2) The amounts reported represent the amounts paid under our executive bonus plan (or sales incentive plan, with respect to Mr. Vadakkedath). Payments for fiscal 2016 are described in greater detail in the section titled "—Non-Equity Incentive Plan Compensation."
- (3) Mr. Pandey served as our President, Chief Executive Officer and Chairman until February 2016, at which point his title was changed to Chief Executive Officer and Chairman. He continues to hold all of the responsibilities of the principal executive officer.
- (4) Under our executive bonus plan, Mr. Pandey was eligible to receive a payment of \$198,258 based on achievement of plan metrics for fiscal 2016. However, Mr. Pandey waived his right to receive incentive payments for fiscal 2016. Thus, the amounts reported as earned in this column were not paid to Mr. Pandey.
- (5) Pursuant to his employment letter, Mr. Pandey was eligible for the increase in his base salary to be retroactive to April 1, 2014. Mr. Pandey waived this right for a retroactive increase upon signing his employment letter.
- (6) Reflects the grant of RSUs covering an aggregate of 1,900,000 shares. In March 2016, Mr. Pandey voluntarily forfeited his rights with respect to 1,300,000 shares subject to these RSUs so that the shares may be available for future grants under our 2010 Plan, as a result of which only 600,000 shares remain subject to these RSUs.
- (7) Under our executive bonus plan, Mr. Pandey was eligible to receive a payment of (i) \$42,300 based on achievement of plan metrics for the first half of fiscal 2015; and (ii) \$152,400 based on achievement of plan metrics for the second half of fiscal 2015. However, Mr. Pandey waived his right to receive incentive payments for fiscal 2015. Thus, the amounts reported as earned in this column were not paid to Mr. Pandey.
- (8) Mr. Potti joined us in January 2015 and therefore the salary and incentive compensation payable to him was pro-rated for the portion of fiscal 2015 in which he was employed by us. Mr. Potti served as our Senior Vice President, Engineering and Product Management until February 2016, at which point his title was changed to Chief Product and Development Officer.

Non-Equity Incentive Plan Compensation**Fiscal Year 2016 Executive Bonus**

We sponsored a fiscal 2016 executive bonus plan, or the Fiscal 2016 Bonus Plan, under our Executive Bonus Plan. Our named executive officers (other than Mr. Vadakkedath) for fiscal 2016 were

eligible to participate in our Fiscal 2016 Bonus Plan. Incentives under our Fiscal 2016 Bonus Plan were payable based on our achievement of certain company financial targets. For fiscal 2016, the performance metrics were bookings and new end-customer adds. The performance periods in the Fiscal 2016 Bonus Plan were semi-annual. For fiscal 2016, the target incentives for each eligible named executive officer were as follows: (i) Dheeraj Pandey, \$150,000; and (ii) Sunil Potti, \$150,000. Amounts earned for fiscal 2016 under the Fiscal 2016 Bonus Plan are set forth in the Summary Compensation Table.

Sales Incentive Plan

Mr. Vadakkedath is a participant in our Sales Incentive Plan. Our Sales Incentive Plan generally covers a semi-annual period. Mr. Vadakkedath has certain targets for each quarter during the applicable semi-annual period. Under our Sales Incentive Plan, Mr. Vadakkedath earns commissions when we receive and approve a purchase order with respect to our products or services from a channel partner. Mr. Vadakkedath's earned commissions for a quarter equal the amount of the purchase orders entered into for the quarter multiplied by his commission rate. Mr. Vadakkedath's commission rate can vary depending on whether he has met or exceeded his target for that quarter. The amount reported for Mr. Vadakkedath in the Non-Equity Incentive Plan Compensation column in the Summary Compensation Table reflects the commissions earned by Mr. Vadakkedath under our Sales Incentive Plan for fiscal 2016.

Named Executive Officer Employment Arrangements

Dheeraj Pandey

We entered into an employment letter with Dheeraj Pandey, our Chief Executive Officer and Chairman on February 26, 2015. The employment letter does not have a fixed expiration date and Mr. Pandey's employment is at-will. Mr. Pandey's current annual base salary is \$250,000, and he is currently eligible to earn annual incentive compensation with a target equal to \$150,000, based upon achievement of milestones determined by our board of directors or compensation committee for each fiscal year. Pursuant to his employment letter, shortly after its effectiveness, Mr. Pandey was eligible to receive an amount to put him in the same position he would have been in if his base salary change had been paid at the current level since April 1, 2014. Mr. Pandey waived this right to a retroactive increase.

In connection with entering into the employment letter, we granted Mr. Pandey four RSU grants under our 2010 Plan and RSU agreements covering an aggregate of 1,900,000 shares as follows: (1) 1,187,500 shares subject to quarterly time-based vesting over four years, or Time-Based RSUs, provided that a liquidity event (i.e., the occurrence prior to April 15, 2021 of: a change in control transaction or the one-month anniversary of the expiration of the lock-up established in connection with this offering) must occur for vesting to occur, subject to his continued service through each applicable vesting date; (2) 316,666 shares that vest one month after the expiration of the lock-up period established in connection with this offering, subject to his continued service through the applicable vesting date, or IPO RSUs; (3) 197,917 shares that commence vesting on the one-year anniversary of this offering and vest quarterly thereafter over four years, subject to his continued service through the applicable vesting dates, or First Milestone RSUs; and (4) 197,917 shares that commence vesting on the two-year anniversary of this offering and vest quarterly thereafter over four years, subject to his continued service through the applicable vesting dates, or the Second Milestone RSUs. The IPO RSUs, the First Milestone RSUs and the Second Milestone RSUs require the one-month anniversary of the expiration of the lock-up period to occur by April 15, 2019 for vesting to occur. If in connection with a corporate transaction (i.e., a change in control transaction), the Time-Based RSUs are not assumed by our successor, then 100% of the Time-Based RSUs accelerate prior to the corporate transaction. Upon Mr. Pandey's death or disability, 100% of the Time-Based RSUs accelerate. If during

Mr. Pandey's service, a corporate transaction occurs with net proceeds available to stockholders equal to (x) \$5 billion or more, then 100% of the IPO RSUs, the First Milestone RSUs and the Second Milestone RSUs vest; (y) \$2.5 billion or more but less than \$5 billion, then the 100% of the unvested portion of the IPO RSUs and the First Milestone RSUs vest and the unvested portions of the Second Milestone RSUs terminate without consideration; and (z) less than \$2.5 billion, then the unvested portions of the IPO RSUs, the First Milestone RSUs and the Second Milestone RSUs all terminate without consideration.

In March 2016, Mr. Pandey voluntarily forfeited his rights with respect to the entirety of the IPO RSUs, the First Milestone RSUs and the Second Milestone RSUs, as a result of which these RSUs have been cancelled in their entirety, as well as his rights with respect to the last 587,500 shares eligible to vest under the Time-Based RSUs, as a result of which only 600,000 shares remain subject to the Time-Based RSUs.

If, at any time prior to a corporate transaction or more than 12 months following a corporate transaction, Mr. Pandey's employment is terminated by us other than for cause (as defined below), death or disability or Mr. Pandey resigns for good reason (as defined below), then subject to Mr. Pandey signing a release of claims and complying with certain covenants, Mr. Pandey will receive: (1) continuing payments of base salary for a period of 12 months; (2) a lump-sum payment equal to 60% of the base salary (pro-rated for time served during the year of termination); (3) reimbursement of COBRA premiums for 12 months; (4) acceleration of 50% of the unvested Time-Based RSUs so long as a liquidity event has occurred prior to such termination; and (5) an extended post-termination exercise period of stock options for 24 months after termination.

If, within 12 months following a corporate transaction, Mr. Pandey's employment is terminated by us other than for cause, death or disability or Mr. Pandey resigns for good reason, then subject to Mr. Pandey signing a release of claims and complying with certain covenants, Mr. Pandey will receive: (1) a lump-sum payment equal to 12 months base salary; (2) 100% of Mr. Pandey's target bonus for the year of the termination of his employment; (3) reimbursement of COBRA premiums for 12 months; (4) 100% acceleration of the unvested Time-Based RSUs so long as a liquidity event has occurred prior to such termination; and (5) an extended post-termination exercise period of stock options for 24 months after termination.

For purposes of Mr. Pandey's employment letter, "cause" means generally:

- an act of dishonesty by him made in connection with his responsibilities as an employee which causes material economic injury to us;
- his conviction of, or plea of nolo contendere to, a felony or any crime of fraud, embezzlement or moral turpitude;
- his acts of gross misconduct in the performance of his job duties which cause material economic injury to us;
- his unauthorized use or disclosure of material proprietary information of ours or any party to whom executive owes an obligation of non-disclosure; or
- his repeated and intentional failure to follow a lawful directive of the board of directors.

For purposes of Mr. Pandey's employment letter, "good reason" means generally the occurrence of any of the following without his consent:

- a significant reduction of his duties, position or responsibilities;
- a significant reduction in his base salary;
- a material reduction in employee benefits;

- his relocation of his primary place of work by more than 50 miles; or
- any attempt by us or a successor to cancel to terminate his employment letter.

Sudheesh Nair Vadakkedath

We entered into an employment letter with Sudheesh Nair Vadakkedath, our President, on August 8, 2016. The employment letter does not have a fixed expiration date and Mr. Vadakkedath's employment is at-will. Mr. Vadakkedath's current annual base salary is \$400,000, but it will be adjusted to \$250,000 on the one-year anniversary of the effective date of our initial public offering. In addition, Mr. Vadakkedath is currently eligible for commissions under our Sales Incentive Plan (capped at \$200,000 per fiscal year), but upon the one-year anniversary of the effective date of our initial public offering, he will cease to be eligible to participate in our Sales Incentive Plan and instead will be eligible to earn annual incentive compensation with a target equal to \$150,000 (which will be pro-rated for the remainder of the fiscal year in which our initial public offering occurs), based upon achievement of milestones determined by our board of directors or compensation committee for each fiscal year.

In connection with entering into the employment letter, we granted Mr. Vadakkedath two RSU awards under our 2010 Plan covering an aggregate of 800,000 shares as follows: (1) 500,000 shares subject to quarterly time-based vesting over five years, or Time-Based RSUs, and (2) 300,000 shares subject to the performance-based vesting schedule described below, or Performance RSUs, in each case provided that a liquidity event (i.e., the occurrence prior to January 1, 2023 of a change in control transaction or the one-month anniversary of the expiration of the lock-up established in connection with this offering) must occur for vesting of the Time-Based RSUs or Performance RSUs to occur, subject to Mr. Vadakkedath's continued service through each applicable vesting date.

1/3rd of the Performance RSUs will vest on the later of achievement of an applicable performance milestone or January 1, 2019, 1/3rd of the Performance RSUs will vest on later of achievement of an applicable performance milestone or January 1, 2020 and 1/3rd of the Performance RSUs will vest on later of achievement of an applicable performance milestone or January 1, 2021, subject to the liquidity event and continued service conditions described above. If the performance milestones are not achieved by January 1, 2023, then the unvested Performance RSUs forfeit entirely. If a triggering event (as defined in our 2010 Plan) occurs and the Performance RSUs have not been or will not be accelerated in connection with the closing of the triggering event, then any remaining outstanding and unvested Performance RSUs will instead under the following alternative time-based vesting schedule: 1/3rd of such Performance RSUs will vest in equal annual installments on each of January 1, 2019, January 1, 2020 and January 1, 2021, subject to Mr. Vadakkedath's continued service through each applicable vesting date. If any such Performance RSUs would be vested under such alternative time-based vesting schedule as of the closing date of the triggering event, they will be deemed vested as of immediately prior to the closing of such triggering event.

If, at any time prior to a triggering event, Mr. Vadakkedath's employment is terminated by us other than for cause (as defined below), death or disability or Mr. Vadakkedath resigns for good reason (as defined below), then subject to Mr. Vadakkedath signing a release of claims and returning all our property in his possession within ten days following the effective date of his termination, Mr. Vadakkedath will receive: (1) acceleration of 1/20th of the Time-Based RSUs so long as the one-month anniversary of the lock-up expiration has occurred; (2) three months' acceleration of certain options listed in Mr. Vadakkedath's employment letter; (3) continuing payments of his base salary for six months; and (4) reimbursement of COBRA premiums for six months.

If a triggering event occurs during Mr. Vadakkedath's continuous service with us and the Time-Based RSUs and/or Performance RSUs are not assumed, substituted, or otherwise continued or replaced with similar equity awards in connection with the triggering event, then subject to

Mr. Vadakkedath signing a release of claims, Mr. Vadakkedath will receive acceleration of 100% of such Time-Based RSUs and Performance RSUs.

If, upon or within 12 months following a triggering event, Mr. Vadakkedath's employment is terminated by us other than for cause, death or disability or Mr. Vadakkedath resigns for good reason, then subject to Mr. Vadakkedath signing a release of claims and returning all our property in his possession within 10 days following the effective date of his termination, Mr. Vadakkedath will receive acceleration of 100% of his unvested Time-Based RSUs and Performance RSUs.

For purposes of Mr. Vadakkedath's employment letter, "cause" has the same meaning as defined in the 2010 Plan and means generally:

- his willful failure to perform his duties and responsibilities to us or his violation of any written policy;
- his commission of any act of fraud, embezzlement, dishonesty or any other willful misconduct that has caused or is reasonably expected to result in injury to us;
- his unauthorized use or disclosure of any proprietary information or trade secrets of ours or any other party to whom executive owes an obligation of nondisclosure as a result of his relationship with us; or
- his material breach of any of his obligations under any written agreement or covenant with us.

For purposes of Mr. Vadakkedath's employment letter, "good reason" means Mr. Vadakkedath's resignation due to the occurrence of any of the following conditions which occurs without his written consent, provided that the requirements regarding advance notice and an opportunity to cure set forth below are satisfied:

- his then-current base salary is reduced by more than 20% (other than (1) as part of an across-the-board salary reduction applicable to all executive officers or (2) as otherwise agreed in Mr. Vadakkedath's employment letter);
- a material reduction of his individual duties, authority, responsibilities or reporting relationship, relative to his duties, authority, responsibilities or reporting relationship as in effect immediately prior to such reduction; or
- we (or a successor, if appropriate) require him to relocate to a facility or location more than 50 miles away from the location at which he was working immediately prior to the required relocation and such relocation increases his one-way commute by more than 50 miles from his principal residence at the time of such relocation.

In order for Mr. Vadakkedath to resign for good reason, he must provide written notice to us of the existence of the good reason condition within 60 days of the initial existence of such good reason condition and a period of 30 days during which we may remedy the good reason condition, the good reason condition must not have been remedied within such 30-day period, and he must resign no later than 30 days following the expiration of our 30-day cure period.

Sunil Potti

We entered into an employment letter with Sunil Potti, our Chief Product and Development Officer, on January 4, 2015. The employment letter has an indefinite term and Mr. Potti's employment is at-will. Mr. Potti's current annual base salary is \$250,000, and he is currently eligible to earn annual incentive compensation with a target equal to \$150,000, based upon achievement of milestones determined by our board of directors or compensation committee for each fiscal year.

In connection with his hire, Mr. Potti was granted three RSU grants covering an aggregate of 800,000 shares under our 2010 Plan and RSU agreements, as follows: (1) 700,000 shares subject to quarterly time-based vesting over four years with a one-year vesting cliff, or Potti Time-Based RSUs, provided that a liquidity event (i.e., the occurrence prior to January 13, 2022 of: a change in control transaction or the one-month anniversary of the expiration of the lock-up established in connection with this offering, or lock-up expiration) must occur for vesting to occur, subject to his continued service through each applicable vesting date; (2) 50,000 shares that commence vesting on lock-up expiration and vest quarterly thereafter over 42 months, subject to his continued service through the applicable vesting dates, or Potti IPO RSUs; and (3) 50,000 shares that commence vesting on the six month anniversary of lock-up expiration and vest quarterly thereafter over four years, subject to his continued service through the applicable vesting dates, or the Potti Post-IPO RSUs.

If in connection with a triggering event, the Potti Time-Based RSUs, the Potti IPO RSUs and the Potti Post-IPO RSUs are not assumed by our successor, then (i) 50% of the then-unvested Potti Time-Based RSUs and (ii) if this offering occurs prior to January 2020, 50% of the then-unvested Potti IPO RSUs and the Potti Post-IPO RSUs will accelerate prior to the triggering event, subject to Mr. Potti signing a release of claims and complying with certain covenants.

If, at any time prior to a triggering event, Mr. Potti's employment is terminated by us other than for cause, then subject to Mr. Potti signing a release of claims and complying with certain covenants, Mr. Potti will receive: continuing payments of base salary for a period of six months and accelerated vesting of 3/48th of the Potti Time-Based RSUs; provided no acceleration will occur unless lock-up expiration has occurred by the termination date.

If, upon or within six (6) months following a triggering event, Mr. Potti's employment is terminated by us other than for cause, then subject to Mr. Potti signing a release of claims and complying with certain covenants, Mr. Potti will receive (i) 50% acceleration of the then-unvested Potti Time-Based RSUs and (ii) if this offering occurs, 50% of the then-unvested Potti IPO RSUs and the Potti Post-IPO RSUs will accelerate prior to such termination.

If during Mr. Potti's service and prior to the completion of this offering and January 2020, a corporate transaction occurs with net proceeds available to stockholders equal to (x) \$5 billion or more, then 50% of the Potti IPO RSUs and the Potti Post-IPO RSUs vest and the unvested portions terminate; and (y) \$2.5 billion or more but less than \$5 billion, then 50% of the Potti IPO RSUs vest and the unvested portions of the Potti RSUs terminate without consideration and all of the Potti Post-IPO RSUs terminate without consideration.

For purposes of Mr. Potti's employment letter, "cause" has the same meaning as defined in the 2010 Plan, as described above in the summary of Mr. Vadakkedath's employment letter.

Change of Control and Severance Policy

In August 2016, we adopted a Change of Control and Severance Policy, or the severance policy, pursuant to which a designated employee is eligible to receive severance benefits in lieu of any other severance payments and benefits, subject to the employee signing a participation agreement. Each of our named executive officers is eligible to participate in the severance policy. Generally, if a participant's employment is terminated within three months prior to or 12 months following the consummation of a change of control, which such period is referred to as the change of control period, either by us or a subsidiary of ours other than for cause, death or disability or by the participant for good reason, then the severance policy provides for:

(1) the applicable percentage of the then-unvested shares subject to each of the participant's then-outstanding time-based equity awards, except for performance-based equity awards that were

[Table of Contents](#)

[Index to Financial Statements](#)

converted by their terms into time-based equity awards upon a change of control transaction, will immediately vest and become exercisable, with such percentage being 100% for each of the named executive officers,

(2) a lump sum payment equal to the participant's annual base salary, as in effect immediately prior to the participant's termination or, if the termination is due to a resignation for good reason based on a material reduction in base salary, immediately prior to such reduction, or immediately prior to the change of control, whichever is greater, multiplied by 100% for our Chief Executive Officer and 75% for each of our other named executive officers,

(3) a lump sum payment equal to the participant's target annual bonus as in effect for the fiscal year in which his or her termination of employment occurs, multiplied by 100% for our Chief Executive Officer and 75% for each of our other named executive officers, and

(4) payment or reimbursement of the cost of continued health benefits for a period of up to 12 months for our Chief Executive Officer and nine months for each of our other named executive officers.

In order to receive severance benefits under the severance policy, a participant must timely execute and not revoke a release of claims in favor of us. In addition, the severance policy provides that, if any payment or benefits to a participant, including the payments and benefits under the severance policy, would constitute a "parachute payment" within the meaning of Section 280G of the Code and would therefore be subject to an excise tax under Section 4999 of the Code, then such payments and benefits will be either (1) reduced to the largest portion of the payments and benefits that would result in no portion of the payments and benefits being subject to the excise tax, or (2) not reduced, whichever, after taking into account all applicable federal, state and local employment and income taxes and the excise tax, results in the participant's receipt, on an after-tax basis, of the greater payments and benefits.

For purposes of the severance policy, "cause" means any of the following reasons (with any references to us interpreted to include any subsidiary, parent, affiliate or successor of ours):

- the participant's willful failure to perform his or her duties and responsibilities to us or the participant's violation of any written policy of ours;
- the participant's commission of any act of fraud, embezzlement, dishonesty or any other willful misconduct that has caused or is reasonably expected to result in injury to us;
- the participant's unauthorized use or disclosure of any proprietary information or trade secrets of ours or any other party to whom the participant owes an obligation of nondisclosure as a result of his or her relationship with us; or
- the participant's material breach of any of his or her obligations under any written agreement or covenant with us.

For purposes of the severance policy, "good reason" means the participant's termination of his or her employment in accordance with the next sentence after the occurrence of one or more of the following events without the participant's express written consent:

- a material reduction of the participant's duties, authorities or responsibilities relative to the participant's duties, authorities or responsibilities in effect immediately prior to such reduction;
- a material reduction by us in the participant's rate of annual base salary; provided, however, that, a reduction of annual base salary that also applies to substantially all other similarly situated employees of ours will not constitute "good reason";

- a material change in the geographic location of the participant’s primary work facility or location; provided, that a relocation of less than 35 miles from the participant’s then present location will not be considered a material change in geographic location; or
- our failure to obtain from any successor or transferee of ours an express written and unconditional assumption of our obligations to the participant under the severance policy.

In order for the participant’s termination of his or her employment to be for good reason, the participant must not terminate employment with us without first providing us with written notice of the acts or omissions constituting the grounds for “good reason” within 90 days of the initial existence of the grounds for “good reason” and a cure period of 30 days following the date of written notice, such grounds must not have been cured during such time, and the participant must terminate his or her employment within 30 days following the expiration of our 30-day cure period.

Outstanding Equity Awards at Fiscal 2016 Year-End

The following table sets forth information regarding outstanding equity awards held by our named executive officers as of July 31, 2016:

Named Executive Officer	Grant Date	Option Awards— Number of Securities Underlying Unexercised Options Exercisable (#)	Option Awards— Number of Securities Underlying Unexercised Options Unexercisable (#)	Option Awards— Option Exercise Price (\$)	Option Awards— Option Expiration Date	Stock Awards— Number of Shares That Have Not Vested (#)	Stock Awards— Market Value of Shares or Units of Stock That Have Not Vested (\$)(1)
Dheeraj Pandey	03/28/2012(2)	886,000	—	0.49	03/27/2022	—	—
	06/13/2012(2)	705,000	—	0.49	06/12/2022	—	—
	2/26/2015(3)	—	—	—	—	600,000	7,386,000
Sudheesh Nair Vadakkedath	03/16/2012(4)	40,000	—	0.49	03/15/2022	—	—
	11/16/2012(5)	—	—	—	—	4,167	51,296
	05/14/2013(6)	370,000	—	1.22	05/13/2023	—	—
	05/20/2014(7)	900,000	—	3.20	05/19/2024	—	—
	03/02/2016(8)	—	—	—	—	500,000	6,155,000
Sunil Potti	04/27/2016(9)	—	—	—	—	300,000	3,693,000
	1/26/2015(10)	—	—	—	—	700,000	8,617,000
	1/26/2015(11)	—	—	—	—	50,000	615,500
	1/26/2015(12)	—	—	—	—	50,000	615,500
	4/27/2016(13)	—	—	—	—	250,000	3,077,500

- (1) This amount reflects the fair market value of our Class B common stock of \$12.31 as of July 31, 2016 (the determination of the fair market value by our board of directors as of the most proximate date) multiplied by the amount shown in the column for the Number of Shares That Have Not Vested.
- (2) Fully vested as of March 15, 2014.
- (3) 1/16th of the RSUs will vest on each quarterly anniversary of April 15, 2014; *provided, that* a liquidity event (i.e. the occurrence prior to April 15, 2021 of (i) a change of control transaction or (ii) the one-month anniversary of the expiration of the lock-up established in connection with this offering) must occur for vesting to occur, in each case subject to continued service to us. In March 2016, Mr. Pandey voluntarily forfeited his rights with respect to the last 587,500 shares eligible to vest under these RSUs so that these shares may be available for further grants under our 2010 Plan, as a result of which only 600,000 shares remain subject to these RSUs. Subject to accelerated vesting terms as described in the section titled “—Named Executive Officer Employment Arrangements.”
- (4) 1/4th of the shares subject to the option vested on March 15, 2013, and 1/48th of the shares subject to the option vest monthly thereafter, in each case, subject to continued service to us. The option contains an early-exercise provision and is exercisable as to unvested shares, subject to our right of repurchase.
- (5) Shares acquired pursuant to an early-exercise provision and subject to a right of repurchase we held as of July 31, 2016. 1/48th of the shares subject to the option vested on the monthly anniversary of November 5, 2012, subject to continued service to us. The option contains an early-exercise provision and is exercisable as to unvested shares, subject to our right of repurchase.
- (6) 1/36th of the shares subject to the option vested on the monthly anniversary of May 1, 2013, subject to continued service to us. The option contains an early-exercise provision and is exercisable as to unvested shares, subject to our right of repurchase.

[Table of Contents](#)

[Index to Financial Statements](#)

- (7) The shares subject to the option vest as follows: (i) 12,500 shares subject to the option vested on the monthly anniversary of April 1, 2014 through April 1, 2015; (ii) 25,000 shares subject to the option vested on the monthly anniversary of April 1, 2015 through April 1, 2016; and (iii) 12,500 shares subject to the option will vest on the monthly anniversary of April 1, 2016 through April 1, 2019, in each case, subject to continued service to us. The option contains an early-exercise provision and is exercisable as to unvested shares, subject to our right of repurchase.
- (8) 1/20th of the RSUs will vest on each quarterly anniversary of January 1, 2016; provided, that a liquidity event (i.e. the occurrence prior to January 1, 2023 of (i) a change of control transaction or (ii) the one-month anniversary of the expiration of the lock-up established in connection with this offering) must occur for vesting to occur, in each case subject to continued service to us.
- (9) 1/3rd of the RSUs will vest on the later of achievement of an applicable performance milestone or January 1, 2019, 1/3rd of the RSUs will vest on later of achievement of an applicable performance milestone or January 1, 2020 and 1/3rd of the RSUs will vest on later of achievement of an applicable performance milestone or January 1, 2021; provided, that a liquidity event (i.e. the occurrence prior to April 27, 2023 of (i) a change of control transaction or (ii) the one-month anniversary of the expiration of the lock-up established in connection with this offering) must occur for vesting to occur, in each case subject to continued service to us. If the performance milestones are not achieved by January 1, 2023, then the unvested RSUs forfeit entirely. If triggering event (as defined in our plan) occurs, then any remaining outstanding and unvested RSU convert to a 3 year annual time-based vesting schedule with 1/3rd equal vesting on January 1, 2019, January 1, 2020 and January 1, 2021.
- (10) 1/4th of the RSUs will vest on January 13, 2016, and 1/16th of the RSUs will vest on each quarterly anniversary thereafter; *provided, that* a liquidity event (i.e. the occurrence prior to January 13, 2022 of (i) a change of control transaction or (ii) the one-month anniversary of the expiration of the lock-up established in connection with this offering) must occur for vesting to occur, in each case subject to continued service to us. Subject to accelerated vesting terms as described in the section titled “—Named Executive Officer Employment Arrangements.”
- (11) 1/14th of the RSUs will vest on each quarterly anniversary of the one-month anniversary of the expiration of the lock-up established in connection with this offering, subject to continued service with us. Subject to accelerated vesting terms as described in the section titled “—Named Executive Officer Employment Arrangements.”
- (12) 1/16th of the RSUs will vest on each quarterly anniversary of the seven-month anniversary of the expiration of the lock-up established in connection with this offering, subject to continued service with us. Subject to accelerated vesting terms as described in the section titled “—Named Executive Officer Employment Arrangements.”
- (13) 1/3rd of the RSUs will vest on the later of achievement of an applicable performance milestone or January 1, 2019, 1/3rd of the RSUs will vest on later of achievement of an applicable performance milestone or January 1, 2020 and 1/3rd of the RSUs will vest on later of achievement of an applicable performance milestone or January 1, 2021; provided, that a liquidity event (i.e. the occurrence prior to April 27, 2023 of (i) a change of control transaction or (ii) the one-month anniversary of the expiration of the lock-up established in connection with this offering) must occur for vesting to occur, in each case subject to continued service to us. If the performance milestones are not achieved by January 1, 2023, then the unvested RSUs forfeit entirely. If triggering event (as defined in our plan) occurs, then any remaining outstanding and unvested RSU convert to a three-year annual time-based vesting schedule with 1/3rd equal vesting on January 1, 2019, January 1, 2020 and January 1, 2021.

Subsequent Events

In September 2016, the compensation committee of our board of directors approved stock option grants to Mr. Pandey for an aggregate of 1,000,000 shares of our Class B common stock. The stock options were granted pursuant to our 2010 Plan. Stock options for 500,000 of these shares are scheduled to vest monthly over four years from the grant date, subject to Mr. Pandey's continued service through each vesting date. Stock options for the remaining 500,000 shares are scheduled to vest subject to certain time-based and performance-based conditions. The stock options were granted with an exercise price equal to \$12.00 per share, the midpoint of the range on the cover of the preliminary prospectus dated September 19, 2016.

Employee Benefit and Stock Plans

2016 Equity Incentive Plan

Our board of directors adopted our 2016 Plan in December 2015, and it was amended in September 2016. Our stockholders approved our 2016 Plan in March 2016. Our 2016 Plan will be effective one business day prior to the effective date of the registration statement of which this prospectus forms a part. Our 2016 Plan will provide for the grant of incentive stock options, within the meaning of Section 422 of the Code, to our employees and any parent and subsidiary

corporations' employees, and for the grant of nonstatutory stock options, restricted stock, RSUs, stock appreciation rights, performance units and performance shares to our employees, directors and consultants and our parent and subsidiary corporations' employees and consultants.

Authorized Shares. A total of 22,400,000 shares of our Class A common stock is reserved for issuance pursuant to our 2016 Plan. In addition, the shares to be reserved for issuance under our 2016 Plan shall be increased by that number of shares of Class A Common Stock equal to the number of shares of our Class B common stock returned to our 2010 Plan and our 2011 Plan as the result of expiration or termination of awards after the effective date of the registration statement of which this prospectus forms a part (provided that the maximum number of shares that may be added to our 2016 Plan pursuant to this sentence is 38,667,284 shares). The number of shares available for issuance under our 2016 Plan will also include an annual increase on the first day of each fiscal year beginning in fiscal 2018, equal to the least of:

- 18,000,000 shares;
- 5% of the outstanding shares of all classes of common stock as of the last day of our immediately preceding fiscal year; or
- such other amount as our board of directors may determine.

Plan Administration. Our board of directors or one or more committees appointed by our board of directors, will administer our 2016 Plan. Our compensation committee will administer our 2016 Plan. In the case of awards intended to qualify as "performance-based compensation" within the meaning of Section 162(m) of the Code, our compensation committee will consist of two or more "outside directors" within the meaning of Section 162(m) of the Code. In addition, if we determine it is desirable to qualify transactions under our 2016 Plan as exempt under Rule 16b-3 of the Exchange Act, or Rule 16b-3, such transactions will be structured to satisfy the requirements for exemption under Rule 16b-3. Subject to the provisions of our 2016 Plan, the administrator will have the power to administer the plan, including but not limited to, the power to interpret the terms of the 2016 Plan and awards granted thereunder, to create, amend and revoke rules relating to our 2016 Plan, including creating sub-plans, and to determine the terms of the awards, including the exercise price, the number of shares subject to each such award, the exercisability of the awards and the form of consideration, if any, payable upon exercise. The administrator will also have the authority to amend existing awards to reduce or increase their exercise price, to allow participants the opportunity to transfer outstanding awards to a financial institution or other person or entity selected by the administrator, and to institute an exchange program by which outstanding awards may be surrendered in exchange for awards of the same type, which may have a higher or lower exercise price or different terms, awards of a different type and/or cash.

Stock Options. Stock options may be granted under our 2016 Plan. The exercise price of options granted under our 2016 Plan must at least be equal to the fair market value of our Class A common stock on the date of grant. The term of an incentive stock option may not exceed 10 years, except that with respect to any participant who owns more than 10% of the voting power of all classes of our outstanding stock, the term must not exceed five years and the exercise price must equal at least 110% of the fair market value on the grant date. The administrator will determine the methods of payment of the exercise price of an option, which may include cash, shares or other property acceptable to the administrator, as well as other types of consideration permitted by applicable law. After the termination of service of an employee, director or consultant, he or she may exercise his or her option for the period of time stated in his or her option agreement. Generally, if termination is due to death or disability, the option will remain exercisable for 12 months. In all other cases, the option will generally remain exercisable for three months following the termination of service. However, in no event may an option be exercised after the expiration of its term. Subject to the provisions of our 2016 Plan, the administrator determines the other terms of options.

Stock Appreciation Rights. Stock appreciation rights may be granted under our 2016 Plan. Stock appreciation rights allow the recipient to receive the appreciation in the fair market value of our common stock between the exercise date and the date of grant. Stock appreciation rights may not have a term exceeding 10 years. After the termination of service of an employee, director or consultant, he or she may exercise his or her stock appreciation right for the period of time stated in his or her stock appreciation right agreement. However, in no event may a stock appreciation right be exercised after the expiration of its term. Subject to the provisions of our 2016 Plan, the administrator determines the other terms of stock appreciation rights, including when such rights become exercisable and whether to pay any increased appreciation in cash or with shares of our Class A common stock, or a combination thereof, except that the per share exercise price for the shares to be issued pursuant to the exercise of a stock appreciation right will be no less than 100% of the fair market value per share on the date of grant.

Restricted Stock. Restricted stock may be granted under our 2016 Plan. Restricted stock awards are grants of shares of our Class A common stock that vest in accordance with terms and conditions established by the administrator. The administrator will determine the number of shares of restricted stock granted to any employee, director or consultant and, subject to the provisions of our 2016 Plan, will determine the terms and conditions of such awards. The administrator may impose whatever conditions to vesting it determines to be appropriate. For example, the administrator may set restrictions based on the achievement of specific performance goals or continued service to us; provided, however, that the administrator, in its sole discretion, may accelerate the time at which any restrictions will lapse or be removed. Recipients of restricted stock awards generally will have voting and dividend rights with respect to such shares upon grant without regard to vesting, unless the administrator provides otherwise. Shares of restricted stock that do not vest are subject to our right of repurchase or forfeiture.

Restricted Stock Units. RSUs may be granted under our 2016 Plan. RSUs are bookkeeping entries representing an amount equal to the fair market value of one share of our Class A common stock. Subject to the provisions of our 2016 Plan, the administrator will determine the terms and conditions of RSUs, including the vesting criteria, which may include accomplishing specified performance criteria or continued service to us, and the form and timing of payment. Notwithstanding the foregoing, the administrator, in its sole discretion, may accelerate the time at which any restrictions will lapse or be removed.

Performance Units and Performance Shares. Performance units and performance shares may be granted under our 2016 Plan. Performance units and performance shares are awards that will result in a payment to a participant only if performance goals established by the administrator are achieved or the awards otherwise vest. The administrator will establish organizational or individual performance goals or other vesting criteria in its discretion, which, depending on the extent to which they are met, will determine the number and the value of performance units and performance shares to be paid out to participants. After the grant of a performance unit or performance share, the administrator, in its sole discretion, may reduce or waive any performance criteria or other vesting provisions for such performance unit or performance share. Performance units shall have an initial dollar value established by the administrator prior to the grant date. Performance shares shall have an initial value equal to the fair market value of our Class A common stock on the grant date. The administrator, in its sole discretion, may pay earned performance units or performance shares in the form of cash, in shares or in some combination thereof.

Outside Directors. Our 2016 Plan provides that all non-employee directors will be eligible to receive all types of awards, except for incentive stock options, under our 2016 Plan. During any fiscal year, a non-employee director may not be granted (i) cash-settled awards with a grant date fair value (determined in accordance with GAAP) of more than \$750,000, increased to \$1,500,000 in connection with his or her initial service, or (ii) stock-settled awards with a grant date fair value of more than \$750,000, increased to \$1,500,000 in connection with his or her initial service.

Non-Transferability. Unless the administrator provides otherwise, our 2016 Plan generally will not allow for the transfer of awards and only the recipient of an award may exercise an award during his or her lifetime.

Certain Adjustments. In the event of certain changes in our capitalization, to prevent diminution or enlargement of the benefits or potential benefits available under our 2016 Plan, the administrator will adjust the number and class of shares that may be delivered under our 2016 Plan and the number, class, and price of shares covered by each outstanding award, and the numerical share limits set forth in our 2016 Plan. In the event of our proposed liquidation or dissolution, the administrator will notify participants as soon as practicable, and all awards will terminate immediately prior to the consummation of such proposed transaction.

Merger or Change in Control. Our 2016 Plan will provide that in the event of a “merger” or “change in control,” as defined under our 2016 Plan, each outstanding award will be treated as the administrator determines, except that if a successor corporation or its parent or subsidiary does not assume or substitute an equivalent award for any outstanding award, then such award will fully vest, all restrictions on such award will lapse, all performance goals or other vesting criteria applicable to such award will be deemed achieved at 100% of target levels, and such award will become fully exercisable, if applicable, for a specified period prior to the transaction. The award will then terminate upon the expiration of the specified period of time. If the service of an outside director is terminated on or following a change in control, other than pursuant to a voluntary resignation, his or her options, RSUs and stock appreciation rights, if any, will vest fully and become immediately exercisable, all restrictions on his or her restricted stock will lapse, and all performance goals or other vesting requirements for his or her performance shares and units will be deemed achieved at 100% of target levels, and all other terms and conditions met.

Amendment, Termination. The administrator will have the authority to amend, suspend or terminate our 2016 Plan, provided such action does not impair the existing rights of any participant without his or her consent. Our 2016 Plan will automatically terminate in 2026, unless we terminate it sooner.

2016 Employee Stock Purchase Plan

Our board of directors adopted our ESPP in December 2015 and it was amended in January 2016 and September 2016. Our stockholders approved our 2016 Plan in March 2016. Our ESPP is effective as of the date it was adopted by our board of directors. We believe that allowing our employees to participate in our ESPP provides them with a further incentive towards ensuring our success and accomplishing our corporate goals.

Authorized Shares. A total of 3,800,000 shares of our Class A common stock are available for sale under our ESPP. The number of shares of our Class A common stock available for sale under our ESPP also includes an annual increase on the first day of each fiscal year beginning in fiscal 2018, equal to the least of:

- 3,800,000 shares;
- 1% of the outstanding shares of our Class A common stock as of the last day of the immediately preceding fiscal year; or
- such other amount as our board of directors may determine.

Plan Administration. Our compensation committee will administer our ESPP, and have full but non-exclusive authority to interpret the terms of our ESPP and determine eligibility to participate, subject to the conditions of our ESPP, as described below.

Eligibility. Generally, all of our employees will be eligible to participate if they are employed by us, or any participating subsidiary, for at least 20 hours per week and more than five months in any calendar year. However, an employee may not be granted rights to purchase shares of our Class A common stock under our ESPP if such employee:

- immediately after the grant would own capital stock possessing 5% or more of the total combined voting power or value of all classes of our capital stock; or
- holds rights to purchase shares of our Class A common stock under all of our employee stock purchase plans that accrue at a rate that exceeds \$25,000 worth of shares of our Class A common stock for each calendar year.

Offering Periods. Our ESPP includes a component that allows us to make offerings intended to qualify under Section 423 of the Code and a component that allows us to make offerings not intended to qualify under Section 423 of the Code to designated companies, as described in our ESPP. Our ESPP provides for 12-month offering periods. The offering periods are scheduled to start on the first trading day on or after March 20 and September 20 of each year, except that the first offering period will commence on the first trading day on or after the effective date of the registration statement of which this prospectus forms a part and will end on a date determined by the administrator and that the second offering period will commence on a date determined by the administrator. Each offering period will include purchase periods, which will be the approximately six-month period commencing with one exercise date and ending with the next exercise date.

Contributions. Our ESPP permits participants to purchase shares of our Class A common stock through payroll deductions of up to 15% of their eligible compensation. A participant may purchase a maximum of 1,000 shares of our Class A common stock during a purchase period.

Exercise of Purchase Right. Amounts deducted and accumulated by the participant are used to purchase shares of our Class A common stock at the end of each six-month purchase period. The purchase price of the shares will be 85% of the lower of the fair market value of our Class A common stock on the first trading day of each offering period or on the exercise date. Participants may end their participation at any time during an offering period and will be paid their accrued contributions that have not yet been used to purchase shares of our Class A common stock. Participation ends automatically upon termination of employment with us.

Non-Transferability. A participant may not transfer rights granted under our ESPP. If our compensation committee permits the transfer of rights, it may only be done by will, the laws of descent and distribution or as otherwise provided under our ESPP.

Merger or Change in Control. Our ESPP provides that in the event of a merger or change in control, as defined under our ESPP, a successor corporation may assume or substitute each outstanding purchase right. If the successor corporation refuses to assume or substitute for the outstanding purchase right, the offering period then in progress will be shortened, and a new exercise date will be set. The administrator will notify each participant that the exercise date has been changed and that the participant's option will be exercised automatically on the new exercise date unless prior to such date the participant has withdrawn from the offering period.

Amendment; Termination. The administrator has the authority to amend, suspend or terminate our ESPP, except that, subject to certain exceptions described in our ESPP, no such action may adversely affect any outstanding rights to purchase shares of our Class A common stock under our ESPP. Our ESPP automatically will terminate in 2036, unless we terminate it sooner.

2010 Stock Plan

Our board of directors adopted, and our stockholders approved, our 2010 Plan in June 2010.

Authorized Shares. Our 2010 Plan will be terminated in connection with this offering and, accordingly, no shares will be available for issuance under our 2010 Plan after that time. Our 2010 Plan will continue to govern outstanding awards granted thereunder. As of July 31, 2016, 55,766,371 shares of our Class B common stock were reserved for issuance under our 2010 Plan, which excludes an increase of 3,200,000 shares to the authorized shares approved after July 31, 2016. Our 2010 Plan provided for the grant of incentive stock options, nonstatutory stock options, restricted stock and RSUs. As of July 31, 2016, options to purchase 24,406,800 shares of our Class B common stock remained outstanding, and there were 12,265,369 RSUs outstanding.

Plan Administration. Our board of directors or one or more committees appointed by our board of directors administers our 2010 Plan. Following this offering, we anticipate that our compensation committee will administer our 2010 Plan. Subject to the provisions of our 2010 Plan, the administrator has the power to administer the plan, including but not limited to, the power to: determine the fair market value of our Class B common stock; select recipients of awards; determine shares covered by each award; approve form agreements under our 2010 Plan; determine the terms and conditions of awards; amend outstanding awards or any agreements related to such awards; determine when an option may be settled in cash; implement an option exchange program; in accordance with applicable laws, grant awards to non-U.S. recipients and modify the terms of such grants; and construe and interpret our 2010 Plan. The administrator may also at any time offer to buy out any option for a payment in cash or shares.

Stock Options. In general, the exercise price per share of all options equals at least 100% of the fair market value per share of our Class B common stock on the date of grant. The term of an option does not exceed 10 years. An incentive stock option held by a participant who owned more than 10% of the total combined voting power of all classes of our stock, or any parent or subsidiary corporations, does not have a term in excess of five years and has an exercise price of at least 110% of the fair market value per share of our Class B common stock on the date of grant. After the termination of service, the participant may generally exercise his or her option, to the extent vested, for three months following a termination in general (or such other time periods set forth in the option agreement). An option has longer exercisability if termination is on account of death or disability. If termination is for cause, the option will be immediately forfeited. However, in no event may an option be exercised later than the expiration of its term.

Restricted Stock. The administrator determined the number of shares of restricted stock granted to any participant and the terms and conditions of such awards. The administrator could impose whatever conditions to vesting it determines to be appropriate. Recipients of restricted stock awards generally have voting and dividend rights with respect to such shares upon grant without regard to vesting, unless the administrator provided otherwise. Shares of restricted stock that do not vest are subject to our right of repurchase or forfeiture.

Restricted Stock Units. RSUs may be granted under our 2010 Plan. RSUs are bookkeeping entries representing an amount equal to the fair market value of one share of our Class B common stock. Subject to the provisions of our 2010 Plan, the administrator will determine the terms and conditions of RSUs, including the vesting criteria, which may include accomplishing specified performance criteria or continued service to us, and the form and timing of payment. Notwithstanding the foregoing, the administrator, in its sole discretion, may accelerate the time at which any restrictions will lapse or be removed.

Non-Transferability. Our 2010 Plan generally does not allow for the transfer of options and only the recipient of an option may exercise such an award during his or her lifetime.

Certain Adjustments. In the event of certain changes in our capitalization without our receipt of consideration, the number and class of shares of our Class B common stock covered by each outstanding award, the exercise price per share of each outstanding award, any repurchase price per

share applicable to shares issued pursuant to any award and the number of any class of shares available for issuance under our 2010 Plan will be appropriately adjusted. In the event of our proposed liquidation or dissolution, all outstanding awards terminate immediately prior to such event.

Corporate Transaction. Our 2010 Plan provides that in the event of a corporate transaction (as defined in our 2010 Plan), which generally includes a merger, consolidation or sale of all or substantially all of our assets, each outstanding award will either be (i) assumed or substituted for an equivalent award or (ii) terminated in exchange for a payment for the vested and exercisable immediately prior to the corporate transaction portion of the award (less any exercise price for that portion of the award). In the event that the successor corporation does not agree to such assumption, substitution or exchange, the awards will terminate immediately prior to such event.

Amendment; Termination. Our board of directors may amend our 2010 Plan at any time, provided that such amendment generally may not materially and adversely affect the rights of any holder of outstanding awards without the award holder's consent. As noted above, in connection with this offering, our 2010 Plan will be terminated and no further awards will be granted thereunder. All outstanding awards will continue to be governed by their existing terms.

2011 Stock Plan

Our board of directors adopted, and our stockholders approved, our 2011 Plan in December 2011.

Authorized Shares. Our 2011 Plan will be terminated in connection with this offering and, accordingly, no shares will be available for issuance under our 2011 Plan after that time. Our 2011 Plan will continue to govern outstanding awards granted thereunder. As of July 31, 2016, 3,707,000 shares of our Class B common stock were reserved for issuance under our 2011 Plan. Our 2011 Plan provides for the grant of incentive stock options, nonstatutory stock options and restricted stock. As of July 31, 2016, options to purchase 1,760,168 shares of our Class B common stock remained outstanding.

Plan Administration. Our board of directors or one or more committees appointed by our board of directors administers our 2011 Plan. Following this offering, we anticipate that our compensation committee will administer our 2011 Plan. Subject to the provisions of our 2011 Plan, the administrator has the power to administer the plan, including but not limited to, the power to: determine the fair market value of our Class B common stock; select recipients of awards; determine shares covered by each award; approve form agreements under our 2011 Plan; determine the terms and conditions of awards; amend outstanding awards or any agreements related to such awards; determine when an option may be settled in cash; implement an option exchange program; in accordance with applicable laws, grant awards to non-U.S. recipients and modify the terms of such grants; and construe and interpret our 2011 Plan. The administrator may also at any time offer to buy out any option for a payment in cash or shares.

Stock Options. The exercise price per share of all options equals at least 100% of the fair market value per share of our Class B common stock on the date of grant. The term of an option does not exceed 10 years. An incentive stock option held by a participant who owned more than 10% of the total combined voting power of all classes of our stock, or any parent or subsidiary corporations, does not have a term in excess of five years and has an exercise price of at least 110% of the fair market value per share of our Class B common stock on the date of grant. After the termination of service, the participant may generally exercise his or her option, to the extent vested, for three months following a termination in general (or such other time periods set forth in the option agreement). An option has longer exercisability if termination is on account of death or disability. If termination is for cause, the option will be immediately forfeited. However, in no event may an option be exercised later than the expiration of its term.

[Table of Contents](#)

[Index to Financial Statements](#)

Restricted Stock. The administrator determined the number of shares of restricted stock granted to any participant and the terms and conditions of such awards. The administrator could impose whatever conditions to vesting it determines to be appropriate. Recipients of restricted stock awards generally have voting and dividend rights with respect to such shares upon grant without regard to vesting, unless the administrator provided otherwise. Shares of restricted stock that do not vest are subject to our right of repurchase or forfeiture.

Non-Transferability. Our 2011 Plan generally does not allow for the transfer of options and only the recipient of an option may exercise such an award during his or her lifetime.

Certain Adjustments. In the event of certain changes in our capitalization without our receipt of consideration, the number of shares of our Class B common stock covered by each outstanding award, the exercise price per share of each outstanding award, and the number of shares available for issuance under our 2011 Plan will be appropriately adjusted. In the event of our proposed liquidation or dissolution, all outstanding awards terminate immediately prior to such event.

Corporate Transaction. Our 2011 Plan provides that in the event of a corporate transaction (as defined in our 2011 Plan), which generally includes a merger, consolidation or sale of all or substantially all of our assets, each outstanding award will either be (i) assumed or substituted for an equivalent award or (ii) terminated in exchange for a payment for the vested portion of the award (less any exercise price for that portion of the award). In the event that the successor corporation does not agree to such assumption, substitution or exchange, the awards will terminate immediately prior to such event.

Amendment; Termination. Our board of directors may amend our 2011 Plan at any time, provided that such amendment generally may not materially and adversely affect the rights of any holder of outstanding awards without the award holder's consent. As noted above, in connection with this offering, our 2011 Plan will be terminated and no further awards will be granted thereunder. All outstanding awards will continue to be governed by their existing terms.

Executive Bonus Plan

Our board of directors adopted the Executive Incentive Compensation Plan, or the Executive Bonus Plan. Our Executive Bonus Plan will allow our compensation committee to provide incentive awards to employees selected by our compensation committee, including our named executive officers.

Under our Executive Bonus Plan, our compensation committee determines the performance goals (if any) applicable to any award or portion of an award. The performance goals include attainment of research and development milestones, billings, bookings, business divestitures and acquisitions, cash flow, cash position, contract awards or backlog, customer-related measures, customer retention rates, business unit or division, earnings (which may include any calculation of earnings, including but not limited to earnings before interest and taxes, earnings before taxes, earnings before interest, taxes, depreciation and amortization, earnings before taxes and net earnings), earnings per share, employee retention, employee mobility, expenses, geographic expansion, gross margin, growth in stockholder value relative to the moving average of the S&P 500 Index or another index, hiring targets, internal rate of return, inventory turns, inventory levels, market share, milestone achievements, net billings, net income, net profit, net revenue margin, net sales, new customers, new product development, new product invention or innovation, number of customers, operating cash flow, operating expenses, operating income, operating margin, origination volume, overhead or other expense reduction, penetration in Global 2000 accounts, product defect measures, product development, product release timelines, productivity, profit, return on assets, return on capital, return on equity, return on investment, return on sales, revenue, revenue growth, sales efficiency, sales results, sales growth, stock price, time to market, total stockholder return, units sold (total and

new), working capital, and individual objectives such as MBOs, peer reviews or other subjective or objective criteria. The performance goals may differ from participant to participant and from award to award.

Our compensation committee will administer our Executive Bonus Plan. The administrator of our Executive Bonus Plan may, in its sole discretion and at any time, increase, reduce or eliminate a participant's actual award, and/or increase, reduce or eliminate the amount allocated to the bonus pool for a particular performance period. The actual award may be below, at or above a participant's target award, in the discretion of the administrator. The administrator may determine the amount of any reduction on the basis of such factors as it deems relevant, and it is not required to establish any allocation or weighting with respect to the factors it considers.

Actual awards are paid in cash in a single lump sum only after they are earned, which usually requires continued employment through the last day of the performance period and the date the actual award is paid. If a participant terminates employment because of death or disability before the actual award is paid, the award may be paid to the participant's estate or to the participant, as applicable, subject to the administrator's discretion to reduce or eliminate the award.

Payment of awards occurs as soon as administratively practicable after they are earned, but no later than the dates set forth in our Executive Bonus Plan.

Our board of directors and our compensation committee have the authority to amend, alter, suspend or terminate our Executive Bonus Plan, provided such action does not impair the existing rights of any participant with respect to any earned awards.

401(k) Plan

We maintain a tax-qualified retirement plan, or our 401(k) plan, that provides eligible employees with an opportunity to save for retirement on a tax-advantaged basis. Participants are able to defer up their eligible compensation subject to applicable annual Internal Revenue Service limits. All participants' interests in their deferrals are 100% vested when contributed. Our 401(k) plan permits us to make matching contributions and discretionary contributions to eligible participants.

Limitation on Liability and Indemnification Matters

Our amended and restated certificate of incorporation and amended and restated bylaws, each to be effective upon the completion of this offering, will provide that we will indemnify our directors and officers and may indemnify our employees and other agents, to the fullest extent permitted by the Delaware General Corporation Law, which prohibits our amended and restated certificate of incorporation from limiting the liability of our directors for the following:

- any breach of the director's duty of loyalty to us or to our stockholders;
- acts or omissions not in good faith or that involve intentional misconduct or a knowing violation of law;
- unlawful payment of dividends or unlawful stock repurchases or redemptions; and
- any transaction from which the director derived an improper personal benefit.

If Delaware law is amended to authorize corporate action further eliminating or limiting the personal liability of a director, then the liability of our directors will be eliminated or limited to the fullest extent permitted by Delaware law, as so amended. Our amended and restated certificate of incorporation does not eliminate a director's duty of care and in appropriate circumstances, equitable remedies, such as

injunctive or other forms of non-monetary relief, remain available under Delaware law. This provision also does not affect a director's responsibilities under any other laws, such as the federal securities laws or other state or federal laws. Under our amended and restated bylaws, we will also be empowered to purchase insurance on behalf of any person whom we are required or permitted to indemnify.

In addition to the indemnification required in our amended and restated certificate of incorporation and amended and restated bylaws, we have entered into and expect to continue to enter into agreements to indemnify each of our current directors, officers and some employees. With specified exceptions, these agreements provide indemnification for certain expenses and liabilities incurred in connection with any action, suit, proceeding or alternative dispute resolution mechanism, or hearing, inquiry or investigation that may lead to the foregoing, to which they are a party, or are threatened to be made a party, by reason of the fact that they are or were a director, officer, employee, agent or fiduciary of our company, or any of our subsidiaries, by reason of any action or inaction by them while serving as an officer, director, agent, or fiduciary, or by reason of the fact that they were serving at our request as a director, officer, employee, agent or fiduciary of another entity. In the case of an action or proceeding by, or in the right of, our company or any of our subsidiaries, no indemnification will be provided for any claim where a court determines that the indemnified party is prohibited from receiving indemnification. Our directors who are affiliated with venture capital firms also have certain rights of indemnification provided by their venture capital funds and the affiliates of those funds (together, the Fund Indemnitors). We have agreed to indemnify the Fund Indemnitors to the extent of any claims asserted against the Fund Indemnitors that arise solely from the status or conduct of these directors in their capacity as directors of us, which indemnification arrangements terminate upon the completion of this offering. We believe that these bylaw provisions and indemnification agreements are necessary to attract and retain qualified persons as directors and officers. We also maintain directors' and officers' liability insurance.

The limitation of liability and indemnification provisions in our amended and restated certificate of incorporation and amended and restated bylaws may discourage stockholders from bringing a lawsuit against directors for breach of their fiduciary duties. They may also reduce the likelihood of derivative litigation against directors and officers, even though an action, if successful, might benefit us and our stockholders. A stockholder's investment may be harmed to the extent we pay the costs of settlement and damage awards against directors and officers pursuant to these indemnification provisions. Insofar as we may provide indemnification for liabilities arising under the Securities Act to our directors, officers and controlling persons pursuant to the foregoing provisions, or otherwise, we have been advised that, in the opinion of the SEC, such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. There is no pending litigation or proceeding naming any of our directors or officers as to which indemnification is being sought, nor are we aware of any pending or threatened litigation that may result in claims for indemnification by any director or officer.

CERTAIN RELATIONSHIPS AND RELATED-PARTY TRANSACTIONS

In addition to the executive officer and director compensation arrangements discussed above in the sections titled "Management" and "Executive Compensation," the following is a description of each transaction since August 1, 2013 and each currently proposed transaction in which:

- we have been or are to be a participant;
- the amounts involved exceeded or will exceed \$120,000; and
- any of our directors, executive officers or beneficial holders of more than 5% of any class of our capital stock, or entities affiliated with them, or any immediate family members of or person sharing the household with any of these individuals, had or will have a direct or indirect material interest.

Equity Financing Transactions**Series D Convertible Preferred Stock Financing**

In December 2013 and January 2014, we sold an aggregate of 13,857,438 shares of our Series D convertible preferred stock at a purchase price of \$7.2885 per share for an aggregate purchase price of approximately \$101.0 million. Each share of our Series D convertible preferred stock will convert automatically into one share of our Class B common stock upon completion of this offering. Purchasers of our Series D convertible preferred stock include venture capital funds that hold 5% or more of our capital stock or were represented on our board of directors. The following table summarizes the number of shares of our Series D convertible preferred stock and the total purchase price paid by these related persons:

<u>Name of Stockholder</u>	<u>Shares of Series D Convertible Preferred Stock</u>	<u>Total Purchase Price</u>
Entities affiliated with Khosla Ventures(1)	686,012	\$ 4,999,998
Entities affiliated with Lightspeed Venture Partners(2)(3)	686,011	4,999,991
Entities affiliated with Riverwood Capital Partners(4)	6,174,108	44,999,986

- (1) Entities affiliated with Khosla Ventures holding our securities whose shares are aggregated for purposes of reporting share ownership information Khosla Ventures IV (CF), L.P. and Khosla Ventures IV, L.P.
- (2) Entities affiliated with Lightspeed Venture Partners holding our securities whose shares are aggregated for purposes of reporting share ownership information Lightspeed Venture Partners VII, L.P. and Lightspeed Venture Partners VIII, L.P. Ravi Mhatre, a member of our board of directors, is affiliated with Lightspeed Venture Partners.
- (3) Bipul Sinha, a member of our board of directors, is currently affiliated with Lightspeed Venture Partners.
- (4) Entities affiliated with Riverwood Capital Partners holding our securities whose shares are aggregated for purposes of reporting share ownership information include Riverwood Capital Partners L.P., Riverwood Capital Partners (Parallel-A) L.P. and Riverwood Capital Partners (Parallel-B) L.P. Jeffrey T. Parks, a member of our board of directors, is affiliated with Riverwood Capital Partners.

Series E Convertible Preferred Stock Financing

In August and September 2014, we sold an aggregate of 10,823,724 shares of our Series E convertible preferred stock at a purchase price of \$13.3965 per share for an aggregate purchase price of approximately \$145.0 million. Each share of our Series E convertible preferred stock will convert automatically into one share of our Class B common stock upon completion of this offering. Purchasers of our Series E convertible preferred stock include certain affiliated funds that, in the aggregate, hold 5% or more of our capital stock. The following table summarizes the number of shares of our Series E convertible preferred stock and the total purchase price paid by these related persons:

<u>Name of Stockholder</u>	<u>Shares of Series E Convertible Preferred Stock</u>	<u>Total Purchase Price</u>
Entities affiliated with Fidelity(1)	7,464,637	\$100,000,010

(1) Entities affiliated with Fidelity holding our securities whose shares are aggregated for purposes of reporting share ownership information include 16 accounts managed by direct or indirect subsidiaries of FMR LLC.

Transactions with Directors and Officers

We have contracted with Garnish Events, LLC, or Garnish, to plan and manage various conferences and other corporate events organized by us. Emily Ward is a co-founder of Garnish and is the spouse of Howard Ting, our Chief Marketing Officer. We pay Garnish a fee for their event planning services and reimburse any out-of-pocket costs incurred by them during the course of providing these services. In addition, to the extent that the events being planned involve hotel reservations, we enter into contracts with the hotel for room blocks and conference room reservations, and Garnish earns a commission from the hotels based on the value of the rooms reserved by us for the event, and the fees we pay to Garnish for their services in part assumes that they receive these commissions and are subject to adjustment if they do not. In fiscal 2013, for the events that Garnish helped plan, we paid Garnish a total of approximately \$11,000 in fees and reimbursements for their event planning services. In addition, Garnish earned a total of approximately \$3,000 in commissions from hotel reservations. In fiscal 2014, for the events that Garnish helped plan, we paid Garnish a total of approximately \$82,000 in fees and reimbursements for their event planning services. In addition, we paid an aggregate of approximately \$782,000 in hotel fees for the events that occurred during fiscal 2014, in connection with which Garnish earned a total of approximately \$49,000 in commissions. In fiscal 2015, we incurred or paid Garnish a total of approximately \$138,000 in fees and reimbursements for their event planning services. In addition, we have paid an aggregate of approximately \$1,095,000 in hotel fees for the events that occurred in fiscal 2015, in connection with which Garnish earned a total of approximately \$173,000 in commissions. We ceased using Garnish's services in September 2015.

From time to time in the ordinary course of business, on an arm's length basis, we sell our products and support services to distributors in transactions in which F5 Networks, Inc., or F5, is the end-customer. John McAdam, a member of our board of director since August 2015, has also served as a member of F5's board of directors since July 2000. Mr. McAdam also served as the President and Chief Executive officer of F5 from July 2000 until his retirement in July 2015, and was re-appointed in December 2015. For sales to F5 that have occurred since August 2015, when Mr. McAdam was first appointed to our board of directors, we have received approximately \$247,000, of which approximately \$199,000 was received by us after Mr. McAdam's re-appointment as the Chief Executive Officer of F5 in December 2015. In addition, F5 is our technology partner and a member of our Elevate Technology Alliance Program, and we and F5 engage in joint marketing and other alliance activities, including serving as sponsors in each company's user conferences. The amounts involved in these activities are not material. Mr. McAdam has not participated in any of discussions regarding the sale transactions or the alliance activities, and has no material interest in these transactions other than in his role as the Chief Executive Officer and a director of F5.

On September 6, 2016, we completed the acquisition of PernixData, Inc. for 1,711,019 shares of our Class B common stock and contingent consideration of up to \$7.5 million in cash, which may be payable over the next three years upon the achievement of certain operating milestones. Entities affiliated with Lightspeed Venture Partners, including Lightspeed Venture Partners VIII, L.P., or Lightspeed VIII, collectively owned approximately 26.4% of the outstanding capital stock of PernixData immediately prior to the completion of the acquisition, and received 625,478 shares of our Class B common stock in the transaction (of which 435,115 were received by Lightspeed VIII), as well as the right to receive up to approximately \$2.7 million in cash in the event the contingent consideration becomes payable. As of July 31, 2016, entities affiliated with Lightspeed Venture Partners, collectively, beneficially owned approximately 23% of our Class B common stock, of which approximately 14% was beneficially owned by Lightspeed VIII. Bipul Sinha, a member of our board of directors, was also a director of PernixData and is affiliated with Lightspeed Venture Partners, but did not receive any

financial benefit from the transaction other than through his affiliation with Lightspeed Venture Partners. Ravi Mhatre, a member of our board of directors, is affiliated with Lightspeed Venture Partners, and shares voting and dispositive power with respect to shares held by the Lightspeed entities that held shares in PernixData, as well as the Lightspeed entities that held shares of our Class B common stock prior to the acquisition, and did not otherwise receive any financial benefit from the transaction. Messrs. Mhatre and Sinha recused themselves from discussions between the companies and all deliberations of our board of directors regarding the acquisition.

Stock Option Grants to Executive Officers and Directors

We have granted stock options and RSUs to our named executive officers and three of our non-employee directors. For a description of these options, see the sections titled “Executive Compensation—Outstanding Equity Awards at Fiscal 2016 Year-End” and “Management—Non-Employee Director Compensation.”

Offer Letters

We have entered into offer letters and other arrangements containing compensation, termination and change of control provisions, among others, with certain of our executive officers as described under the caption “Executive Compensation—Named Executive Officer Employment Arrangements.”

Additionally, we have entered into an offer letter with board member Michael P. Scarpelli. Our agreement with Mr. Scarpelli provides that he will be granted a stock option to purchase 275,000 shares of our Class B common stock under our 2010 Plan, which grant was made in fiscal 2014, and is entitled to an annual retainer of \$20,000, which is payable in quarterly installments.

Additionally, we have entered into an offer letter with board member John McAdam. Our agreement with Mr. McAdam provides that he will be granted an RSU for 85,000 shares of our Class B common stock under our 2010 Plan, which grant was made in fiscal 2016.

Amended and Restated Investors’ Rights Agreement

We entered into an amended and restated investors’ rights agreement with the holders of our convertible preferred stock, including entities affiliated with each of Khosla Ventures, Lightspeed Venture Partners, Blumberg Capital II, L.P., Fidelity and Riverwood Capital Partners which each hold 5% or more of our capital stock or of which certain of our directors are affiliated. This agreement provides, among other things, that the holders of our preferred stock have the right to request that we file a registration statement or request that their shares be covered by a registration statement that we are otherwise filing, subject to certain exceptions. For a description of these registration rights, see the section titled “Description of Capital Stock—Registration Rights.”

Indemnification Agreements

We have entered or will enter into indemnification agreements with each of our directors and executive officers. The indemnification agreements and our certificate of incorporation and bylaws require us to indemnify our directors and officers to the fullest extent permitted by Delaware law. For more information regarding these agreements, see the section titled “Executive Compensation—Limitation on Liability and Indemnification Matters.”

Policies and Procedures for Related-Party Transactions

Effective upon the completion of this offering, we will have a formal written policy providing that our executive officers, directors, nominees for election as directors, beneficial owners of more than 5% of any class of our common stock and any member of the immediate family of any of the foregoing persons, is not permitted to enter into a related-party transaction with us without the consent of our audit committee, subject to the exceptions described below.

In approving or rejecting any such proposal, our audit committee is to consider the relevant facts and circumstances available and deemed relevant to our audit committee, including, whether the transaction is on terms no less favorable than terms generally available to an unaffiliated third party under the same or similar circumstances, and the extent of the related party's interest in the transaction. Our audit committee has determined that certain transactions will not require audit committee approval, including certain employment arrangements of executive officers, director compensation, transactions with another company at which a related party's only relationship is as a non-executive employee, director or beneficial owner of less than 10% of that company's shares and the aggregate amount involved does not exceed \$120,000 in any fiscal year, transactions where a related party's interest arises solely from the ownership of our common stock and all holders of our common stock received the same benefit on a pro rata basis and transactions available to all employees generally.

We believe that we have executed all of the transactions set forth above on terms no less favorable to us than we could have obtained from unaffiliated third parties. It is our intention to ensure that all future transactions between us and our officers, directors and principal stockholders and their affiliates, are approved by the audit committee of our board of directors and are on terms no less favorable to us than those that we could obtain from unaffiliated third parties.

PRINCIPAL STOCKHOLDERS

The following table sets forth certain information with respect to the beneficial ownership of our Class A and Class B common stock as of August 31, 2016, after giving effect to the automatic conversion of all outstanding shares of our convertible preferred stock into shares of Class B common stock, and as adjusted to reflect the sale of Class A common stock in this offering, for:

- each person, or group of affiliated persons, who beneficially owned more than 5% of our Class A and Class B common stock;
- each of our named executive officers;
- each of our current directors; and
- all of our executive officers and directors as a group.

We have determined beneficial ownership in accordance with the rules of the SEC, and the information is not necessarily indicative of beneficial ownership for any other purpose. Except as indicated by the footnotes below, we believe, based on information furnished to us, that the persons and entities named in the table below have sole voting and sole investment power with respect to all shares of Class A and Class B common stock that they beneficially owned, subject to applicable community property laws.

Applicable percentage ownership prior to this offering is based on no shares of Class A common stock outstanding and 123,253,323 shares of Class B common stock outstanding as of August 31, 2016, after giving effect to the automatic conversion of all outstanding shares of preferred stock into an aggregate of 76,319,511 shares of our Class B common stock. Applicable percentage ownership after this offering assumes that 14,000,000 shares of our Class A common stock will be issued by us in this offering and that the underwriters will not exercise their option to purchase additional shares. In computing the number of shares of Class A and Class B common stock beneficially owned by a person and the percentage ownership of that person, we deemed to be outstanding all shares of Class A and Class B common stock subject to equity awards held by that person or entity that are currently exercisable or that will become exercisable within 60 days of August 31, 2016. We did not deem these shares outstanding, however, for the purpose of computing the percentage ownership of any other person.

Unless otherwise indicated, the address of each beneficial owner listed in the table below is c/o Nutanix, Inc., 1740 Technology Drive, Suite 150, San Jose, California 95110.

- (1) Consists of (i) 10,352,222 shares held of record by Lightspeed Venture Partners VII, L.P., or Lightspeed VII, and (ii) 17,626,757 shares held of record by Lightspeed Venture Partners VIII, L.P., or Lightspeed VIII. Lightspeed Ultimate General Partner VII, Ltd., or LUGP VII, is the sole general partner of Lightspeed General Partner VII, L.P., or LGP VII, which serves as the sole general partner of Lightspeed VII. Lightspeed Ultimate General Partner VIII, Ltd., or LUGP VIII, is the sole general partner of Lightspeed General Partner VIII, L.P., or LGP VIII, which serves as the sole general partner of Lightspeed VIII. Barry Eggers, Ravi Mhatre, Peter Y. Nieh and Christopher J. Schaepe, the directors of LUGP VII and LUGP VIII, share voting and dispositive power with respect to the shares held of record by Lightspeed VII and Lightspeed VIII. The address for each of these entities is 2200 Sand Hill Road, Menlo Park, California 94025. Excludes 625,478 shares which were issued to Lightspeed entities after August 31, 2016, in connection with the acquisition of Pernix, which consists of (i) 190,363 shares held of record Lightspeed Venture Partners Select, L.P., and (ii) 435,115 shares of record held by Lightspeed VIII. Please see the section titled "Certain Relationships and Related-Party Transactions" for additional information.
 - (2) Consists of (i) 797,640 shares held of record by Khosla Ventures IV (CF), L.P., or KV IV CF, and (ii) 12,476,420 shares held of record by Khosla Ventures IV, L.P., or KV IV LP. The general partner of KV IV CF and KV IV LP is Khosla Ventures Associates IV, LLC, or KVA IV. VK Services, LLC is the sole manager of KVA IV. Vinod Khosla is the managing member of VK Services, LLC. Each of Mr. Khosla, VK Services, LLC and KVA IV may be deemed to share voting and dispositive power over the shares held by KV IV CF and KV IV LP. The address for each of these entities is 2128 Sand Hill Road, Menlo Park, California 94025.
 - (3) Consists of (i) 6,870,514 shares held of record by Mohit Aron and (ii) 3,879,010 shares held of record by The 2009 Aron Family Dynasty Trust, for the benefit of the minor children of Dr. Aron. The trustee is North Point Trust, a corporate trustee, whose address is 333 West Boulevard, Suite 400, P.O. Box 1421, Rapid City, South Dakota 57709.
 - (4) Consists of (i) 6,296,361 shares held of record by Blumberg Capital II, L.P., or Blumberg II LP, and (ii) 700,734 shares issuable upon exercise of warrants held of record by Blumberg II LP. David J. Blumberg, the managing member of Blumberg Capital Management II, L.L.C., the general partner of Blumberg II LP, has sole voting and dispositive power with respect to the shares held of record by Blumberg II LP. The address for each of these entities is 501 Folsom Street, Suite 400, San Francisco, California 94105.
 - (5) Consists of 7,464,637 shares held of record by 16 accounts managed by direct or indirect subsidiaries of FMR LLC. Edward C. Johnson III is a Director and the Chairman of FMR LLC and Abigail P. Johnson is a Director, the Vice Chairman and the President of FMR LLC and shares voting and dispositive power with respect to all shares held by such entities. Members of the family of Edward C. Johnson III, including Abigail P. Johnson, are the predominant owners, directly or through trusts, of Series B voting common shares of FMR LLC, representing 49% of the voting power of FMR LLC. The Johnson family group and all other Series B shareholders have entered into a shareholders' voting agreement under which all Series B voting common shares will be voted in accordance with the majority vote of Series B voting common shares. Accordingly, through their ownership of voting common shares and the execution of the shareholders' voting agreement, members of the Johnson family may be deemed, under the Investment Company Act of 1940, as amended, or Investment Company Act, to form a controlling group with respect to FMR LLC. Neither FMR LLC nor Edward C. Johnson III nor Abigail P. Johnson has the sole power to vote or direct the voting of the shares owned directly by the various investment companies registered under the Investment Company Act, or Fidelity Funds, advised by Fidelity Management & Research Company, or FMR Co, a wholly-owned subsidiary of FMR LLC, which power resides with the Fidelity Funds' Boards of Trustees. FMR Co carries out the voting of the shares under written guidelines established by the Fidelity Funds' Boards of Trustees. The address for FMR LLC is 245 Summer Street, V13H, Boston, Massachusetts 02110.
 - (6) Consists of (i) 3,531,179 shares held of record by Riverwood Capital Partners L.P., (ii) 1,217,430 shares held of record by Riverwood Capital Partners (Parallel-A) L.P. and (iii) 1,425,499 shares held of record by Riverwood Capital Partners (Parallel-B) L.P., collectively, the Riverwood Entities. Riverwood Capital, LP is the general partner of the Riverwood Entities.

[Table of Contents](#)

[Index to Financial Statements](#)

The general partner of Riverwood Capital, LP is Riverwood Capital GP Ltd. Riverwood Capital, LP and Riverwood Capital GP Ltd. may be deemed to have shared voting and dispositive power over, and be deemed to be indirect beneficial owners of, shares directly held by the Riverwood Entities. All investment decisions with respect to the shares held by the Riverwood Entities are made by a majority vote of a six-member investment committee, comprised of Michael Marks, Christopher P. Varelas, Nicholas Brathwaite, Thomas Smach, Francisco Alvarez-Demalde and Jeffrey T. Parks. All voting decisions over the shares held by the Riverwood Entities are made by a majority vote of Riverwood Capital GP Ltd.'s eleven shareholders. Accordingly, no single natural person controls investment or voting decisions with respect to the shares held by the Riverwood Entities. The address for each of these entities is c/o Riverwood Capital Management, 70 Willow Road, Suite 100, Menlo Park, California 94025.

- (7) Consists of (i) 6,756,592 shares held of record by The Pandey Revocable Trust for which Mr. Pandey and Mr. Pandey's spouse serve as trustees, (ii) 2,500,000 shares held of record by The Pandey Irrevocable Descendants' Trust for which Mr. Pandey's spouse serves as trustee, (iii) 500,000 shares held of record by The Swapna Pandey 2014 Irrevocable Descendant's Trust for which Mr. Pandey serves as trustee, and (iv) 1,591,000 shares subject to options exercisable within 60 days of June 30, 2016, all of which are vested as of such date. Excludes 600,000 RSUs which vest subject to time-based and performance-based vesting conditions that will not be satisfied within 60 days of August 31, 2016.
- (8) Consists of (i) 180,000 shares held of record by The Sudheesh Vadakkedath 2015 GRAT dated November 21, 2015 for which Mr. Vadakkedath serves as trustee, (ii) 327,500 shares held by Mr. Vadakkedath, of which 1,042 shares are subject to repurchase upon the occurrence of certain events, and (iii) 1,310,000 shares subject to options exercisable within 60 days of August 31, 2016, 935,000 of which are vested as of such date. Excludes 800,000 RSUs which vest subject to time-based and performance-based vesting conditions that will not be satisfied within 60 days of August 31, 2016.
- (9) Excludes 1,050,000 RSUs which vest subject to time-based and performance-based vesting conditions that will not be satisfied within 60 days of August 31, 2016.
- (10) Excludes 85,000 RSUs which vest subject to time-based and performance-based vesting conditions that will not be satisfied within 60 days of August 31, 2016.
- (11) Excludes 85,000 RSUs which vest subject to time-based and performance-based vesting conditions that will not be satisfied within 60 days of August 31, 2016.
- (12) Consists of the shares listed in footnote (1) above, which are held of record by entities affiliated with Lightspeed Venture Partners.
- (13) Consists of shares listed in footnote (6) above, which are held by the Riverwood Entities.
- (14) Consists of 275,000 shares subject to options exercisable within 60 days of August 31, 2016, 194,791 of which are vested as of such date.
- (15) Consists of (i) 45,134,179 shares beneficially owned by our executive officers and directors, 45,133,137 of which are vested within 60 days of August 31, 2016 and no longer subject to our right of repurchase as of such date and (ii) 6,189,000 shares subject to options exercisable within 60 days of August 31, 2016, 4,330,455 of which are vested as of such date. Excludes 2,975,000 RSUs which vest subject to time-based and performance-based vesting conditions that will not be satisfied within 60 days of August 31, 2016.

DESCRIPTION OF CAPITAL STOCK

General

The following is a summary of the rights of our Class A and Class B common stock and preferred stock and certain provisions of our amended and restated certificate of incorporation and amended and restated bylaws as they will be in effect immediately prior to the completion of this offering. This summary does not purport to be complete and is qualified in its entirety by the provisions of our amended and restated certificate of incorporation and amended and restated bylaws, copies of which have been filed as exhibits to the registration statement of which this prospectus is a part.

Immediately following the completion of this offering, our authorized capital stock will consist of 1,400,000,000 shares, with a par value of \$0.000025 per share, of which:

- 1,000,000,000 shares are designated as Class A common stock;
- 200,000,000 shares are designated as Class B common stock; and
- 200,000,000 shares are designated as preferred stock.

Our board of directors is authorized, without stockholder approval, except as required by the listing standards of the NASDAQ Stock Market, to issue additional shares of our capital stock.

As of July 31, 2016, we had no outstanding shares of Class A common stock, 122,403,162 shares of Class B common stock outstanding, held by approximately 591 stockholders of record, and no shares of preferred stock outstanding, assuming the automatic conversion of all outstanding shares of our convertible preferred stock into Class B common stock effective immediately prior to the completion of this offering.

Class A and Class B Common Stock

Prior to the completion of this offering, we had one class of common stock. Upon completion of this offering, we will have authorized a new class of Class A common stock and a new class of Class B common stock. All currently outstanding shares of common stock, convertible preferred stock, and warrants exercisable for convertible preferred stock will be reclassified into shares of Class B common stock. In addition, all currently outstanding stock options and RSUs will become eligible to be settled in or exercisable for shares of our new Class B common stock.

Voting Rights

Holders of our Class A common stock and Class B common stock have identical rights, provided however that, except as otherwise expressly provided in our certificate of incorporation or required by applicable law, on any matter that is submitted to a vote of our stockholders, holders of Class A common stock are entitled to one vote per share of Class A common stock and holders of Class B common stock are entitled to 10 votes per share of Class B common stock. Holders of shares of Class A common stock and Class B common stock vote together as a single class on all matters (including the election of directors) submitted to a vote of stockholders, unless otherwise required by Delaware law or our amended and restated certificate of incorporation. Delaware law could require either holders of our Class A common stock or Class B common stock to vote separately as a single class in the following circumstances:

- if we were to seek to amend our amended and restated certificate of incorporation to increase or decrease the par value of a class of our capital stock, then that class would be required to vote separately to approve the proposed amendment; and

- if we were to seek to amend our amended and restated certificate of incorporation in a manner that alters or changes the powers, preferences or special rights of a class of our capital stock in a manner that affected its holders adversely, then that class would be required to vote separately to approve the proposed amendment.

Under our certificate of incorporation, we may not issue any shares of Class B common stock, other than upon exercise of options, warrants, or similar rights to acquire common stock outstanding immediately prior to the completion of the offering and in connection with stock dividends or settlement of RSUs and similar transactions, unless that issuance is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class B common stock.

We have not provided for cumulative voting for the election of directors in our certificate of incorporation. Our amended and restated certificate of incorporation and amended and restated bylaws provide for a classified board of directors consisting of three classes of approximately equal size, each class serving staggered three-year terms. Only one will be elected at each annual meeting of our stockholders, with the other classes continuing for the remainder of their respective three-year terms.

No Preemptive or Similar Rights

Our common stock is not entitled to preemptive rights and is not subject to conversion, redemption or sinking fund provisions.

Economic Rights

Except as otherwise expressly provided in our certificate of incorporation or required by applicable law, shares of Class A common stock and Class B common stock have the same rights and privileges and rank equally, share ratably and are identical in all respects as to all matters, including, without limitation those described below.

Dividends and Distributions

Subject to preferences that may apply to any shares of preferred stock outstanding at the time, the holders of Class A common stock and Class B common stock are entitled to share equally, identically and ratably, on a per share basis, with respect to any dividend or distribution of cash, property or shares of our capital stock paid or distributed by us, unless different treatment of the shares of each such class is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and Class B common stock, each voting separately as a class. In the event a dividend or distribution is paid in the form of shares of Class A common stock or Class B common stock or rights to acquire shares of such stock, the holders of Class A common stock shall receive Class A common stock, or rights to acquire Class A common stock, as the case may be, and the holders of Class B common stock shall receive Class B common stock, or rights to acquire Class B common stock, as the case may be.

Liquidation Rights

Upon our liquidation, dissolution or winding-up, the holders of Class A common stock and Class B common stock are entitled to share equally, identically and ratably in all assets remaining after the payment of any liabilities and the liquidation preferences and any accrued or declared but unpaid dividends, if any, with respect to any outstanding preferred stock, unless different treatment of the shares of each class is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and Class B common stock, each voting separately as a class.

Change of Control Transactions

Upon (A) the closing of the sale, transfer or other disposition of all or substantially all of our assets, (B) the consummation of a merger, reorganization, consolidation or share transfer which results in our voting securities outstanding immediately prior to the transaction (or the voting securities issued with respect to our voting securities outstanding immediately prior to the transaction) representing less than a majority of the combined voting power of our voting securities or the voting securities of the surviving or acquiring entity, (C) the closing of the transfer (whether by merger, consolidation or otherwise), in one transaction or a series of related transactions, to a person or group of affiliated persons of securities of the company if, after closing, the transferee person or group would hold 50% or more of our outstanding voting stock (or the outstanding voting stock of the surviving or acquiring entity), (D) any voluntary or involuntary liquidation, dissolution or winding-up, or (E) the issuance by us of voting securities representing more than 2% of our total voting power to a person who held 50% or less of our total voting power immediately prior to such transaction and who following such transaction holds more than 50% of our total voting power, the holders of Class A common stock and Class B common stock will be treated equally and identically with respect to shares of Class A common Stock or Class B common stock owned by them, unless different treatment of the shares of each class is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and Class B common stock, each voting separately as a class.

Subdivisions and Combinations

If we subdivide or combine in any manner outstanding shares of Class A common stock or Class B common stock, the outstanding shares of the other class will be subdivided or combined in the same manner, unless different treatment of the shares of each class is approved by the affirmative vote of the holders of a majority of the outstanding shares of Class A common stock and Class B common stock, each voting as a separate class.

Conversion

Each share of Class B common stock is convertible at any time at the option of the holder into one share of Class A common stock. In addition, each share of Class B common stock will convert automatically into one share of Class A common stock upon (i) the date specified by affirmative vote, written consent of the holders of at least 67% of the outstanding shares of Class B common stock or (ii) any transfer, whether or not for value, except for certain transfers described in our certificate of incorporation, including, without limitation, transfers for tax and estate planning purposes, so long as the transferring holder of Class B common stock continues to hold exclusive voting and dispositive power with respect to the shares transferred, or (iii) on the 17 year anniversary of the closing date of this offering.

Upon the death of a holder of Class B common stock who is a natural person, the Class B common stock held by that person or his or her permitted estate planning entities will convert automatically into Class A common stock.

Once transferred and converted into Class A common stock, the Class B common stock will not be reissued. Following the conversion of all outstanding shares of our Class A common stock and Class B common stock into a single class of common stock, no further shares of our Class A common stock or our Class B common stock will be issued.

Preferred Stock

After the completion of this offering, no shares of preferred stock will be outstanding. Pursuant to our amended and restated certificate of incorporation, our board of directors will have the authority, without further action by the stockholders, to issue from time to time up to 200,000,000 shares of

preferred stock in one or more series. Our board of directors may designate the rights, preferences, privileges and restrictions of the preferred stock, including dividend rights, conversion rights, voting rights, redemption rights, liquidation preference, sinking fund terms and the number of shares constituting any series or the designation of any series. The issuance of preferred stock could have the effect of restricting dividends on the Class A and Class B common stock, diluting the voting power of the Class A and Class B common stock, impairing the liquidation rights of the Class A and Class B common stock or delaying, deterring or preventing a change in control. Such issuance could have the effect of decreasing the market price of the Class A and Class B common stock. We currently have no plans to issue any shares of preferred stock.

Option Awards and RSUs

As of July 31, 2016, we had outstanding options to purchase an aggregate of 26,166,968 shares of our Class B common stock pursuant to our 2010 Plan and 2011 Plan, with a weighted-average exercise price of \$4.39.

As of July 31, 2016, we had outstanding 12,265,369 shares of our Class B common stock issuable upon the vesting and settlement of RSUs pursuant to our 2010 Plan.

Warrants

As of July 31, 2016, we had outstanding warrants to purchase an aggregate of 824,094 shares of our Class B common stock, with a weighted-average exercise price of \$0.70 per share, of which warrants to purchase an aggregate of 814,094 shares of our Class B common stock have a net exercise provision pursuant to which the holder may, in lieu of payment of the exercise price in cash, surrender the warrant and receive a net amount of shares based on the fair market value of our Class B common stock, as applicable, at the time of exercise of the warrant after deduction of the aggregate exercise price. The warrants also contain provisions for the adjustment of the exercise price and the number of shares issuable upon the exercise of the warrant in the event of certain stock dividends, stock splits, reorganizations, reclassifications and consolidations. The holders of the shares issuable upon exercise of our warrants are entitled to registration rights with respect to such shares as described in greater detail below under the section titled “—Registration Rights.”

Registration Rights

We will pay the registration expenses (other than underwriting discounts, selling commissions and stock transfer taxes) of the holders of the shares registered pursuant to the registrations described below. In an underwritten offering, the managing underwriter, if any, has the right, subject to specified conditions, to limit the number of shares such holders may include. In connection with the completion of this offering, each stockholder that has registration rights agreed not to sell or otherwise dispose of any securities without the prior written consent of Goldman, Sachs & Co. and Morgan Stanley & Co. LLC for a period of 180 days after the date of this prospectus, subject to certain terms and conditions. See the section titled “Underwriting” for additional information.

The holders of shares of our convertible preferred stock or their permitted transferees are entitled to certain registration rights with respect to the registration of certain shares of our capital stock under the Securities Act. These rights are provided under the terms of our amended and restated investors' rights agreement between us and holders of these shares, which was entered into in connection with our convertible preferred stock financings, and include demand registration rights, Form S-3 registration rights and piggyback registration rights. In any registration made pursuant to such rights

agreement, all fees, costs and expenses of underwritten registrations, including the reasonable fees of one counsel for the selling stockholders selected by them (not to exceed \$20,000) will be borne by us and all selling expenses, including estimated underwriting discounts and selling commissions, will be borne by the holders of the shares being registered.

The registration rights terminate upon the earlier to occur of (i) five years following the completion of this offering, (ii) with respect to any particular stockholder, at such time that such stockholder can sell all of its shares during any three month period pursuant to Rule 144 of the Securities Act, or (iii) upon termination of the amended and restated investors' rights agreement.

Demand Registration Rights

The holders of an aggregate of 74,906,047 shares of our Class B common stock following this offering (assuming automatic conversion of all outstanding shares of our convertible preferred stock into shares of Class B common stock immediately prior to the completion of this offering), or their permitted transferees, are entitled to demand registration rights. At any time after the earlier of (i) August 26, 2016 or (ii) six months after the effective date of this offering, the holders of at least a majority of the then outstanding shares that are entitled to registration rights under the amended and restated investors' rights agreement can request that we register the offer and sale of their shares, provided that such registration of shares would result in an anticipated aggregate price to the public of at least \$5 million. We are required to effect only two registrations pursuant to this provision of the amended and restated investors' rights agreement. Depending on certain conditions, however, we may defer such registration for up to 120 days one time in a 12-month period. We are not required to effect a requested registration earlier than 180 days after the effective date of this offering.

Piggyback Registration Rights

If we register any of our securities for public sale, the holders of an aggregate of 74,906,047 shares of our Class B common stock following this offering (assuming automatic conversion of all outstanding shares of our convertible preferred stock into shares of Class B common stock immediately prior to the completion of this offering) or their permitted transferees are entitled to piggyback registration rights. If we register any of our securities under the Securities Act, subject to certain exceptions, the holders of these shares will be entitled to notice of the registration and to include their registrable securities in the registration. The underwriters of any underwritten offering have the right to limit the number of shares registered by these holders for marketing reasons, subject to limitations as set forth in the amended and restated investors' rights agreement.

Form S-3 Registration Rights

The holders of an aggregate of 74,906,047 shares of our Class B common stock following this offering (assuming automatic conversion of all outstanding shares of our convertible preferred stock into shares of Class B common stock immediately prior to the completion of this offering) or their permitted transferees are also entitled to Form S-3 registration rights. If we are eligible to file a registration statement on Form S-3, these holders have the right, upon written request from holders of these shares, to have such shares registered by us if the proposed aggregate offering price of the shares to be registered by the holders requesting registration is at least \$3 million, subject to exceptions set forth in the amended and restated investors' rights agreement.

Anti-Takeover Effects of Delaware Law and Our Certificate of Incorporation and Bylaws

Our amended and restated certificate of incorporation and amended and restated bylaws to be effective immediately prior to the completion of this offering will contain provisions that could have the effect of delaying, deferring or discouraging another party from acquiring control of us. These

provisions and certain provisions of Delaware law, which are summarized below, could discourage takeovers, coercive or otherwise. These provisions are also designed, in part, to encourage persons seeking to acquire control of us to negotiate first with our board of directors. We believe that the benefits of increased protection of our potential ability to negotiate with an unfriendly or unsolicited acquirer outweigh the disadvantages of discouraging a proposal to acquire us.

Dual Class Stock. As described above in “—Class A and Class B Common Stock—Voting Rights,” our amended and restated certificate of incorporation provides for a dual class common stock structure, which will provide our pre-offering investors and our executive officers, employees, directors and their affiliates with significant influence over all matters requiring stockholder approval, including the election of directors and significant corporate transactions, such as a merger or other sale of our company or its assets.

Issuance of Undesignated Preferred Stock. As discussed above under “—Preferred Stock,” our board of directors will have the ability to designate and issue preferred stock with voting or other rights or preferences that could deter hostile takeovers or delay changes in our control or management.

Limits on Ability of Stockholders to Act by Written Consent or Call a Special Meeting. Our amended and restated certificate of incorporation will provide that, upon the conversion of our Class A common stock and Class B common stock into a single class of common stock, our stockholders may not act by written consent. This limit on the ability of stockholders to act by written consent may lengthen the amount of time required to take stockholder actions. As a result, the holders of a majority of our capital stock would not be able to amend the amended and restated bylaws or remove directors without holding a meeting of stockholders called in accordance with the amended and restated bylaws.

In addition, our amended and restated bylaws will provide that special meetings of the stockholders may be called only by the chief executive officer, the president (in the absence of a chief executive officer), the lead independent director or a majority of our board of directors. A stockholder may not call a special meeting, which may delay the ability of our stockholders to force consideration of a proposal or for holders controlling a majority of our capital stock to take any action, including the removal of directors.

Advance Requirements for Advance Notification of Stockholder Nominations and Proposals. Our amended and restated bylaws will establish advance notice procedures with respect to stockholder proposals and the nomination of candidates for election as directors, other than nominations made by or at the direction of our board of directors or a committee of the board of directors. These advance notice procedures may have the effect of precluding the conduct of certain business at a meeting if the proper procedures are not followed and may also discourage or deter a potential acquirer from conducting a solicitation of proxies to elect its own slate of directors or otherwise attempt to obtain control of our company.

Board Classification. Our amended and restated certificate of incorporation provides that our board of directors will be divided into three classes, one class of which is elected each year by our stockholders. The directors in each class will serve for a three-year term. For more information on the classified board of directors, see the titled section “Management—Board Composition.” Our classified board of directors may tend to discourage a third party from making a tender offer or otherwise attempting to obtain control of us because it generally makes it more difficult for stockholders to replace a majority of the directors.

Election and Removal of Directors. Our amended and restated certificate of incorporation and amended and restated bylaws contain provisions that establish specific procedures for appointing and removing members of our board of directors. Under our amended and restated certificate of

incorporation and amended and restated bylaws, upon the conversion of our Class A common stock and Class B common stock into a single class of common stock, vacancies and newly created directorships on our board of directors may be filled only by a majority of the directors then serving on our board of directors. Under our amended and restated certificate of incorporation and amended and restated bylaws, directors may be removed only for cause and, in addition to any other vote required by law, upon the affirmative vote of the holders of at least two-thirds of the shares then entitled to vote at an election of directors.

No Cumulative Voting. The Delaware General Corporation Law provides that stockholders are not entitled to the right to cumulate votes in the election of directors unless our amended and restated certificate of incorporation provides otherwise. Our amended and restated certificate of incorporation and amended and restated bylaws do not expressly provide for cumulative voting. Without cumulative voting, a minority stockholder may not be able to gain as many seats on our board of directors as the stockholder would be able to gain if cumulative voting were permitted. The absence of cumulative voting makes it more difficult for a minority stockholder to gain a seat on our board of directors to influence our board of directors' decision regarding a takeover.

Amendment of Charter Provision. Any amendment of the above provisions in our amended and restated certificate of incorporation would require approval by holders of at least two-thirds of our then outstanding Class A and Class B common stock.

Delaware Anti-Takeover Statute. We will be subject to the provisions of Section 203 of the Delaware General Corporation Law regulating corporate takeovers. In general, Section 203 prohibits a publicly held Delaware corporation from engaging, under certain circumstances, in a business combination with an interested stockholder for a period of three years following the date the person became an interested stockholder unless:

- prior to the date of the transaction, our board of directors approved either the business combination or the transaction that resulted in the stockholder becoming an interested stockholder;
- upon completion of the transaction that resulted in the stockholder becoming an interested stockholder, the interested stockholder owned at least 85% of the voting stock of the corporation outstanding at the time the transaction commenced, excluding for purposes of determining the voting stock outstanding, but not the outstanding voting stock owned by the interested stockholder, (1) shares owned by persons who are directors and also officers and (2) shares owned by employee stock plans in which employee participants do not have the right to determine confidentially whether shares held subject to the plan will be tendered in a tender or exchange offer; or
- at or subsequent to the date of the transaction, the business combination is approved by our board of directors and authorized at an annual or special meeting of stockholders, and not by written consent, by the affirmative vote of at least two-thirds of the outstanding voting stock that is not owned by the interested stockholder.

Generally, a business combination includes a merger, asset or stock sale, or other transaction resulting in a financial benefit to the interested stockholder. An interested stockholder is a person who, together with affiliates and associates, owns or, within three years prior to the determination of interested stockholder status, did own 15% or more of a corporation's outstanding voting stock. We expect the existence of this provision to have an anti-takeover effect with respect to transactions our board of directors does not approve in advance. We also anticipate that Section 203 may discourage attempts that might result in a premium over the market price for the shares of Class A common stock held by stockholders.

[Table of Contents](#)

[Index to Financial Statements](#)

The provisions of Delaware law and the provisions of our amended and restated certificate of incorporation and amended and restated bylaws could have the effect of discouraging others from attempting hostile takeovers and as a consequence, they might also inhibit temporary fluctuations in the market price of our Class A common stock that often result from actual or rumored hostile takeover attempts. These provisions might also have the effect of preventing changes in our management. It is also possible that these provisions could make it more difficult to accomplish transactions that stockholders might otherwise deem to be in their best interests.

Transfer Agent and Registrar

Upon the completion of this offering, the transfer agent and registrar for our Class A common stock will be Computershare Trust Company, N.A. The transfer agent's address is 250 Royall Street, Canton, MA 02021, and its telephone number is (877) 373-6374.

Exchange Listing

We have been approved to list our Class A common stock on The NASDAQ Global Select Market under the symbol "NTNX."

SHARES ELIGIBLE FOR FUTURE SALE

Prior to this offering, there has been no public market for our Class A common stock, and we cannot assure you that a liquid trading market for our Class A common stock will develop or be sustained after this offering. Future sales of substantial amounts of shares of Class A common stock, including shares issued upon the exercise of outstanding options or warrants or upon settlement of RSUs, in the public market after this offering, or the possibility of these sales occurring, could adversely affect the prevailing market price for our Class A common stock or impair our ability to raise equity capital in the future.

Upon the completion of this offering, we will have a total of 136,403,162 shares of our Class A and Class B common stock outstanding, after giving effect to the automatic conversion of all outstanding shares of our convertible preferred stock into 76,319,511 shares of Class B common stock immediately prior to the completion of this offering and assuming no exercise of outstanding options or warrants or settlement of RSUs that were outstanding as of July 31, 2016. Of these outstanding shares, all the 14,000,000 shares of Class A common stock sold in this offering, plus any shares sold upon exercise of the underwriters' option to purchase additional shares, will be freely tradable in the public market without restriction or further registration under the Securities Act, unless those shares are held by "affiliates," as that term is defined in Rule 144 under the Securities Act.

The remaining 122,403,162 outstanding shares of our Class B common stock will be deemed "restricted securities" as defined in Rule 144. Restricted securities may be sold in the public market only if they are registered under the Securities Act or if they qualify for an exemption from registration under Rule 144 or Rule 701 promulgated under the Securities Act, which rules are summarized below. In addition, holders of substantially all of our equity securities are subject to market stand-off agreements or have entered into lock-up agreements with the underwriters under which they have agreed, subject to specific exceptions, not to sell any of our stock for at least 180 days following the date of this prospectus, as described below. As a result of these agreements and the provisions of our amended and restated investors' rights agreement described above under "Description of Capital Stock—Registration Rights," subject to the provisions of Rule 144 or Rule 701, following the expiration of the lock-up period, all shares subject to such provisions and agreements will be available for sale in the public market only if registered or pursuant to an exemption from registration under Rule 144 or Rule 701 under the Securities Act.

Rule 144

In general, under Rule 144 as currently in effect, once we have been subject to public company reporting requirements for at least 90 days, a person who is not deemed to have been one of our affiliates for purposes of the Securities Act at any time during the 90 days preceding a sale and who has beneficially owned the shares proposed to be sold for at least six months, including the holding period of any prior owner other than our affiliates, is entitled to sell such shares (subject to the requirements of the lock-up and market stand-off agreements, as described below) without complying with the manner of sale, volume limitation or notice provisions of Rule 144, subject to compliance with the public information requirements of Rule 144. If such a person has beneficially owned the shares proposed to be sold for at least one year, including the holding period of any prior owner other than our affiliates, then such person is entitled to sell such shares (subject to the requirements of the lock-up and market stand-off agreements, as described below) without complying with any of the requirements of Rule 144.

In general, under Rule 144, as currently in effect, our affiliates or persons selling shares on behalf of our affiliates are entitled to sell upon expiration of the lock-up and market stand-off agreements described above, within any three-month period beginning 90 days after the date of this prospectus, a number of shares that does not exceed the greater of:

- 1% of the number of shares of Class A common stock then outstanding, which will equal approximately 140,000 shares immediately after this offering; or

- the average weekly trading volume of the Class A common stock during the four calendar weeks preceding the filing of a notice on Form 144 with respect to such sale.

Sales under Rule 144 by our affiliates or persons selling shares on behalf of our affiliates are also subject to certain manner of sale provisions and notice requirements and to the availability of current public information about us. Notwithstanding the availability of Rule 144, the holders of substantially all of Class B common stock have entered into lock-up or market stand-off agreements as described below, and their restricted securities will become eligible for sale (subject to the above limitations under Rule 144) upon the expiration of the restrictions set forth in those agreements.

Rule 701

Rule 701, as currently in effect, generally allows a stockholder who purchased shares of our Class A or Class B common stock pursuant to a written compensatory plan or contract and who is not deemed to have been an affiliate of our company during the immediately preceding 90 days to sell these shares (subject to the requirements of the lock-up or market stand-off agreements, as described below) in reliance upon Rule 144, but without being required to comply with the public information, holding period, volume limitation or notice provisions of Rule 144. Rule 701 also permits affiliates of our company to sell their Rule 701 shares under Rule 144 without complying with the holding period requirements of Rule 144. However, all holders of Rule 701 shares are required to wait until 90 days after the date of this prospectus (or until such later date that is required by the lock-up or market stand-off agreements, as described below) before selling such shares pursuant to Rule 701.

Lock-Up and Market Stand-off Agreements

We, all of our directors and officers and holders of substantially all of our common stock, or securities exercisable for or convertible into our common stock outstanding immediately prior to this offering, have agreed that, without the prior written consent of Goldman, Sachs & Co. and Morgan Stanley & Co. LLC on behalf of the underwriters, we and they will not, during the period ending 180 days after the date of this prospectus:

- offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, lend or otherwise transfer or dispose of, directly or indirectly, any shares of common stock or any securities convertible into or exercisable or exchangeable for shares of common stock;
- file any registration statement with the SEC relating to the offering of any shares of common stock or any securities convertible into or exercisable or exchangeable for common stock; or
- enter into any swap or other arrangement that transfers to another, in whole or in part, any of the economic consequences of ownership of our common stock;

whether any such transaction described above is to be settled by delivery of shares of our common stock or such other securities, in cash or otherwise, subject to certain exceptions set forth in the section titled "Underwriting."

In addition to the restrictions contained in the lock-up agreements described above, we have entered into agreements with certain security holders, including the amended and restated investors' rights agreement and our standard form of stock purchase agreement, option agreement and restricted stock unit agreement, that contain certain market stand-off provisions imposing restrictions on the ability of such security holders to offer, sell or transfer our equity securities for a period of 180 days following the date of this prospectus.

Registration Rights

The holders of 74,906,047 shares of our Class B common stock following this offering (assuming automatic conversion of all outstanding shares of our convertible preferred stock into shares of Class B common stock immediately prior to the completion of this offering), or their permitted transferees, will be entitled to various rights with respect to the registration of these shares under the Securities Act. Registration of these shares under the Securities Act would result in these shares becoming fully tradable without restriction under the Securities Act immediately upon the effectiveness of the registration, except for shares purchased by affiliates. See the section titled “Description of Capital Stock—Registration Rights” for additional information.

Registration Statements on Form S-8

Upon completion of this offering, we intend to file a registration statement on Form S-8 under the Securities Act to register all of the shares of Class A and Class B common stock issued or reserved for issuance under our stock option plans. Shares covered by this registration statement will be eligible for sale in the public market, upon the expiration or release from the terms of the lock-up and market stand-off agreements and subject to vesting of such shares.

**MATERIAL U.S. FEDERAL INCOME AND ESTATE TAX CONSEQUENCES
TO NON-U.S. HOLDERS OF OUR CLASS A COMMON STOCK**

The following is a summary of the material U.S. federal income and estate tax consequences to non-U.S. holders (as defined below) of their ownership and disposition of our Class A common stock, but does not purport to be a complete analysis of all the potential tax considerations relating thereto. This summary is based upon the provisions of the Code, Treasury regulations promulgated thereunder, administrative rulings and judicial decisions, all as of the date hereof. These authorities may be changed, possibly retroactively, so as to result in U.S. federal income and estate tax consequences different from those set forth below. We have not obtained, and do not intend to obtain, any opinion of counsel or ruling from the Internal Revenue Service, or the IRS, with respect to the statements made and the conclusions reached in the following summary, and there can be no assurance that the IRS will agree with such statements and conclusions.

This summary also does not address the tax considerations arising under the laws of any non-U.S., state or local jurisdiction or under any non-income tax laws, including U.S. federal gift and estate tax laws, except to the limited extent set forth below. In addition, this discussion does not address the potential application of the tax on net investment income, the alternative minimum tax or any tax considerations applicable to an investor's particular circumstances or to investors that may be subject to special tax rules, including, without limitation:

- banks, insurance companies or other financial institutions;
- tax-exempt organizations;
- controlled foreign corporations, passive foreign investment companies and corporations that accumulate earnings to avoid U.S. federal income tax;
- brokers or dealers in securities or currencies;
- traders in securities that elect to use a mark-to-market method of accounting for their securities holdings;
- persons that own, or are deemed to own, more than 5% of our capital stock (except to the extent specifically set forth below);
- certain former citizens or long-term residents of the United States;
- partnerships, arrangements, other pass-through entities or other entities classified as partnerships for U.S. federal income tax purposes (and partners or investors therein);
- persons who hold our Class A common stock as a position in a hedging transaction, "straddle," "conversion transaction" or other risk reduction transaction;
- persons who hold or receive our Class A common stock pursuant to the exercise of any employee stock option or otherwise as compensation;
- persons who do not hold our Class A common stock as a capital asset within the meaning of Section 1221 of the Code; or
- persons deemed to sell our Class A common stock under the constructive sale provisions of the Code.

In addition, if a partnership, an arrangement or an entity classified as a partnership for U.S. federal income tax purposes holds our Class A common stock, the tax treatment of a partner generally will depend on the status of the partner and upon the activities of the partnership. Accordingly, partnerships that hold our Class A common stock, and partners in such partnerships, should consult their tax advisors.

YOU ARE URGED TO CONSULT YOUR TAX ADVISOR WITH RESPECT TO THE APPLICATION OF THE U.S. FEDERAL INCOME TAX LAWS TO YOUR PARTICULAR SITUATION, AS WELL AS ANY TAX CONSEQUENCES OF THE PURCHASE, OWNERSHIP AND DISPOSITION OF OUR CLASS A COMMON STOCK ARISING UNDER THE U.S. FEDERAL ESTATE OR GIFT TAX RULES OR UNDER THE LAWS OF ANY STATE, LOCAL, NON-U.S. OR OTHER TAXING JURISDICTION OR UNDER ANY APPLICABLE TAX TREATY.

Non-U.S. Holder Defined

For purposes of this discussion, you are a non-U.S. holder if you are any holder other than a partnership or other entity classified as a partnership for U.S. federal income tax purposes, or:

- an individual citizen or resident of the United States (for tax purposes);
- a corporation or other entity taxable as a corporation created or organized in the United States or under the laws of the United States or any political subdivision thereof;
- an estate whose income is subject to U.S. federal income tax regardless of its source; or
- a trust (x) whose administration is subject to the primary supervision of a U.S. court and which has one or more U.S. persons (within the meaning of Section 7701(a)(3) of the Code) who have the authority to control all substantial decisions of the trust or (y) which has made a valid election to be treated as a U.S. person.

Distributions

As described in the section titled "Dividend Policy," we have never declared or paid any cash dividends on our Class A common stock and currently do not anticipate paying any cash dividends or other distributions on our Class A common stock. However, if we do make distributions on our Class A common stock, those payments will constitute dividends for U.S. tax purposes to the extent paid from our current or accumulated earnings and profits, as determined under U.S. federal income tax principles. To the extent those distributions exceed both our current and our accumulated earnings and profits, the excess will constitute a return of capital and will first reduce your basis in our Class A common stock, but not below zero, and then will be treated as gain from the sale of stock as described below under "—Gain on Disposition of Our Class A Common Stock."

Subject to the discussion below on effectively connected income, any dividend paid to you generally will be subject to U.S. withholding tax either at a rate of 30% of the gross amount of the dividend or such lower rate as may be specified by an applicable income tax treaty. In order to receive a reduced treaty rate, you must provide us with an IRS Form W-8BEN, IRS Form W-8BEN-E or other appropriate version of IRS Form W-8 (or successor form), including a U.S. taxpayer identification number, certifying qualification for the reduced rate. These forms must be updated periodically. A non-U.S. holder of shares of our Class A common stock eligible for a reduced rate of U.S. withholding tax pursuant to an income tax treaty may obtain a refund of any excess amounts withheld by filing an appropriate claim for refund with the IRS. If the non-U.S. holder holds our Class A common stock through a financial institution or other agent acting on the non-U.S. holder's behalf, the non-U.S. holder will be required to provide appropriate documentation to the agent, which then will be required to provide certification to us or our paying agent, either directly or through other intermediaries.

Dividends received by you that are effectively connected with your conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, that are attributable to a permanent establishment or a fixed base maintained by you in the United States), are exempt from such withholding tax if you satisfy certain certification and disclosure requirements. In order to obtain this

exemption, you must provide us with an IRS Form W-8ECI (or successor form) or other applicable IRS Form W-8 (or successor form) properly certifying such exemption. Such effectively connected dividends, although not subject to withholding tax, generally are taxed at the same graduated U.S. federal income tax rates applicable to U.S. persons, net of certain deductions and credits. In addition, if you are a corporate non-U.S. holder, dividends you receive that are effectively connected with your conduct of a U.S. trade or business may also be subject to a branch profits tax at a rate of 30% or such lower rate as may be specified by an applicable income tax treaty. You should consult your tax advisor regarding any applicable tax treaties that may provide for different rules.

For additional withholding rules that may apply to dividends paid to foreign financial institutions (as specifically defined by the applicable rules), or to non-financial foreign entities that have substantial direct or indirect U.S. owners, see the discussion below under the heading “—Foreign Accounts.”

Gain on Disposition of Our Class A Common Stock

Subject to the discussion below regarding backup withholding and foreign accounts, you generally will not be required to pay U.S. federal income tax on any gain realized upon the sale, exchange or other disposition of our Class A common stock unless:

- the gain is effectively connected with your conduct of a U.S. trade or business (and, if required by an applicable income tax treaty, the gain is attributable to a permanent establishment or a fixed base maintained by you in the United States);
- you are a non-resident alien individual who is present in the United States for a period or periods aggregating 183 days or more during the calendar year in which the sale or disposition occurs and certain other conditions are met; or
- our Class A common stock constitutes a U.S. real property interest by reason of our status as a “United States real property holding corporation”, or USRPHC, for U.S. federal income tax purposes at any time within the shorter of the five-year period preceding your disposition of, or your holding period for, our Class A common stock.

We believe that we are not currently and will not become a USRPHC and the remainder of this discussion so assumes. However, because the determination of whether we are a USRPHC depends on the fair market value of our U.S. real property relative to the fair market value of our other business assets, there can be no assurance that we will not become a USRPHC in the future. Even if we become a USRPHC, however, as long as our Class A common stock is regularly traded on an established securities market, such Class A common stock will be treated as U.S. real property interests only if you actually or constructively hold more than 5% of such regularly traded Class A common stock at any time during the shorter of the five-year period preceding your disposition of, or your holding period for, our Class A common stock.

If you are a non-U.S. holder described in the first bullet above, you will be required to pay tax on the net gain derived from the sale under regular graduated U.S. federal income tax rates, and a corporate non-U.S. holder described in the first bullet above also may be subject to the branch profits tax at a 30% rate, or such lower rate as may be specified by an applicable income tax treaty. If you are an individual non-U.S. holder described in the second bullet above, you will be required to pay a flat 30% tax (or such lower rate specified by an applicable income tax treaty) on the gain derived from the sale, which gain may be offset by U.S.-source capital losses for the year (provided you have timely filed U.S. federal income tax returns with respect to such losses). You should consult your tax advisor regarding any applicable income tax or other treaties that may provide for different rules.

For additional withholding rules that may apply to dividends paid to foreign financial institutions (as specifically defined by the applicable rules), or to non-financial foreign entities that have substantial direct or indirect U.S. owners, see the discussion below under the heading “—Foreign Accounts.”

Federal Estate Tax

Our Class A common stock beneficially owned by an individual who is not a citizen or resident of the United States (as defined for U.S. federal estate tax purposes) at the time of their death will generally be includable in the decedent's gross estate for U.S. federal estate tax purposes, unless an applicable estate tax treaty provides otherwise. Such stock, therefore, may be subject to U.S. federal estate tax, unless an applicable estate tax or other treaty provides otherwise. Investors are urged to consult their own tax advisors regarding the U.S. federal estate tax consequences of the ownership or disposition of our Class A common stock.

Backup Withholding and Information Reporting

Generally, we must report annually to the IRS the amount of dividends paid to you, your name and address, and the amount of tax withheld, if any. A similar report will be sent to you. Pursuant to applicable income tax treaties or other agreements, the IRS may make these reports available to tax authorities in your country of residence.

Payments of dividends on or of proceeds from the disposition of our Class A common stock made to you may be subject to additional information reporting and backup withholding at a current rate of 28% unless you establish an exemption, for example, by properly certifying your non-U.S. status on an IRS Form W-8BEN, IRS Form W-8BEN-E or another appropriate version of IRS Form W-8 (or successor form). Notwithstanding the foregoing, backup withholding and information reporting may apply if either we or our paying agent has actual knowledge, or reason to know, that you are a U.S. person.

Backup withholding is not an additional tax; rather, the U.S. income tax liability of persons subject to backup withholding will be reduced by the amount of tax withheld. If withholding results in an overpayment of taxes, a refund or credit may generally be obtained from the IRS, provided that the required information is furnished to the IRS in a timely manner.

Foreign Accounts

The Foreign Account Tax Compliance Act, or FATCA, generally imposes a U.S. federal withholding tax of 30% on dividends on and the gross proceeds from the sale or other disposition of our Class A common stock, paid to a "foreign financial institution" (as specifically defined under these rules), unless such institution enters into an agreement with the U.S. government to, among other things, withhold on certain payments and to collect and provide to the U.S. tax authorities substantial information regarding the U.S. account holders of such institution (which includes certain equity and debt holders of such institution, as well as certain account holders that are foreign entities with U.S. owners) or otherwise establishes an exemption. FATCA also generally imposes a U.S. federal withholding tax of 30% on dividends on and the gross proceeds from the sale or other disposition of our Class A common stock paid to a "non-financial foreign entity" (as specifically defined for purposes of these rules) unless such entity provides the withholding agent with a certification identifying certain substantial direct and indirect U.S. owners of the entity, certifies that there are none or otherwise establishes an exemption. The withholding provisions under FATCA generally apply to dividends on our Class A common stock and, under current transitional rules, are expected to apply with respect to the gross proceeds from a sale or other disposition of our Class A common stock on or after January 1, 2019. Under certain circumstances, a non-U.S. holder might be eligible for refunds or credits of such taxes. An intergovernmental agreement between the United States and an applicable foreign country may modify the requirements described in this paragraph. Prospective investors are encouraged to consult with their own tax advisors regarding the possible implications of this legislation on their investment in our Class A common stock.

EACH PROSPECTIVE INVESTOR SHOULD CONSULT ITS OWN TAX ADVISOR REGARDING THE PARTICULAR U.S. FEDERAL, STATE AND LOCAL AND NON-U.S. TAX CONSEQUENCES OF PURCHASING, HOLDING AND DISPOSING OF OUR CLASS A COMMON STOCK, INCLUDING THE CONSEQUENCES OF ANY PROPOSED CHANGE IN APPLICABLE LAWS.

UNDERWRITING

We and the underwriters named below will enter into an underwriting agreement with respect to the shares of our Class A common stock being offered. Subject to certain conditions, each underwriter has severally agreed to purchase the number of shares indicated in the following table. Goldman, Sachs & Co., Morgan Stanley & Co. LLC and J.P. Morgan Securities LLC are the representatives of the underwriters.

Underwriters	Number of Shares
Goldman, Sachs & Co.	
Morgan Stanley & Co. LLC	
J.P. Morgan Securities LLC	
RBC Capital Markets, LLC	
Robert W. Baird & Co. Incorporated	
Needham & Company, LLC	
Pacific Crest Securities, a division of KeyBanc Capital Markets Inc.	
Piper Jaffray & Co.	
Raymond James & Associates, Inc.	
Stifel, Nicolaus & Company, Incorporated	
William Blair & Company, L.L.C.	
Oppenheimer & Co., Inc.	
Total	<u>14,000,000</u>

The underwriters are committed to take and pay for all of the shares being offered, if any are taken, other than the shares of our Class A common stock covered by the option described below unless and until this option is exercised.

The underwriters have an option to buy up to an additional 2,100,000 shares of our Class A common stock from us to cover sales by the underwriters of a greater number of shares than the total number set forth in the table above. They may exercise that option for 30 days. If any shares are purchased pursuant to this option, the underwriters will severally purchase shares in approximately the same proportion as set forth in the table above.

The following tables show the per share and total underwriting discounts and commissions to be paid to the underwriters by us. Such amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase 2,100,000 additional shares from us.

	No Exercise	Full Exercise
Per Share	\$	\$
Total	\$	\$

Shares sold by the underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this prospectus. Any shares sold by the underwriters to securities dealers may be sold at a discount of up to \$ per share from the initial public offering price. After the initial offering of the shares, the representatives may change the offering price and the other selling terms. The offering of the shares by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part.

At our request, the underwriters have reserved for sale, at the initial public offering price, up to 5% of the shares offered by this prospectus for sale to certain customers and partners through a directed share program. If these parties purchase reserved shares, it will reduce the number of shares

available for sale to the general public. Any reserved shares that are not so purchased will be offered by the underwriters to the general public on the same terms as the other shares offered by this prospectus. None of our directors, executive officers or employees will participate in the directed share program. We have agreed to indemnify J.P. Morgan Securities LLC and its affiliates against certain liabilities and expenses, including liabilities under the Securities Act, in connection with the sale of such reserved shares. Shares sold through the directed share program will not be subject to lock-up restrictions.

We and our officers, directors and holders of substantially all of our outstanding securities, have entered into market stand-off agreements with us or agreed with the underwriters, subject to certain exceptions as described below, from the date of this prospectus continuing through the date 180 days after the date of this prospectus, referred to as the "restricted period," except with the prior written consent of Goldman, Sachs & Co. and Morgan Stanley & Co. LLC., not to:

- offer, sell, contract to sell, pledge, grant any option to purchase, make any short sale or otherwise transfer or dispose of, directly or indirectly, any shares of Class A or Class B common stock or securities convertible into or exchangeable for shares of Class A or Class B common stock;
- enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of Class A or Class B common stock or any such other securities, whether any such transaction described in these first two bullets is to be settled by delivery of Class A or Class B common stock or such other securities, in cash or otherwise;
- in our case, file with the SEC a registration statement under the Securities Act relating to the offering of any Class A or Class B common stock or securities convertible into or exchangeable for shares of Class A or Class B common stock; or
- make any demand for or exercise any right with respect to, the registration of any shares of Class A or Class B common stock or any security convertible into or exercisable or exchangeable for Class A or Class B common stock.

The restrictions described in the immediately preceding paragraph shall not apply to:

- the sale of shares of Class A common stock to the underwriters pursuant to the underwriting agreement;
- transfers of common stock: (i) as a *bona fide* gift or gifts; (ii) to any member of a security holder's immediate family or to any trust for the direct or indirect benefit of a security holder or the immediate family of a security holder, or if a security holder is a trust, to a trustor or beneficiary of the trust or to the estate of a beneficiary of such trust; (iii) by will or intestate succession; (iv) in connection with a sale of a security holder's Class A common stock acquired (A) from the underwriters in this offering or (B) in open market transactions after completion of this offering; (v) if a security holder is a corporation, partnership, limited liability company or other business entity, (A) to another corporation, partnership, limited liability company or other business entity that is an affiliate of such security holder, or to any investment fund or other entity controlled or managed by such security holder or affiliates of such security holder, or (B) as part of a distribution by such security holder to its stockholders, partners, members or other equityholders; (vi) to us in connection with the vesting or settlement of RSUs or the "net" or "cashless" exercise of options or other rights to purchase common stock for purposes of exercising such options or rights, including any transfer for the payment of tax withholdings or remittance payments due as a result of the vesting, settlement, or exercise of such RSUs, options or rights (but for the avoidance of doubt, excluding any transfer that would involve a sale of common stock in connection with the vesting, settlement, or exercise, whether to cover the applicable exercise price, tax withholdings, or remittance payments), in all such cases, pursuant to equity awards granted under our stock incentive plan or other equity award plan;

(vii) to us in connection with the repurchase of common stock issued pursuant to equity awards granted under our stock incentive plan or other equity award plan; (viii) pursuant to a bona fide third-party tender offer, merger, consolidation or other similar transaction following the completion of this offering that is approved by our board of directors and that is made to all security holders involving an acquisition of us, *provided, that* in the event that such tender offer, merger, consolidation or other similar transaction is not completed, the common stock shall remain subject to the restrictions described above; (ix) in connection with the conversion of our outstanding preferred stock into Class B common stock, provided that any Class B common stock received upon such conversion shall be subject to the restrictions described above; or (x) by operation of law pursuant to a qualified domestic order or in connection with a divorce settlement; *provided, that* (A) in the case of (i), (ii), (iii), and (v) such transfer shall not involve of a disposition for value, (B) in the case of (i), (ii), (iii), (v) and (x) above, it shall be a condition to the transfer or distribution that the donee, transferee or distributee, as the case may be, agrees in writing to be bound by the restrictions described above, (C) in the case of (iv), (v) and (vi) above, no filing under Section 16 of the Exchange Act, or other public filing, report or announcement shall be required or shall be voluntarily made during the restricted period, (D) in the case of (i), (ii), and (iii) above, no filing under Section 16 of the Exchange Act, or other public filing, report or announcement reporting a reduction in beneficial ownership of Class A or Class B common stock shall be required or shall be voluntarily made during the restricted period (other than any required Form 5 filing), and (E) in the case of (vii) and (x) above, no filing under Section 16 of the Exchange Act, or other public filing, report or announcement reporting a reduction in beneficial ownership of Class A or Class B common stock shall be voluntarily made during the restricted period and, if a security holder is required to file a report under Section 16 of the Exchange Act during the restricted period, such security holder shall include a statement in such report to the effect that such transfer is by operation of law pursuant to a qualified domestic order or in connection with a divorce settlement or to us in connection with the repurchase of common stock, as the case may be;

- receipt of common stock from us in connection with (i) the exercise of options or the vesting and settlement of RSUs or other rights granted under our stock incentive plan or other equity award plan, and (ii) the exercise of warrants; *provided, that* any shares issued upon exercise of such option or warrant or the vesting and settlement of RSUs shall continue to be subject to the restrictions set forth herein until the expiration of the restricted period;
- the issuance by us of shares of common stock upon the exercise or an option or warrant, vesting or settlement of a RSU, or the exercise, conversion or exchange of a security outstanding as of the date of this prospectus; *provided, that* each recipient of such securities shall execute a lock-up agreement;
- the grant by us of options to purchase or the issuance by us of shares of common stock or any securities convertible into, exchangeable for or that represent the right to receive shares of common stock pursuant to our equity compensation plans described in this prospectus; *provided, that* each recipient of such securities shall execute a lock-up agreement;
- establishment of a trading plan pursuant to Rule 10b5-1 under the Exchange Act for the transfer of shares of common stock; *provided, that* the common stock subject to such plan may not be transferred until after the expiration of the restricted period and no announcement, report or filing under the Exchange Act shall be voluntarily made regarding the establishment of such written plan during the restricted period, and to the extent an announcement, report or filing is required during the restricted period, such announcement, report or filing shall include a statement to the effect that no transfer of securities subject to such written plan may be made under the plan until after the expiration of the restricted period;

- the sale or issuance of or entry into an agreement providing for the issuance by us of shares of Class A or Class B common stock or any security convertible into or exercisable for shares of Class A or Class B common stock (i) in connection with the acquisition by us or any of our subsidiaries of the securities, business, technology, property or other assets of another person or an entity or pursuant to an employee benefit plan assumed by us in connection with such acquisition, or (ii) in connection with joint ventures, commercial relationships or other strategic transactions, and the issuance of any such securities pursuant to any such agreement; *provided, that* the aggregate number of shares of Class A or Class B common stock that we may sell or issue or agree to sell or issue shall not exceed 5% of the total number of shares of Class A and Class B common stock issued and outstanding immediately following this offering; and *provided, further* that each recipient of such securities shall execute a lock-up agreement with respect to the remaining restricted period; and
- the filing of any registration statement on Form S-8 relating to securities granted or to be granted pursuant to our equity incentive plans that are described in this prospectus.

Goldman, Sachs & Co. and Morgan Stanley & Co. LLC, in their sole discretion, may release the Class A and Class B common stock and other securities subject to the lock-up agreements described above in whole or in part at any time.

When and as required by Financial Industry Regulatory Authority, or FINRA, Rule 5131, at least two business days before the release or waiver of these restrictions, Goldman, Sachs & Co. and Morgan Stanley & Co. LLC will notify us of the impending release or waiver and announce the impending release or waiver through a major news service, except where the release or waiver is effected solely to permit a transfer of securities that is not for consideration and where the transferee has agreed in writing to be bound by the same restrictions in place for the transferor. See "Shares Eligible for Future Sale" for a discussion of certain transfer restrictions.

Prior to the offering, there has been no public market for the shares. The initial public offering price has been negotiated among us and the representatives. Among the factors considered in determining the initial public offering price of the shares, in addition to prevailing market conditions, were our historical performance, estimates of our business potential and earnings prospects, an assessment of our management and the consideration of the above factors in relation to market valuation of companies in related businesses.

We have been approved for the listing of our Class A common stock on The NASDAQ Global Select Market under the symbol "NTNX."

In connection with the offering, the underwriters may purchase and sell shares of our Class A common stock in the open market. These transactions may include short sales, stabilizing transactions and purchases to cover positions created by short sales. Short sales involve the sale by the underwriters of a greater number of shares than they are required to purchase in the offering, and a short position represents the amount of such sales that have not been covered by subsequent purchases. A "covered short position" is a short position that is not greater than the amount of additional shares for which the underwriters' option described above may be exercised. The underwriters may cover any covered short position by either exercising their option to purchase additional shares from us or purchasing shares in the open market. In determining the source of shares to cover the covered short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared to the price at which they may purchase additional shares from us pursuant to the option described above. "Naked" short sales are any short sales that create a short position greater than the amount of additional shares for which the option described above may be exercised. The underwriters must cover any such naked short position by

purchasing shares in the open market. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of our Class A common stock in the open market after pricing that could adversely affect investors who purchase in the offering. Stabilizing transactions consist of various bids for or purchases of our Class A common stock made by the underwriters in the open market prior to the completion of the offering.

The underwriters may also impose a penalty bid. This occurs when a particular underwriter repays to the underwriters a portion of the underwriting discount received by it because the representatives have repurchased shares sold by or for the account of such underwriter in stabilizing or short covering transactions.

Purchases to cover a short position and stabilizing transactions, as well as other purchases by the underwriters for their own accounts, may have the effect of preventing or retarding a decline in the market price of our Class A common stock, and together with the imposition of the penalty bid, may stabilize, maintain or otherwise affect the market price of the Class A common stock. As a result, the price of the Class A common stock may be higher than the price that otherwise might exist in the open market. The underwriters are not required to engage in these activities and may end any of these activities at any time. These transactions may be effected on The NASDAQ Global Select Market, in the over-the-counter market or otherwise.

The underwriters do not expect sales to discretionary accounts to exceed five percent of the total number of shares offered.

We estimate that our share of the total expenses of the offering, excluding underwriting discounts and commissions, will be approximately \$5.9 million. We have agreed to reimburse the underwriters for up to \$35,000 of expenses relating to clearance of this offering with FINRA.

We have agreed to indemnify the several underwriters against certain liabilities, including liabilities under the Securities Act.

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include sales and trading, commercial and investment banking, advisory, investment management, investment research, principal investment, hedging, market making, brokerage and other financial and non-financial activities and services. Certain of the underwriters and their respective affiliates have provided, and may in the future provide, a variety of these services to the issuer and to persons and entities with relationships with the issuer, for which they received or will receive customary fees and expenses.

In the ordinary course of their various business activities, the underwriters and their respective affiliates, officers, directors and employees may purchase, sell or hold a broad array of investments and actively trade securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of the issuer (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with the issuer. The underwriters and their respective affiliates may also communicate independent investment recommendations, market color or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they should acquire, long and/or short positions in such assets, securities and instruments.

In April 2016, we issued an aggregate principal amount of \$75.0 million of senior notes due April 15, 2019 to Goldman Sachs Specialty Lending Group, L.P., an affiliate of Goldman, Sachs & Co., an underwriter in this offering. We intend to repay the entire outstanding principal amount of the senior

notes prior to the effectiveness of this offering. For more information on our senior notes, please see “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Debt Obligations.”

European Economic Area

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (each, a Relevant Member State), an offer of shares to the public may not be made in that Relevant Member State, except that an offer of shares to the public may be made at any time under the following exemptions under the Prospectus Directive, if they have been implemented in that Relevant Member State:

(a) to any legal entity which is a qualified investor as defined in the Prospectus Directive;

(b) to fewer than 100 or, if the Relevant Member State has implemented the relevant provisions of the 2010 Amending Directive, 150, natural or legal persons (other than qualified investors as defined in the Prospectus Directive) subject to obtaining the prior consent of the representatives for any such offer; or

(c) in any other circumstances falling within Article 3(2) of the Prospectus Directive,

provided that no such offer of shares shall result in a requirement for the publication of a prospectus pursuant to Article 3 of the Prospectus Directive or any measure implementing the Prospectus Directive in a Relevant Member State and each person who initially acquires any shares or to whom an offer is made will be deemed to have represented, warranted and agreed to and with the underwriters that it is a qualified investor within the meaning of the law in that Relevant Member State implementing Article 2(1)(e) of the Prospectus Directive.

For the purposes of this provision, the expression an “offer of shares to the public” in relation to any shares in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the shares to be offered so as to enable an investor to decide to purchase or subscribe the shares, as the same may be varied in that Relevant Member State by any measure implementing the Prospectus Directive in that Relevant Member State, the expression Prospectus Directive means Directive 2003/71/EC (and amendments thereto, including the 2010 PD Amending Directive, to the extent implemented in the Relevant Member State) and includes any relevant implementing measure in each Relevant Member State.

In the case of any shares being offered to a financial intermediary as that term is used in Article 3(2) of the Prospectus Directive, such financial intermediary will also be deemed to have represented, acknowledged and agreed that the shares acquired by it in the offer have not been acquired on a non-discretionary basis on behalf of, nor have they been acquired with a view to their offer or resale to, persons in circumstances which may give rise to an offer of shares to the public other than their offer or resale in a Relevant Member State to qualified investors as so defined or in circumstances in which the prior consent of the underwriters has been obtained to each such proposed offer or resale.

United Kingdom

This prospectus is only addressed to and directed as qualified investors who are (i) investment professionals falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, or the Order; or (ii) high net worth entities and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order (all such persons together being referred to as “relevant persons”). Any investment or investment activity to which this prospectus relates is available only to relevant persons and will only be engaged with relevant persons. Any person who is not a relevant person should not act or rely on this prospectus or any of its contents.

Hong Kong

The shares may not be offered or sold in Hong Kong by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32 of the Laws of Hong Kong), or Companies (Winding Up and Miscellaneous Provisions) Ordinance, or which do not constitute an invitation to the public within the meaning of the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong), or Securities and Futures Ordinance, or (ii) to “professional investors” as defined in the Securities and Futures Ordinance and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance, and no advertisement, invitation or document relating to the shares may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” in Hong Kong as defined in the Securities and Futures Ordinance and any rules made thereunder.

Singapore

This prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares may not be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor (as defined under Section 4A of the Securities and Futures Act, Chapter 289 of Singapore, or SFA) under Section 274 of the SFA, (ii) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA, in each case subject to conditions set forth in the SFA.

Where the shares are subscribed or purchased under Section 275 of the SFA by a relevant person which is: (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, the securities (as defined in Section 239(1) of the SFA) of that corporation shall not be transferable for six months after that corporation has acquired the shares under Section 275 of the SFA except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person (as defined in Section 275(2) of the SFA), (2) where such transfer arises from an offer in that corporation’s securities pursuant to Section 275(1A) of the SFA, (3) where no consideration is or will be given for the transfer, (4) where the transfer is by operation of law, (5) as specified in Section 276(7) of the SFA, or (6) as specified in Regulation 32 of the Securities and Futures (Offers of Investments) (Shares and Debentures) Regulations 2005 of Singapore, or Regulation 32.

Where the shares are subscribed or purchased under Section 275 of the SFA by a relevant person which is a trust (where the trustee is not an accredited investor (as defined in Section 4A of the SFA)) whose sole purpose is to hold investments and each beneficiary of the trust is an accredited investor, the beneficiaries’ rights and interest (howsoever described) in that trust shall not be transferable for six months after that trust has acquired the shares under Section 275 of the SFA except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person (as defined

in Section 275(2) of the SFA), (2) where such transfer arises from an offer that is made on terms that such rights or interest are acquired at a consideration of not less than S\$200,000 (or its equivalent in a foreign currency) for each transaction (whether such amount is to be paid for in cash or by exchange of securities or other assets), (3) where no consideration is or will be given for the transfer, (4) where the transfer is by operation of law, (5) as specified in Section 276(7) of the SFA, or (6) as specified in Regulation 32.

Japan

The securities have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Act No. 25 of 1948, as amended), or the FIEA. The securities may not be offered or sold, directly or indirectly, in Japan or to or for the benefit of any resident of Japan (including any person resident in Japan or any corporation or other entity organized under the laws of Japan) or to others for reoffering or resale, directly or indirectly, in Japan or to or for the benefit of any resident of Japan, except pursuant to an exemption from the registration requirements of the FIEA and otherwise in compliance with any relevant laws and regulations of Japan.

Australia

No placement document, prospectus, product disclosure statement or other disclosure document has been lodged with the Australian Securities and Investments Commission, or ASIC, in relation to the offering. This prospectus does not constitute a prospectus, product disclosure statement or other disclosure document under the Corporations Act 2001, or Corporations Act, and does not purport to include the information required for a prospectus, product disclosure statement or other disclosure document under the Corporations Act.

Any offer in Australia of the shares may only be made to persons, or Exempt Investors, who are “sophisticated investors” (within the meaning of section 708(8) of the Corporations Act), “professional investors” (within the meaning of section 708(11) of the Corporations Act) or otherwise pursuant to one or more exemptions contained in section 708 of the Corporations Act so that it is lawful to offer the shares without disclosure to investors under Chapter 6D of the Corporations Act.

The shares applied for by Exempt Investors in Australia must not be offered for sale in Australia in the period of 12 months after the date of allotment under the offering, except in circumstances where disclosure to investors under Chapter 6D of the Corporations Act would not be required pursuant to an exemption under section 708 of the Corporations Act or otherwise or where the offer is pursuant to a disclosure document which complies with 6D of the Corporations Act. Any person acquiring shares must observe such Australian on-sale restrictions.

This prospectus contains general information only and does not take account of the investment objectives, financial situation or particular needs of any particular person. It does not contain any securities recommendations or financial product advice. Before making an investment decision, investors need to consider whether the information in this prospectus is appropriate to their needs, objectives and circumstances, and, if necessary, seek expert advice on these matters.

The Dubai International Financial Centre

This prospectus relates to an Exempt Offer in accordance with the Offered Securities Rules of the Dubai Financial Services Authority, or DFSA. This prospectus is intended for distribution only to persons of a type specified in the Offered Securities Rules of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this prospectus nor taken

steps to verify the information set forth herein and has no responsibility for the prospectus. The shares to which this prospectus relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the shares offered should conduct their own due diligence on the shares. If you do not understand the contents of this prospectus you should consult an authorized financial advisor.

Switzerland

We have not and will not register with the Swiss Financial Market Supervisory Authority, or FINMA, as a foreign collective investment scheme pursuant to Article 119 of the Federal Act on Collective Investment Scheme of 23 June 2006, as amended, or CISA, and accordingly the securities being offered pursuant to this prospectus have not and will not be approved, and may not be licensable, with FINMA. Therefore, the securities have not been authorized for distribution by FINMA as a foreign collective investment scheme pursuant to Article 119 CISA and the securities offered hereby may not be offered to the public (as this term is defined in Article 3 CISA) in or from Switzerland. The securities may solely be offered to “qualified investors,” as this term is defined in Article 10 CISA, and in the circumstances set out in Article 3 of the Ordinance on Collective Investment Scheme of 22 November 2006, as amended, or CISO, such that there is no public offer. Investors, however, do not benefit from protection under CISA or CISO or supervision by FINMA. This prospectus and any other materials relating to the securities are strictly personal and confidential to each offeree and do not constitute an offer to any other person. This prospectus may only be used by those qualified investors to whom it has been handed out in connection with the offer described herein and may neither directly or indirectly be distributed or made available to any person or entity other than its recipients. It may not be used in connection with any other offer and shall in particular not be copied and/or distributed to the public in Switzerland or from Switzerland. This prospectus does not constitute an issue prospectus as that term is understood pursuant to Article 652a and/or 1156 of the Swiss Federal Code of Obligations. We have not applied for a listing of the securities on the SIX Swiss Exchange or any other regulated securities market in Switzerland, and consequently, the information presented in this prospectus does not necessarily comply with the information standards set out in the listing rules of the SIX Swiss Exchange and corresponding prospectus schemes annexed to the listing rules of the SIX Swiss Exchange.

Notice to Prospective Investors in Canada

The securities may be sold in Canada only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the securities must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser’s province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 of National Instrument 33-105 Underwriting Conflicts, or NI 33-105, the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.

LEGAL MATTERS

The validity of the shares of Class A common stock offered by this prospectus will be passed upon for us by Wilson Sonsini Goodrich & Rosati, P.C., Palo Alto, California. Certain legal matters relating to the offering will be passed upon for the underwriters by Fenwick & West LLP, Mountain View, California.

EXPERTS

The consolidated financial statements of Nutanix, Inc. and its subsidiaries as of July 31, 2015 and 2016 and for the years ended July 31, 2014, 2015 and 2016, included in this prospectus have been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report appearing herein. Such consolidated financial statements have been so included in reliance upon the report of such firm given upon its authority as an expert in accounting and auditing.

ADDITIONAL INFORMATION

We have filed with the SEC a registration statement on Form S-1 under the Securities Act with respect to the shares of Class A common stock offered hereby. This prospectus, which constitutes a part of the registration statement, does not contain all of the information set forth in the registration statement, some of which is contained in exhibits to the registration statement as permitted by the rules and regulations of the SEC. For further information about us and the Class A common stock offered hereby, we refer you to the registration statement, including the exhibits filed as a part of the registration statement. Statements contained in this prospectus regarding the contents of any contract or any other document that is filed as an exhibit to the registration statement are not necessarily complete. If a contract or document has been filed as an exhibit to the registration statement, please see the copy of the contract or document that has been filed. Each statement in this prospectus relating to a contract or document filed as an exhibit is qualified in all respects by the filed exhibit.

You may obtain copies of this information by mail from the Public Reference Section of the SEC, 100 F Street, N.E., Room 1580, Washington, D.C. 20549, at prescribed rates. You may obtain information on the operation of the public reference rooms by calling the SEC at 1-800-SEC-0330. The SEC also maintains an Internet website that contains reports, proxy statements and other information about issuers, like us, that file electronically with the SEC. The address of that website is www.sec.gov.

As a result of this offering, we will become subject to the information and reporting requirements of the Exchange Act and, in accordance with this law will file periodic reports, proxy statements, and other information with the SEC. These periodic reports, proxy statements and other information will be available for inspection and copying at the SEC's public reference facilities and the website of the SEC referred to above. We also maintain a website at www.nutanix.com. Upon completion of this offering, you may access these materials free of charge as soon as reasonably practicable after they are electronically filed with, or furnished to, the SEC. Information contained on or that can be accessed through our website is not a part of this prospectus, and the inclusion of our website address in this prospectus is an inactive textual reference only.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of
Nutanix, Inc.
San Jose, California

We have audited the accompanying consolidated balance sheets of Nutanix, Inc. and subsidiaries (the "Company") as of July 31, 2015 and 2016, and the related consolidated statements of operations, comprehensive loss, convertible preferred stock and stockholders' deficit, and cash flows for each of the three years in the period ended July 31, 2016. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Nutanix, Inc. and subsidiaries as of July 31, 2015 and 2016, and the results of their operations and their cash flows for each of the three years in the period ended July 31, 2016, in conformity with accounting principles generally accepted in the United States of America.

/s/ DELOITTE & TOUCHE LLP

NUTANIX, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION

Organization and Description of Business—Nutanix, Inc. was incorporated in the state of Delaware in September 2009. Nutanix, Inc. is headquartered in San Jose, California, and together with its wholly-owned subsidiaries (collectively, the “Company”) has operations throughout North America, Europe, Asia-Pacific, Middle East, Latin America and Africa.

The Company’s enterprise cloud platform converges traditional silos of server, virtualization and storage into one integrated solution and can also connect to public cloud services. The Company primarily sells its products and services to end-customers through distributors and resellers (collectively “Partners”).

2. BASIS OF PRESENTATION AND SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation—The consolidated financial statements, which include the accounts of Nutanix, Inc. and its wholly-owned subsidiaries, have been prepared in conformity with accounting principles generally accepted in the United States (“U.S. GAAP”). All intercompany accounts and transactions have been eliminated in consolidation.

Unaudited Pro Forma Consolidated Balance Sheet—Upon the completion of the initial public offering (“IPO”) contemplated by the Company, all of the outstanding shares of Convertible Preferred Stock will automatically convert into 76,319,511 shares of common stock and the outstanding convertible preferred stock warrant liability will be reclassified into additional paid-in capital.

Use of Estimates—The preparation of consolidated financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Such management estimates include, but are not limited to, the best estimate of selling prices for products and related support; allowance for doubtful accounts; determination of fair value of common stock and convertible preferred stock, fair value of stock options and convertible preferred stock warrant liability; accounting for income taxes, including the valuation reserve on deferred tax assets and uncertain tax positions; warranty liability; commissions expense; and contingencies and litigation. Management evaluates these estimates and assumptions on an ongoing basis using historical experience and other factors and makes adjustments when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could materially differ from those estimates and assumptions.

Concentration Risk:

Credit Risk—Financial instruments that potentially subject the Company to concentrations of credit risk consist of cash and cash equivalents and accounts receivable. The Company places its cash and cash equivalents primarily with domestic financial institutions that are federally insured within statutory limits. The Company places its deposits with multiple institutions, however such deposits may exceed federally insured limits. The Company provides credit, in the normal course of business, to a number of companies and performs credit evaluations of its customers.

Concentration of Revenue and Accounts Receivable—The Company sells its products primarily through Partners and occasionally directly to end-customers. For the years ended July 31, 2014, 2015 and 2016, no end-customer accounted for more than 10% of total revenue.

[Table of Contents](#)[Index to Financial Statements](#)

For each significant Partner, revenue as a percentage of total revenue and accounts receivable as a percentage of total accounts receivable, net are as follows:

Customers	Revenue			Accounts Receivables	
	Year Ended July 31			As of July 31	
	2014	2015	2016	2015	2016
Partner A	23%	23%	15%	29%	*
Partner B	*	15%	20%	14%	17%
Partner C	*	*	14%	12%	12%
Partner D	*	*	*	19%	23%
Partner E	*	*	11%	*	11%
Partner F	*	*	15%	*	*

* Less than 10%

Vendor Risk—The Company relies on a limited number of suppliers for its contract manufacturing and certain raw material components. In instances where suppliers fail to perform their obligations, the Company may be unable to find alternative suppliers or satisfactorily deliver its products to its customers on time.

Cash, Cash Equivalents and Short-Term Investments—The Company classifies all highly liquid investments with stated maturities of three months or less from the date of purchase as cash equivalents and all highly liquid investments with stated maturities of greater than three months as marketable securities.

The Company determines the appropriate classifications of its marketable securities at the time of purchase and reevaluates such designation as of each balance sheet date. The Company classifies and accounts for its marketable securities as available-for-sale securities. The Company may or may not hold its securities with stated maturities greater than twelve months until their maturities due to its objectives at the time of purchase and its liquidity requirements. The Company classifies its marketable securities with stated maturities greater than twelve months as short-term investments due to its intention to use these securities to support its current operations.

The Company's marketable securities are recorded at their estimated fair value. Unrealized gains or losses on available-for-sale securities are reported in other comprehensive income (loss). The Company periodically reviews whether its securities may be other-than-temporarily impaired, including whether or not (i) the Company has the intent to sell the security or (ii) it is more likely than not that the Company will be required to sell the security before its anticipated recovery. If one of these factors is met, the Company will record an impairment loss associated with its impaired investment. The impairment loss will be recorded as a write-down of investments in the consolidated balance sheets and a realized loss within other expense in the consolidated statements of operations.

Fair Value Measurement—The Company defines fair value as the price that would be received from selling an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. When determining the fair value measurements for assets and liabilities, which are required to be recorded at fair value, the Company considers the principal or most advantageous market in which to transact and the market-based risk. The Company applies fair value accounting for all assets and liabilities that are recognized or disclosed at fair value in the consolidated financial statements on a recurring basis. The carrying amounts reported in the consolidated financial statements for cash and cash equivalents, accounts receivable, accounts payable and accrued liabilities approximate their fair values due to their short-term nature. The fair value of the Company's Senior Notes (see Note 5) approximates their face value as the effective interest rates on the Senior Notes approximate market interest rates for similar instruments.

Accounts Receivable and Allowance for Doubtful Accounts—Accounts receivable are recorded at the invoiced amount, net of an allowance for doubtful accounts. Credit is extended to customers based on an evaluation of their financial condition and other factors. The Company generally does not require collateral or other security to support accounts receivable. The Company performs ongoing credit evaluations of its customers and maintains an allowance for doubtful accounts.

The allowance for doubtful accounts is based on the best estimate of the amount of probable credit losses in existing accounts receivable. The Company evaluates the collectability of its accounts receivable based on known collection risks and historical experience. In circumstances where the Company is aware of a specific customer's inability to meet its financial obligations (e.g., bankruptcy filings or substantial downgrading of credit ratings), the Company records allowance for doubtful accounts in order to reduce the net recognized receivable to the amount the Company reasonably believes will be collected. For all other customers, the Company records allowance for doubtful accounts based on the length of time the accounts receivable are past due and the Company's historical experience of collections and write-offs.

The changes in the allowance for doubtful accounts are as follows (in thousands):

	Year Ended July 31		
	2014	2015	2016
Allowance for doubtful accounts—beginning balance	\$ 157	\$ 400	\$ 410
Charged to provision for doubtful accounts (credit)	243	119	(85)
Write-offs	—	(109)	(193)
Allowance for doubtful accounts—ending balance	<u>\$ 400</u>	<u>\$ 410</u>	<u>\$ 132</u>

Property and Equipment—Property and equipment, including leasehold improvements, are stated at cost, less accumulated depreciation and amortization. The Company includes the cost to acquire demonstration units and the related accumulated depreciation in property and equipment as such units are generally not available for sale. Depreciation and amortization is computed using the straight-line method over the estimated useful lives of the related assets.

Impairment of Long-Lived Assets—The Company continually monitors events and changes in circumstances that could indicate that carrying amounts of its long-lived assets, including property and equipment, may not be recoverable. When such events or changes in circumstances occur, the Company assesses the recoverability of long-lived assets by determining whether the carrying value of such assets will be recovered through their undiscounted expected future cash flow. If the undiscounted expected future cash flow is less than the carrying amount of these assets, the Company recognizes an impairment loss based on the excess of the carrying amount over the fair value of the assets. The Company did not recognize any impairment charges on its long-lived assets during the years ended July 31, 2014, 2015 and 2016.

Revenue Recognition—The Company derives revenue from two sources (1) product revenue, which consists of hardware combined with software and software-only revenue, and (2) support and service revenue which includes post-contract customer support (“PCS”) and professional services.

The Company recognizes revenue when:

- Persuasive evidence of an arrangement exists—The Company relies on sales agreements and purchase orders to determine the existence of an arrangement.
- Delivery has occurred—The Company typically recognizes product revenue upon shipment, when title and risk of loss are transferred to its Partners at that time. Service revenue is recognized as services are performed.

- The fee is fixed or determinable—The Company assesses whether the fee is fixed or determinable based on the payment terms associated with the transaction. Payment from Partners is not contingent upon the Partners receiving payments from end-customers.
- Collection is reasonably assured—The Company assesses collectability based on a credit analysis and payment history.

The Company reports revenue net of sales taxes. The Company includes shipping charges billed to customers in revenue and the related shipping costs are included in cost of revenue.

A substantial majority of the Company's product revenue is generated from the sale of the Company's software platform, which is typically delivered on a hardware appliance that is configured to order. The software is deemed essential to the functionality of the hardware. Although historically it has represented a small portion of the Company's product revenue, the Company's proprietary software can also be delivered on a software-only basis. The Company also sells non-essential software, which can be purchased by customers to enhance the functionality of the Company's offerings. The hardware appliance and the software essential to the functionality of the hardware appliance are considered non-software deliverables and, therefore, are not subject to industry-specific software revenue recognition guidance. Software-only and non-essential software sales are subject to the industry-specific software revenue recognition guidance. The Company established Vendor Specific Objective Evidence ("VSOE") of fair value for certain of its PCS offerings during the fourth quarter of the year ended July 31, 2015. The establishment of VSOE for these PCS offerings did not have a material impact on the Company's results. When VSOE of fair value for PCS does not exist, revenues subject to industry-specific software revenue recognition guidance are deferred and generally recognized ratably over the PCS period (see VSOE related discussion below).

Support and other services revenue includes the sale of PCS contracts and professional services such as installation, training and onsite engineering support. The Company's PCS contracts include the right to receive unspecified software upgrades and enhancements on a when-and-if-available basis, bug fixes, as well as parts replacement services related to the Company's hardware appliances. The Company's PCS contracts support both non-software deliverables and non-essential software. The Company allocates fees associated with PCS to the software deliverables and non-software deliverables in a contract based on the relative selling prices of such deliverables, which is based on VSOE when available. When VSOE is not available, relative selling prices are determined based upon the Company's best estimate of selling price, as third-party evidence is also not available. Revenue related to PCS contracts are recognized ratably over the contractual term, which generally range from one to five years. Revenue related to installation, training and onsite engineering support services are recognized as the services are provided to the customer.

Most of the Company's arrangements, other than stand-alone renewals of PCS contracts, are multiple-element arrangements with a combination of product and support and service related deliverables (as defined above). In multiple-element revenue arrangements, the Company allocates consideration at the inception of an arrangement to all deliverables based on the relative selling price method in accordance with the selling price hierarchy, which includes (i) VSOE of selling price, if available; (ii) third-party evidence ("TPE") of selling price, if VSOE is not available; and (iii) best estimate of selling price ("BESP"), if neither VSOE nor TPE is available. For deliverables where the Company has not established VSOE, the Company typically allocates consideration to all deliverables based on BESP as TPE typically cannot be obtained.

VSOE—In the Company's multiple-element arrangements, the Company determines VSOE based on its historical pricing and discounting practices for the specific products and services when sold separately. In determining VSOE, the Company requires that a substantial majority of the stand-

alone selling prices fall within a reasonably narrow pricing range. The Company has established VSOE for certain PCS related deliverables based upon the pricing and discounting of a substantial majority of stand-alone sales of the deliverables falling within a reasonably narrow range. The Company has not established VSOE for any of its other deliverables given that its pricing is not sufficiently concentrated (based on an analysis of separate sales of the deliverables) to conclude that it can demonstrate VSOE of selling prices.

TPE—When VSOE cannot be established for deliverables in multiple-element arrangements, the Company applies judgment with respect to whether it can establish a selling price based on TPE. TPE is determined based on competitor prices for interchangeable products or services when sold separately to similarly situated customers. However, because the Company's products contain a significant element of proprietary technology and the Company's solutions offer substantially different features and functionality, the comparable pricing of products with similar functionality cannot be obtained.

BESP—When neither VSOE nor TPE can be established, the Company utilizes BESP to allocate consideration to deliverables in a multiple-element arrangement. The Company's process to determine its BESP for products and services is based on qualitative and quantitative considerations of multiple factors, which primarily include historical sales, margin objectives and discount behavior. Additional considerations are given to other factors such as customer demographics, pricing practices and market conditions.

Deferred Revenue—The Company recognizes certain revenue ratably over the contractual support period. Amounts prepaid by customers in excess of revenue recognized are deferred. The current portion of deferred revenue represents the amounts that are expected to be recognized as revenue within one year of the consolidated balance sheet date.

Deferred Commissions—Deferred commissions consist of direct and incremental costs paid to the Company's sales force related to customer contracts. The deferred commission amounts are recoverable through the revenue streams that will be recognized under the related customer contracts. Direct sales commissions are deferred when earned and amortized over the same period that revenue is recognized from the related customer contract. Amortization of deferred commissions is included in sales and marketing expense in the consolidated statements of operations.

Cost of Revenue—Cost of revenue consists of cost of product revenue and cost of support and other revenue. Personnel costs associated with the Company's operations and global customer support organizations consist of salaries, benefits, and stock-based compensation. Allocated costs consist of certain facilities, depreciation and amortization, recruiting, and information technology costs allocated based on headcount.

Warranties—The Company generally provides a one-year warranty on hardware and a 90-day warranty on software licenses. The hardware warranty provides for parts replacement for defective components and the software warranty provides for bug fixes. With respect to the hardware warranty obligation, the Company has a warranty agreement with its contract manufacturers under which the contract manufacturers are generally required to replace defective hardware within three years of shipment. Furthermore, the Company's PCS agreements provide for the same parts replacement that customers are entitled to under the warranty program, except that replacement parts are delivered according to targeted response times to minimize disruption to the customers' critical business applications. Substantially all customers purchase PCS agreements.

Given the warranty agreement with the Company's contract manufacturers and considering that substantially all products are sold together with PCS agreements, the Company generally has very limited exposure related to warranty costs and therefore no warranty reserve has been recorded.

Research and Development—The Company's research and development expense consists primarily of product development personnel costs, including salaries and benefits, stock-based compensation and allocated facilities costs. Research and development costs are expensed as incurred.

Convertible Preferred Stock Warrant Liability—The Company accounts for freestanding warrants to purchase shares of its Convertible Preferred Stock (the "Convertible Preferred Stock Warrants"), as liabilities in the consolidated balance sheets at their estimated fair value. The fair value of the warrants is estimated using the Black-Scholes-Merton ("Black-Scholes") option-pricing model and is subject to remeasurement at fair value at each reporting date. Changes in the estimated fair value of the Convertible Preferred Stock Warrants are recorded in the consolidated statements of operations within other expense, net. The Company will continue to adjust the convertible preferred stock warrant liability for changes in fair value until the earlier of conversions, exercise or expiration of the warrants. Upon the conversion of the underlying Convertible Preferred Stock to common stock in an IPO, the related convertible preferred stock warrant liability will be re-measured to its then fair value and will be reclassified to additional paid-in capital.

Stock-Based Compensation—Stock-based compensation expense is measured based on the grant-date fair value of the share-based awards. The fair value of the stock options is estimated using Black-Scholes. The Company grants both stock awards with service condition only and with service and performance conditions. The Company recognizes stock-based compensation expense for employee stock awards with a service condition only using the straight-line method over the requisite service period of the awards, which is generally the vesting period. The Company uses the accelerated attribution method of recognizing stock-based compensation expense related to its employee stock awards that contain both service and performance conditions. These amounts are reduced by an estimated forfeiture rate. Forfeitures are required to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

Foreign Currency—The functional currency of the Company's foreign subsidiaries is the U.S. dollar. Transactions denominated in currencies other than the functional currency are re-measured at the average exchange rate in effect during the reporting period. At the end of each reporting period all monetary assets and liabilities of the Company's subsidiaries are re-measured at the current U.S. dollar exchange rate at the end of the reporting period. Remeasurement gains and losses are included within other expense, net in the accompanying consolidated statements of operations. For the two years ended July 31, 2015, the Company's net foreign currency gains and losses were immaterial. During the year ended July 31, 2016, the Company recorded \$1.5 million of foreign currency losses. To date, the Company has not undertaken any hedging transactions related to foreign currency exposure.

Income Taxes—The Company accounts for income taxes using the asset and liability method. Deferred income taxes are recognized by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases and operating loss and tax credit carryforwards. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. The measurement of deferred tax assets is reduced, if necessary, by a valuation allowance to amounts that are more likely than not to be realized.

The Company records a liability for uncertain tax positions if it is not more likely than not to be sustained based solely on its technical merits as of the reporting date. The Company considers many

factors when evaluating and estimating its tax positions and tax benefits, which may require periodic adjustments and may not accurately anticipate actual outcomes.

Advertising Costs—Advertising costs are charged to sales and marketing expenses as incurred in the consolidated statements of operations. During the years ended July 31, 2014, 2015 and 2016, advertising expense was \$1.4 million, \$3.5 million and \$6.5 million, respectively.

Deferred Offering Costs—Deferred offering costs consist of fees and expenses incurred in connection with the anticipated sale of the Company's common stock in an IPO, including the legal, accounting, printing and other IPO-related costs. Upon completion of the Company's IPO, these deferred offering costs will be reclassified to stockholders' equity (deficit) and offset against the proceeds of the offering. As of July 31, 2015 and 2016, deferred offering costs of \$2.1 million and \$4.5 million, respectively, were included within other assets—non-current.

Recently Issued and Adopted Accounting Pronouncements—In August 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. This new standard will make eight targeted changes to how cash receipts and cash payments are presented and classified in the statement of cash flows. The new standard is effective for fiscal years beginning after December 15, 2018, which means that it will be effective for the Company in its fiscal year beginning August 1, 2019. The new standard will require adoption on a retrospective basis unless it is impracticable to apply, in which case the Company would be required to apply the amendments prospectively as of the earliest date practicable. The Company is currently evaluating the effect the adoption of this guidance will have on its consolidated financial statements.

In March 2016, the FASB issued ASU 2016-09, Stock Compensation, which is intended to simplify several aspects of the accounting for share-based payment award transactions. ASU 2016-09 is effective for the fiscal years beginning after December 15, 2017, and interim periods within fiscal years beginning after December 15, 2018 for the Company, with early adoption permitted. The Company is currently evaluating the effect the adoption of this guidance will have on its consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases, which requires recognition of right-to-use lease assets and lease liabilities for all leases (with the exception of short-term leases) on the balance sheet of lessees. ASU 2016-02 is effective for fiscal years beginning after December 15, 2019, and interim periods within fiscal years beginning after December 15, 2020 for the Company, with early adoption permitted. ASU 2016-02 requires a modified retrospective transition approach and provides certain optional transition relief. The Company is currently evaluating the effect the adoption of this guidance will have on its consolidated financial statements.

In November 2015, the FASB issued ASU 2015-17, Balance Sheet Classification of Deferred Taxes. The standard requires deferred tax liabilities and assets to be classified as non-current in a classified statement of financial position. ASU 2015-17 is effective for the Company beginning August 1, 2017. The Company early adopted ASU 2015-17 (see Note 12) on a prospective basis effective January 31, 2016, which resulted in a reclassification of its net current deferred tax asset to the net non-current deferred tax asset in its consolidated balance sheet as of January 31, 2016. The Company did not retrospectively adjust prior periods. The Company believes that this change in accounting principle provides more useful information by simplifying the presentation of deferred tax assets and liabilities.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606). The standard is a comprehensive new revenue recognition model that requires revenue to be

recognized in a manner to depict the transfer of goods or services to a customer at an amount that reflects the consideration expected to be received in exchange for those goods or services. In August 2015, the FASB issued ASU 2015-14, Revenue from Contracts with Customers, to defer the effective date of ASU 2014-09 by one year, but permits entities to adopt the original effective date if they choose. In 2016, the FASB issued ASU 2016-08, ASU 2016-10 and ASU 2016-12 that provide interpretive clarifications on the new guidance in Topic 606. These updates in Topic 606 are effective for the Company beginning August 1, 2018, with early adoption allowed, on August 1, 2017. The Company is currently evaluating the impact that the adoption of these updates will have on its consolidated financial statements.

3. FAIR VALUE MEASUREMENTS

The authoritative guidance on fair value measurements establishes a three-tier fair value hierarchy based on the observability of the inputs available in the market used to measure fair value as follows:

- *Level I*—Inputs are unadjusted, quoted prices in active markets for identical assets or liabilities at the measurement date;
- *Level II*—Inputs are observable, unadjusted quoted prices in active markets for similar assets or liabilities, unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the related assets or liabilities; and
- *Level III*—Unobservable inputs that are significant to the measurement of the fair value of the assets or liabilities that are supported by little or no market data.

Assets and Liabilities Measured at Fair Value on a Recurring Basis

Cash equivalents and short-term investments. The Company's money market funds are classified within Level I due to the highly liquid nature of these assets and have unadjusted inputs, quoted prices in active markets for these assets at the measurement date from the financial institution that carries these investment securities. The Company's investments in available-for-sale debt securities such as commercial paper and corporate bonds are classified within Level II. The fair value of these securities is priced by using inputs based on non-binding market consensus prices that are corroborated by observable market data, quoted market prices for similar instruments, or pricing models such as discounted cash flow techniques.

Convertible Preferred Stock warrant liability. The Company's convertible preferred stock warrant liability is classified within Level III. The convertible preferred stock warrant liability is measured at fair value on a recurring basis using Black-Scholes. The valuation takes into account multiple inputs, such as the estimated fair value of the underlying stock at the valuation measurement date, the remaining contractual term of the warrants, risk-free interest rates, expected dividends and the expected volatility of the underlying stock. Generally, changes in the fair value of the underlying stock would result in a directionally similar impact to the fair value measurement. The valuation methodology and underlying assumptions are discussed further in Note 7.

The fair value of the Company's financial assets and liabilities measured on a recurring basis is as follows:

	As of July 31, 2015			
	Level I	Level II	Level III	Total
	(In thousands)			
Financial Assets:				
Cash equivalents:				
Commercial paper	\$ —	\$ 9,998	\$ —	\$ 9,998
Money market funds	7,160	—	—	7,160
Short-term investments:				
Corporate bonds	—	64,372	—	64,372
Commercial paper	—	18,288	—	18,288
Total measured at fair value	<u>7,160</u>	<u>92,658</u>	<u>—</u>	<u>99,818</u>
Cash				<u>50,721</u>
Total cash, cash equivalents and short-term investments				<u>\$150,539</u>
Financial Liabilities:				
Convertible preferred stock warrant liability	<u>\$ —</u>	<u>\$ —</u>	<u>\$11,683</u>	<u>\$ 11,683</u>
	As of July 31, 2016			
	Level I	Level II	Level III	Total
	(In thousands)			
Financial Assets:				
Cash equivalents:				
Money market funds	\$47,305	\$ —	\$ —	\$ 47,305
Commercial paper	—	4,999	—	4,999
Short-term investments:				
Corporate bonds	—	64,360	—	64,360
Commercial paper	—	21,631	—	21,631
Total measured at fair value	<u>47,305</u>	<u>90,990</u>	<u>—</u>	<u>138,295</u>
Cash				<u>46,905</u>
Total cash, cash equivalents and short-term investments				<u>\$185,200</u>
Financial Liabilities:				
Convertible preferred stock warrant liability	<u>\$ —</u>	<u>\$ —</u>	<u>\$9,679</u>	<u>\$ 9,679</u>

A summary of the changes in the fair value of the Company's convertible preferred stock warrant liability is as follows (in thousands):

	Year Ended July 31		
	2014	2015	2016
Convertible preferred stock warrant liability—beginning balance	\$1,110	\$ 5,507	\$11,683
Change in fair value*	4,308	6,176	(2,004)
Issuance of additional Convertible Preferred Stock Warrants	89	—	—
Convertible preferred stock warrant liability—ending balance	<u>\$5,507</u>	<u>\$11,683</u>	<u>\$ 9,679</u>

* Recorded in the consolidated statements of operations within other expense—net.

4. BALANCE SHEET COMPONENTS

Short-Term Investments—The amortized cost of the Company's short-term investments approximate their fair value. As of July 31, 2015 and 2016, unrealized gains or losses from the Company's short-term investments were immaterial and there were no securities that were in an unrealized loss position for more than 12 months.

The following table summarizes the estimated fair value of the Company's investments in marketable debt securities, by the contractual maturity date (in thousands):

	As of July 31	
	2015	2016
Due within 1 year	\$65,473	\$66,810
Due after 1 year through 3 years	17,187	19,181
Total	<u>\$82,660</u>	<u>\$85,991</u>

Property and Equipment—Net—Property and equipment, net consists of the following (in thousands):

	Estimated Useful Life (In months)	As of July 31	
		2015	2016
Computer, production, engineering and other equipment	36	\$ 33,361	\$ 54,161
Demonstration units	12	20,662	33,184
Leasehold improvements	**	1,884	6,619
Furniture and fixtures	60	1,189	3,641
Total property and equipment—gross		57,096	97,605
Less accumulated depreciation and amortization		(30,462)	(55,387)
Total property and equipment—net		<u>\$ 26,634</u>	<u>\$ 42,218</u>

** Leasehold improvements are amortized over the shorter of the estimated useful lives of the improvements or the remaining lease term.

Depreciation and amortization expense for the years ended July 31, 2014, 2015 and 2016 was \$11.6 million, \$16.6 million and \$26.4 million, respectively.

Accrued Compensation and Benefits—Accrued compensation and benefits consists of the following (in thousands):

	As of July 31	
	2015	2016
Accrued commissions	\$ 8,353	\$14,203
Accrued bonus	1,855	3,592
Accrued vacation	1,835	3,490
Other	1,795	3,262
Total accrued compensation and benefits	<u>\$13,838</u>	<u>\$24,547</u>

Accrued Expenses and Other Liabilities—Accrued expenses and other liabilities consists of the following (in thousands):

	As of July 31	
	2015	2016
Deferred tax liabilities	\$3,282	\$ —
Accrued professional services	2,388	3,585
Income taxes payable	668	1,417
Other	563	535
Total accrued expenses and other liabilities	<u>\$6,901</u>	<u>\$5,537</u>

During the year ended July 31, 2016, the Company adopted ASU 2015-17 which requires deferred tax liabilities and assets to be classified as non-current in the statement of financial position. As a result, the Company reclassified its net current deferred tax asset to net non-current deferred tax assets during the year ended July 31, 2016.

5. DEBT

Senior Notes

In April 2016, the Company issued an aggregate principal amount of \$75.0 million of senior notes due on April 15, 2019 (the "Senior Notes") to a lender. Interest is payable monthly in arrears. The Senior Notes are secured by substantially all of the Company's assets. The Senior Notes bear interest at a rate based on adjusted LIBOR plus an applicable margin of 9% per annum or, at the option of the Company, the Base Rate (defined as the greatest of (a) the Prime Rate, (b) the Federal Funds Effective Rate plus 0.5%, and (c) 4% per annum) plus an applicable margin of 8% per annum. Under the terms of the Senior Notes, the Company is required to early repay the Senior Notes in full upon receipt of any cash proceeds from a qualified offering (or IPO) of the Company. The Senior Notes contain a guaranteed minimum return to the holder of the Senior Notes of \$6.5 million (the "Guaranteed Minimum Return"), which is reduced by \$1.6 million of debt issuance costs paid following the issuance of the Senior Notes and all interest payments to date, at the time of repayment of all principal of the Senior Notes. If on date of the repayment of all principal of the Senior Notes the total of \$1.6 million of debt issuance costs plus interest paid to date is less than the Guaranteed Minimum Return, the Company is required to make an additional payment equal to the difference between the Guaranteed Minimum Return and the total of \$1.6 million of debt issuance costs plus interest paid to date. The Senior Notes also contain two financial covenants, (i) a minimum consolidated cash billings of \$300.0 million at any fiscal quarter, beginning with the fiscal quarter ended April 30, 2016, for the four fiscal quarter period and (ii) a minimum consolidated liquidity of \$50.0 million at any time during this agreement. As of July 31, 2016, the Company was in compliance with all financial covenants.

As of July 31, 2016, debt issuance costs, net of amortization, related to the Senior Notes were approximately \$1.7 million.

Revolving Credit Line

In November 2013, the Company entered into a credit facility agreement with a lender that provides for \$15.0 million secured revolving credit facility (the "Revolving Credit Line"). In connection with the Revolving Credit Line, the Company issued warrants to purchase 10,000 shares of Series D Convertible Preferred Stock (see Note 7) at the closing of the Revolving Credit Line. Borrowings under the Revolving Credit Line bore interest equal to the issuing lender's prime referenced rate plus 1%, and the interest rate cannot be below 3.5% per annum. Borrowings under the Revolving Credit Line were secured by substantially all of the assets of the Company other than intellectual property. The agreement contained certain financial and non-financial restrictive covenants including a requirement to maintain a minimum liquidity ratio of 1.25 to 1.00 (which is defined in the agreement as the ratio of cash plus eligible accounts receivable divided by the principal amount of debt borrowed under the Revolving Credit Line), with which the Company had to comply monthly. In November 2013, the Company borrowed approximately \$13.4 million under the Revolving Credit Line, which was fully repaid in February 2014. The Revolving Credit Line expired unutilized in November 2015.

6. COMMITMENTS AND CONTINGENCIES

Operating Leases—The Company has commitments for future payments related to its office facility leases and other contractual obligations. The Company leases its office facilities under non-cancelable operating lease agreements expiring through the year ending 2021. Certain of these lease agreements have free or escalating rent payments. The Company recognizes rent expense under such agreements on a straight-line basis over the lease term, with any free or escalating rent payments amortized as a reduction or addition of rent expense over the lease term.

Future minimum payments due under operating leases as of July 31, 2016 are as follows (in thousands):

<u>Year Ending July 31:</u>	
2017	\$ 9,698
2018	8,353
2019	9,103
2020	8,634
2021	<u>5,919</u>
Total	<u>\$41,707</u>

Rent expense incurred under operating leases was \$2.2 million, \$4.0 million and \$7.6 million for the years ended July 31, 2014, 2015 and 2016, respectively.

Purchase Commitments—In the normal course of business, the Company makes commitments with its third-party hardware product manufacturers to manufacture its inventories and non-standard components based on its forecasts. These commitments consist of obligations for on-hand inventories and non-cancelable purchase orders for non-standard components. The Company records a charge for firm, non-cancelable and unconditional purchase commitments with its third-party hardware product manufacturers for non-standard components when and if quantities exceed its future demand forecasts through a charge to cost of product sales. As of July 31, 2016, the Company had approximately \$19.8 million of non-cancellable purchase commitments with its contract manufacturers. As of July 31, 2016, the Company had approximately \$18.9 million in other purchase obligations pertaining to its normal operations.

Guarantees—The Company has entered into agreements with some of its Partners and customers that contain indemnification provisions in the event of claims alleging that the Company's products infringe the intellectual property rights of a third party. The scope of such indemnification varies, and may include, in certain cases, the ability to cure the indemnification by modifying or replacing the product at the Company's own expense, requiring the return and refund of the infringing product, procuring the right for the partner and/or customer to continue to use or distribute the product, as applicable, and/or defending the partner or customer against and paying any damages from third-party actions based upon claims of infringement. Other guarantees or indemnification arrangements include guarantees of product and service performance. The fair value of liabilities related to indemnifications and guarantee provisions are not material and have not had any material impact on the consolidated financial statements to date.

Litigation —From time to time, the Company may become involved in various litigation and administrative proceedings relating to claims arising from its operations in the normal course of business. Management is not currently aware of any matters that may have a material adverse impact on the Company's business, financial position, results of operations or cash flows.

7. CONVERTIBLE PREFERRED STOCK WARRANTS

The Convertible Preferred Stock Warrants outstanding were as follows (in thousands, except for share and per share amounts):

Class of Shares	Issuance Date	Contractual Term	Number of Shares	Exercise Price per Share	Fair Value as of July 31	
					2015	2016
Series A warrants	December 21, 2009	10 years	683,644	\$ 0.234	\$ 9,899	\$ 8,259
Series A warrants	May 10, 2010	10 years	85,450	0.234	1,238	1,032
Series D warrants	November 26, 2013	10 years	10,000	7.289	107	77
Series D warrants	December 12, 2013	7 years	45,000	7.289	439	311
			<u>824,094</u>		<u>\$ 11,683⁽¹⁾</u>	<u>\$ 9,679⁽¹⁾</u>

(1) Reflected in the consolidated balance sheets as convertible preferred stock warrant liability.

The Company estimates the fair value of each Convertible Preferred Stock Warrants using Black-Scholes with the following assumptions:

Fair Value of Convertible Preferred Stock—The fair value of Convertible Preferred Stock represents the fair value of the underlying Convertible Preferred Stock that the warrants are convertible into.

Remaining Contractual Term—The remaining contractual term represents the time from the date of the valuation to the expiration of the warrant.

Risk-Free Interest Rate—The risk-free interest rate is based on U.S. Treasury yield in effect as of the measurement dates, and for zero coupon U.S. Treasury notes with maturities approximately equal to the term of the warrant.

Volatility—The volatility is derived from historical volatilities of several unrelated publicly-listed peer companies over a period approximately equal to the term of the warrant because the Company has limited information on the volatility of the Convertible Preferred Stock since there is currently no trading history. When making the selections of industry peer companies to be used in the volatility calculation, the Company considered the size, operational and economic similarities to the Company's principle business operations.

Dividend Yield—The expected dividend assumption is based on the Company's current expectations about the Company's anticipated dividend policy.

The assumptions used to determine the fair value of the Company's Series A convertible preferred stock warrants are as follows:

	<u>As of July 31</u>	
	<u>2015</u>	<u>2016</u>
Fair value of convertible preferred stock	\$14.70	\$12.31
Risk-free interest rate	1.4%	0.9%
Contractual term (in years)	4.4	3.4
Volatility	49%	54%
Dividend yield	—	—

The assumptions used to determine the fair value of the Company's Series D convertible preferred stock warrants are as follows:

	<u>As of July 31</u>	
	<u>2015</u>	<u>2016</u>
Fair value of convertible preferred stock	\$15.40	\$13.16
Risk-free interest rate	1.7%	1.0%
Contractual term (in years)	5.9	4.9
Volatility	43%	35%
Dividend yield	—	—

8. CONVERTIBLE PREFERRED STOCK

As of July 31, 2015 and 2016, Series A Convertible Preferred Stock, Series B Convertible Preferred Stock, Series C Convertible Preferred Stock, Series D Convertible Preferred Stock and Series E Convertible Preferred Stock (collectively the "Convertible Preferred Stock") outstanding consisted of the following:

	<u>Shares Authorized</u>	<u>Shares Issued and Outstanding</u>	<u>Aggregate Liquidation Preference (In thousands)</u>
Series A	28,165,300	27,396,198	\$ 15,494
Series B	16,558,441	16,558,441	25,250
Series C	7,683,710	7,683,710	33,000
Series D	13,912,438	13,857,438	151,500
Series E	11,943,420	10,823,724	145,000
	<u>78,263,309</u>	<u>76,319,511</u>	<u>\$ 370,244</u>

The holders of the Company's Convertible Preferred Stock have various rights, preferences and privileges as follows:

Redemption Rights—Convertible Preferred Stock is not redeemable.

Voting Rights—Each share of Convertible Preferred Stock has voting rights equivalent to the number of shares of common stock into which it is convertible.

Conversion—Each share of Convertible Preferred Stock is convertible, at the option of the holder, into one share of common stock (subject to adjustment for certain diluting issuances, as defined, stock dividends, recapitalizations, stock splits and the like). Shares of each series of Convertible Preferred Stock will be converted automatically on the same terms upon the Company's sale of its common stock in a firm commitment underwritten public offering with gross proceeds of no less than \$50.0 million (such an offering, a qualified offering). Shares of Series A Convertible Preferred Stock, Series B Convertible Preferred Stock, and Series C Convertible Preferred Stock, as applicable, will be converted automatically on the same terms upon the date specified by vote or written consent of the holders of a majority of the then-outstanding shares of each such series of Convertible Preferred Stock (with holders of each such series of preferred stock voting separately as a single class). Shares of Series D Convertible Preferred Stock and Series E Convertible Preferred Stock will be converted automatically on the same terms upon the date specified by vote or written consent of the holders of 66.7% of the then-outstanding shares of Series D Convertible Preferred Stock and Series E Convertible Preferred Stock (voting separately as a single class).

In the event of a qualified offering or any IPO of the Company's common stock in which all of the Series D Convertible Preferred Stock are to be converted to common stock and the offering price to the public (prior to any underwriting discounts) in such IPO is less than \$10.9328 per share (as adjusted for stock splits, stock dividends, reclassification and the like) (any such offering, an IPO preference triggering offering), then the conversion price for each share of Series D Preferred Stock will be adjusted immediately prior to the conversion of the Series D Convertible Preferred Stock to a price equal to 66.67% times the IPO price of the common stock (rounded to four decimals).

In the event of an IPO preference triggering offering in which the Conversion Price of the Series D Convertible Preferred Stock is adjusted, the conversion price for each share of Series E Convertible Preferred Stock shall be adjusted immediately prior to the conversion of the Series E Convertible Preferred Stock into common stock to a new conversion price determined by multiplying the Series E conversion price then in effect by a fraction, (x) the numerator of which shall be the sum of (i) the outstanding shares of common stock immediately after the offering after giving effect to the conversion of all Convertible Preferred Stock into common stock prior to such offering (assuming that no adjustment is made to the Series D conversion price), (ii) the issuance of common stock in such offering and (iii) the shares of common stock reserved for issuance under all of the Company's equity compensation plans in effect immediately following such offering (such sum referred to as the Pre-Adjustment Fully Diluted Shares); and (y) the denominator of which shall be the sum of the Pre-Adjustment Fully Diluted Shares plus the number of additional shares of common stock issuable upon conversion of the Series D Convertible Preferred Stock solely as a result of the adjustment provided for by an IPO Preference Triggering Offering.

Dividends—Holders of Series A Convertible Preferred Stock, Series B Convertible Preferred Stock, Series C Convertible Preferred Stock, Series D Convertible Preferred Stock and Series E Convertible Preferred Stock are entitled to receive noncumulative dividends at the rate of \$0.045244, \$0.121992, \$0.3436, \$0.5831 and \$1.0717 per share, respectively (as adjusted for any stock dividends, recapitalizations, or stock splits) when, as, and if declared by the Company's board of directors (the "Board"), and common stock holders are not entitled to dividends until these amounts have been paid, declared, or set apart during that fiscal year for each series of preferred stock (as adjusted for any stock dividends, recapitalizations, or stock splits). After payment of such dividends on Convertible Preferred Stock, any additional dividends will be distributed among the holders of the Series A Convertible Preferred Stock, Series B Convertible Preferred Stock, Series C Convertible Preferred Stock, Series D Convertible Preferred Stock, Series E Convertible Preferred Stock and common stock pro rata based on the number of shares of common stock then held by each holder (assuming conversion of all Convertible Preferred Stock into common stock). No dividends have been declared by the Board through July 31, 2016.

[Table of Contents](#)

[Index to Financial Statements](#)

Series E Liquidation Preference—In the event of a qualifying sale or change in control of the Company, a sale, lease or other disposition of all or substantially all of the assets of the Company, a sale or exclusive license of all or substantially all of the intellectual property of the Company, or the liquidation, dissolution or winding up of the Company (any of the foregoing events, a “Liquidation Transaction”), prior and in preference to the distribution to any distribution to any other series of Convertible Preferred Stock or the common stock, the holders of Series E Convertible Preferred Stock shall receive an amount per share equal to \$13.3965 (as adjusted for stock splits, stock dividends, reclassification and the like), plus any declared but unpaid dividends. If, upon the occurrence of such event, the assets and funds available for distribution among the holders of Series E Convertible Preferred Stock are insufficient to permit the payment to such holders of the full aforesaid preferential amounts, then the entire assets and funds of the Company legally available for distribution shall be distributed ratably among the holders of Series E Convertible Preferred Stock in proportion to the preferential amount each such holder is otherwise entitled to receive with respect to such shares.

Series D Liquidation Preference—In the event of a Liquidation Transaction, the holders of Series D Convertible Preferred Stock shall be entitled to receive, prior and in preference to any distribution of any of the assets of the Company to the holders of the Series A Convertible Preferred Stock, Series B Convertible Preferred Stock, Series C Convertible Preferred Stock or common stock by reason of their ownership thereof, an amount per share equal to \$10.9328 (as adjusted for stock splits, stock dividends, reclassification and the like) for each outstanding share of Series D Convertible Preferred Stock then held by them, plus any declared but unpaid dividends. If, upon the occurrence of such event, the assets and funds available for distribution among the holders of Series D Convertible Preferred Stock are insufficient to permit the payment to such holders of the full aforesaid preferential amounts, then the entire amount of the proceeds shall be distributed ratably among the holders of Series D Convertible Preferred Stock in proportion to the preferential amount each such holder is otherwise entitled to receive.

Junior Preferred Liquidation Preference—After payment to the holders of Series E Convertible Preferred Stock and Series D Convertible Preferred Stock as mentioned above, the holders of Series A Convertible Preferred Stock, Series B Convertible Preferred Stock, and Series C Convertible Preferred Stock will receive \$0.56555, \$1.5249, and \$4.2948 per share, respectively, plus all declared, but unpaid dividends thereon, prior and in preference to any payment or distribution to holders of common stock. After the preferred liquidation preferences have been met, the remaining assets will be distributed to the holders of the then-outstanding common stock.

9. COMMON STOCK RESERVED FOR ISSUANCE

The Company had reserved shares of common stock, on an as-if converted basis, for future issuance as follows:

	As of July 31	
	2015	2016
Conversion of Series A preferred stock	27,396,198	27,396,198
Conversion of Series B preferred stock	16,558,441	16,558,441
Conversion of Series C preferred stock	7,683,710	7,683,710
Conversion of Series D preferred stock	13,857,438	13,857,438
Conversion of Series E preferred stock	10,823,724	10,823,724
Exercise and conversion of convertible preferred stock warrants	824,094	824,094
Outstanding stock awards	33,039,810	38,432,337
Remaining shares available for future issuance under the 2010 and 2011 Stock Plan	2,650,840	3,271,863
Total	<u>112,834,255</u>	<u>118,847,805</u>

10. EQUITY AWARD PLANS

2010 and 2011 Stock Plan—In June 2010, the Company adopted the 2010 Stock Plan (“2010 Plan”) and in December 2011, the Company adopted the 2011 Stock Plan (“2011 Plan”). Under the 2010 Plan as subsequently amended and 2011 Plan (together, the “Stock Plan”), the Company may grant incentive stock options (“ISO”), non-statutory stock options (“NSO”), restricted stock (“RS”) and restricted stock units (“RSU”) to employees, directors and consultants. As of July 31, 2016, the Company had reserved a total of 59,473,371 shares for the issuance of equity awards under the Stock Plan, of which 3,271,863 shares were still available for grant. In addition, in August 2016, the Company approved an increase of 3,200,000 shares to the total number of shares reserved for the issuance of equity awards under the Stock Plan.

Stock Options

The Board determines the period over which stock options become exercisable and stock options generally vest over a four-year period. Stock options generally expire 10 years from the date of grant. The term of an ISO grant to a 10% stockholder will not exceed five years from the date of the grant. The exercise price of an ISO will not be less than 100% of the estimated fair value of the shares of common stock underlying the stock option (or 110% of the estimated fair value in the case of an ISO granted to a 10% stockholder) on the date of grant. The exercise price of a NSO is determined by the Board at the time of grant, and is generally not less than 100% of the estimated fair value of the shares of common stock underlying the stock option on the date of grant.

The Company's stock option activity under the Stock Plan is as follows:

	Options Outstanding			
	Number of Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life (In years)	Aggregate Intrinsic Value (In thousands)
Outstanding—August 1, 2015	28,530,835(1)	4.21	8.5	\$ 299,150
Options granted	237,000	14.34		
Options exercised	(1,573,577)	2.23		
Options canceled/forfeited	(1,027,290)	5.16		
Outstanding—July 31, 2016	<u>26,166,968(1)</u>	4.39	7.5	208,101
Exercisable—July 31, 2016	<u>24,314,517(1)</u>	4.21	7.5	197,519
Vested and expected to vest—July 31, 2016	<u>25,578,221(1)</u>	4.34	7.4	204,734

(1) Includes 455,000 stock options with both service and performance conditions with a weighted-average fair value per share of \$3.78 (the "Performance Stock Options"). Vesting of the Performance Stock Options are subject to continuous service with the Company (the "service condition") and satisfaction of certain liquidity events of the Company (the "performance condition"). As of July 31, 2016, the Company had not recognized stock-based compensation expense related to the Performance Stock Options as it determined that it was not probable that the performance condition would be met.

The stock options exercisable as of July 31, 2016 include 14,941,547 of stock options that are vested and 9,372,970 of stock options that are unvested with an early exercise provision. The weighted-average grant-date fair value per share of stock options granted was \$2.15, \$4.86 and \$6.36 for the years ended July 31, 2014, 2015 and 2016, respectively. The aggregate intrinsic value of stock options exercised was \$3.6 million, \$16.2 million and \$18.3 million for the years ended July 31, 2014, 2015 and 2016, respectively. Aggregate intrinsic value represents the difference between the exercise price of the options and the estimated fair value of the Company's common stock. The total grant date fair value of stock options vested was \$4.1 million, \$10.8 million and \$23.9 million for the years ended July 31, 2014, 2015 and 2016, respectively. The vested and expected to vest amounts included in the table above exclude early exercised stock options of 954,215 as of July 31, 2016.

Early Exercise of Stock Options. The Company issued 1,983,844, 1,019,223 and 269,737 shares of common stock for total proceeds of \$3.3 million, \$3.3 million and \$0.8 million, respectively, related to exercises of unvested stock options (the "early exercised stock options") during the years ended July 31, 2014, 2015 and 2016. The shares of common stock issued in connection with the early exercised stock options are subject to the Company's repurchase right at the original purchase price. The proceeds initially are recorded as a liability and reclassified to common stock and additional paid in capital as the Company's repurchase right lapses. As of July 31, 2015 and 2016, 2,549,102 and 954,215, respectively, shares of common stock related to the early exercised stock options held by employees at an aggregate price of \$5.1 million and \$2.3 million, respectively, were subject to the Company's repurchase right.

Restricted Stock Units

For RSUs, the Board determines their vesting conditions, the period over which RSUs will vest and the settlement. RSUs convert into common stock when they vest and settle.

Performance RSUs. The Company grants RSUs that contain both service and performance conditions (the “Performance RSUs”) to its executives and employees. Vesting of the Performance RSUs is subject to continuous service with the Company and satisfaction of certain liquidity events of the Company, including the expiration of a lock-up period established in connection with the IPO, or both certain liquidity events of the Company and specified performance targets. While the Company will recognize cumulative stock-based compensation expense when it is probable that the performance condition will be met, vesting and settlement of the Performance RSUs are subject to the performance condition being met. For the performance condition associated with certain liquidity events or IPO, the Company expects that the satisfaction of the performance condition will become probable upon completion of the IPO, and that the performance condition will be satisfied one-month after the completion of the lock-up period established in connection with the IPO. As of July 31, 2016, the Company had not recognized stock-based compensation expense related to the outstanding Performance RSUs as it has determined that it is not probable that any of the liquidity events will occur.

The Company’s summary of Performance RSUs activity under the Stock Plan is as follows:

	Number of Shares	Grant-Date Fair Value per Share
Outstanding—August 1, 2015	4,508,975	\$ 11.40
Granted	9,426,292	13.87
Canceled/forfeited	<u>(1,669,898)</u>	11.92
Outstanding—July 31, 2016	<u>12,265,369</u>	13.23

Stock-Based Compensation—Total stock-based compensation expense recognized for stock awards granted under the Stock Plan in the consolidated statements of operations is as follows (in thousands):

	Year Ended July 31		
	2014	2015	2016
Cost of revenue:			
Product	\$ 124	\$ 363	\$ 391
Support and other services	194	718	968
Sales and marketing	2,150	6,474	8,006
Research and development	2,243	5,411	6,259
General and administrative	1,149	4,174	4,432
Total stock-based compensation expense	<u>\$5,860</u>	<u>\$17,140</u>	<u>\$20,056</u>

As of July 31, 2016, unrecognized stock-based compensation expense, net of estimated forfeitures, related to outstanding stock awards with a service condition only was approximately \$35.5 million and is expected to be recognized over a weighted-average period of approximately 2.2 years.

As of July 31, 2016, unrecognized stock-based compensation expense, net of estimated forfeitures, related to the Performance Stock Options and the Performance RSUs was approximately \$151.1 million. The Company will record cumulative stock-based compensation expense related to the Performance Stock Options and the Performance RSUs in the period when its IPO is completed for the portion of the awards for which the relevant service condition has been satisfied with the remaining expense recognized over the remaining service period.

Determination of Fair Value—The fair value of options granted to employees is estimated on the grant date using Black-Scholes. Compensation expense related to options granted to non-

[Table of Contents](#)[Index to Financial Statements](#)

employees is recognized as the equity instruments vest, and such options are revalued at each reporting date. As a result, compensation expense related to unvested options granted to non-employees fluctuates as the fair value of the Company's common stock fluctuates.

The valuation model for stock-based compensation expense requires the Company to make assumptions and judgments about the variables used in the calculation, including the expected term (weighted-average period of time that the options granted are expected to be outstanding), the expected volatility of the Company's common stock, a risk-free interest rate and expected dividend yield.

The fair value of the Company's stock options was estimated using the following weighted-average assumptions:

	Year Ended July 31		
	2014	2015	2016
Fair value of common stock	\$3.80	\$10.29	\$14.81
Expected term (in years)	6.0	6.1	6.1
Risk-free interest rate	1.9%	1.7%	1.6%
Volatility	50%	46%	42%
Dividend yield	—%	—%	—%

The fair value of each grant of stock options was determined using Black-Scholes and assumptions discussed below. Each of these inputs is subjective and generally requires significant judgment to determine.

Fair Value of Common Stock—Given the absence of a public trading market, the Board considered numerous objective and subjective factors to determine the fair value of the Company's common stock at each meeting at which awards were approved. These factors included, but were not limited to (i) contemporaneous third-party valuations of common stock; (ii) the rights and preferences of Convertible Preferred Stock relative to common stock; (iii) the lack of marketability of common stock; (iv) developments in the business; and (v) the likelihood of achieving a liquidity event, such as an IPO or sale of the Company, given prevailing market conditions.

Expected Term—The expected term represents the period that the stock-based awards are expected to be outstanding. For option grants that are considered to be "plain vanilla," the Company determines the expected term using the simplified method as provided by the Securities and Exchange Commission. The simplified method deems the term to be the average of the time-to-vesting and the contractual life of the options.

Risk-Free Interest Rate—The risk-free interest rate is based on U.S. Treasury yield curve in effect at the time of grant for zero-coupon U.S. Treasury notes with maturities approximately equal to the option's expected term.

Expected Volatility—Since the Company does not have a trading history of its common stock, the expected volatility was derived from the average historical stock volatilities of several unrelated public companies within the Company's industry that it considers to be comparable to its business over a period equivalent to the expected term of the stock option grants.

Dividend Rate—The expected dividend was assumed to be zero, as the Company has never paid dividends and have no current plans to do so.

11. NET LOSS AND UNAUDITED NET LOSS PER SHARE ATTRIBUTABLE TO COMMON STOCKHOLDERS

Basic and diluted net loss per share attributable to common stockholders is presented in conformity with the two-class method required for participating securities. The Company's Convertible Preferred Stock is considered a participating security. Participating securities do not have a contractual obligation to share in the Company's losses. As such, for the periods the Company incurs net losses, there is no impact on the calculated net loss per share attributable to common stockholders in applying the two-class method.

Basic net loss per share attributable to common stockholders is computed by dividing the net loss by the weighted-average number of shares of common stock outstanding during the period. The diluted net loss per share attributable to common stockholders is computed by giving effect to all potential dilutive common stock equivalents outstanding for the period. For purposes of this calculation, participating securities, stock options to purchase common stock, RSUs and warrants to purchase Convertible Preferred Stock are considered to be common stock equivalents and have been excluded from the calculation of diluted net loss per share attributable to common stockholders, as their effect is antidilutive.

Net Loss Per Share Attributable to Common Stockholders—The computation of basic and diluted net loss per share is as follows (in thousands, except share and per share data):

	Year Ended July 31		
	2014	2015	2016
Numerator:			
Net loss	\$ (84,003)	\$ (126,127)	\$ (168,499)
Denominator:			
Weighted-average shares—basic and diluted	36,520,107	40,509,481	43,970,381
Net loss per share attributable to common stockholders—basic and diluted	\$ (2.30)	\$ (3.11)	\$ (3.83)

The potential shares of common stock that were excluded from the computation of diluted net loss per share attributable to common stockholders for the periods presented because including them would have been antidilutive are as follows:

	As of July 31		
	2014	2015	2016
Convertible preferred stock	65,495,787	76,319,511	76,319,511
Stock awards	23,540,714	33,039,810	38,432,337
Common stock subject to repurchase	4,281,455	2,549,102	954,215
Convertible preferred stock warrants	824,094	824,094	824,094
Total	94,142,050	112,732,517	116,530,157

Unaudited Pro Forma Net Loss Per Share Attributable to Common Stockholders—Pro forma basic and diluted net loss per share have been computed to give effect, even if antidilutive, to the conversion of the Company's Convertible Preferred Stock into common stock as of the beginning of the period presented or the original issuance date, if later, and the remeasurement and the assumed reclassification to equity upon consummation of a qualified IPO as if it occurred at the beginning of the period presented. However, stock-based compensation expense related to the Performance RSUs and the Performance Stock Options (see Note 10) is excluded from the pro forma presentation below. Had

[Table of Contents](#)[Index to Financial Statements](#)

the qualified IPO been deemed probable on July 31, 2016, the Company would have recorded approximately \$59 million of stock-based compensation expense, net of estimated forfeitures related to the Performance RSUs and the Performance Stock Options during the year ended July 31, 2016. If the satisfaction of performance conditions is deemed probable as of October 31, 2016, the Company estimates that it would record approximately \$77 million of stock-based compensation expense related to the performance stock awards granted to date, net of estimated forfeitures, during the three months ending October 31, 2016. The Company has also excluded the impact of the early extinguishment of the Senior Notes. Had the Senior Notes been extinguished as of July 31, 2016, a charge of approximately \$5.1 million would have been incurred.

The computation of pro forma basic and diluted net loss per share is as follows (in thousands, except share and per share data):

	<u>Year Ended July 31, 2016</u>
Net loss used to compute pro forma net loss per share attributable to common stockholders:	
Net loss	\$ (168,499)
Change in fair value of convertible preferred stock warrant liability	(2,004)
Pro forma net loss	<u>\$ (170,503)</u>
Weighted-average shares used to compute pro forma net loss per share attributable to common stockholders:	
Weighted-average shares used to compute net loss per share—basic and diluted	43,970,381
Pro forma adjustment to reflect assumed conversion of convertible preferred stock	76,319,511
Pro forma weighted-average shares—basic and diluted	<u>120,289,892</u>
Pro forma net loss per share attributable to common stockholders—basic and diluted	<u>\$ (1.42)</u>

The potential shares of common stock that were excluded from the computation of pro forma diluted net loss per share attributable to common stockholders for the periods presented because including them would have been antidilutive are as follows:

	<u>As of July 31, 2016</u>
Stock awards	38,432,337
Early exercised stock options	954,215
Convertible preferred stock warrants	824,094
Total	<u>40,210,646</u>

12. INCOME TAXES

Income Taxes—Loss before provision for income taxes by fiscal year consisted of the following (in thousands):

	<u>Year Ended July 31</u>		
	<u>2014</u>	<u>2015</u>	<u>2016</u>
Domestic	\$(59,210)	\$ (84,327)	\$(104,339)
Foreign	(24,185)	(40,256)	(61,968)
Loss before provision for income taxes	<u>\$(83,395)</u>	<u>\$(124,583)</u>	<u>\$(166,307)</u>

[Table of Contents](#)[Index to Financial Statements](#)

Provision for income taxes by fiscal year consisted of the following (in thousands):

	Year Ended July 31		
	2014	2015	2016
Current:			
State and local	\$ 12	\$ 56	\$ 140
Foreign	684	1,655	3,047
Total current taxes	<u>696</u>	<u>1,711</u>	<u>3,187</u>
Deferred:			
Foreign	(88)	(167)	(995)
Total deferred taxes	<u>(88)</u>	<u>(167)</u>	<u>(995)</u>
Provision for income taxes	<u>\$608</u>	<u>\$1,544</u>	<u>\$2,192</u>

The income tax provision differs from the amount of income tax determined by applying the applicable U.S. federal statutory income tax rate of 34% to pretax loss. The reconciliation of the statutory federal income tax and the Company's effective income tax is as follows (in thousands):

	Year Ended July 31		
	2014	2015	2016
U.S. federal income tax at statutory rate	\$(28,355)	\$(42,351)	\$(56,545)
Effect of foreign operations	8,820	15,168	23,121
Stock-based compensation	1,483	2,152	3,655
Warrant revaluation	1,465	2,100	(681)
Non-deductible expenses	265	389	802
State income taxes	11	56	140
Change in valuation allowance	16,919	24,030	31,700
Total	<u>\$ 608</u>	<u>\$ 1,544</u>	<u>\$ 2,192</u>

During the year ended July 31, 2016, the Company's provision for income taxes was primarily attributable to foreign tax provision in certain foreign jurisdictions in which it conducts business.

During the year ended July 31, 2016, the Company early adopted ASU 2015-17 on a prospective basis. As a result of this adoption, the Company decreased \$3.3 million of its non-current deferred tax assets, which are included within other assets—non-current, and \$3.3 million of its current deferred tax liabilities, which are included within accrued expenses and other liabilities, on its consolidated balance sheet upon adoption. The Company did not retrospectively adjust prior periods.

The temporary differences that give rise to significant portions of deferred tax assets and liabilities are as follows (in thousands):

	As of July 31	
	2015	2016
Deferred tax assets:		
Net operating loss carryforward	\$ 48,564	\$ 81,546
Deferred revenue	4,850	9,935
Tax credit carryforward	3,294	7,304
Property and equipment	489	—
Accruals and reserves	945	1,938
Stock compensation expense	3,121	5,780
Total deferred tax assets	<u>61,263</u>	<u>106,503</u>
Deferred tax liabilities:		
Deferred commission expense	(6,274)	(13,483)
Other	(71)	(424)
Total deferred tax liabilities	<u>(6,345)</u>	<u>(13,907)</u>
Valuation allowance	<u>(54,663)</u>	<u>(91,346)</u>
Net deferred tax assets	<u>\$ 255</u>	<u>\$ 1,250</u>

Total net deferred tax assets and liabilities included in the Company's consolidated balance sheets are as follows (in thousands):

	As of July 31	
	2015	2016
Non-current deferred tax assets	\$ 3,537	\$1,250
Current deferred tax liabilities	(3,282)	—
Net deferred tax assets	<u>\$ 255</u>	<u>\$1,250</u>

Management believes that, based on available evidence, both positive and negative, it is more likely than not that the U.S. deferred tax assets will not be utilized, such that a full valuation allowance has been recorded.

The valuation allowance for deferred tax assets was \$91.3 million as of July 31, 2016. The net change in the total valuation allowance for the years ended July 31, 2015 and 2016 was an increase of \$27.3 million and \$36.6 million, respectively.

As of July 31, 2016, the Company had approximately \$267.1 million of federal net operating loss carryforwards and \$160.7 million of state net operating loss carryforwards available to reduce future taxable income, which will begin to expire in 2030.

Included in the above net operating loss carryforwards are \$4.5 million and \$3.8 million of federal and state net operating loss carryforwards, respectively, associated with windfall tax benefit that will be recorded as additional paid in capital when realized.

In addition, the Company had approximately \$4.3 million of federal research credit carryforwards and \$4.3 million of state research credit carryforwards. The federal credits will begin to expire in 2030 and the state credits can be carried forward indefinitely.

Utilization of the net operating loss and tax credits carryforwards may be subject to an annual limitation due to the ownership change limitations provided by the Internal Revenue Code of 1986, as amended, and similar state provisions. Any annual limitation may result in the expiration of net

operating losses and credits before utilization. If an ownership change occurred, utilization of the net operating loss and tax credit carryforwards could be significantly reduced.

As of July 31, 2016, the Company held an aggregate of \$22.3 million in cash and cash equivalents in the Company's foreign subsidiaries, of which \$19.1 million was denominated in U.S. dollars. None of the Company's short-term investments was held in its foreign subsidiaries as of July 31, 2016. The Company attributes revenue, costs and expenses to domestic and foreign components based on the terms of its agreements with its subsidiaries. The Company does not provide for federal income taxes on the undistributed earnings of its foreign subsidiaries, as such earnings are to be reinvested offshore indefinitely. The income tax liability would be insignificant if these earnings were to be repatriated.

The Company recognizes uncertain tax positions in the financial statements if that position is more likely than not of being sustained on audit, based on the technical merits of the position. A reconciliation of the Company's unrecognized tax benefits, excluding accrued interest and penalties, is as follows (in thousands):

	Year Ended July 31	
	2015	2016
Balance at the beginning of the year	\$18,925	\$28,311
Increases related to prior year tax positions	541	972
Decreases related to prior year tax positions	(594)	(3,942)
Increases related to current year tax positions	9,439	1,654
Settlements with tax authorities	—	(7,284)
Balance at the end of the year	<u>\$28,311</u>	<u>\$19,711</u>

During the year ended July 31, 2016, the \$3.9 million decrease in unrecognized tax benefits was due to the issuance of a California Supreme Court opinion on December 31, 2015 disallowing taxpayers to use the three-factor apportionment formula pursuant to the Multistate Tax Compact, which the Company previously elected. The California Supreme Court decision resulted in an adjustment to the Company's deferred tax assets and a corresponding adjustment to the valuation allowance but did not impact provision for income taxes in the Company's statement of operations. In addition, the \$7.3 million decrease in unrecognized tax benefits during the year ended July 31, 2016 was due to the resolution of an uncertain tax position with a foreign tax authority, of which \$0.4 million impacted the Company's effective tax rate and the remaining amount resulted in an adjustment to the Company's deferred tax assets and a corresponding adjustment to the valuation allowance. During the year ended July 31, 2015, the \$9.4 million increase in unrecognized tax benefits was primarily associated with positions taken with respect to the international restructuring of intercompany transactions.

As of July 31, 2016, if uncertain tax positions are fully recognized in the future, \$0.1 million would impact the effective tax rate, and the remaining amount would result in adjustments to deferred tax assets and corresponding adjustments to the valuation allowance.

The Company recognizes interest and/or penalties related to income tax matters as a component of income tax expense. As of July 31, 2016, the Company had recognized immaterial accrued interest and penalties related to uncertain tax positions.

The Company files income tax returns in the U.S. federal jurisdiction as well as various U.S. states and foreign jurisdictions. The tax years 2009 and forward remain open to examination by the major jurisdictions in which the Company is subject to tax. These fiscal years outside the normal statute of limitation remain open to audit by tax authorities due to tax attributes generated in those early years, which have been carried forward and may be audited in subsequent years when utilized.

The Company is subject to the continuous examination of income tax returns by various tax authorities. The Company regularly assesses the likelihood of adverse outcomes resulting from these examinations to determine the adequacy of the provision for income taxes. The Company believes that adequate amounts have been reserved for any adjustments that may ultimately result from these examinations and does not anticipate a significant impact to the gross unrecognized tax benefits within the next 12 months related to these years.

13. SEGMENT INFORMATION

The Company's chief operating decision maker is a group which is comprised of its Chief Executive Officer, Chief Financial Officer and President. This group reviews financial information presented on a consolidated basis for purposes of allocating resources and evaluating financial performance. Accordingly, the Company has a single reportable segment.

The following table sets forth revenue by geographic area by bill-to location (in thousands):

	Year Ended July 31		
	2014	2015	2016
U.S.	\$ 77,531	\$161,439	\$280,800
Europe, the Middle East and Africa	25,789	43,526	81,320
Asia-Pacific	15,949	28,386	63,610
Other Americas	7,858	8,081	19,198
Total revenue	<u>\$127,127</u>	<u>\$241,432</u>	<u>\$444,928</u>

As of July 31, 2015 and 2016, \$19.0 million and \$30.0 million, respectively, of the Company's long-lived assets, net were located in the United States.

14. 401(K) PLAN

The Company has a 401(k) Savings Plan ("401(k) Plan") that qualifies as a deferred salary arrangement under Section 401(k) of the Internal Revenue Code. Under the 401(k) Plan, participating full-time employees over the age of 21 may voluntarily elect to contribute up to 75% of their eligible compensation, subject to maximum allowed by law. The 401(k) Plan provides for a discretionary employer-matching contribution. The Company has not made any matching contributions to the 401(k) Plan to date.

15. RELATED-PARTY TRANSACTIONS

The Company enters into various transactions with its related parties in the normal course of business. During the years ended July 31, 2014, 2015 and 2016, the Company's purchases of goods or services from related parties totaled \$0.2 million, \$0.2 million and \$0.8 million, respectively. Amounts payable to related parties as of July 31, 2015 and 2016 were not material. Revenue from related parties for the years ended July 31, 2015 and 2016 were \$0.1 million and \$0.6 million, respectively. The Company did not have revenue from related parties for the year ended July 31, 2014. The Company did not have any receivables outstanding from related parties as of July 31, 2015 and 2016, respectively.

On September 6, 2016, the Company completed the acquisition of PernixData, Inc. ("PernixData"), a company based in the United States, which specializes in scale-out data acceleration and analytics (the "PernixData Acquisition") (see Note 16). Entities affiliated with Lightspeed Venture Partners owned approximately 26.4% of the outstanding capital stock of PernixData immediately prior to the completion of the PernixData Acquisition, and received 625,478 shares of the Company's common stock in the PernixData Acquisition, as well as the right to receive up to approximately

\$2.7 million in cash in the event the contingent consideration becomes payable. As of July 31, 2016, entities affiliated with Lightspeed Venture Partners owned approximately 36.7% of the Company's outstanding Convertible Preferred Stock. Two members of the Company's board of directors are affiliated with Lightspeed Venture Partners.

16. SUBSEQUENT EVENTS

The Company originally evaluated subsequent events through September 12, 2016, the date on which the audited consolidated financial statements for fiscal year ended July 31, 2016 were available to be issued. After the original issuance of the audited consolidated financial statements, the Company evaluated subsequent events through September 27, 2016.

In August and September 2016, the Company granted a total of 2,429,273 Performance RSUs, excluding the new RSU grants from the Tender Offer (see below), 500,000 Performance Stock Options and 539,950 stock options to its employees. Total unrecognized stock-based compensation expense, net of estimated forfeitures, associated with these stock awards is approximately \$32.8 million.

Offer to Exchange Stock Options for RSUs (the "Tender Offer").

In July 2016, the Company approved a tender offer stock option exchange program under which outstanding employee stock options with exercise prices of \$8.41 or greater per share could be exchanged for a specified number of Performance RSUs based on a predetermined exchange ratio granted with a new vesting period. As a result of the Tender Offer, on August 16, 2016, stock options to purchase 1,361,317 common shares were cancelled and, in exchange, the Company granted 911,489 Performance RSUs to eligible employees. The Tender Offer resulted in a total incremental stock-based compensation expense of approximately \$3.4 million which the Company will begin to recognize when it is probable that the performance condition will be met.

Calm Acquisition

On August 22, 2016, the Company completed the acquisition of all shares outstanding of Calm.io Pte. Ltd. ("Calm"), a company based in Singapore which specializes in container and DevOps automation (the "Calm Acquisition"). The consideration for the acquisition consisted of 528,517 shares of the Company's common stock and \$1.2 million of cash. Under the acquisition method of accounting, the assets acquired and liabilities assumed in a business combination shall be measured at fair value at the date of the acquisition. As of the date these financial statements are available to be issued, the Company has not completed the valuation of the purchase price allocation for the Calm Acquisition. The Calm Acquisition is not included in the Company's consolidated financial statements as of and for the year ended July 31, 2016.

PernixData Acquisition

On September 6, 2016, the Company completed the acquisition of PernixData, Inc. a company based in the United States which specializes in scale-out data acceleration and analytics. The consideration for the acquisition consisted of 1,711,019 shares of the Company's common stock and contingent consideration of up to \$7.5 million, which may be payable over the next three years upon the achievement of certain operating milestones. Immediately after the completion of the PernixData Acquisition, the Company repaid \$7.0 million of debt assumed from the PernixData Acquisition. Under the acquisition method of accounting, the assets acquired and liabilities assumed in a business combination shall be measured at fair value at the date of the acquisition. As of the date these financial statements are available to be issued, the Company has not completed the valuation of the purchase price allocation for the PernixData Acquisition. The PernixData Acquisition is not included in the Company's consolidated financial statements as of and for the year ended July 31, 2016.

PART II**INFORMATION NOT REQUIRED IN PROSPECTUS****ITEM 13. OTHER EXPENSES OF ISSUANCE AND DISTRIBUTION.**

The following table sets forth all expenses to be paid by us, other than underwriting discounts and commissions, in connection with this offering. All amounts shown are estimates except for the SEC registration fee and the FINRA filing fee.

SEC registration fee	\$ 21,077
FINRA filing fee	36,725
Exchange listing fee	225,000
Printing and engraving	600,000
Legal fees and expenses	2,350,000
Accounting fees and expenses	1,855,000
Transfer agent and registrar fees	2,500
Miscellaneous	809,698
Total	<u>\$ 5,900,000</u>

ITEM 14. INDEMNIFICATION OF DIRECTORS AND OFFICERS.

Section 145 of the Delaware General Corporation Law authorizes a corporation's board of directors to grant, and authorizes a court to award, indemnity to officers, directors, and other corporate agents.

On completion of this offering, as permitted by Section 102(b)(7) of the Delaware General Corporation Law, the Registrant's amended and restated certificate of incorporation will include provisions that eliminate the personal liability of its directors and officers for monetary damages for breach of their fiduciary duty as directors and officers.

In addition, as permitted by Section 145 of the Delaware General Corporation Law, the amended and restated certificate of incorporation and amended and restated bylaws of the Registrant will provide that:

- The Registrant shall indemnify its directors and officers for serving the Registrant in those capacities or for serving other business enterprises at the Registrant's request, to the fullest extent permitted by Delaware law. Delaware law provides that a corporation may indemnify such person if such person acted in good faith and in a manner such person reasonably believed to be in or not opposed to the best interests of the Registrant and, with respect to any criminal proceeding, had no reasonable cause to believe such person's conduct was unlawful.
- The Registrant may, in its discretion, indemnify employees and agents in those circumstances where indemnification is permitted by applicable law.
- The Registrant is required to advance expenses, as incurred, to its directors and officers in connection with defending a proceeding, except that such director or officer shall undertake to repay such advances if it is ultimately determined that such person is not entitled to indemnification.
- The Registrant will not be obligated pursuant to the amended and restated bylaws to indemnify a person with respect to proceedings initiated by that person, except with respect to proceedings authorized by the Registrant's board of directors or brought to enforce a right to indemnification.

- The rights conferred in the amended and restated certificate of incorporation and amended and restated bylaws are not exclusive, and the Registrant is authorized to enter into indemnification agreements with its directors, officers, employees, and agents and to obtain insurance to indemnify such persons.
- The Registrant may not retroactively amend the bylaw provisions to reduce its indemnification obligations to directors, officers, employees, and agents.

The Registrant's policy is to enter into separate indemnification agreements with each of its directors and certain officers that provide the maximum indemnity allowed to directors and executive officers by Section 145 of the Delaware General Corporation Law and also to provide for certain additional procedural protections. The Registrant also maintains directors and officers insurance to insure such persons against certain liabilities.

These indemnification provisions and the indemnification agreements entered into between the Registrant and its directors and officers may be sufficiently broad to permit indemnification of the Registrant's officers and directors for liabilities (including reimbursement of expenses incurred) arising under the Securities Act of 1933, as amended, or the Securities Act.

The underwriting agreement to be filed as Exhibit 1.1 to this registration statement provides for indemnification by the underwriters of the Registrant and its officers and directors for certain liabilities arising under the Securities Act and otherwise.

ITEM 15. RECENT SALES OF UNREGISTERED SECURITIES.

Since August 1, 2013, the Registrant has issued the following unregistered securities:

Convertible Preferred Stock Warrants

In November and December 2013, the Registrant issued warrants to purchase an aggregate of 55,000 shares of its Series D convertible preferred stock to two lenders at an exercise price of \$7.289 per share.

Sales of Convertible Preferred Stock

In December 2013 and January 2014, the Registrant sold an aggregate of 13,857,438 shares of its Series D convertible preferred stock to a total of 20 accredited investors at a purchase price of \$7.2885 per share, for an aggregate purchase price of approximately \$101,000,000.

In August and September 2014, the Registrant sold an aggregate of 10,823,724 shares of its Series E convertible preferred stock to a total of 46 accredited investors at a purchase price of \$13.3965 per share, for an aggregate purchase price of approximately \$145,000,000.

Stock Awards and Common Stock Issuances

From August 1, 2013 through September 27, 2016, the Registrant granted to its officers, directors, employees, consultants and other service providers options or restricted stock to purchase an aggregate of 24,813,413 shares of common stock at exercise prices ranging from \$2.09 to \$15.64 per share under its 2010 Stock Plan, or 2010 Plan, and 2011 Stock Plan, or 2011 Plan.

From August 1, 2013 through September 27, 2016, the Registrant granted to its officers, directors, employees, consultants and other service providers RSUs issuable for an aggregate of 17,294,882 shares, including 911,489 RSUs issued upon exchange of 1,361,317 outstanding options as part of a stock option exchange program, under its 2010 Plan.

[Table of Contents](#)

[Index to Financial Statements](#)

From August 1, 2013 through September 27, 2016, the Registrant issued and sold to its officers, directors, employees, consultants and other service providers an aggregate of 6,312,216 shares of common stock upon exercise of options or issuance of restricted stock under its 2010 Plan and 2011 Plan at exercise prices ranging from \$0.05 to \$15.64 per share, for an average weighted-exercise price of \$2.11 per share.

Shares Issued in Connection with Acquisitions

From August 1, 2013 through September 27, 2016, the Registrant issued an aggregate of 2,239,536 shares of common stock to a total of 25 accredited investors in connection with its acquisition of certain companies.

None of the foregoing transactions involved any underwriters, underwriting discounts or commissions, or any public offering. The Registrant believes these transactions were exempt from registration under the Securities Act in reliance upon Section 4(a)(2) of the Securities Act (or Regulation D or Regulation S promulgated thereunder), or Rule 701 promulgated under Section 3(b) of the Securities Act as transactions by an issuer not involving any public offering or pursuant to benefit plans and contracts relating to compensation as provided under Rule 701. The recipients of the securities in each of these transactions represented their intentions to acquire the securities for investment only and not with a view to or for sale in connection with any distribution thereof, and appropriate legends were placed upon the stock certificates issued in these transactions. All recipients had adequate access, through their relationships with the Registrant, to information about the Registrant. The sales of these securities were made without any general solicitation or advertising.

ITEM 16. EXHIBITS AND FINANCIAL STATEMENT SCHEDULES.

(a) *Exhibits.*

The Registrant filed the exhibits listed on the accompanying Exhibit Index of this Registration Statement, which is incorporated by reference herein.

(b) *Financial Statement Schedules.*

All financial statement schedules are omitted because the information called for is not required or is shown either in the consolidated financial statements or in the notes thereto.

ITEM 17. UNDERTAKINGS.

The undersigned Registrant hereby undertakes to provide to the underwriters at the closing specified in the underwriting agreement certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers, and controlling persons of the Registrant pursuant to the foregoing provisions, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission, such indemnification is against public policy as expressed in the Securities Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer, or controlling person of the Registrant in the successful defense of any action, suit, or proceeding) is asserted by such director, officer, or controlling person in connection with the securities being registered, the Registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Securities Act and will be governed by the final adjudication of such issue.

[Table of Contents](#)

[Index to Financial Statements](#)

The undersigned Registrant hereby undertakes that:

(1) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the Registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.

(2) For the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

SIGNATURES

Pursuant to the requirements of the Securities Act of 1933, the Registrant has duly caused this Registration Statement on Form S-1 to be signed on its behalf by the undersigned, thereunto duly authorized, in San Jose, California on the 28th day of September, 2016.
